COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in Paris and London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in Hamburg and London.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109¼ per cent., which, when compared with the mint par between the two countries, shows that the exchange is slightly against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

INDIA EXCHANGES.—December 10.

		Indian Government Bills.				Bank and Commercial Bills.

Bills with documents attached against indents and consignments for India, vary according to the articles drawn against.

The Commercial Times.

Reduction of Postage to the Republic of Venezuela.—On the 1st January next, and thenceforward, the following alterations will take place in the British rates of postage chargeable upon letters, book packets, and newspapers conveyed by packet between the United Kingdom and the Republic of Venezuela. The postage of letters will be reduced to the uniform British rate of 6d the half ounce, and so on, according to the usual scale for charging inland letters. This postage must, as heretofore, be in all cases prepaid. Book Packets.—The British postage of book packets (which must also be prepaid) will be as follows:—Not exceeding 4 oz, 3d; above 4 oz, and not exceeding 8 oz, 6d; above 8 oz, and not exceeding 1 lb, 1s; above 1 lb, and not exceeding 1½ lb, 1s 6d; above 1½ lb, and not exceeding 2 lbs, 2s; and so on, adding 6d for each additional half-pound or fraction of half a pound. The British charge upon a newspaper not exceeding four ounces in weight will be 1d, and a like sum of 1d will be charged for each additional four ounces, or fraction of four ounces. This postage must also be paid in advance.

Letters for Natal.—On the 1st January next, and thenceforward, the rate of postage of 6d the half-ounce letter, chargeable upon letters between the United Kingdom and Natal, will include both the British and Colonial rates, and no further charge will be made, either in the colony or in the United Kingdom, on the delivery of letters upon which that rate has been prepaid. Any letters, however, which may be posted in the United Kingdom unpaid, will be charged with an additional rate of 6d each letter, besides the usual postage; and letters posted insufficiently prepaid will be charged with the amount deficient and with 6d additional.

Money Orders.—1. On the 1st January, 1862, and thenceforward, the limit of the amount for which a *single* money order can be issued will be extended to 10*l* instead of being restricted to 5*l*, as hitherto. The following table shows the rates of commission which will, from that date, be charged on Inland and Colonial Money Orders; viz.:—

	For Sums Not exceeding £2.	Above £2 and not exceeding £5.	Above £5 and not exceeding £7.	Above £7 and not exceeding £10.
	s d	s d	s d	s d
If payable in the United Kingdom	0 3	0 6	0 9	1 0
— Canada	1 0	2 0	3 0	4 0
— Malta or Gibraltar ...	0 9	1 6	2 3	3 0

2. In all other respects the issue and payment of inland and colonial money orders will remain as at present.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Although the show of samples of English wheat at Mark lane to-day was small, the demand for all kinds ruled heavy in the extreme, and sales could only be effected by submitting to a reduction of 1s per quarter. The supply of foreign wheat was large, and buyers were indisposed to make purchases except at reduced rates. Good and fine barley was in fair request, at full quotations, but inferior sorts were a heavy sale. Malt was dull, and prices had a downward tendency. Oats ruled steady, at full currencies, but the value of beans and peas was decidedly in favour of buyers. The flour trade was very dull, on easier terms. This week's imports amount to 47,470 quarters of wheat, 5,630 barley, 7,290 oats, 620 sacks and 27,910 barrels of flour.

At Liverpool, this morning, both wheat and flour were very inactive, yet no quotable change took place in prices. Maize, however, was in request, at an advance of 6d to 9d per quarter.

The present week has been again a very unsettled one in the Liverpool cotton market. Great fluctuations have occurred in prices, but the general feeling is in favour of cotton, and quotations therefore at the close of the week show an advance of ¼d to ½d per lb. The sales are only limited, not exceeding 35,000 bales, including 22,000 to spinners, 9,000 on speculation, and 4,000 for export. The stock of American cotton, both in Liverpool and in the hands of the trade, is now so very small, that even in the case of a war the position of the article cannot but be regarded as very precarious. If the blockade of the Southern ports should be raised within a month, it will still no doubt take three to four months till fresh supplies reach Liverpool, and the present stock, even with the reduced consumption, cannot last longer than two months.

The public sales of tea, held this week, have gone off slowly, at about previous rates. By private contract a moderate business has been transacted, at late currencies.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Nov. 30, 1860 and 1861, with STOCK on hand on December 1, 1860 and 1861.

The total quantity of tea now on passage from China is about 32,000,000 lbs, against 25,000,000 lbs at the corresponding period last year. Advices from Canton to the 30th October state that a fair amount of business was doing in tea, wholly on English account, at full prices, and that the *total exports amount to* 39,781,000 lbs.

There has been less activity in the market for coffee, and only good and fine qualities have supported former rates. Cocoa has ruled firm in value, but the inquiry for it has been much restricted.

Not the slightest improvement has been observed in the demand for raw sugar; indeed, in some instances, prices exhibit a further decline. For refined goods, however, there has been a somewhat improved sale, at the late reduction in prices.

COMPARATIVE STATEMENT of SHIPMENTS of SUGAR from the Mauritius, from the 1st August to the 31st October of each Crop.

Total	53,242,934	81,161,683	63,053,414

Floating cargoes of rice have changed hands somewhat freely at full prices; otherwise, the market has ruled inactive on former terms. In dry fruit, rather more business has been passing, at the late decline in the quotations. The rum market has been steady, and prices have been well supported. Brandy, however, has met a dull inquiry.

In English wool, a moderate business has been transacted, at previous rates. With regard to the public sales of colonial wool, which were brought to a close on Tuesday, Messrs. Willans and Overbury observe:—"Great irregularity in price has characterised the auctions just brought to a conclusion. On some days considerable animation prevailed, and previous rates were touched, if not exceeded. On others the biddings were spiritless, and importers were compelled to submit to a greater reduction than the one quoted below. The impending difficulty with America in reference to the Trent, however, exercised no perceptible influence, and the last two sales, consisting chiefly of Cape wools, were distinguished by keen competition and full prices. The sales opened at about August quotations, but it shortly became apparent that these rates could not be maintained, and before the close all descriptions suffered to some extent, except good stapled Sydney, Port Phillip, and New Zealand fleeces suitable for combing purposes, which were exceedingly scarce. Fine clothing Sydneys, as well as moity, seedy, defective parcels, exhibited a reduction of 1d to 1½d per lb. Faulty Port Phillips suffered in about the same degree. Van Diemen's Land wools, although the quantity was small, were also neglected, and declined to the extent of 1d per lb. In New Zealands the alteration was less decided, but the lower descriptions must also be quoted as selling in favour of the buyer. Capes from the Algoa Bay district were the leading feature of the sales; they comprised, as usual in November and December, a very large proportion of short, ill-conditioned two-shear wool. In consequence of the demand for America, greasy wool from this colony realised somewhat higher prices than in the July-August series, but washed and scoured parcels ruled low; ordinary qualities of both descriptions being procurable from 1s 1½d to 1s 3d per lb. Many lots, however, did not even realise these prices, but, if very short and heavy, were knocked down at about a shilling. It is estimated that fully 20,000 bales have been taken for the Continent, and about 2,000 bales greasy wool, at and under 8½d, for America.

The annexed remarks are from Messrs Durant and Co.'s monthly circular of the silk trade:—"We have unfortunately no change to report in the character of the silk market—still the same dulness of demand, limited amount of business, and most unsatisfactory deliveries. Of China silk, the arrivals have been comparatively small, hence probably it is that the pressure upon the market has been nothing of moment, still prices continue to have a drooping tendency. Of Japan silk, too, the arrivals have been small, but even this class suffers from the general quiet. Bengal silk may be said to be almost entirely neglected. In Italian silk we have still very little doing, although prices may be considered decidedly lower. In Brutia and Persian silk nothing passing."

STATE of the SILK WAREHOUSES.

Public sales of 25 tons of ivory have been held this week, but nearly the whole quantity was bought in, the prices offered being extremely low.

The market for saltpetre is much less active, and the quotations are barely supported.

Cochineal has sold very heavily at the public sales, at which 1,276 bags have been offered, and prices almost generally have given way. Honduras, however, of good and fine quality, forms an exception.

Scotch pig iron is steady at 48s 3d to 48s 6d cash, mixed numbers. Tin is dull, and lower. All other metals are a slow inquiry.

The quantity of tin here and in Holland on the 30th ultimo was as follows, compared with the previous year:—

	1861. slabs.	1861. tons.	1860. slabs.	1860. tons.
Stock in Holland	62,628	= 1,925	69,964	= 2,170
Arrived towards next sale	57,250	= 1,770	61,848	= 1,923
Stock here		1,230		517
		4,925		4,610

The transactions in most oils have been confined to immediate wants, and, in some instances, a slight reduction has taken place in their value. Sperm, however, is dearer. American spirits of turpentine command 66s 6d per cwt.

Annexed are the total receipts and exports of naval stores at New York from Jan. 1 to Nov. 28:—

	Receipts. bbls 1861.	Receipts. bbls 1860.	Exports. bbls 1861.	Exports. bbls 1860.
Turpentine	32,139	54,417	19,465	47,082

Tar	48,919	48,691	26,130	25,796

The tallow market has been very inactive. P.Y.C. is quoted at 51s 3d per cwt on the spot; and at 52s for March delivery. Town tallow, 51s net cash.

"The week closes," observes the New York *Shipping List* of the 30th ult., "in a very quiet state of trade throughout the commercial marts of the city. Commercial affairs generally wear the same quiet aspect. In financial circles, there has transpired nothing worthy of especial notice. In the money market, there is no change to record, except that business in currency is very brisk, which is regarded as an evidence of a continued increase in general business. The quotations for money are as follows:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

The statements of the banks of the three principal cities for the last week compare with the previous one, and the corresponding time of 1860, are as follows:—

	Loans. dols	Deposits. dols
New York, Nov. 23	158,460,376	133,359,354
Boston, Nov. 25	63,108,108	23,853,354

Last year	25,993,989	18,955,047"

COTTON.

NEW YORK, Jan. 30.—The excitement in the cotton market, previously mentioned, has increased since our last, and prices have again advanced. There is an active speculative inquiry, but as holders are not at all anxious to sell, even at the advanced rates, the transactions are moderate. Our quotations below may be considered nominal, as some of the holders refuse to sell, except at a still further advance. The sales comprise about 5,000 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	23	23	23	23

The demand for cotton this week has not been extensive. There has been, however, a decided reaction from the depression of the previous week, and the supply has been but scanty. Holders have recovered a large proportion of the previous decline in American, and the quotations are ¾d to ⅛d per lb above those of last week. Egyptian are forced on the market at very low and irregular rates, making a sale very difficult. Brazil are much neglected, and may be bought on easy terms. Surat are rather dearer during the week. The sales to-day are 6,000 bales. The market is quiet, and rather weak. The reported export amounts to 4,000 bales, consisting of 1,200 American, 30 Brazil, and 2,770 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from the manufacturing districts this week, state that an increased amount of business has been transacted in goods, chiefly for shipment to India and China, and that, in some instances, prices have had an upward tendency. The transactions in iron have been tolerably extensive, on former terms, whilst the demand for coals has somewhat improved, at extreme rates.

MANCHESTER, Dec. 12.—Our yarn market has exhibited a degree more strength this week, particularly the qualities for home manufacture, which is chiefly attributable to a calmer comparison of our supplies of cotton with our prices and prospects under any circumstances either of war or peace. The same confidence has partially extended to cloths, in which inquiries have been more numerous from *bona fide* purchasers, the speculators who have so long ruled the market having stepped aside on the fall in prices. In the present uncertainty, however, it cannot be said that transactions have been in any hands more than moderate; but it is noticeable that what has been mostly wanted has been the lower and lighter makes of both 39 and 45-inch goods for India, staple articles respecting which no doubt can now be entertained of there being a very scarce supply for the next four months. To-day, telegrams announce a decided improvement from Shanghai for the better class of shirtings, and from Calcutta to the 16th a firm market, no sellers, prices nominal, but values two annas higher than last mail, a favourite make of 7-lb shirting being quoted 5 rupees 8 annas, with exchange advancing.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Prices, while they may be quoted firm as regards most wools, must, in respect of lustre wools, be allowed to be lower. The dealers in down wools do not find their business much affected, or their prices to suffer. The market for yarns does not differ from the other branches of the trade. Operations are as limited as possible, until the question of peace or war be decided. The piece market has again been dull and inactive. We have had a few continental buyers over, but their transactions are very limited.

LEEDS.—There were a few inquiries for spring goods, but no disposition to give orders was shown, the object of the inquiries being directed mostly to finding out new fabrics and the prices asked. Prices, those of cloth as well as those of wool, keep steady.

ROCHDALE.—Both the flannel and the wool markets have been of a quiet order, but scarcely more so than last week. Dyed Saxonies are not in so much demand as of late, and there is no improvement in the sales of Yorkshire goods, but prices of both are firm.

LEICESTER.—The hosiery trade remains in a healthy condition. There is a good demand for seasonable goods, and the operatives engaged in making articles of a heavy quality are well employed. Yarns are still high in price, and material is firm; spinners are fully employed. There is not much demand for wools, but prices are about the same.

NOTTINGHAM.—The depression which has existed for so long a period in the lace trade continues, and there has been very little doing in any department. There is no material change in the silk lace trade, nearly every branch being dull. In hosiery there is not much doing, and manufacturers sell and produce very cautiously. Yarns continue high, and there are no indications of their being lower.

BELFAST.—Neither in the home nor the foreign market has there been any activity. Goods which had been prepared for shipment to New York have been laid up in the warehouses, and orders in course of fulfilment are held over. Some of the more extensive men in the American trade are on their way to that country for the purpose of looking after their property; others less bound up in the same market are about to let their hands go off for a time, and to close operations until a definite change takes place in the exchanges. Bleaching operations are still in full activity at the chief seats of finish.

WOLVERHAMPTON.—Mr S. Griffiths thus quotes the price of iron:—Staffordshire finished:—Common Staffordshire bars, 7*l* at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 10s to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 5s; Barrow hæmatites, 3*l* 5s; Workington hæmatites, 3*l* 5s; grey forge cinder pig iron, 2*l* 10s to 2*l* 15s; white forge cinder pigs, 2*l* 5s to 2*l* 10s; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 7s 6d to 3*l* 17s 6d, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites, 3*l* 5s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 30.—The market for State and Western flour has been heavy, and a reduction of 5 to 10c per barrel has taken place in the quotations. Canada flour is in fair demand, but prices were a shade lower; the sales were 1,700 bbls, including 900 yesterday. Southern flour is dull, but prices are substantially the same.

EXPORT from 1st to 26th November.

	1861. barrels	1860. barrels
Wheat Flour.....	306,560	220,267

The rather unfavourable tenor of the European advices exerted an adverse tenor on the wheat market, and with only a moderate export demand, prices ruled in favour of the purchaser. The sales for the two days have been pretty heavy, however, amounting in the aggregate to about 472,000 bushels, of which 257,000 changed owners yesterday. Corn has been in moderate request, and the market is heavy; the sales comprise 300,000 bushels, including 108,000 yesterday, at 63c to 63½ cents for Western mixed; other kinds are unchanged.

EXPORT from 1st to 26th November.

Corn	944,020	546,570

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Nearly the whole of the markets held this week have been but moderately supplied with English wheat; nevertheless, the transactions have continued on a limited scale, at about stationary prices. Foreign wheats have come freely to hand, both here and at the outports. Selected samples have moved off slowly, but at very full currencies. Low and damp qualities, however, have ruled almost nominal in value. There has been rather more inquiry for malting barley, at extreme rates; but grinding and distilling sorts have sold somewhat heavy. In prices, however, no quotable change has taken place. Malt has met a slow sale, at barely previous rates. Although the receipts of oats have fallen off, the demand for that description of produce has been in a sluggish state, on former terms. Both beans and peas have continued firm, but the flour trade has been heavy, compared with some previous weeks.

No change of importance has taken place in the value of wheat in the French markets, and the demand has been chiefly confined to immediate wants. All spring corn has moved off steadily, on former terms. The latest advices from New York state that both wheat and flour were a shade lower in price, notwithstanding that

large quantities were in progress of shipment to England. For the time of year, the arrivals from the interior were on a large scale, and the supplies now on passage are extensive.

The Scotch markets have been scantily supplied with wheat, chiefly in poor condition. The transactions have been somewhat restricted; nevertheless, prices have ruled about stationary. Barley has changed hands heavily; but oats have commanded quite as much money as of late. For other kinds of produce, the demand has fallen off.

In Ireland, scarcely any change has taken place in the value of any article, and the trade, generally, has been in a sluggish state. The shipments to England have somewhat increased.

The wheat trade at Mark lane, to-day, was very dull, and sales could only be effected by submitting to a reduction of 1s per quarter. Foreign wheat was a heavy sale, and prices had a downward tendency. Barley and oats were steady at full quotations, but beans, peas, and flour ruled heavy on easier terms.

Mr E. Rainford writes as follows in reference to the floating trade:—There have been 39 arrivals at ports of call since the 5th inst., comprising 15 cargoes of wheat, 15 maize, and 9 miscellaneous, viz.:—Wheat, 6 cargoes from New York, 1 Marseilles, 1 Portland, 1 Baltimore, 1 Taganrog, 2 Odessa, 1 Alexandria, 1 Montreal, 1 Sulina; flour, 1 Philadelphia; flour and wheat, 2 Montreal, 2 New York; maize, 2 Galatz, 10 New York, 2 Montreal, 1 Saffi; barley, 1 Ibraila, 1 Taganrog, 1 Alexandria; beans, 1 Alexandria. The subdued tone of some of the American and English papers has caused great caution on the part of buyers, and consequently I have very few transactions in cargoes afloat to report. The following are the prices paid since this day week for the United Kingdom:—Wheat, per 492 lbs, arrived, *Odessa Ghirka, nearly perfect, 57s and 57s 6d; per 480 lbs, arrived, red American, 63s; Milwaukee, 60s; Sandomirka, 61s; new Milwaukee, 58s 3d; on passage, white California, about 61s, to be delivered sound. Maize, per 492 lbs, arrived, Odessa, more or less injured, 35s 3d; per 480 lbs, arrived, Galatz, not perfect, 35s 3d; Ibraila, perfect, 35s 3d; ditto, damaged, 34s 6d and 33s; mixed American, part discoloured, 32s 6d. Barley, per 400 lbs, arrived, new Odessa, not quite perfect, 25s 6d; Egyptian, 27s; new Taganrog, 27s 6d; Ibraila, not perfect, 27s, sea-damaged, for sellers' account; on passage, Egyptian, 26s 6d, for London direct. Mixed cargo, per 480 lbs, arrived, Egyptian Saide wheat, 46s; and Saide beans, 35s.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has been inactive this week, and prices up to yesterday did not show any material change. There were 2,000 casks West India sold in the three days, including a portion of 652 casks 812 bags by auction. Barbadoes, 33s 6d to 41s; grainy Demerara, 38s 6d to 44s; Berbice, 41s to 42s 6d. The public sales have been of limited extent this week. Deliveries during the last were 4,450 tons, making the decrease for home use since the commencement of the year 8,610 tons contrasted with 1860, leaving the stock at the close 72,700 tons, against 53,170 tons last year.

Mauritius.—1,260 bags, by auction, went at 40s to 42s 6d for crystalised kinds. A limited business has been done by private contract.

Bengal.—1,700 bags partly sold as follows: Gurpatta date, middling to fine, 39s to 43s; low Damma kind taken in at 32s 6d; Khaur at 30s per cwt.

Foreign.—By auction, 325 casks 160 barrels Porto Rico were chiefly bought in: grey and low yellow, 37s to 38s 6d; middling to fine, 39s to 43s 6d. 1,930 bags Rio were taken in: brown, 31s to 34s 6d; low soft yellow, 36s 6d. 51 cases Bahia were bought in at 33s 6d to 41s per cwt.

Refined.—The market is quiet: common to middling dry goods quoted 47s 6d to 48s 6d; crushed, 45s 6d to 46s 6d per cwt.

MOLASSES.—210 casks clayed Cuba have sold at 14s 6d; and 80 puns common Antigua at 15s per cwt.

COFFEE.—The sales of plantation Ceylon have gone off without spirit, and at rather lower prices, while other descriptions remain nearly as before. 509 casks 494 barrels and bags of the former chiefly sold at 72s to 77s for small berry to middling. 73 cases Cochin brought 71s to 74s 6d. 289 bags Munzerabad mountain part sold at 90s 6d to 91s. 951 bags Cannon's Mysore, 90s to 95s. 1,470 bags Rio were taken in at 56s to 57s for ordinary qualities. 41 bales long berry Mocha withdrawn at 130s to 134s per cwt.

RUM is steady at the rates of last week, but with less inquiry prevailing. The stock is 32,200 puns 3,450 hhds, against 26,650 puns 3,450 hhds last year at the same date. Some good Penang has sold at 1s 7½d per proof gallon; Mauritius at the same price.

TEA.—There has not been any improvement in the demand this week, and further public sales are declared for to-day, including several parcels printed "without reserve." The business by private contract does not establish any material change in prices, excepting for scented kinds, these being rather cheaper.

RICE.—Floating cargoes have commanded enhanced rates this week, three of Necrania Arracan selling at 11s 3d to 11s 6d; one of Rangoon at 11s 3d. 1,500 tons Necrania Arracan, to be shipped next year, have sold at 11s 3d. Further contracts have been made in Ballam at 10s 3d, or 6d more if landed. By auction, 2,720 bags cargo were taken in at 11s per cwt.

IMPORTS and DELIVERIES of RICE to December 7, with STOCKS on hand.

SPICES.—The public sales have passed off flatly. Some small parcels of nutmegs and mace went at about previous quotations. The sound portion of 2,032 bags Singapore black pepper was taken in at 3¼d. 253 bags common dusty to fair Penang realised 3⅜d to 3¾d. 159 bags pimento 3d, two lots 3⅛d. 150 bags Zanzibar cloves withdrawn above the value. 7 casks Amboyna were bought in at 4¾d per lb. 100 boxes cassia lignea bought in at 91s for fair pile 1, with short prompt, 56 barrels Jamaica ginger taken in at 51s to 58s per cwt.

SAGO.—197 boxes partly sold: bold middling to good bold, 22s 6d to 24s; good small medium, 23s 6d per cwt.

SALTPETRE.—The market continued firm in the early part of the week, but has since been rather quiet. Bengal last sold for arrival, or in course of landing, at 42s; on the spot at 41s to 42s; refraction 10¼ to 5¼. By auction, 926 bags Bombay, refraction 47 to 40¼, 36s to 36s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to December 7, with STOCKS on hand.

	1861.	1860.	1859.	1858.

Delivered	11180	12125	16760	13350
Stock	3120	3650	3940	2480

NITRATE OF SODA.—A floating cargo recently sold for the United Kingdom at 14s 1½d per cwt.

COCHINEAL.—1,276 bags, by auction, about two-thirds sold without material change in prices: Teneriffe silvers, small to fine, 2s 6d to 3s; blacks, 2s 8d to 3s 2d; Mexican silver, 2s 4d to 2s 6d; blacks, 2s 6d to 2s 10d; Honduras silvers, 2s 1d to 2s 4d; blacks chiefly bought in at 2s 8d to 3s 5d per lb.

CAMPHOR.—A parcel sold at 9*l* 5s per cwt.

DYESTUFFS.—Bengal turmeric is rather more in demand, and 1,000 bags Bengal, by auction, sold at 14s to 14s 6d per cwt. No change has occurred in Cutch or Gambier. A large business is reported in St Domingo logwood afloat at 6*l* 5s to 6*l* 7s 6d. A floating cargo of St Domingo logwood reported at 6*l* per ton.

METALS.—There has not been any favourable reaction in the market, and most kinds are still quiet. Scotch pig iron, after receding to 47s 6d, rose to 48s 6d. Nothing done in spelter. Tin further receded in value at the commencement of the week, but has since risen to 118s per cwt for Straits. Spelter has been more inquired after for spring shipment at 18*l* per ton.

HEMP.—Petersburg clean is firm at 35*l*. By auction, 1,150 bales Manilla sold readily at extreme rates, from 23*l* 5s to 24*l* 15s per ton.

JUTE.—2,535 bales, at public sale on Wednesday, partly sold at fully 10s decline upon common marks at 12*l* to 14*l* 12s 6d per ton. The better qualities remain firm.

LINSEED.—The market is freely supplied, and arrivals keep liberal. Quotations remain unchanged. Bombay, 67s; Calcutta, 62s to 64s per quarter. Floating cargoes remain about the same as before.

OIL.—The production of linseed is still much in excess of demand; lower rates are in consequence submitted to. On the spot 34*l* 10s per ton is now the value, and there are sellers at 34*l* for monthly deliveries January to March. Rape oils are much neglected, with sellers of refined at 46*l*, and brown at 43*l* per tun. Olive oils are difficult to sell: on the spot we quote Gallipoli 60*l* to 60*l* 10s; Gioja and Malaga, 59*l* to 59*l* 10s, down to 55*l* to 55*l* 10s for Mogadore. A cargo Gioja just shipped has been sold at 56*l* per tun, cost, freight, and insurance to United Kingdom. Cocoa-nut oil is held firmly: Ceylon, 49*l* 10s; and Cochin, 50*l* 10s to 51*l* per ton. The dull state of the Liverpool market is influencing this

market for palm, and fine Lagos may be bought at 45*l* 10s to 45*l* per ton. Notwithstanding the diversity of opinions as to war or peace between ourselves and the American Government, the fact that buyers predominate over sellers of sperm oil leads to the anticipation that supplies of cotton will be forthcoming; there are now buyers of colonial at 30*l*, and American at 89*l* per tun.

TURPENTINE.—The last transactions were 66s 6d for American spirits; 22s per cwt for rough.

TALLOW.—The excitement which prevailed in the market last week has since subsided, and quotations of foreign have fallen nearly 1s. 1st sort Petersburg Y.C., 50s 6d; to the end of the year 50s 6d to 51s; January to March, 51s to 51s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, December 9.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was unaltered to-day. By auction, 2,156 bags Penang sold at 33s 6d to 39s 6d for brown to very good yellow. 217 casks Barbadoes part sold on former terms. Privately, several parcels of colonial and foreign met with buyers. 150 tons clayed Manilla brought 33s to 34s 6d per cwt. The week's business in West India has been 2,433 casks.

COFFEE.—1,000 bags East India, 66 casks native Ceylon, and a few lots native sold at steady rates. 57 bales long berry Mocha bought in at 130s per cwt.

RICE.—A cargo of Necrancie Arracan sold at 11s 4½d, and 4,000 bags on the spot at 11s 3d. By auction, 691 bags sold at 12s to 13s per cwt for low middling to middling white.

SAGO.—438 boxes found buyers chiefly at 23s 6d to 25s for small grain.

SPICES.—1,268 bags Penang pepper were chiefly bought in, a few lots common selling at 3⅝d. 752 bags Malabar sold on lower terms, from 4¾d to 5d for dusty to good shot kind. 1,703 packages Zanzibar cloves realised 3d to 3⅝d; fine, 4d. 51 bags pimento bought in at 3d. 49 cases brown nutmegs sold at 1s to 1s 6d. 14 cases mace, 1s to 1s 4d, partly sold. 58 barrels Jamaica ginger withdrawn.

TEA.—11,111 packages went off flatly. Low congous at reduced rates, and 2,072 packages sold.

SALTPETRE.—By auction, 1,550 bags Bengal were bought in or withdrawn.

SAFFLOWER.—131 bales Bengal sold steadily, at 5*l* 12s 6d to 7*l* 7s 6d per ton.

RUBBER.—East India was bought in at 1s 4d. Fine Para sold as high as 1s 9d per lb.

SHELLAC.—200 chests D C orange were bought in, at 9*l* 10s per cwt.

CUTCH.—1,050 bags Pegue bought in, at 26s per cwt.

OILS.—212 tuns colonial sperm sold at higher rates, from 88*l* to 94*l* 5s; 87 tuns seal, brown to pale, 31*l* 10s to 40*l* 5s; 40 tuns Southern part sold at 34*l* 10s to 35*l* 10s per tun. 148 casks palm part sold at 38s 6d to 44s per cwt.

TALLOW.—927 casks Australian part sold at 47s 6d to 51s 9d; town reduced to 52s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues without any material alteration to note. Dutch crushed has a tendency downwards.

GREEN FRUIT.—Arrivals of all kinds large, which tend to depress prices. Some cargoes St Michael, Terceira, and Fayal oranges, sold by Keeling and Hunt at public auction, went at 2s per package lower. Messina lemons without alteration. Barcelona nuts 1s per bag lower. French walnuts cheaper. The consumption of fruit generally is good; open weather and moderate prices, together with the approaching Christmas holidays, leading to an increased consumption.

DRY FRUIT.—A further fall has been manifested in Valencias, in consequence of forced sales. Currants continue steady, but no business doing in any description. In the minor articles of the market a large fall has taken place.

COLONIAL WOOL.—The public sales closed on the 10th inst. for colonial wool, with more firmness. The low wool was sold on the 11th and 12th inst. at ½d to 1d decline on late rates.

FLAX.—Market steady.

HEMP.—Not any alteration in the value of this article during the week.

COTTON.—Sales of cotton from Friday, 6th December, to Thursday, 12th December, inclusive:—1,000 bales Surat at 6d to 6¾d for ordinary to middling fair Oomrawatty; 200 bales Tinnevelly at 8¼d to 8½d for good fair to good; 200 bales Western Madras at 6½d for good fair. Last week, owing to the unsettled state of the Liverpool market, arising from the gross outrage committed by the American war steamer in capturing the two Southern Commissioners on board the Trent, there were no transactions in cotton, and it was quite impossible to give quotations. This week a better feeling has prevailed, and more disposition to purchase evinced, particularly during the last few days, and a fair amount of business has been transacted at a decline of 1d to 1¼d per lb from the late highest point, but importers generally do not submit to this concession, and it is now difficult to buy at the decline above mentioned. 2,000 bales Tinnevelly, guaranteed good fair, have been sold for arrival at 7½d, 7¾d, and 7⅞d per lb. 1,000 Surat are advertised for public sale on Thursday, 19th Dec.

IMPORTS AND STOCK OF EAST INDIA COTTON IN LONDON.

	Surat. bales.	Madras. bales.	Total. bales.
Imports, 1st Jan. to 13th Dec.	91,766	45,429	137,195
Stock, 13th Dec., 1861	42,840	26,187	69,027
— — 1860	11,780	18,312	30,092

TOBACCO.—The market has not presented any change in character, and prices remain steady at previous quotations. A fair extent of sales has been made both for home trade and exportation.

TIMBER.—The demand for Baltic wood has been flat, and prices have been rather depressed within the past fortnight. For North American timber and deals there is more inquiry, and business has been done in those articles, which have been very low during the season, and some improvement is seen in the prices of pine and spruce deals, oak, and pine timber. If the stock in London of all descriptions of colonial wood were not extremely large, the possible rupture with the Northern States of America would have excited the buyers. As it is, there is no disposition to speculate, and much incredulity on the danger of war.

LEATHER AND HIDES.—The leather trade maintains the same position as described in our report of last week. The business of the past week has been about an average of the season of the year. There has been a very active demand for russet shoe middlings for Government work, of which article the market has been cleared; but the goods wanted being for immediate delivery, the demand is likely to be only temporary. The supply at Leadenhall on Tuesday was rather larger, and prices unaltered.

METALS.—Copper is unchanged in value, but there has not yet been a demand at the late advanced prices. Iron presents no new feature, unless it is that the demand for France begins to tell favourably in this time of depression. Prices are unchanged. Tin has kept very steady. Spelter is somewhat flat, with prices a trifle easier. Lead meets a fair average demand. Tin plates have found a readier sale, and prices have slightly stiffened.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	8
Yellow Russian	52	6
Melted stuff	38	0
Rough ditto	22	0
Greaves	18	0
Good dregs	7	0

Imports this week 2,817 casks.

PROVISIONS.

Bacon market firmer this week at former rates; delivery very good Friesland in better demand, the quality fine, price 120s. Jersey in good demand for best quality, at 106s to 108s.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 9.—The total imports of foreign stock into London, last week, amounted to 4,951 head. In the corresponding period in 1860, we received 6,103; in 1859, 4,311; in 1858, 4,322; in 1857, 1,773; in 1856, 1,622; and in 1855, 4,752 head.

Our market to-day was but moderately supplied with foreign stock; nevertheless, the demand for it ruled very inactive, at barely last week's currency. The supply of home-fed beasts was limited as to number, but in greatly improved condition, especially the arrivals from Scotland. Although, owing to the prevailing mild weather, the demand for all breeds was in a sluggish state, prices were well supported, and, in some few instances, last Monday's currencies were slightly exceeded. A few very superior Scots sold at 5s per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire, we received 2,200 Shorthorns, &c.; from other parts of England, 500 various breeds; from Scotland, 300 Scots and crosses; and from Ireland, 500 oxen and heifers. The show of sheep was limited even for the time of year. For all breeds the demand ruled steady, but by no active, at fully last week's currency. Very superior Downs were worth 5s 8d, but the general top figure for mutton was 5s 6d per 8 lbs. Calves, the supply of which was small, moved off steadily at very full prices. The highest quotation was 5s 6d per 8 lbs.

SUPPLIES.

	Dec. 10, 1860.	Dec. 9, 1861.
Beasts	5020	4420
Sheep	22840	16230
Calves	159	87
Pigs	260	370

THURSDAY, Dec. 12.—Our market to-day was seasonably well supplied with beasts, both as to number and quality. Prime Scots, [&c., commanded a steady sale, at fully Monday's currency, the extreme quotation being 5s per 8 lbs, otherwise the beef trade was in a sluggish state on former terms. The supply of sheep was somewhat on the increase, nevertheless the demand for most breeds ruled steady, at full prices. The best Downs realised 5s 6d per 8 lbs. No change took place in the value of calves; the veal trade, however, was firm. Pigs commanded full quotations, but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	4	3	10	Large coarse calves	4	6	5	0
Prime large oxen	4	0	4	6	Prime small ditto	5	2	5	6
Prime Scots, &c.	4	8	4	10	Large hogs	3	10	4	4
Coarse and inferior sheep	3	2	3	6	Small porkers	4	6	4	10
Second quality ditto	3	8	4	4	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	6	5	2	Quarter old store pigs	21	0	29	0

Total supply—Beasts, 2,500; sheep, 5,120; calves, 130; pigs, 490.
Foreign supply—Beasts, 420; sheep, 1,200; calves, 60.

NEWGATE AND LEADENHALL

FRIDAY, Dec. 13.—The supplies of meat are seasonably extensive. The trade, however, may be considered steady, and prices are fairly supported.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	2	Middling mutton	3	10	4	2
Middling ditto	3	4	3	8	Prime ditto	4	4	4	6
Prime large ditto	3	10	4	0	Veal	3	10	4	8
Prime small ditto	4	0	4	2	Small pork	4	6	5	0
Large Pork	3	10	4	4	Lamb	0	0	0	0
Inferior mutton	3	4	3	8					

HOP MARKET.

BOROUGH, Monday, Dec. 9.—We have no change to report in the character of our market: the transactions still continue limited, and the few hops on offer are held for full rates. In foreign hops there is not so much doing. Mid and East Kents, 180s to 195s, choice 220s; Weald of Kents, 147s to 165s, choice 185s; Sussex, 135s to 145s, choice 155s.

FRIDAY, Dec. 13.—A fair business is doing in most kinds of hops, and prices are well supported.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Dec. 9.—During the past week the arrivals, both coastwise and by rail, have been more plentiful. Owing to so many of inferior quality, the consumption of potatoes is very limited. The following are this day's quotations:—Kent and Essex Regents, 120s to 140s; Yorkshire Flukes, 120s to 140s; ditto Regents, 100s to 130s; Lincolnshire ditto, 90s to 110s; Scotch ditto, 70s to 110s; French whites, 90s to 95s per ton.

FRIDAY, Dec. 13—The supplies of potatoes on sale are to a moderate extent. Good and fine qualities move off steadily, at full prices; but other kinds are a dull inquiry.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 0s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Supply good.

COAL MARKET.

FRIDAY, Dec. 13.—Wall's-end Tees 17s 9d—Wall's-end Hartlepool 17s 6d—Wylam 16s—Buddle's Hartley 15s 9d—Davidson's Hartley 15s 9d—Hasting's Hartley 15s 9d. 32 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 13.—Our market has been very quiet this week, owing in some measure to the scanty supply of such wools as are wanted for the States, as also to the public sales of low wools in London engrossing the attention of the trade.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 13.—The demand for wheat is inactive, but the sales made to-day have been done at about Tuesday's rates. Flour quiet, and no material change in value. Indian corn in good request at an advance of 6d to 9d. Holders firm at 33s 9d to 34s.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 30th of November amounted to 498,840*l*, and for the corresponding week of last year to 498,160*l*, showing an increase of 680*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 222,756*l*, and for the corresponding week of 1860 to 219,079*l*, showing an increase of 3,677*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 9.—The railway market to-day experienced a general improvement from speculative repurchases on the American news. The more fluctuating stocks, such as Midland, Lancashire and Yorkshire, London and North-Western, and Great Western, showed the principal recovery. Compared with Saturday, Midland and Lancashire and Yorkshire advanced 1⅛ per cent.; London and North-Western, Great Western, and North-Eastern descriptions, 1 to 1⅛; and other stocks, ½ to ⅝. The final prices were rather lower than at one period of the day. The colonial market also exhibited a stronger tendency, several Indian guaranteed stocks, Grand Trunk and Great Western of Canada having advanced. Cape Town shares were rather flat. Foreign descriptions improved. Canada, New Brunswick, and Nova Scotia Government debentures rallied. A general rise likewise took place in American securities. Mines were dull at an occasional decline.

TUESDAY, Dec. 10.—The railway market opened steadily this morning, but in the afternoon the tendency was less favourable. Lancashire and Yorkshire has declined ½ per cent., and London and North-Western, Midland, Great Western, and Sheffield ⅛ to ¼. The transactions during the day were unimportant. No material change occurred in colonial descriptions. Grand Trunk left off at 18 to ⅜, and Great Western of Canada left off at 8⅞ to 9⅛. Foreign shares relapsed; especially Bahia, San Paulo, Great Luxembourg, and Lombardo-Venetian. Canada, New Brunswick, and Nova Scotia Government debentures again improved. In American securities, Virginia Six per Cents., Erie shares, and Illinois Central receded; while other descriptions, including United States Five per Cents., were rather firmer. Mines were quiet, and generally less steady. There were few transactions in joint stock banks, and prices were occasionally a shade lower. In miscellaneous descriptions, a recovery occurred in Canada Land shares.

WEDNESDAY, Dec. 11.—The railway market to-day showed renewed firmness. Midland advanced fully 1 per cent., Great Northern ¾, and Lancashire and Yorkshire, Great Western, South-Eastern, Caledonian, and Eastern Counties ¼ to ½. London and North Western was exceptionally dull, on the traffic return. The final prices were generally at the highest point of the day. In the colonial market, Indian guaranteed descriptions were steady. Grand Trunk of Canada stock was ¼ per cent. higher, at 18¼ to ¾, and the debentures also improved. Foreign railways were firm. After official hours Lombardo-Venetian advanced to ⅜ to ½ pm., on a corresponding movement on the Paris Bourse. In American securities, Illinois Central shares were lower. Mines were in little demand, and occasionally showed a decline. Joint stock banks were rather dull. In miscellaneous descriptions Canada Land, Oriental Inland Steam, and Red Sea Telegraph shares advanced.

THURSDAY, Dec. 12.—The railway market opened this morning without alteration, but subsequently became rather flat. Compared with yesterday, Midland and Great Northern declined ¾ per cent., and most of the other leading stocks ⅛ to ⅜. There was not much business doing. In colonial department, Indian guaranteed stocks remained steady. the Grand Trunk and Great Western of Canada closed about the same as yesterday, at 18¼ to ¾, and 8⅞ to 9. Foreign descriptions were rather dull, Lombardo-Venetian especially receding to ¼ to ⅜ pm. Canada Government debentures were again higher. In American securities another reduction occurred in Illinois Central shares. There was little doing in British mines, and prices were occasionally lower. East Carn Brea, however, improved. In foreign adventures a rise took place in Port Phillip and Scottish Australian, and a decline in United Mexican.

FRIDAY, Dec. 13.—The railway share market to-day was very inactive, and quite devoid of any feature of interest. Prices in nearly every instance were quoted almost precisely the same as at four o'clock yesterday. Lombardo-Venetian Railway shares were steady, at ¼ to ⅜ premium. Dutch Rhenish ruled dull. In the Brazilian, Indian, and Canadian lines there was scarcely any business.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

FRAMPTON'S PILL OF HEALTH,
Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place: and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to aquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of all booksellers

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfect; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required, or a quarter at all

Lord Keane's own confession.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted
WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

DR MARSTON'S LECTURES—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr. Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

LAMBERT BROTHERS, Walsall, Staffordshire, (Established 1830,) Manufacturers
WROUGHT-IRON WELDED TUBES & ITTINGS, Chandeliers, High Pressure Steam and Water Valves. Patent Metallic Bedsteads for exportation.

EDINBURGH.....	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.
When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL.—Having frequently examined samples of Pale Cod Liver Oil as imported by Mr THOMAS KEATING, I can testify that it is uniformly of the best and purest quality that can be desired or obtained, possessing as it does the nutrient properties of that valuable medicine in the highest degree, unassociated at the same time with any disagreeable and irritating qualities resulting from the presence of decayed matter, thus making it an exception in respect of purity from many of the oils so abundantly advertised.—EDWIN PAYNE, M.D., L.R.C.P., M.R.C.S., Assistant Physician to the Royal General Dispensary, &c., &c.—September 27th, 1861. Sold in half-pint bottles, 1s 6d; pints, 2s 6d; quarts, 4s 6d; or in five-pint bottles, 10s 6d, Imperial Measure, at 79 St Paul's Churchyard, London.

HOLLOWAY'S PILLS—Extraordinary Merit.—The wonderful cures effected by these Pills have alone enabled them to withstand the keenest opposition for 27 years. They are valued at the humblest hearths as well as in the houses of comfort and wealth. Holloway's Pills work a thorough purification of the whole system without disordering, weakening, or otherwise interfering with the natural action of any organ. They are admitted to be the best restorers of appetite, strength, and perfect health to the most delicate constitution. They give colour and freshness to the face, and by their gentle alterative properties eradicate from the system the germs of consumption, scrofula, and scurvy, without annoyance or danger to the most fragile female or most weakly child.

ANOTHER CURE OF ASTHMATIC COUGH BY DR LOCOCK'S PULMONIC WAFERS.—From Mr J. Richardson, Bookseller, Seaham: "Gentlemen,—Having for some time been troubled with asthma and cough, and not being able to get any medicine that would relieve me, I was recommended to try Dr Locock's Pulmonic Wafers, and before I had finished one box I was nearly well. Whenever I get a cold and return of cough I take some of the wafers, which give me immediate relief. I feel it my duty to let you know, hoping it may induce others who suffer from those complaints to give the wafers a trial. A friend of mine, Captain Dinsdale, has used them with similar results.—I am, Gentlemen, yours, &c., T. B. BROWN." To singers and public speakers, Dr Locock's Wafers are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.
CAUTION.
The public is cautioned against purchasing any (so called) "Pulmonic" Medicine, "Locock's Pills," "Lotion," "Bark," "Tooth Powders," or any such catchpenny things, under the belief that they are connected with "Dr Locock's Wafers." This caution has often been given before; but it is still, from time to time, found that some persons try to foist such articles upon the public. The only genuine medicines are, "Dr Locock's Wafers," and "Dr Locock's Cosmetic" (for the complexion); all others are an imposition upon the public.

MANUAL OF HYDROPATHY, FOR LADIES and CHILDREN. By Mrs SMEDLEY. 1s 6d. London: Job Caudwell, 335 Strand.

SMEDLEY'S PRACTICAL HYDROPATHY.—20th Thousands, 516 pages. 160 Anatomical cuts, 2s 6d.

£10,000 HAS BEEN EXPENDED on the HYDROPATHIC ESTABLISHMENT, MATLOCK BANK. As a winter residence it is unequalled. Extensive saloons, bed-rooms, bath-houses—all connected and warmed with pipes—a summer temperature is kept up. Thorough ventilation. Mild treatment.—Mr and Mrs SMEDLEY.—Terms, Two Guineas per week. No fees.

TAYLOR BROTHERS' HOMŒPATHIC COCOA, for price and quality combined, stands unequalled.
Sold by all Grocers at 1s 4d per lb.

TAYLOR BROTHERS' GENUINE MUSTARD. Dr Hassell, in his report on Taylor Brothers' Genuine Mustard, says, "I find this Mustard perfectly genuine, and of superior quality, possessing a delicate flavour and much pungency."
Sold by all Grocers and Oilmen.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.
E. LAZENBY and SON, of 6 Edwards street, Portman square, London, as sole proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.
Sold by all respectable grocers, druggists, and oilmen.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The author of the above Medical Treatise may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT,

By their process, which is *patented*, Pure White Zinc Paint *is* cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

N.B.—White Zinc does not require Bonds and Sureties on Exportation not being Contraband of War like White Lead.

THE ONLY STOVE WITHOUT A FLUE.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the HALF-YEARLY INTEREST on the Company's Debentures will be paid on and after the 1st January, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths, London.—By order of the Board,
J. SYMONS, Secretary.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of Parliament of Canada.
Chief Office—Victoria Hall, Toronto.
President—Lewis Moffatt, Esq.
Vice-President—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan M.L.C., President Bank of Upper Canada.
Col. Richard D. Chatterton.
The Hon. M. Cameron, M.L.C.
R. L. Denison, Esq., Treasurer Board of Agriculture.
Charles Donaldson, Esq., Grantham.
W. P. Howland, Esq., M.P.P., President Board of Trade
Thomas D. Harris, Esq. (Harris, Evans, and Co.)
Lewis Moffatt, Esq., Director Bank of British North America.
William McMaster, Esq. (Mc Master and Nephews.)
Samuel Spreull, Esq., Stock Broker.
Mr Sheriff Smith, Collingwood.
E. W. Thomson, Esq., President Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

BROKERS—Messrs Brunton and Son, London; James Walker, Esq., Manchester; Messrs Taunton and Molyneux, Liverpool; Messrs Boyle, Low, Pim, and Co., Dublin; Messrs Cuningham and Co., Belfast; John Murray, Esq., Glasgow.

The Company in pursuance of their charter grant Debentures for sums of £50, £100, £500, and £1,000 sterling, for periods of three, five, seven, and ten years, bearing interest at six per cent. per annum, with principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company, by its charter, is always first mortgagee.

The evils, uncertainties, and delays of the old mortgagee system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day, viz.: the 1st of January and the 1st of July, at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk, as in a railway or similar undertaking, their interest being derived from cultivated land, and which is, by charter, always paid in advance.

Further particulars, prospectuses, and the debentures, may be had at Messrs BRUNTON and SON, Stock Brokers, Auction Mart chambers, Bartholomew lane, London.

FORD'S COLOURED FLANNEL SHIRTS.—Patterns of all the newest designs in fancy wove and printed flannels sent per post free.
RICHARD FORD and CO., Patentees, 38 Poultry, London.

FORD'S EUREKA SHIRTS, known from Cornhill to China, for the last ten years, as the acme of perfection for fit and quality. Where difficulty occurs in procuring Ford's Eureka Shirts, send to the Patentees.

65 Moorgate street, London

AT AN ADJOURNED GENERAL

MEETING of SHAREHOLDERS of the GREAT WESTERN RAILWAY of CANADA, held on Wednesday, Dec. 11, 1861, at the London Tavern, Bishopsgate street, London,

ROBERT GILL, Esq., President, in the Chair,

It was proposed by the Chairman, and seconded by Mr A. Hoyes, and resolved,—

That the report and accounts for the half-year ending July 31, 1861, be received and adopted.

It was proposed by Mr A. Beattie, and seconded by Mr John Harris,—

That the eleven retiring Directors be re-elected for the ensuing year, and that the two retiring Auditors be also re-elected for the ensuing year.

To which, as an amendment, it was proposed by Mr Alderman Dakin, and seconded by Colonel Evelyn,

That it is the opinion of this meeting that the Board of the Great Western Railway of Canada, as at present constituted, does not possess the confidence of the shareholders, and that the names of gentlemen who have been connected with the loan to the Detroit and Milwaukee Railway Company, and the receipt of money from that Company, be omitted from the list.

Mr Gill.—Mr Cullen.—Mr Brydges.

On a show of hands being taken, the majority appeared to be in favour of the amendment. The mover of the proposition requested a poll to be taken, the votes to be recorded at the Statutory Adjourned Meeting, to be held in Hamilton, Canada West, on January 8, 1862.

It was proposed by Mr A. Beattie, and seconded by Mr Hartridge, and resolved,—

That the matter of the accounts of the Committee of Investigation be referred back to the Board, with power to refer the matter to arbitration in case of need.

It was proposed by Mr Alderman Dakin, and seconded by Mr Hartridge, and resolved,—

That the thanks of this meeting be given to the Chairman and to his locum tenens, Mr A. Hoyes, for his conduct this day.

The meeting then separated.

(True extract from the Minutes.)

BRACKSTONE BAKER, Secretary.

GREAT WESTERN RAILWAY OF CANADA.

—Several independent shareholders deeply regret that the opposition and agitation which have prevailed in the affairs of the Company since the appointment of the Committee of Investigation, have produced at the general meeting held yesterday, the 11th inst., an adverse vote upon a show of hands, the effect of which will be to deprive the Company of the able services of Mr Brydges as manager of the line, if it is confirmed at the Statutory Meeting to be held in Canada on Jan. 8, 1862. They feel confident that the meeting of yesterday did not represent the general feeling of the shareholders, but that the majority will concur in the conviction that any change in the management at this critical juncture of political affairs in Canada, and pending an arrangement with the other Canadian Railway Companies now under negotiation, would be most disastrous and injurious to the real interest of the Great Western Railway of Canada. Shareholders are, therefore, called upon to record their votes for the Re-election of the entire Board as moved at the meeting, by signing a form of proxy, for the Canadian Meeting of Jan. 8, 1862, and forwarding it to the Secretary of the Company. Any proxy of recent date cancels of right that of a prior date.

THOS. H. BENNETT.

London, Dec. 12, 1861. And for other Shareholders.

ATLANTIC AND GREAT WESTERN RAILWAY (New York Division).

Coupons due 1st of January next will be paid in London at the Bank of London, or in New York at the banking house of Messrs Duncan, Sherman, and Co., No. 10 New Cannon street.

December 6, 1861.

TAFF VALE RAILWAY

COMPANY.—The Directors of this Company are prepared to issue Debenture Bonds for 7 or 10 years, bearing interest at the rate of 4 per cent. per annum, payable half-yearly, to replace debentures falling due.

Applications to be made to the undersigned.—By order of the Board of Directors,

EDWARD KENWAY, Secretary.

Cardiff, Oct. 22, 1861.

THE OTTOMAN RAILWAY

COMPANY (from Smyrna to Aidin) of His Majesty the Sulton.

STATE GUARANTEE OF SIX PER CENT.

Notice is hereby given, that interest at the rate of 6 per cent. per annum will be payable on and after the 16th proximo, at the offices of the Company, No 2 St Michael's House, Cornhill, London.

Share certificates must be deposited with the Secretary for examination three clear days previously to the issuing of the warrants.

MACDONALD STEPHENSON, Chairman.

S. J. COOKE, Secretary.

Company's Offices, 2 St Michael's House, Cornhill, London, E.C., Dec. 13, 1861.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from Wednesday, the 18th day of December, 1861, to Saturday, the 11th day of January, 1862, both days inclusive, for the purpose of making up the interest account to the 31st day of December, 1861.

The Interest Warrants will be forwarded on the 11th day of January to the Proprietors who are registered in the Company's books on the 17th day of December instant.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Dec. 12, 1861.

N.B.—Transfers will not be received at the office while the books remain closed.

THE LANCASHIRE AND YORKSHIRE RAILWAY COMPANY.

—Debenture Stock.—The Directors are prepared to receive applications for the issue of a portion of the Company's Perpetual Four per Cent. Debenture Stock, which will be recorded in the books of the Company in the names of the applicants free of stamp duty or other charge.

This stock will be entitled to the same priority against the property and income of the Company as the mortgage debt, in substitution of which it will be issued.

Forms of application may be obtained from the undersigned, either personally or by letter.—By order,

S. WM. BULTEEL, Treasurer.

Manchester, Nov. 1861.

NORTH LONDON RAILWAY COMPANY.

FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK.

The North London Railway Company are prepared to receive applications for their new shares of £20 each, created under the powers of their Acts of 1861, bearing a fixed Preferential dividend at the rate of 4½ per cent. per annum, with a contingent right to a further increase up to £5 per cent. per annum. The shares will be issued on such terms that the holders will be entitled to 4½ per cent. on the whole nominal amount of the shares, from the 1st January, 1862, to the end of 1865, after which they will be entitled to the further contingent increase.

A form of application, in which the terms are fully and particularly stated, may be had on application at the Company's offices.—By order,

HARRY CHUBB, Secretary.

Euston Station, London, 20th November, 1861.

MADRAS RAILWAY COMPANY.

—Notice is hereby given, that the Transfer Books of the Company will be closed from the 19th inst. to the 11th day of January next, both days inclusive, for the purpose of making up the interest accounts to the 31st inst.

The Interest Warrants will be forwarded to the Proprietors whose names are registered on the 19th instant in the books of the Company.

Deeds of Transfer are not received at the Offices of the Company while the books are closed.—By order of the Board, JAMES WALKER, Managing Director.

No. 33 New Broad street, E.C., Dec. 13, 1861.

LOANS ON DEBENTURES,

guaranteed by the Secretary of State for India.—The Directors of the MADRAS RAILWAY COMPANY are prepared to issue DEBENTURES, as under, at par, in sums of not less than £100 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest payable by coupon, half-yearly, at the Union Bank, London.

1. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest.

2. For a term of 5 years from the above date, convertible, at the option of the holder, into Capital Stock of the Company, bearing 5 per cent. interest, and with the option also of renewal for a second term of 5 years at the same rate of interest.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., Nov. 8, 1861.

THE NATIONAL MARINE INSURANCE COMPANY.

To be incorporated under the Joint Stock Companies Acts, and to be conducted on the principle of limited liability.

Capital £1,000,000, in 50,000 shares of £20 each, with power to increase to £2,000,000 by the issue of additional shares.

Deposit on application, 10s per share, and a further payment on allotment of £1 10s, making £2 per share, beyond which it is believed no further call will be necessary.

THE GREAT FIRE.—

Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THUBRON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

INTERNATIONAL EXHIBITION of 1862.—AN ELEGANT ALMANAC, with a highly-finished and accurate engraving of the magnificent structure for the International Exhibition of 1862, may be had, gratis, of

London: Religious Tract Society, 56 Paternoster row, and 164 Piccadilly; and sold by all booksellers.

THIRTY YEARS AGO,

when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size without increase of price, until the average has become double its former size—above ninety-six columns.

The Proprietors, taking advantage of the Abolition of the Paper Duty, therefore resolved that from the 5th of October, the price of THE ATHENÆUM should be reduced to THREEPENCE.

Just published, price 4s 6d, (double No.),

JOURNAL OF THE STATISTICAL SOCIETY for DECEMBER. Vol. XXIV. Part IV.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER, introduced more than 25 years ago by WILLIAM S. BURTON, when PLATED, by the patent process of Messrs Elkington and Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and durability, as follows:—

	Fiddle or Old Silver Pattern	Thread or Brunswick Pattern	Lily Pattern	King's or Military &c.
	£ s d	£ s d	£ s d	£ s d
12 Table Forks	1 13 0	2 4 0	2 10 0	2 15 0
12 Table Spoons	1 13 0	2 4 0	2 10 0	2 15 0
12 Dessert Forks	1 4 0	1 12 0	1 15 0	1 17 0
12 Dessert Spoons	1 4 0	1 12 0	1 15 0	1 17 0
12 Tea Spoons	0 16 0	1 2 0	1 5 0	1 7 0
6 Egg Spoons, gilt bls	0 10 0	0 13 6	0 15 0	0 15 0
2 Sauce Ladles	0 6 0	0 8 0	0 9 0	0 9 0
1 Gravy Spoon	0 6 6	0 10 0	0 11 0	0 12 0
2 Salt Spoons, gilt bls	0 3 4	0 4 6	0 5 0	0 5 0
1 Mustard Spoon, gilt bowl	0 1 8	0 2 3	0 2 6	0 2 0
1 Pair of Sugar Tongs	0 2 6	0 3 6	0 4 0	0 4 0
1 Pair of Fish Carvers	1 4 0	1 7 6	1 10 0	1 12 0
1 Butter Knife	0 2 6	0 5 6	0 6 0	0 7 0
1 Soup Ladle	0 10 0	0 17 0	0 17 0	1 0 0
1 Sugar Sifter	0 3 3	0 4 6	0 5 0	0 5 0
Total	9 19 9	13 10 3	14 19 6	16 4 0

Any article to be had singly at the same prices. An oak chest to contain the above, and a relative number of knives, &c., for £2 15s. Tea and coffee sets, dish covers and corner dishes, cruet and liqueur frames, &c., at proportionate prices. All kinds of replating done by the patent process.

CUTLERY WARRANTED.—The most varied assortment of TABLE CUTLERY in the World, all warranted, is on sale at WILLIAM BURTON'S, at prices that are remunerative only because of the largeness of the sale. 3½-inch ivory-handled table knives, with high shoulders, 12s 6d per dozen; desserts to match, 10s; if to balance, 6d per dozen extra; carvers, 4s 3d per pair; larger sizes, from 20s to 27s per dozen; extra fine ivory, 32s; if with silver ferrules, 30s to 50s; white bone table knives, 6s per dezen; desserts, 5s; carvers, 2s 3d per pair; black horn table knives, 7s 6d per dozen; desserts, 6s; carvers, 2s 6d; black wood-handled table knives and forks, 6s per dozen; table steels, from 1s each. The largest stock in existence of plated dessert knives and forks, in cases and otherwise, and of the new plated fish carvers.

DISH COVERS AND HOT-WATER DISHES in every material, in great variety, and of the newest and most recherché patterns, are on show at WILLIAM S. BURTON'S. Tin dish covers, 7s 6d the set of six; block tin, 12s 3d to 38s 6d the set of six; elegant modern patterns, 39s 9d to 69s the set; Britannia metal, with or without silver plated handles, £3 11s to £6 8s the set; Electro-plated, £9 to £21 the set of four; block tin hot-water dishes, with wells for gravy, 12s to 30s; Britannia metal, 22s to 77s; electro-plated on nickel, full size, £9.

WILLIAM S. BURTON'S GENERAL FURNISHING IRONMONGERY CATALOGUE may be had gratis, and free by post. It contains upwards of 500 illustrations of his illimited stock of sterling silver and electro plate, nickel silver, and Britannia metal goods, dish covers, hot-water dishes, stoves, fenders, marble chimneypieces, kitchen ranges, lamps, gaseliers, tea trays, urns, and kettles, clocks, table cutlery, baths, toilet ware, tornery, iron and brass bedsteads, bedding, bed room and cabin furniture, &c., with lists of prices, and plans of the Twenty large Show Rooms, at 39 Oxford street W. 1, 1a, 2, 3, and 4 Newman street; 4, 5, and 6 Perry place; and 1 Newman's mews, London.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-Office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE

CAPS, &c. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of Dicquemare, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This Dye is superior to all that have been employed hitherto; can be obtained of all purfumers and chemists.—Manufactory at Rouen, Rue St Nicholas 39.; Wholesale, Messrs HOVENDEN and SONS. 5 Great Marlborough street, W., London

DINNEFORD'S FLUID MAGNESIA

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants. DINNEFORD and CO., Chemists, 172 New Bond street, London, and of 1 other chemists throughout the world.

HOLLOWAY'S OINTMENT AND PILLS.

— Society's Safeguard. — Whatever the disease may be, wherever it may discover itself, whether externally or internally, its victims may enter on Professor Holloway's treatment with hearts of hope that every day will bring some amelioration of the inarmity. For the cures of ulcers, wounds, sores, abrasions, eruptions, a scesses, glandular swellings, and the generality of throat and chest complaints, the ointment need only be used according to the instructions to ensure a successful issue to the illness, and a desirable restoration of health and strength. In all disorders which have been of long duration, Holloway's pills should be taken; they powerfully stimulate the circulation, and raise the needful nervous energy.

ELECTRICITY IS LIFE.—

HEALTH RESTORED WITHOUT MEDICINE. —The PATENT CURATIVE and ELECTRIC BELT is the only guaranteed remedy for weakness, nervousness indigestion, feelings of decay, &c. Sent for one stamp by H. JAMES, Mechanical Electrician, Percy House, Bedford square, London.

N.B. Medicine alone can never cure.

with an Appendix, containing Elements and Ephemerides of Ceres, Pallas, Juno, Vesta, and Astræa.

John Murray, Albemarle street.

(Publisher to the Admiralty.)

THE VICTORIA MAGAZINE.

The "Victoria Magazine" has received many proofs of the great regard in which it is held by the subscribers, advertisers, and the press, and has obtained an extensive circulation in the highest circles. In a recent review, the "Spectator" remarks:—

"The 'Victoria Magazine' maintains its position amongst the serials of the day. Its tales and criticisms are quite of average merit, and it discusses the social questions that affect the status of women with a knowledge and ability altogether its own. It is always ready to call up for judgment the oppressor or defamer of the sex, and really does an immense amount of good in impressing on the public mind their genuine wants, and in resisting the silly opposition that has often attended the attempt to improve either their mental or physical condition."

Since the magazine was first published in 1863, it has contained original articles on all questions relating to women; it records each month any practical effort made for the improvement of their condition; and under the head of miscellanea, reprints articles on similar subjects, whether adverse or otherwise to the views of those who advocate remunerative employment for women, that free expression may be given "to both sides of the question."

An original serial tale runs through the monthly numbers, which also contain reviews of the newest books and music, theatrical and musical criticisms, and articles upon topics of general interest.

Subscribers receive their copies direct (postage free), on payment of 12s in advance, to

Emily Faithfull, publisher in Ordinary to Her Majesty, VICTORIA PRESS, Princes street, Hanover square, W., where all advertisements and communications must in future be addressed.

"The 'Victoria Magazine' would be worth perusing if it was only for the very truthful remarks as to the morals of society in 'Facts and Faces,' by May, but the whole number is very readable."—JOHN BULL.

The Creditors of the above-named Company who have not yet sent in particulars of their claims, are hereby required, on or before the 14th day of December, 1867, to send their names and addresses and the particulars of their debts or claims to the undersigned, the liquidators of the said Company, at their office, 7 Hornby row, Bombay.
(Signed)
BURJORJEE RUSTOMJEE MODY,
ARDASEER EDULJEE CHINAY,
HORMUSJEE PESTOMJEE FRAMJEE,
Liquidators.
Bombay, 13th September, 1867.

NEW ZEALAND GOVERNMENT
DEBENTURE LOAN, £3,000,000, authorised by the Loan Act, 1863, and the Rate of Interest Act, 1864, of which £2,494,600 have already been issued.—The undersigned Crown Agents for the Colonies, acting under instructions received from the General Government of New Zealand, and with the concurrence of Her Majesty's Principal Secretary of State for the Colonies, now invite TENDERS for DEBENTURES representing £505,400—less £35,400 which have recently been exchanged for 8 per cent. Treasury Bills—making the Seventh instalment of the above Loan.
The Debentures, having 24 years to run, will be drawn in sums of £1,000, £500, £200, and £100 each, and bear interest at the rate of 6 per cent. per annum from the 15th December, 1867.
Both principal and interest will be made payable at the Offices of the Crown Agents for the Colonies in London; the former on the 15th June, 1891, and the latter by coupon on the 15th June and 15th December of each year.
The Loan is secured on the public revenues of the Colony, and, in addition thereto, provision has been made by an Act of the Colonial Legislature for the payment annually, to public trustees appointed in this country, of a sum equal to two per cent. on the total amount borrowed, for the formation of an accumulating fund for the final liquidation of the debt.
The money will be applied to the redemption of 8 per cent. Treasury Bills (or short-dated Debentures), falling due on the 31st December next, of which upwards of £400,000 are held in this country.
Sealed Tenders, made in accordance with the annexed form, will be received by the undersigned for the whole or any portion of the loan—not being less than £100—until One o'clock on Tuesday, the 19th instant, and the allotment will take place at that hour in the presence of such of the applicants as may desire to be present.
The Debentures will be allotted to the highest bidders, provided the rates offered are not below the minimum which will be placed in a sealed envelope on the table before the Tenders are opened.

VALUE OF IMPORTS, EXPORTS, AND REVENUE, FOR THE LAST TEN YEARS.

Year.	Imports.	Exports.	Customs' Revenue.	Ordinary Revenue.
	£	£	£	£
1857–8.....	1,066,153	411,133	138,998	166,646
1858–9.....	1,345,387	502,794	160,830	193,734
1859–60 ...	1,549,682	570,219	178,117	220,726
1860–1.....	2,021,072	979,600	204,612	278,585
1861–2.....	3,559,946	1,896,490	339,393	416,140
1862–3.....	5,825,325	2,954,054	488,522	635,250
1863–4.....	6,762,352	3,443,184	617,002	778,929
1864–5.....	6,047,501	3,557,055	643,297	876,174
1865–6.....	5,744,754	4,116,462	796,227	1,011,499
1866–7.....	5,864,609	5,254,129	864,668	1,108,362

Tenders at a price including a fraction of a Shilling, other than Sixpence, will not be preferentially accepted, and in the event of an equality of tenders beyond the amount to be issued, a pro-rata distribution on such tenders will be made.
Five per cent. on the nominal value of the debentures must be paid into the Bank of England as soon as the allotment is made, and the balance not later than the 14th December following.
The debenture bonds will be delivered in exchange for the Bank receipts for the money.
The following figures afford conclusive evidence of the steady progress and rapidly growing wealth of New Zealand, and, at the same time, they can hardly fail to convince capitalists that the colony possesses abundant resources to meet all its pecuniary obligations.

During the same period the export of Gold amounted to £13,106,891, of which £2,605,789 were produced during the year ended 30th June last.
Forms of tender, and further information respecting the financial condition of the colony, may be had on application to the undersigned.
PENROSE G. JULYAN, } Crown Agents for
W. C. SARGEAUNT, } the Colonies.
London, 7th November, 1867.

FORM OF TENDER.
GENTLEMEN,
I hereby tender for the following portion of the above Loan, subject to the conditions contained in your advertisement of the 7th November, 1867, viz., Debentures to the extent of £——— for which I undertake to pay at the rate of £——— for every £100 in Debentures.
Name .....
Address .....

To the Crown Agents for the Colonies,
Spring Gardens, London, S.W.

On Oct. 26 was published No. 10, Vol. III., of the
INVESTORS' MONTHLY MANUAL.
The Proprietors of the INVESTORS' MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly REPORTS of the Companies mentioned in the MANUAL.
They have also decided upon receiving for it a few pages of Advertisements; and, at the same time, beg to observe that it now commands a very extensive sale, and is a peculiarly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being a WORK OF CONSTANT REFERENCE FOR A WHOLE MONTH, and is used exclusively by all MONIED CLASSES.
Sold as a Supplement to the ECONOMIST, price 6d separately, 8d and 9d.
Advertisements for the next number must be sent on or before the 27th of November.
OFFICE, 340 STRAND.

TO TRUSTEES AND
CAPITALISTS seeking Safe Investments.—Freehold ground rents situate on the Kensington district, and near two stations of the Hammersmith and City railway. Amply secured, and yielding 4½ per cent. per annum.—For further particulars apply to Mr Blake, 2 Stanley crescent, Notting hill. Also two freehold houses, in Stanley gardens, to be sold, or let unfurnished.

MESSRS FREDERIC GILL AND
CO., STOCK and SHARE DEALERS, St Clement's house, St Clement's lane, London, E.C., Transact Business in all Mining Stocks and Shares at closest market nett prices, either for cash or account.
Having an extensive and growing connection, Messrs. F. G. and Co. are generally able to deal in shares difficult of sale in the open market, and invite transactions from holders of this kind of stock. They are also in a position to advance money on approved securities. Telegraphic messages have prompt attention.

INVESTMENT, LOAN, AND BANK AGENCY.
Established 1839.
Investments and Sales of every description of Public Securities can be effected, either for immediate or deferred settlement, as may be agreed upon.
Loans granted, for one year or any shorter period, on Stocks and Shares having a market value.
Deposits of all amounts received at 5 per cent.
The Finance Agency of Foreign Governments, Municipalities, Public Companies, and Money Agency Business generally undertaken.
RICHARD TAYLOR and COMPANY,
No. 12 Clement's lane, Lombard street, London, E.C.

GOOD DIVIDENDS. — INDIAN
Railways, Colonial Bonds, United States 5-20 Bonds, Brazilian and Egyptian Stock pay from 5 to 8 per cent., as regularly as Consols; Turkish, 1865, Loan, pays 15 per cent.—all without liability. A list of good investments sent free.—C. WATSON, Stock, Share, and Consol dealer, 2 Crown court, Threadneedle street.

SAFE INVESTMENTS,
paying 5 to 20 per cent. per annum upon outlay. SHAREHOLDERS, CAPITALISTS, and INVESTORS, requiring valuable and reliable information, and seeking safe, sound, and profitable investments, should at all times consult SHARP'S GENERAL INVESTMENT CIRCULAR, post free. It is a safe guide for Trustees and others. GRANVILLE SHARP, STOCK and SHARE DEALER, 32 Poultry, London, E.C. [Established 1852.]

SWEDEN AND NORWAY.
MESSRS HADWEN, CRUMP & CO.,
of 3 George yard, Lombard street, E.C., issue drafts at short or long date daily, from 11 to 3 o'clock, in Swedish Currency, drawn on, and payable at, the Skandinaviska Kredit Aktiebolag, Stockholm, negotiable in any part of Sweden or Norway.

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF TRADE AND THE MONEY MARKET.

THE condition of the trade of the country thoroughly explains the state of the money market, and affords the most conclusive answer to those who fancy, guided by a false analogy from late years, that the minute export of bullion at present indicates a speedy rise in the rate of interest. The facts are very simple; the export trade is in much the same state that it has been for the last three years.

AGGREGATE EXPORTS for the NINE MONTHS ending 30th Sept.:—

	£
1866	141,936,898
1867	137,262,497

Which are not figures that would induce us to expect a special result in the money market, and there is no particular change in the items to speak of.

But the import trade is in a curious state; the aggregate import of the year is much less than last.

AGGREGATE IMPORTS for EIGHT MONTHS ending 31st Aug. (The last for which the returns are published):—

	£
1866	155,812,883
1867	141,448,055

But the two critical items have curiously changed—

	1866. £	1867. £
Cotton stands	58,204,544	39,752,424
Corn —	8,192,693	14,680,438

The increase in the corn import has partly counterbalanced the great diminution (as far as value goes) in the cotton import.

It may at first seem strange that when the imports are falling off there should be an export of bullion, but it is not really strange. Last year there was an export of bullion, which may not improbably be greater than that of this year when we can compare the two; but what is most material is, that any new trade naturally causes a demand for bullion. At first our new creditors take cash, and they gradually spend that cash as they like; every shifting of international demand causes an increased use of the precious metals. But if we contrast our creditor-countries of this year with those of last year, we shall see reason not to expect any greater demand upon our bullion this year than last; perhaps even not so great. The following is our imports of wheat, divided into the countries from which it comes:—

CORN—WHEAT.

From—	1866. £	1867. £
Russia	2,263,829	5,334,125
Denmark	182,637	233,112
Prussia	1,755,805	3,437,432
Schleswig, Holstein, & Lauenburg	72,284	63,093
Mecklenburg	326,064	427,081
Hanse Towns	337,494	341,815
France	1,676,745	361,220
Turkey and Wallachia and Moldavia	150,432	1,030,200
Egypt	5,565	254,344
United States	180,658	1,285,863
British North America	4,156	2,273
Other countries	1,237,024	1,909,880
Total	8,192,693	14,680,438

The imports of other sorts of corn, and of wheat, meal, and flour, are not, in the aggregate, very different from those of last year.

The following is our import of cotton:—

COTTON RAW.

From—	1866. £	1867. £
United States	29,349,669	22,606,517
Bahamas and Bermudas	46,816	56,437
Mexico	28,591	121
Brazil	3,973,456	2,716,300
Turkey	515,714	273,333
Egypt	6,626,740	6,074,842
British India	16,139,879	6,942,842
China	78,000	20,965
Other countries	1,445,679	1,061,067
Total	58,204,544	39,752,424

From these figures, it is evident that our largest new creditors are Continental countries, as Russia and Prussia, which do not, as a rule, take much bullion; while there is a very great *falling off* in our Indian debt for cotton, which has of late years absorbed so much of bullion.

Upon the whole, therefore, the plain state of the money market is, that the *capital* is most abundant, as is shown by the bill brokers' rates and the very face of Lombard street; and our *bullion* is not likely to have greater demands on it

[illegible] own confession

than last year, if so great, because the new countries from which this year we buy unusual corn, have not so great demands upon us as those from which we have of late years bought extraordinary values of cotton, and because India, to which we had last year to pay so much, is a far more bullion-taking country than any other, perhaps more so than all others added together.

TRADES' UNIONS AND FRIENDLY SOCIETIES.

We have explained at length that the present Trades' Union were radically faulty, because they included the Benefit Society, which ought to represent the insurance of the working man and to contain the Provident fund, and also included a "Strike Society," which at the best represents the speculative element of a working man's life, and holds the fund by which he hopes to exact from the capitalist more than he is willing to pay. An incalculable and a dubious element is bound up with a calculable and certainly beneficial element. We showed, too, that in practice this junction favours bad strikes, because the early years of a Benefit Society, like the corresponding years of an Insurance Company, always bring in much more money than they take out, and the managers are tempted to use that accumulation in a rash and aggressive policy, which they would never have begun had they depended on strike-premiums only. But it would be very unfair to blame such managers for this junction. The Legislature is mainly to blame, and that in consequence of a fixed and mischievous policy.

In former times in this country, as in all the countries of Europe, the right of association was strictly guarded. In part, the restrictions were due to a constant dread of the Government of an *imperium in imperio*, and in part to certain legal superstitions which regarded the right of suing and being sued in its own name (like a corporation) as of a somewhat mystic nature, not to be granted except upon peculiar terms and after curious precautions. In the case of the rich, this suspicion of associations descended to our own time, and the formation of companies with limited or unlimited liability is a thing of yesterday. But in the case of the poor, Mr Pitt, in 1793, begun to remove it; his administration matured and passed the first law relating to Friendly Societies, and that law has been followed by a whole crowd of successors. The aim of them all is identical, though their detail has been different; it is to exempt from the general prohibition of combination certain particular associations of which the objects were good, or supposed to be good. Thus, Mr Pitt's Act recites that "the encouragement and protection of Friendly Societies in this kingdom for securing, by voluntary subscriptions of the members thereof, separate funds for the mutual relief and maintenance of the members in sickness, age, and infirmity, is likely to be attended with very beneficial effects by promoting the happiness of individuals, and, at the same time, diminishing the public burthens." And as the general anxiety to promote the poor's welfare grew of late years, these societies, and the statutes to foster them, have grown too. But, pernicious as was the prohibition of voluntary association, it is open to question whether the permission of these favoured associations was not worse. The poor, of course,—that is, the best of the poor,—put faith in them, but in many cases they were unworthy of faith. The calculation of the proper premium to be paid to secure support in sickness and old age is a very difficult matter, requiring a basis of facts which, in the beginning of the societies, could not exist, and agreement as to the relative value of facts which even yet is deficient. But unless the payment is based upon good tables, paying money to an "old age and sickness society," is paying money "in your own wrong;" the persons who spend it for immediate enjoyment are sure of something at least, though that something may be mean; but persons who lay it up in unsound "futurity companies" will, probably, never get anything, for the company may break before they want it. Now, after a good deal of experience and discussion, many "Friendly Societies" are, doubtless, solvent, but many also are insolvent. This insolvency was often very gross, even in the case of very respectable societies. Thus, "the Preston branch of the Manchester Unity," according to Mr Hardwicke, one of the best authorities on the subject, had only the following balance sheet:—

	£	s	d
Probable liability	60,013	19	7
Probable assets	36,133	0	2
Deficiency	23,880	19	5

The Government gave these societies which had, in their nature, much difficulty, exceptional privileges and protection, and, as usual, did harm; the persons intended to be benefited were often harmed, and were never so much benefited as they ought to have been.

The favours given to the Friendly Societies were of two sorts. First, they had the right of suing, and being sued at law, especially,—what was vital,—the right of suing their own members for arrears, and their own officers for defalcations. The right was, indeed, given in an absurd way. In the case of Joint Stock banks, those constituted under the original Act cannot sue for themselves—a "public officer" must sue for them; and Friendly Societies are under the same disability; they cannot sue on their own account as a railway company sues; a trustee has to sue for them. In theory, this is very curious, because it shows the barbarous kind of jealousy with which the Legislature restricted the right of corporate suing; but in practice, the right to sue its own members or officers by a decently cheap process was what any *saving* society requires, no matter for what purpose the saving is; and mainly by its help, Friendly Societies have multiplied fast, and have collected much money, even though they may have been found insolvent when the repayment of it was required.

The second favour to Friendly Societies was the exemption of the transfer of interests in them from certain stamp duties, though only to a certain amount—which, of course, was often a great help.

The "Friendly Societies" having these privileges, and this almost ostentatious protection, all other associations of working men tried to be Friendly Societies whatever else they were, and so to gain the right of suing their defaulting members and officers. And the attempt was easier because, by a series of enactments, it had become very difficult to say what was a Friendly Society and what was not; the original patronage had been extended until (as so often happens in England) it was very difficult to say where it could be said to stop, or what it *did not* include. No blame can fairly be attached to the founders of Trades' Unions for coupling together two antagonistic aims, for the law encouraged them in it, and gave them no chance of gaining that for which they most cared, unless they attempted the other also.

The attempt was, however, vain. However shadowy and various in different Acts was the bounding definition of a Friendly Society, it did not and could not include anything "illegal," and the judges—by judicial legislation and in reliance upon an old common law doctrine—decided that "Strike Societies" were illegal as in restraint of trade; and, therefore, that notwithstanding that they were benefit societies also, they could not sue for payments in arrears by members, or for sums in the custody of defaulting and resisting officers. Although very naturally the Trades' Unions tried to get the benefit of the Friendly Societies' Acts, and though even experienced people would have thought beforehand that their chances of success were good, yet, in fact, they failed utterly, and are now subject to the common law suspicion of organised combination, and are wholly unable either to sue or be sued.

No legal defect in such a case can be more absurd or more fatal. There are many plausible arguments against the legalisation of "Strike Societies;" there are other and preponderating arguments which prove that, in accordance with our present law, it is far better to permit these combinations. We can understand a man who says that the junction of workmen into wages combinations should be made a grave penalty, and should be strictly kept down: we can understand a man who argues that such combinations, whether for good or evil, are inevitable products of our present society, and, therefore, like all other necessary things, should be legalised and born with; but we cannot understand those who wish that these societies should be half legal and half illegal; that workmen should be allowed to join, but should not be allowed to sue for money to aid the junction; that they be permitted to combine, but not allowed to provide the funds which alone can make that combination effectual.

The remedy for these evils is clear. We should get rid at

once and for ever of the remaining vestiges of the old common law jealousy of association. We should make the union of working men for the "support of those working men in cases "of want of work from causes other than sickness,' for that is the proper description of a 'Strike Society,' and all other kinds of union by working men and others to be parts of one single law of joint stock combination. A mutual company should be established upon the same sort of terms that a limited liability company can be established. The two differ, indeed, in one principal characteristic; the main concerns of an ordinary limited company are with the external world; the main concerns of a mutual company are with its own members and officers, for whom and by whom it saves and divides; but this difference is favorable rather to the mutual than to the limited company; it makes the formation of the mutual company rather the easier of the two, because dealings with the outside world are both more difficult and more likely to end badly than dealings with inside members. But all that should be required is much the same—a simple statement of the objects of the association, a designation of its locality, and a periodical list of its members. We would have no licensing of rules, as now in Friendly Societies, and it would be an additional gain to be rid of the reports of the Registrar, which abound in quotations from the "Leisure Hour" and "The Reporter," and are models of all which a business-like document should not be. We would apply in this case the doctrine which Mr Lowe stated and applied to commercial companies in 1856—the doctrine that the power of combination is "not a favour to be conceded, but "a right to be recognised," and that all persons who contemplate a legal object, and give notice that they mean to pursue it together, shall be allowed to form an effective company—a company which can sue and be sued for that purpose. And, of course, we would abolish all notion of wages-combinations being in restraint of trade; we professed to legalise these combinations years ago, and now it would be impossible to destroy them by a sidewind, and pernicious to attempt it.

The stamp duties should, if necessary, be revised, so as not to bear hardly on any small transactions; but we are not inclined to exempt any kind of transactions, because they are exceptionally good. In fact, Friendly Societies have not been by any means such; and on principle, in balancing between relative goodness and badness, we are landed in nice metaphysical distinctions, which give us much trouble, and the whole end of what we effect is to taint with a suspicion of State patronage the companies we favour, and to advertise by a semblance of political oppression the companies we dislike. The real remedy, both for the evils of Friendly Societies and the evils of Trades' Unions, is perfect equality of taxation, and perfect freedom in the right of association.

THE VENEZUELA BONDHOLDERS AND LORD STANLEY.

A VERY influential deputation lately waited upon Lord Stanley to ask him to interfere, by force, in favour of the English holders of Venezuela Bonds, and they left with him a memorial as well signed as any which we can remember to have seen. We annex the memorial to this article, because the signatures attached to it deserve weight and influence, and yet we cannot agree with their conclusion.

As all our readers are aware, lending to foreign Governments is now an habitual employment of English capital. Not a year—scarcely a quarter of a year—ever passes without an application, by some foreign State, for English money, or without their getting more or less of it. Most of these States trust entirely to their own credit; they borrow money as we ourselves borrow it, either by inscribed annuity, or by promissory bond; but the inferior sort feeling their weakness, offer in aid of their credit certain "securities." Of these, we have often had to speak; and whenever we have so spoken, it has been to warn our readers. The only securities which a common Government can offer are certain branches of revenue, *to be* collected, and when collected *to be* paid to the creditors; and our belief is, that such securities are worse than none, because if the indebted State means not to pay, it will not collect the revenue, or it will not deliver it over. In ordinary cases of mortgage, you can apply to a court of law to aid you, but here your "law" is the foreign law, and no defaulting foreign Government will permit its judges to help creditors they wish to defraud. You cannot realise your security without the consent of your dishonest debtor, and, of course, that debtor will never let you. So obvious is this, that there are constant cries in such cases that the British Government ought to help the British creditor, which means that the British Government is by force to realise the British creditor's foreign securities; but the British Government never can or ought to do so. It *ought* not, because the cost of the necessary fleets and armies would be paid by the whole nation, and not by the individual foreign bondholder, so that we should be taxing A to benefit B; and because our whole foreign policy would be fettered in great and essential duties by the teasing cross-threads of these unceasing disputes. And our Government cannot, if it would, for no fleets and armies, no taxation, would be enough to meet such a liability. Our lenders would lend any number of millions to any Government, however wretched, if they thought that our Government would collect their debts and obtain their securities.

But the memorialists will say:—"We quite assent to this doctrine as a general rule; we do not wish the "English Government to collect other people's securities; "they must stand or fall by themselves; but this is a "peculiar case, and there are good reasons why the "British fleet should be used for us, though not for "others." The argument from exception is always a dangerous and delicate argument. The present Chancellor of the Exchequer once said, "that on some point or other, everybody "considered himself an exception to the rules of morality;" and foreign bondholders are apt to think that, upon the one point of getting them paid, their case is quite an exception to the common doctrine of non-intervention.

What is the Venezuela case, as it is stated distinctly and clearly in the "memorial?" First, they say that they lent the money in reliance on English help, and upon the credit of the English State—at least, that is what the plea is meant to come to, and what it must come to if it is to prove a case for intervention. The exact words are:—"4. Whereas the "original Venezuela bondholders were induced to subscribe "to the loan of 1862, from the important circumstance that "Her Majesty's Government had given permission to Mr "Orme, the British Consul-General, to superintend the due "execution of the objects of the loan, and to collect conjointly "with the agents of Messrs Baring Brothers and Co. the pro-"ceeds of 55 per cent. of Customs' duties specially to be hypo-"thecated, the holders of those bonds entertain the conviction "that they have a special claim upon the consideration of "Her Majesty's Government."

But we do not think that in 1862 anybody had a "conviction" that the British Government was liable. For the rate of interest was 6 per cent., and the price of issue 63, so that the lenders clearly thought it a speculative transaction, because of the very high interest which they charged. They knew they were not lending to the British Government, for they would not have charged or have got anything approaching the half of it. And it is not reasonable that persons should enjoy the high interest suitable to bad security, and then want others to help them when the unsound nature of the securities is disclosed.

We much regret that the British Government ever allowed the British Consul to help Messrs Baring in collecting the revenue; the English Government cannot keep too studiously aloof from all loan transactions between Englishmen and foreign Governments. But still, the promise of the aid of Mr Orme in collecting the Customs' revenue while paid, is not a promise of the aid of the English fleet to collect it while unpaid. There was a reasonable likelihood that our Consul's intervention might smooth petty difficulties and pacify small disputes, and, therefore, he was permitted to help; but the use of his name does not amount to a British guarantee. The memorialists may reply—"No, we do not say it does; we only "ask for 'special consideration.'" But special consideration they have had, for they elsewhere say that many remonstrances have been made in their behalf; and, in the case of an ordinary English creditor of a foreign Government, the Foreign Office ought to leave the matter alone; and if the bondholders want more than remonstrances, they ask for what is, in fact, a guarantee.

The second exceptional matter is, that 18,443 dollars of pledged duties were paid to the British agent by the Venezuelan Government, and then taken back again. This, it is

alleged, was a robbery of British property. But such a robbery is evidently a peculiar robbery; these lenders trusted the foreign Government, and they were well warned. In a letter of Lord Russell which went the round of the papers, it was said that "protection to life and property is, before all "things, what is wanted in Venezuela, as well as in other "parts of South America." The agents for the loan circulated this letter, because in another passage Lord Russell "appreciates the efforts which, amid grave fiscal embarrass- "ments, the Government of Venezuela is making to meet the "claims" of their foreign creditors; and they must be taken to have given notice of the whole letter, and of tht fact that property was in that country insecure. But we do not suppose that the bondholders really care about the small sum of dollars which were once given over and then taken back,—that would not be a farthing in the pound upon the liabilities, past and future. What is really wanted is an armed intervention to collect the hypothecated duties, and this, we hope, they will never obtain.

It is impossible that such a question could come before a better judge than Lord Stanley. By taste and predilection, he is inclined to sympathise with the business classes; and, unless we are much mistaken, he will not aid certain of that class to get in their debts at the cost of the rest.

Annexed is the memorial recently addressed to Lord Stanley, with all the signatures:—

"*To the Right Hon. Lord Stanley, Her Majesty's Principal Secretary of State for Foreign Affairs, etc., etc.*

"The memorial of the undersigned British subjects, who are deeply interested in the maintenance of public credit.

"Showeth, That a public meeting of Venezuelan bondholders was held at the London Tavern on the 17th of May last, when the following resolutions were unanimously adopted:—

"'1. Whereas the Government of Venezuela has in the most unjustifiable manner, since the 28th of November, 1864, confiscated the Customs' duties, amounting to 200,000*l* per annum, specially hypothecated to British subjects, and, whereas Lord Stanley, in reply to a question put by the Right Hon. George J. Goschen, has stated in the House of Commons that the remonstrances addressed by Her Majesty's Government to the Government of Venezuela have been met either with silence, with evasive replies, or with vague and general promises, and that he had not much hope of redress being obtained as a consequence of such representations, yet that steps of a different character should only be taken when all other means of obtaining justice shall have failed. "It is hereby resolved and declared that under these circumstances, in the opinion of this meeting, the time has now arrived for Her Majesty's Government to adopt active measures to enforce on the Government of Venezuela the due performance of its special obligations to British subjects."

"'2. Whereas Earl Russell on the 29th of March, 1865, has declared that he considered the 18,443 dollars which had been paid to the agents of the bondholders, and taken back by the Venezuelan Government to be British property; and as the restitution of that sum has been demanded by Earl Russell, Lord Clarendon, and Lord Stanley, which demands have, however, been met by unfulfilled promises of payment, and by pretended offers of Customs' hypothecation, and of bills which the Venezuelan Government well knew to be impracticable and valueless; and, moreover, as Vice-President General Guzman Blanco stated to her Majesty's Chargé d'Affairés at Caracas in March, 1866, that Senor Antonio Guzman had been charged to treat with him Her Majesty's Chargé d'Affairés, but that he was unable to obtain even an interview with the gentleman in question. It is resolved to declare that, independently of the vindication of the just rights of British subjects, the honour and dignity of tne British Government necessitate immediate action in this matter.

"'3. Whereas it is known that the citizens of other nations have to a great extent obtained satisfaction of their claims from the Venezuelan Government in consequence of the determined attitude assumed by their respective Governments, the British bondholders deem themselves entitled to a similar protection on the part of Her Majesty's Government, which they believe ought now the more readily to be granted, since it is understood that the Dutch Government is willing to co-operate in active measures on behalf of the Dutch holders of Venezuelan bonds.

"'4, Whereas the original Venezuelan bondholders were induced to subscribe to the Loan of 1862 from the important circumstance that Her Majesty's Government had given permission to Mr Orme, the British Consul-General, to superintend the due execution of the objects of the loan, and to collect conjointly with the agents of Messrs Baring Brothers and Co. the proceeds of 55 per cent. of Customs' duties specially to be hypothecated, the holders of those bonds entertain the conviction that they have a special claim upon the consideration of Her Majesty's Government.

"'5. Whereas it is understood that a special hypothecation of Customs' duties enabled the British Government to consider and to claim such special hypothecation as British property, it is resolved respectfully to call upon Her Majesty's Government to declare that the proceeds of 55 per cent. of Customs' duties at La Guayra and Puerto Cabello, hypothecated to the British bondholders by a decree of the 1st of November, 1862, are British property.

"'6. Whereas it is desirable that, with a view of speedily obtaining the restitution of the bondholders' property unjustifiably confiscated by the Venezuelan Government, Messrs Baring should send a commissioner to Caracas. It is resolved to solicit Her Majesty's Government to invest such commissioner with the power necessary for the enforcement of the performance of the obligations contracted by the Venezuelan Government towards British subjects.'

"And furthermore—That no satisfactory answer has been received from the British Government with respect to the strong and urgent representations thus addressed to them by a large number of British subjects, who feel confident of their having a right to look to their Government for the due protection of their legitimate claims.

"That it would be futile on the part of helpless and unprotected British subjects, whose property has been confiscated by the Government of Venezuela, to make any fresh appeals to that Government when three consecutive Secretaries of State of Her Britannic Majesty have done so in vain for upwards of two years.

"That the impunity with which the Government of Venezuela has been permitted to confiscate British property is calculated to set a very dangerous example to other debtors to the British public, and thereby injuriously to affect the commercial engagements and relations between British subjects and foreign Governments.

"That the time has now arrived when it behoves the British Government to take active and energetic measures in the matter, and that any further procrastination would be alike injurious to the interests of British subjects, and derogatory to the dignity of the British Government."

THE FENIAN CONVICTS.

THERE has probably never, at any time, been a more sincere disposition to decide the fate of convicted Fenians impartially, on the gravest principles of public justice and expediency, than exists now throughout all those grades of society likely to influence the decision of the Crown with respect to the confirmation or commutation of the five sentences of death already passed at Manchester. The state of feeling has entirely changed since the first moment of angry impatience at the repetition of those futile attacks on the order of English society; and we, who a few weeks ago, were compelled to protest earnestly against the spirit of panic, are now disposed rather to deprecate the too strong reaction which is setting in for a lenient penalty. The truth is, that nothing can be more painful, than the execution of these sentences, or of any of them, is felt to be at present by almost all Englishmen. Every one now knows that the man who is believed to have committed the murder of Brett with his own hand is a youth under age, bubbling up with fierce republican feeling, who was filled with a sort of puerile chivalry for Kelly and Deasey, and whose act was probably, to his foolish imagination, one of romantic heroism rather than of unjust and cruel violence. His colleagues—three of them at least, for we can scarcely believe that the fourth, Maguire, has not been convicted under a mistake—are ignorant, frank, muddle-headed Irish patriots, who make no concealment of their rebellious sympathies, but repudiate any act of personal violence, and who were in fact, we believe, captured without the slightest effort to do violence to the persons of the police who captured them. All these are circumstances which cannot but impress the more educated part of the English public. Think of these convicts as they may, they can feel no *horror* of their personal guilt. It is quite impossible to feel towards them as we felt towards Palmer, or Catherine Wilson, or even towards Townley. No one, whatever view he may take of the duty of carrying out the sentence at least in the case of the principal actor in the murder, can regard these men as he would abandoned burglars, or treacherous poisoners, or even men who in the transport of jealousy had deliberately taken away life. And when no feeling of personal horror is entertained towards the criminal, it can never be otherwise than a most painful violence to public feeling to demand the infliction of the extreme penalty for the crime.

Still, we must remember that the execution of the sentence of the law is not, and ought not to be, affected by this one consideration solely,—probably not even chiefly. If we refuse to punish with the extreme sentence any class of criminals

whose *motives* can be cleared of infamy, we shall run a great risk of encouraging the commission of common crime under the cloak of political motives. If we spare Irishmen who have shot down English policemen, on the ground that their heads were filled with windy political dreams, how can we refuse to spare Englishmen who may at any time take savage revenge on their Irish neighbours, if they succeed in making it appear that their motive was to anticipate an expected assault from the Irish. When once there begin to be grave inroads on the order of society, we cannot afford to take motive much into account in punishing those who attack it. Some of the Exeter bread mob may, for anything we know, be able to show some evidence of ignorant fanaticism as the source of their lawless proceedings. It is said that the riot was connected, at least, with the prohibition to hold the usual 5th November bonfire in the Cathedral yard. Suppose evidence of this could be brought, and some of the criminals could be shown to have joined in the riots from some muddle-headed panic about Jesuits or Roman Catholics? Should we give them more lenient sentences for such an excuse as that? Why, it might be made the veil for the most dangerous and malicious acts in future, and a veil almost impossible to tear away. When once there is any rise of the disposition to set the law at defiance, the first interests of society require that this spirit of anarchy should be put down with a good deal of sternness, and without inquiring too minutely into the palliations of individual guilt. Nothing is so disastrous as any spread of the feeling that civil order may be violated with impunity. There is too much reason to fear that such a feeling has been growing rapidly for the few last months. Perhaps it began with the weakness of the Government at the time of the Hyde Park Riots. It certainly took an immense impulse from the Irish rising. Latterly, there have been but few weeks without the record of some outrage on the police, often without any political bearing, but still showing that the respect for the force of the order-keepers of English society is on the decline. The last, and in some respects most startling symptom of this state of feeling, is the bread riot in Exeter. Somehow or other, a feeling has run through the discontented classes that it is not so unsafe as it once was to take the law into their own hands. For many who have done so have escaped altogether; not a few who have done so both in England in connection with the Park riots, and in Ireland in connection with the Fenian movement, have been lightly punished. The public esteem for the repressive force of the Government has been greatly depreciated of late. Nothing is more essential for the benefit of society than to revive it. Therefore, we think that considerations affecting the individual guilt of criminals of this class, and calculated to lighten the penalty, should not be easily admitted.

There is another and even graver consideration on the same side. The worst effect that could result from these Irish outrages on English order would be anything like town-wars between the Irish and English quarters. Now, it is well known that there are many parts of all our great towns where English operatives are hardly safe in expressing their opinion of the Fenian crimes. There seems no reason at all to doubt that the bandsman, M'Donnell, really lost his life in consequence of the opinions which he and his companion Furber had been passing, in the public house where they had been drinking, on the Fenian conspiracy. This is only a sample of the state of feeling in plenty of English towns where there are strong Irish colonies. Now, the English workman feels a very just resentment and irritation towards the authors of this monstrous condition of things. He feels it to be a shameful and unjust thing that his life should be endangered, if he avows the common feeling of all Englishmen about this babyish conspiracy. He is keen for the punishment of any one who can be shown to have violated the law in this direction. If mercy is shown to the murderer of the policeman Brett, the English operatives' feeling is pretty certain to be that there is no justice to be obtained from Government in the matter, and that the only course left for them is to take the law into their own hands in case of any obvious risk, and chastise "Irish "bullies" on the spot. Should this state of feeling once spring up, evils infinitely worse than any we have endured may be expected. A war of races in the lowest quarters of Liverpool, Manchester, Birmingham, London, and other large towns, would be a calamity, the extent of which no one could calculate; yet those who know the present condition of feeling among English workmen best, are most seriously concerned lest this sort of violence should break out. If it is true, as is stated in one of our contemporaries, that the London police force are resigning in numbers on the ground that they will not serve any longer without being armed—so often are they now threatened with revolvers, as in the Burton Crescent affair the other day—there could not be a more remarkable proof of the necessity of firmness in inflicting the extreme sentence on any who have been fairly found guilty of violence to the police.

Nor can Allen or his associates in their hearts blame the English Government for defending the order of English society with some sternness. Allen, at least, admits fairly that he knew he was risking his life in acting as he did, and asserts that he was prepared to forfeit it for the end he had in view. He cannot blame the guardians of English order for demanding that forfeit. However much visionary and silly fancies may have obscured his own sense of wrong,—even admitting that morally he has absolutely no guilt on his soul in the matter,—he knew exactly what risk he ran, and why he ran it, and cannot complain of injustice in reaping that which, with his eyes open, he carefully sowed.

On the whole, therefore, while admitting to the full the extenuations that in all probability diminish the personal guilt of this murder,—while prepared to concede that were Ireland alone concerned, it might be wiser, though not juster, to be merciful,—we are inclined to hold that the cause of order in English society demands severity, and that by sparing life now, we may only too soon repent that we have sacrificed many lives that we might have saved in the immediate future.

FRANCE, ITALY, THE REVOLUTION, AND THE POPE.

THE Roman question has this week, probably, passed into a phase in which it ceases to involve an immediate and urgent alternative between war and peace, and subsides into the chronic condition out of which the events of the last few weeks have dragged it. The French remain, for the present at all events, at Civita Vecchia, if not in Rome. The Italians have retired before the Emperor's threats, and recrossed the frontier. The Garibaldians have been utterly defeated by superior forces, and Garibaldi has not perished in the attempt, but been sent a prisoner to Spezzia by the King. The Romans have not risen against their Papal Ruler. The Pope, by the active aid of France, has recovered his endangered sovereignty. Let us glance at the situation thus left, and see how the crisis through which the secular power of the Pope has just passed leaves its French patron, its constitutional opponents, its revolutionary foes, and the prospects of the Papacy itself.

France appears for the moment to have enforced her will with an almost grand air of dictation on reluctant Italy; to have vindicated her pledges to the Pope, simply because the pledges of a great Government are sacred; and to have succeeded, with the help of but a single brigade of French soldiers in bringing about the actual result. But the more the matter is looked into, the less reason does there seem for the Emperor to congratulate himself on what has happened. He has utterly alienated the great nation which was his surest European ally. The Italians, in general, regard his recent Roman policy as not only hostile, but in effect treacherous. It is now certain that the Antibes Legion was never a Papal force in the sense in which the old Swiss guard was a Papal force. Its commander announced it as the mere vanguard of the French army, and so, in fact, it has proved. The spirit of a French force was in it from the beginning. In the first attack on the Garibaldians at Monte Rotondo, before the French landed, it advanced to the cries of *Vive l'Empereur, Vive la France.* Now that this cry has been justified by the actual participation of a French brigade (the Polhès brigade) in the recent bloody victory over the Garibaldian troops, the Italians will justly feel that the secular power was *not* equal to defending itself against the Italian volunteers; that it could have done nothing effectual but for the never withdrawn moral, and subsequently the physical, support of France. We need not doubt that this has really wiped out the feeling of gratitude cherished by both the Italian people and the Italian Government towards the Emperor. The September Convention was *not* observed faithfully either by France or Italy; but the casting of the French ægis over the Antibes Legion

was the *first* step towards bad faith. As it is, the Italians cannot help seeing that their national policy has been defeated, and their national pride humiliated by French bayonets. It is not likely that either Government or people will forget the lesson. Whatever prestige the Emperor of the French may get, for the moment, out of the issue, he has to weigh against it the complete alienation of his surest ally. Nor is that the only ground on which he will feel that his victory is quite as much loss as gain. He has not only not got himself out of the most perplexing of his diplomatic engagements, but he is further from extrication than ever. He has succeeded in proving that the situation in Rome is anything but impossible; that for the future an "advanced guard" of France, like the Antibes Legion, steadily supported by the promise of further aid against volunteer irruptions, is really sufficient to prop up the Holy Father on his throne. The success of his policy has been so complete that he has no conceivable reason for withdrawing from it. Some French journals, by no means Ultramontane, point out this, and demand that the Pope shall be maintained firmly in the possession of his present territory, though he may be advised and urged to make any other concessions that may seem politic towards reconciliation with Italy. The Pope will reply as he has always replied—that no such concessions are either desirable or necessary,—that he is quite satisfied with the *status quo*,—that he needs only such temporary support as the Emperor has given, and the promise of its renewal in case of need, to make him quite comfortable,—and that he is not really sovereign if he may not rule as he pleases within his own province. To this the Emperor has no reply. He has succeeded so well at such a slight expense of effort, that he can scarcely find any excuse, short of disapproval of the secular power, for abondoning it. He has demonstrated to the world that the French can really uphold the secular power without keeping any French troops in Rome. Even the necessity for an expedition will scarcely occur again if France is known to continue as much in earnest as she has recently shown herself. The regular army of Italy has retired before the French without risking a shot. The Garibaldians would not venture to try again after so disastrous a defeat. The Emperor has done his work so thoroughly, that he has made it more difficult than ever to withdraw from a position which he knows to be a false one. He has turned the September Convention from a provisional arrangement, notoriously temporary and make-shift, into a working treaty, which will satisfy the Pope, and keep the Italians at bay till they find some opportunity of attacking when France is engaged elsewhere, and cannot vindicate her pledges. That is scarcely a position on which the Emperor can congratulate himself. He has made it essential for Italy to look out for an anti-French ally.

But the Italian throne and Government has lost the most. Nothing can be more contemptible than the position in which the Italian Cabinet is left. General Menabrea, in an exceedingly able circular, defended the order to the Italian troops to cross the frontier, on the ground that the Italians were exactly on the same basis as the French under the Convention, and had an equal right to intervene with the French;—when, therefore, France decided that intervention had become necessary, and the French troops landed at Civita Vecchia, the Italian troops crossed the boundary of the Papal States. That, no doubt, was a very tenable position to take up, and very subtly defended. But its logic absolutely implied that the Italians would, at least, never retire while the French remained. They were to act on a perfect equality. They were to restore order together. Yet the French had no sooner put down the Garibaldians,—a process in which the Royal army did not aid,—than that army retired across the frontier, leaving the French flushed with success, and in occupation both of Rome and of Civita Vecchia. It is impossible to conceive a greater practical stultification of General Menabrea's despatch. To cover his humiliation, the King of Italy had, indeed, to profess a belief that the French also would immediately retire. But the French showed (and as yet show) no sort of intention to retire. They had beaten back the King of Italy's unruly subjects, and restored Rome to the Pope, without the slightest co-operation from the Italian army. That army will now appear to have crossed the frontier for the mere purpose of bravado, and to have retired at the first alarm. There is, indeed, another interpretation which will be put on the movement by the Republicans of Italy. They will say that General Menabrea's despatch and the passage of the frontier by the Italian army were mere *feints* to disarm the party of action, and enable the Government to put down the volunteer movements in the great towns, without risking its own overthrow. Directly the Garibaldian volunteers were scattered by defeat, and the cause, therefore, hopeless, this brave external show, this pretence of taking up an equal position with France was at once thrown aside, and the King, having passed the critical moment when the revolutionary party had still heart and hope enough to overthrow the throne rather than give up their movement, came out unblushingly as the mere vassal of France. The Italian Government, and the throne itself, cannot but suffer gravely from what has happened. If they never for a moment thought of fighting France,—if they were wholly unable to fight, and knew their inability,—then to precipitate, as they did, a crisis, in which they knew that they were impotent, was treachery to the nation. General Menabrea had no right at all to maintain the equality of Italy with France under the Convention, or, at least, to order the practical assertion of that equality, by moving into the Papal territory without the consent of France, if he was not prepared to stand his ground with firmness when taken up. He knew that he risked war, and if he was sure that the nation could not make war with any hope of success, he should have been content with protest, and a frank avowal that he yielded to force and not to reason. As it is, he has been guilty for Italy both of braggadocio and cowardice within a single week.

The Left, the Revolutionary party, and the Garibaldians, have gained no credit from these events. They have visibly forced on a crisis for which the nation was not ripe. They have humiliated the regular Government of Italy by openly defying its formal prohibitions, and they have gained nothing, but lost much for the nation, by so doing. The Garibaldians have, indeed, fought boldly, but they have not even had the excuse of a genuine insurrection in Rome—*the* excuse which Garibaldi himself put in the front of his reasons for moving southward. The party of action have acted and failed. They have neither surprised the nation into explosive force, nor gained their immediate end. For the future, they will be less formidable and less self-confident.

The Pope and the secular power alone have gained anything by what has happened,—and they are *undoubtedly* more secure than they have been for many years. Rome has not risen. The Antibes Legion, though it has proved itself to be really "the vanguard of the French army," has shown immense enthusiasm and valour. The Pope has stood firm. France is pledged anew, and pledged more awkwardly than ever to support him. The Italians have crossed the frontier and obtained *plebiscites* in their own favour, only to cross back again and disavow all intention to accept the *plebiscites* so obtained. The Archbishop of Westminster may fairly appeal to the ægis which Providence seems in all these disastrous circumstances to have cast over the Holy See. As he looks at things, he cannot well doubt that his prayers have been heard. At least, if they had been, the chapter of events could scarcely have been more favourable to the successor of St Peter. As *we* view things, these disasters are the natural results of rashness, weakness, stratagem, and imbecility. But the result cannot be doubted. Every one concerned in the recent events has lost power, or freedom, or prestige, except the Pope, who has gained much. The temporal power cannot last long. But it takes out a new—we trust a very short—lease of life, from the *fiasco* of 1867.

EXPERIMENTAL LEGISLATION.

Many important subjects from time to time come up for public discussion, where the arguments on each side seem so equally balanced in cogency and weight that it is difficult for even competent and impartial judges to arrive at any confident conclusion. It sometimes happens that of two measures proposed, or two lines of action suggested, to meet a social evil or a political emergency, the respective advantages and disadvantages of each are so manifest and great, and so ably set forth in turn by statesmen of proved experience and high authority, that Parliament may not unnaturally hesitate about adopting either. Oftener still, perhaps, experience itself is at fault, and the past throws little light upon the probabilities of the future; it is obviously impossible for any knowledge to be certain that it has mastered all the conditions of the pro-

blem, or for any wisdom clearly or confidently to foretell what will be the result of this or that scheme of legislation; everything seems more or less conjectural; we cannot tell whether the hidden dangers may not outweigh the patent recommendations, nor how far the incalculable forces of human passion and folly may not stultify and discredit our soberest estimate of likely consequences and operations. In all political questions, so many elements, all only partially measurable, have to be taken into consideration, so many possibilities as well as probabilities have to be allowed for, that half our legislation —unless, perhaps, where purely economic principles are at issue—partakes inevitably of the character of a "leap in the "dark."

Now, in cases of this sort, common sense appears to suggest a course of proceeding which yet we never by any chance, or only in the rarest instances and in the most timid and infinitesimal degree, adopt. When we cannot *know*, why should we not *try*? Why, whenever practicable—and it constantly is perfectly practicable—should we not ascertain the effect of a measure about which we doubt and doctors disagree in one or two districts, instead of introducing it blindly over the whole country? Why, of two rival schemes for correcting a great mischief or rectifying an admitted grievance—neither of which schemes seems perfect, and each of which has yet much to recommend it—should we not try one scheme in one place, and the other scheme elsewhere? A wise and modest physician when dealing with a new remedy or a new disease—or with diseases and remedies which he is conscious he only imperfectly understands—does not administer the same medicine in the same doses to all his patients, but gives one drug to one and another to another, or ten grains to one and five grains to another, and then watches their operation, and determines upon his ultimate and general mode of practice, according to the ascertained result. Why do the physicians of the State so seldom dream of acting in a similarly rational fashion? Why, in a word, being ignorant and devoid of the gift of unerring foresight, are we not more tentative and experimental in our legislation? There are surely scores of instances where we might be so easily, safely, and with manifest advantage; and the amount of political wisdom and experience we might accumulate by such a course of action is incalculable. For example:—Many sincere and sagacious men, philosophic thinkers as well as mere routine Radicals, are convinced that the ballot would prove an effectual cure to both electoral intimidation and corruption, and that it would be as harmless as complete. Other politicians, just as qualified to form an opinion, believe on the contrary that it would prove almost a total failure; that it would not eradicate bribery or bullying, but merely change their character and manifestations; that it would increase and intensify deceit and lying, and produce a very bad indirect effect on the manly independence of electors; and would enable nearly as many men to vote against their consciences as it would protect in voting honestly. It is impossible to pronounce with absolute confidence which set of arguers are right, or in what proportion truth is divided between them. Then why not try? Why not introduce the ballot in half a dozen counties and half a dozen towns, and be guided by the result of half a dozen general elections? We may be pretty certain that at the expiration of that time the controversy would be settled one way or the other:—controversialists at least would have ascertained facts to argue from, and hopes and fears would alike be either justified or dissipated. In like manner, with regard to voting papers:—One party favoured the scheme most strongly, the other deprecated it as eagerly; but both talked wildly on the question, for the simple reason that both drew their arguments from its expected consequences and operation, about which neither *knew* anything, and could therefore only dogmatise, prophecy, and *guess*. If our legislature had but had the good sense to determine that voting papers should be introduced for a few years in a few districts, the question would soon have been for ever set at rest;—the scheme would either be introduced everywhere or discarded everywhere, and by general consent.

We might easily multiply illustrative examples, and examples of a more important character, but the above will suffice to explain our meaning, and to lead us to the subject we have more immediately in view. There is one question which is now pressing upon us with unprecedented urgency,—which will admit of no delay, no trifling, and no blunders,—which is singularly grave, singularly difficult, singularly complicated by the fierce passions engaged on both sides of the controversy, —the solution of which depends, or ought to depend, mainly on the results which would flow from the adoption of this or that principle or scheme, while yet those results are peculiarly difficult to foresee, or at least are matters of either discrepancy of opinion among those concerned as well as among grave, impartial, and observing politicians,—a question, therefore, especially fitted for decision by experiment—by such fair, limited, adequate experiment as is practicable, safe, and *uncommitting*. We mean the Irish land question. Lord Dufferin, in his address to the Social Science Association at Belfast the other day, threw out a wise and prolific suggestion on this subject, which well deserves most deliberate consideration by our statesmen. Politicians differ *toto cœlo* as to the way in which this great question ought to be decided, but they all agree that, till it is decided one way or the other, there will be no tranquillity in Ireland and no comfort for England. Some argue that it is but just that the land should be owned in one shape or another by the people who live upon it and cultivate it;—that this conviction and the passion for property in land are so deep-rooted and so fierce in the Irish peasant, that yielding to them will loyalise and pacify him at once, and that nothing else can;—that "fixity of tenure" or actual ownership would develop in him, as by magic, those virtues of industry, forethought, good husbandry, and abstinence from undue reproduction, in which he has hitherto been so deficient;—that, in short, *la petite culture* and peasant proprietorship are the remedies for the woes of Ireland, and the true mode of inaugurating her prosperity and developing her resources. Others take precisely the opposite view:—they argue that "fixity of tenure" cannot be granted or insured, because it involves and implies regular payment of the stipulated rent, and that the Irishman will constantly fail in this, and thus necessitate ejection or distraint, and its consequent irritation, disloyalty and outrage;—that the Irish peasant, if fixed in his small holding, would increase and multiply as he did in the cottier times, and thus get the country once more overrun with multitudinous paupers as before; that if he became owner in fee simple, he would instantly sublet his farm in smaller lots, on which the tenants could not live, or could live only in wretchedness;—that the Irishman, left to himself, is essentially and incurably a bad, unscientific, unimproving, and exhausting farmer;—and that to hand over the soil to him as he desires in small properties or holdings would be simply to sink back into the Slough of Despond from which the country is only just emerging, and to begin to tread the old vicious and fatal circle once again. We have, of course, our own distinct opinions on the subject; but why should we not, in place of idly *speculating*, practically *ascertain* which anticipations are correct? Why should not the Government—which has taken, which has been forced to take, upon itself so many strange functions in Ireland—purchase encumbered estates, or the estates of willing sellers, on a great scale,—say half a province, or three or four counties, such as Donegal, Mayo, Galway, and parts of Limerick and Cork? Why should it not then proceed to let one portion in suitably-sized farms to suitable tenants, at reasonable and remunerative rents, with such precautions against subletting as are equitable and could be readily enforced, and with only such provision for enforcing payment of rent by process of eviction as is obviously indispensable; and thus try the Hindoo Ryotwar plan, or the Irish "fixity of tenure" plan, on a scale which would render the experiment a fair and conclusive one? Why should it not further *sell* out and out, with a simple Parliamentry title, other portions of its acquired territory, to such Irish purchasers as had means of purchase or could give adequate security, and then leave them to "do what they will with their own?" Probably not a generation, perhaps not half a generation, would elapse before all men might satisfy themselves not only which set of political prophets had shown the sounder wisdom and the juster appreciation of the Irish nature, but which scheme—absolute ownership, or fixity of tenure with a determinate yearly payment, or the existing landlordism and tenant farming,—was best adapted to the country and the people,—and during that generation or half-generation, at least, we might look for peace. And a generation of peace might be the salvation of Ireland: it would, at all events, be a blessing and a novelty. And during that generation, we should have had three agricultural experiments working side by side—*la grande culture*, under wealthy and powerful and enterprising

landlords,—*la petite culture*, under controlled tenancy,—and peasant-proprietorship in its unrestricted form;—so that we should be unteachable indeed if we could not draw irrefragable conclusions from the spectacle.

ON THE OCCUPATION OF LAND IN ENGLAND.

(COMMUNICATED.)

THERE is a class of political writers and speakers in this country who are never tired of denouncing what they call the Land Laws of England, as a relic of feudal barbarism, and the landowners as a set of persons who strive to maintain and enforce these laws for their own interest, and whose existence and conduct on a whole is injurious to the welfare of the community at large.

These gentlemen usually regard the maintenance of a large class of what are called Peasant Proprietors, in other words, of persons subsisting by the cultivation of small portions of land, their own property, as essential to the moral and political well-being of a country.

They point to France, Belgium, Switzerland, &c., &c., as being in possession of this advantage. They assume that England once possessed it in her yeomanry, and that the gradual absorption of the yeoman properties into larger estates is an artificial process, which could not have occurred unless under the influence of unwise legislation.

It is no part of the writer's purpose to enter upon these facts and opinions in their entirety. His object is to give reasons for supposing that the system now existing in England, under which the separation of the ownership from the occupation of land is the general rule, and the landowners and farmers form separate classes, is one which, for England, possesses great economical advantages, under which alone our vast population could be fed, and which has grown up naturally under the influence of the circumstances in which our country has been placed.

A peasant proprietary live upon the soil, and, as a rule, raise but a small surplus for sale. If the amount of capital and labour employed by them in a given district could be truly calculated, it would be found that their productive industry was most wastefully employed, and that a set of farmer capitalists occupying the same extent would produce far more and with a less outlay.

The comparison in kind, although not in degree, is something like that between a domestic manufacture and that in a factory—between the spinning wheel and the jenny.

The small cultivator carries on all his operations at a disadvantage. He can never do his work expeditiously, and rarely at the propitious moment. He must keep too many horses or oxen for his general purposes, or he will not have enough to plough his land, or to carry his corn at the right time. He is probably ignorant and ill-educated; and, if otherwise, has not the means of purchasing and employing improved implements and expensive animals.

If the ownership of land were in itself so very desirable, it is very remarkable that the tenant-farmer so seldom attempts to become a landowner. Yet that he does not do so may be a matter of observatiou in every part of the kingdom.

It is difficult to imagine that in a country where there is found a set of capitalists who specially devote themselves to the cultivation of land, and who, with abundant opportunities of becoming proprietors, deliberately prefer to hire the land of others, adopt in so doing a course hostile to their own interest: or that if they are right in their views as respects their own interest, they thereby act injuriously to the community at large.

The reasons for their conduct are obvious. The tenant farmer would make a great sacrifice in purchasing land; he would be employing his money at 3 per cent., instead of 15 per cent. As things are now he enters into a sort of partnership with his landlord, in which the latter is content with a very moderate return for his share in the joint enterprise. Putting the matter in another point of view, it may be said that the farmer borrows the largest amount of the capital at a rate of interest which does not exceed 3 per cent.

Upon similar grounds the yeoman sells his freehold. He will not hold a sort of property which yields him 3 per cent. when he can get for the money which he obtains for it, perhaps 5 per cent. on a perfectly secure mortgage, 7 per cent. by building or buying cottages, or from 10 to 15 per cent. in some industrial enterprise. The truth is, that in spite of our land laws, however bad they may be, the principle of free trade regulates in England the ownership and occupation of land.

Notwithstanding entails and settlements, there is plenty of land on sale in almost every district, and any one desirous of becoming a landowner may always buy land at the market price, say 30 years' purchase, that rate, be it remarked, being lower than in most rich and civilised countries, such as France, Holland, and Belgium. Improvements in the law which would tend to make land more easily transferable are, of course, desirable, and for none more than the landowner; but the bugbear of an uncertain title, or the expense of transfer, greatly less than the corresponding charges in France, are rarely obstacles to a willing purchaser.

Lavergne's book, in which he compares the agriculture of France with that of England, shows decisively the great superiority of the latter, and that although the climate and soil of France are more favourable than those of England. Surely the maxim, "By their fruits ye shall know them," is applicable in this case.

The writer is, of course, aware that there are large estates in France, that money rents are usual in some provinces, that the Metayer system exists to an enormous extent, and that some of the largest properties in Europe are to be found in Belgium, which some persons imagine to be wholly cultivated by peasant proprietors. These facts may be considered to cut both ways. At any rate, their bearing may be left to the reader's consideration.

So natural does the general occupation of the soil by tenant-farmers in England appear to the writer, that he is convinced, if by some great political convulsion or any other cause, the number of landowners were to be increased hundredfold without the enactment of laws specially intended to prevent the accumulation of land in fewer hands, a steady and continued sale of property would take place, leading sooner or later, as its final result, to the recreation of large estates.

In coming to this conclusion, the writer feels no small regret. He is by no means unaware of the many social and political advantages connected with the existence of a class of persons supporting themselves by the cultivation of small quantities of land, their own property. Such persons, if usually poor and ignorant, are honest, thrifty, and industrious, and form the best ballast, when the vessel of the State is exposed to political or social storms.

If Peasant Proprietors cannot be expected to exist in England, and, if simply in an economical point of view their existence is hardly to be desired, there seems a reasonable hope that the system of co-operation may be usefully applied to agriculture, and that small farmers may be enabled to carry on their business successfully, through the means of hired implements and machinery.

The number of cottages, with or without gardens, owned by their occupants is annually increasing, because this description of property yields a satisfactory return. The same thing would take place with small quantities of land for cultivation did they hold out the prospect of paying a fair rate of profit to the purchaser.

In France, the offer of a large estate in small lots is that most likely to obtain the highest price for it.

In England, it does not answer to divide an estate into lots unless under exceptional circumstances, such as its vicinity to a large town.

It is quite true that more capital might be employed on the land of England with advantage, and that what is employed might be better employed; but the fact is no less true with respect to other industrial occupations.

Assuming that the existing division of land is, as a general rule, the most suitable for England in an economical point of view, few benefactors could be found more worthy of the national gratitude than he who could devise a system under which small quantities of land could be profitably occupied by tenant-farmers.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

City of Glasgow Union.—Considerable progress, the report stated, had been made during the half-year. The high level bridge over the Clyde, and the Port Eglinton viaduct, were nearly finished, and most of the line would soon be ready for the permanent way. It was anticipated that a portion of the line would be opened next spring.

Dutch-Rhenish (New Shares).—A special settlement in the new

20*l* shares has been granted by the Committee of the Stock Exchange for the 8th instant.

Denburn Valley.—This junction, between the Great North of Scotland and the Scottish North Eastern at Aberdeen, was opened at the beginning of this month.

Finn Valley.—The report stated that the receipts for the half-year ended the 30th of June, were 11 per cent. more than those of the corresponding half of 1866. The directors again regretted being obliged to recommend the payment of the divdend on preference shares only. The board reminded the holders of original shares that it rested with them to take the means to enable the directors to propose a dividend for the ensuing half-year, as surplus revenue was at present absorbed by capital. The chairman hoped that the proprietors would take upthe remaining 3,500*l* 6 per cent. preference shares.

Grand Trunk.—A conference has been held between the directors and the deputation appointed at the meeting on the 31st ult. The result is, that the objectionable clauses in the Bill to be presented to the Canadian Parliament are withdrawn. The powers to be given by the Bill are now confined to the raising of a sum not exceeding 500,000*l* in Equipment Mortgage Bonds No. 2, which are not to interfere with the rights of the existing Equipment Bonds, and to varying the terms of the agreements with the Buffalo and Lake Huron and Champlain Railways, with the consent of those companies.

Great Eastern.—A diminution of the train service has been made this month. Two directors, Mr Josselyn and Major Jervis, have dissented from the rest of the board as to the appointment of Mr Watkin as chairman of the company. They argued that Mr Watkin's other engagements, viz., the chairmanships of the Manchester, Sheffield and Lincolnshire, the South-Eastern and the Grand Trunk companies, would prevent his giving the requisite attention to the Great Eastern.

Great Southern of India.—It is stated that the last issue of stock has all been placed.

Highland.—At the meeting, the report, announcing a 2 per cent. per annum dividend was adopted.

Metropolitan (New Shares).—A settlement in the new redeemable preference shares was appointed by the Stock Exchange Committee for Friday, the 8th instant.

New Brunswick and Canada.—From a statement of the liquidators, it appears that a sale of the line has been advertised to take place in Fredericton, New Brunswick, on the 7th December next, on behalf of the St Stephen's Banking Company, who are creditors for about 7,200*l*. As official liquidators appointed in England cannot by law control the proceeding in colonial courts, they think it doubtful whether these proceedings can be stopped. The debenture debt is said to be about 250,000*l*. The line is likely, according to recent reports, to be sold for a nominal consideration.

North Staffordshire.—The Leek branch has just been completed.

South Eastern of Portugal.—At a meeting of the bondholders, Mr Laing said that the Government were to take the railways, and, besides compensating the company, were to give bonds, bearing 7 per cent. interest, in exchange for the company's bonds and debentures, amounting together to 430,000*l*, with a sinking fund of ½ per cent. for their conversion.

BANKS.

Chartered Mercantile of India, London, and China.—In the interim report, the board show a half-year's profit of 82,502*l*. The winding-up of the previous year's operations has entailed loss, which it is anticipated will be covered by the end of the year. The interim dividend—3 per cent. per annum—leaves a balance of 60,002*l*.

English and Swedish Bank, Limited.—The liquidators have issued a notice to the proprietors of payment of the third instalment of 3*l* per share of the net assets of the company on the 2nd December, making 17*l* per share returned.

European Bank, Limited.—From the statement of the liquidators it appeared, at the meeting on Wednesday, that the liabilities had been reduced to 369,985*l*. The cash in hand was 25,344*l*; and 281,000*l* was due from three French companies, which was expected to realise 181,000*l*. A call of 2*l* 10s per share was expected to realise 75,000*l*, and admit of a dividend payment in January next.

London and South African.—A meeting of the shareholders was held on Thursday last. The net profits for the six months ended June 30 amounted to 14,082*l*, out of which it was agreed to distribute 8s per share, in anticipation of the yearly dividend.

New Zealand Banking Corporation.—A second dividend—3s in the pound—has been paid to the creditors. The bank stopped in May, 1866.

Royal Bank of Liverpool.—At a meeting on Thursday, it was resolved to wind up, under the Companies' Act, 1862.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

City of London and Colonial Financial Association, Limited.—Vice-Chancellor Stuart has fixed the 16th inst. for the appointment of an official liquidator.

MISCELLANEOUS COMPANIES.

Anglo-Romano Gas Company.—An interim dividend of 4 per cent. has been announced for payment.

British—Reduction of the National Debt.—The sum to be invested during the current quarter, on account of the sinking fund for reduction of the National Debt, is 672,682*l*.

Equitable Gas Company—The revenue account for the half-year ended the 30th of June last showed that 49,967*l* had been received, and 32,775*l* expended, leaving a balance of 17,192*l*, from which the directors recommended the payment of a dividend for the half-year of 5 per cent., or at the rate of 10 per cent. per annum, less income tax. The balance sheet showed that 280,933*l* had been expended on capital account. The board regretted that a settlement of the Metropolitan Gas Companies' question had not been determined.

North Atlantic Telegraph Company.—Particulars of creditors' claims are required to be forwarded to Mr William Cooper, the official liquidator, by the 4th December, the 18th December being appointed for their adjudication.

Royal Mail Steam Company.—News of the hurricane, which occurred at St Thomas, on the 29th October, was received here on Thursday last. It appears that four of this company's steamers are wrecked, and two others dismasted. A large mass of shipping has also been destroyed.

Vauxhall Bridge.—Half-year's income, 6,916*l*, showing a small increase. Reserve, 8,219*l*; dividend 18s per share upon 5,600 shares. By the new assessment, made by the parish of Lambeth, the rates are increased about 377*l* per annum.

Wallachian Petroleum Company.—An extraordinary meeting will be held on the 19th inst., when it will be proposed that the undertaking shall be wound up voluntarily.

MINING COMPANIES.

Anglo-Brazilian.—Gold forwarded to Rio—1,521 oitavas for July, 2,525 for August, 1,424 to 20th September. No important change.

Don Pedro North del Rey.—Produce for September, about 10,500 oitavas. Forwarded to Messrs Moore and Co., 25,606 oitavas.

Kapunda.—A dividend of 10d per share has been declared, payable on the 23rd inst.

Lincoln Gold Company, Limited.—Capital 160,000*l*, in 2*l* shares. The object of this new company is to acquire and work some gold mines in Placer County, California. A railway is said to be in the vicinity, and that a 40-stamp mill is in the course of erection. The terms of purchase are 70,000*l*—one half in cash from capital, and the other from profits, after 10 per cent. has been paid to the shareholders of 40,000 shares. Of the remaining 40,000 shares, 20,000 will be issued, and the rest will be given free to the A shareholder's after the vendor's claims have been satisfied.

Rossa Grande.—Advices to the 27th September stated that the lode had again been discovered, and was of rich quality. Captain Brokenshar hoped that the yield would continue longer than the last.

St John del Rey.—The directors have received a report, of which the following is an outline, dated 28th September:—Produce, second division of September, 11 days, 13,593 oitavas; yield, 6·806 oitavas per ton; remittance, 90,002 oitavas—864·652 lbs troy.

United Mexican.—At the meeting the report was adopted, and a resolution was passed authorising further operations.

West Caradon.—Debit balance, 2,070*l*. A call of 2*l* per share has been made.

Yudanamutana.—Nothwithstanding the depressed state of the copper trade, the directors were enabled to state, at the meeting on the 5th instant, that the prospects of the mines had improved during the year.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday.

The *Moniteur* has published the following return of the Bank of France, made up to the 7th inst. The return for the previous week is added:—

DEBTOR.	Nov. 7, 1867. f	c		Oct. 31, 1867. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2
Reserve of the bank and branches	22,105,750	14	.....	22,105,750	14
New reserve	4,000,000	0	.....	4,000,000	0
Notes in circulation and at the branches	1,154,690,625	0	.....	1,194,228,175	0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	34,802,312	3	.....	36,976,243	89

The Bank return of to-day is very unsatisfactory. It shows that the discounts are lower than last week by 53,182,000f, and that the coin and bullion have increased 17,190,000f.

The Bourse down to Monday was in a state of great alarm relative to the Italian question, and the complications it seemed likely to produce. A heavy fall in almost all quotations was the consequence. But on Tuesday, the news of Garibaldi's defeat sent prices up vigorously; and the news yesterday of the mock withdrawal of the Italian army from the Pontifical States, which it had invaded by way of bravado to France, produced a new advance. To-day, however, a fresh subject of political anxiety has disturbed the market. A despatch of Prince Gortschakoff on Turkey, and a declaration of Russia, Prussia, Italy, and France, of an unfriendly character to that Power. This has caused a slight relapse on yesterday's prices. In definitive, the quotations of to-day, speaking generally, stand higher than those of last Thursday. There is, however, an exception in the case of the Credit Mobilier—it is 31f 25c lower. This large decline is partly owing to the report that the municipality of Paris has declined to give any real guarantee to the debentures issued by the Immobilière Company, albeit the funds raised on them were employed in building splendid houses in the new streets the municipality laid out, that is, in embellishing Paris. The following are the week's prices, those of the Credit Industrial Bank and the Mediterranean, Eastern and Lombard railways are ex-dividend:—

The manufacturers of Amiens are complaining of the treaty of commerce with England, and have sent a letter very numerously signed to the Chamber of Commerce of the town, begging it to bring their complaint before the Government. "In presence of the excessive and increasing dearness of food, and the approach of the winter, which threatens to aggravate the sufferings of the working classes," it is, they say, their duty to move, instead of waiting until their resources shall be exhausted. "In examining," they state, "the cotton industry, we might have reason for seeking, in the fall of the raw material, the principal cause of the ruin which is now extending to our manufactories; but this fall has not created the present situation—it has only contributed thereto by producing distrust among purchasers, and rendering those exigencies excessive. If the French cotton industry had remained in possession of all its internal markets, the manufacturers, in making a sacrifice, might have sold all their old goods, and might have attenuated their losses, by buying raw materials at the new prices. In that way, the crisis would have been reduced to ordinary proportions. But the treaty of commerce of 1860 has aggravated the crisis, and given it the proportions of a disaster, by depriving us of a great part of our accustomed markets." The letter writers continue:—"The apprehensions conceived by the French manufacturers in 1860 and 1861 were not at once realised. This circumstance is ascribed to the scarcity of cotton arising from the war in America, and to the fact that the English, having considerably slackened their production owing to the want of raw material, could not inundate our markets. But whatever the cause, the storm suspended over our heads only broke out about a year ago—that is to say, since the raw material again became abundant. From this it is clear that, if we neglect to seek the remedy the most prompt and the most direct, the ruin of our departments will be the consequence." The letter writers go on to say that the treaty having been concluded for ten years expires in 1870, but that either party objecting to it must denounce it a year beforehand. "Therefore," they say, "French manufacturers have a year and a half to come to an understanding to obtain from the Government that in 1870 the treaty shall not be renewed, or that it shall only be renewed with profound modifications—that is to say, that the duty on foreign cotton, yarns, and tissues, shall be raised to a figure sufficiently protective." They affirm that "all the great manufacturing towns in the north of France, which are injured, as we are, share our views, and, in fact, there is unanimity on this grave question." They conclude their epistle with the following observations:—"Being in direct communication for the sale of our dyed goods with the wholesale houses of all France, we are necessarily well informed, and we have the proof that this year all have drawn from England a large part of their supplies. Saying nothing of Paris, which becomes a vast entrepôt of English goods, we know that English agents push sales most actively at Lyons, Marseilles, Nimes, Toulouse, Bordeaux, and all the important towns of the South. As to our manufacturing towns of the North, it is not only with unbleached and dyed tissues that the English inundate them, but the turn of yarn has now arrived, and pressing offers of it are made every day. Our powerful rivals are determined to supply us, and are endeavouring to prove to us that in France there is no need of the industry of cotton spinning. In their ardent greed, they are endeavouring to reduce the manufacturers and traders of Amiens to be nothing more than agents for the sale of English goods." The preceding address will be of great interest in England. It shows that the spirit of Protection in France is not dead. It shows, too, that an agitation against the Treaty of Commerce is to be expected. Already, there are murmurs against the treaty among the manufacturers of Lille, Mulhouse, and Rouen, as well as of Amiens; and the Ironmasters are, of course, both ready and willing to join these people in denouncing it. But it has conferred so many and such great benefits on France, that we may hope that the manufacturing and the iron interests, powerful though they be, will not be able to hurt it.

The octroi question at Paris, about which M. Michel Chevalier has, during the last few months, written long and eloquently in the *Journal des Debats*, is becoming serious. The question briefly stated is, whether or not the municipality can levy octroi duties on raw materials employed in the manufacture of articles not consumed within the walls? The fundamental law on octrois, which was passed in 1816, says that duties shall not be imposed on articles not destined for local consumption, except in virtue of a special law. But when the suburbs were in 1860 included in the city, a law said that for seven years the numerous suburban manufactories should not be subjected to other duties on materials worked up and sent away than they had previously paid. Now, the Prefect of Paris, Baron Haussman, maintains that the proper interpretation of the law of 1860 is, that on the termination of the seven years, the privilege of notpaying on such materials was to cease; the manufacturers under the law of 1816 say that a special Act is necessary to tax them, and there is none. Haussman, after a good deal of bullying by "communicated notes" in newspapers, has peremptorily required the manufacturers to pay; they refuse. He has seized the goods of one of them, and they are to be sold by auction this day. Some others have closed their establishments, saying that ruin awaits them if they submit to Haussman's demand; and by closing, they have thrown some hundreds of workmen out of employment. Unemployed workmen in Paris are a serious danger, owing to their tendency to make the Government responsible for any distress they may endure, and to try to remedy their situation by throwing up barricades and firing muskets from behind them. At the present moment, the gravity of having men out of work is aggravated by the excessive dearness of living which the scarcity of the harvest has occasioned.

The last weekly report of the grain market at Marseilles made up to Saturday says:—"During this week business has been marked with great activity, owing to the constant increase of demands. Prices have not only maintained great firmness, but there has been a new rise on almost all qualities. Transactions for Spain have been important, at advanced prices." From nearly all the other provincial markets, great firmuess in price is announced; and at Paris, the quotations in the market report given below are 1f 50c per sack above those of last week.

Some months back it was stated that the French Government, in what is called on the Continent "paternal solicitude" for the interests of commerce, took on itself to recommend certain persons

as capable of giving "to bankers, merchants, and manufacturers prompt information on the solvability of their customers"—one of the said persons being at London. In the *Moniteur* of to-day, the recommendation is officially renewed.

The Lyons and Mediterranean Railway Company is now paying 25f per share on account of dividend for the present year; and it notifies that, for a discount of 2 per cent., it will pay the half-year's interest on bonds falling due on the 1st January next.

The Orleans Railway announces that it will pay from the 15th November, at discount of 2½ per cent., the interest on debentures falling due on 1st January next; on its own debentures of 1842-8; also on those of the Orsay (2nd series) and the Orleans and Grand Central Companies, which it has absorbed. The January coupon of the Orleans debentures is 25f; of the Orsay, 25f; of the Grand Central, 7f 50c.

The Vieille Montagne Zinc Company is to pay from 10th November 10f per share, the second half of the dividend of 1866.

The bondholders of the Seville, Xeres, and Cadiz Railway are, in virtue of an arrangement with the Spanish Government, now being paid 3f per bond. The directors are endeavouring to obtain from that Government a further sum for the bondholders.

Customs' returns for the first nine months of the present year, compared with the corresponding periods of the last two years, have been issued. They present these results:—

VALUE of IMPORTS taken for CONSUMPTION.

	First nine months of 1867. francs	First nine months of 1866. francs	First nine months of 1865. francs
Articles of food, &c.....	538464000	329846000	349843000
Natural productions and materials necessary for industry	1542765000	1484452000	1360028000
Manufactured articles...	174874000	168102000	150119000
Other goods	90591000	88020000	62012000
	2346694000	2070420000	1917002000

VALUE of EXPORTS of FRENCH PRODUCTIONS.

	First nine months of 1867. francs	First nine months of 1866. francs	First nine months of 1865. francs
Natural productions, articles of food, and materials necessary for industry	790626000	942595000	807608000
Manufactured articles ...	1333192000	1364751000	1303258000
Other goods	73200000	68091000	69143000
	2197018000	2375365000	2180009000

It will be observed that this year, the value of the imports considerably exceeds that of the exports.

The value of the imports and exports of the Precious Metals during the first nine months of 1867, as compared with the same period in the two preceding years, was as follows:—

IMPORTS.

	1867. francs.	1866. francs.	1865. francs.
Gold bullion ...	133,009,126	154,845,035	43,178,487
Gold coin	292,978,182	528,545,406	268,412,616
Silver bullion..	45,024,340	56,216,552	68,453,062
Silver coin.....	136,967,482	124,484,946	117,116,181
	607,979,130	864,091,939	497,160,346

EXPORTS.

Gold bullion ...	39,107,110	1,375,897	26,841,003
Gold coin	106,734,551	202,398,940	174,427,755
Silver bullion..	32,372,558	101,006,381	36,168,727
Silver coin ...	14,903,972	91,114,517	52,952,705
	193,118,191	395,895,735	290,390,190

Deducting the exports from the imports of the present year, the stock of gold and silver will be found to have increased by 414,860,939f, which make 16,594,437*l*.

The following is the market report:—

FLOUR.—The market at *Paris* continues to be firm. Yesterday, superior was 91f the sack of 157 kilogs; first marks, 90f; good, 89f; other sorts, 87f to 88f. Six marks were 89f 75c, disposable. Type Paris, the 101 kilogs, 55f.

WHEAT.—At *Paris*, yesterday, choice, 52f 50c the sack of 120 kilogs; first quality, 51f; second, 50f.

COTTON.—The sales at *Havre*, in the week ending Friday, were 5,850 bales, and the arrivals 5,114. The closing quotations, compared with those of the preceding Friday, were 2f higher for Minas, 2f to 3f for Hayti and Dhollerah; other sorts unchanged. New Orleans, very ordinary, was 105f the 50 kilogs; Broach, good ordinary, 90f; Tinnevelly, ditto, 85f; Madras, ditto, 75f. On Monday and Tuesday, the market was not active; but yesterday there was some animation, and New Orleans, very ordinary, was 103f, and average low middling, 92f 50c to 93f 50c.

SUGAR.—The sales at *Havre*, in the week ending Friday, were only a few lots of French West India, at 49f 50c the 50 kilogs, bonne quatrieme, duty paid, 49f 25c for delivery; usine, second jet, 49f and 50f 50c, on sample. This week, usine, on sample, 56f; also, some damaged Havana, by auction. At *Bordeaux*, last week, some French West India, 48f 25c for bonne quatrieme, and 60f for usine. No sales this week. At *Nantes*, last week, 253 sacks Reunion, at prices kept secret; some Guadaloupe usine, on sample, 55f 50c, and 58f. This week, Reunion has been offered at 53f 25c, bonne quatrieme, but there have been no buyers. At *Marseilles*, last week, 217 casks French West India, 31f, bonne quatrieme. This week, Egyptian, 38f 50c, No. 12.

COFFEE.—At *Havre*, in the week ending Friday, 1,300 sacks Port-au-Prince, 61f to 69f 50c the 50 kilogs, in bond; 48 ditto, 75f; 310 Gonaives, 79f 50c to 80f; 2,910 Rio not washed, 55f to 70f; 400 ditto, for delivery, 62f to 74f; 500 washed, disposable, 76f to 85f; 444 Santos, to come from England, 85f; 50 Winard, 83f also different sorts of damaged, by auction. This week, Jacmel, 64f; ditto inferior, 62f; Gonaives, 80f; Rio, 57f to 64f 50c; La Guayra grage, 77f; Malabar, 85f to 86f 50c; Port-au-Prince, 67f; Cape, 76f. At *Bordeaux*, last week, 620 sacks Rio not washed, 65f to 74f; 80 washed, 98f; 170 Capitania, 55f; 185 Mysore, 109f 50c and 110f; 600 Malabar, 112f. By auction, different sorts of damaged. This week, Rio not washed, prices not stated; ditto unwashed, 92f; Mysore, 109f 50c; habitant, 140f; Salem, 117f 50c. At *Nantes*, last week, 25 bags Reunion pointue, 119f. No sales this this week. At *Marseilles*, last week, 2,971 sacks Rio, 54f to 60f. This week, Rio, for delivery, 53f 50c.

INDIGO.—The sales at *Havre*, in the week ending Friday, were only 19 chests Bengal, at established prices. This week, Bengal, at a premium of 1f, and at prices not stated; Guatemala, ditto. At *Bordeaux*, last week, 20 chests Bengal, at established prices; 2 Kurpah and 3 Madras, prices not stated. This week, Bengal and Kurpah, quotations not given.

HIDES.—The sales at *Havre*, in the week ending Friday, were 214 Monte Video dry ox, 91f the 50 kilogs; 7,650 ditto salted saladeros ox, 57f 50c to 60f; 5,100 ditto ditto cow, 57f; 540 Rio Grande dry, for delivery, 96f; 900 Rio Janeiro salted ox, 55f; 209 Tuspan salted, 55f; 368 Martinique and Gaudaloupe, 52f to 56f, indifferent quality. This week, Monte Video salted saladeros ox, 60f and 57f 50c; Pernambuco salted, for delivery, 52f 50c.

WOOL.—At *Havre*, in the week ending Friday, 315 bales La Plata unwashed, 1f 20c to 2f 25c the kilog; the latter price for lamb; 7 Rio Grande unwashed, 1f 55c; 36 Bombay washed, 2f 35c to 3f 25c. By auction, some La Plata damaged. This week, Monte Video washed, 215f the 100 kilogs; unwashed, 190f; Buenos Ayres ditto, 110f and 145f.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 70 pipes 140 demi-pipes La Plata, 52f 50c to 53f 25c the 50 kilogs; 70 casks sheep, good quality, 54f. This week, Monte Video saladeros, 52f 50c; La Plata, 51f 50c and 50f 50c. At *Paris*, yesterday, the 100 kilogs, without octroi duty, averaged 103f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, 90 deg., 62f and 61f 50c the hectolitre. At *Bordeaux*, yesterday, 3-6 Languedoc, 86 deg., 86f; 3-6 beetroot, fine first quality, 90 deg., 71f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Spanish Customs' authorities have just issued the return of the foreign trade of Spain for the year 1864. The general result of the commercial movement with foreign countries in 1864 was as follows, 100 reals being taken in round numbers to represent one pound sterling:—

	Reals.	£
Imports	1,989,867,132	19,898,671
Exports	1,412,851,571	14,128,515
Total	3,402,718,703	34,027,186

Compared with the year 1863, this is an increase of 621,873,730 reals (6,218,737*l*), of which 302,319,481 reals are in the imports, and 319,554,249 reals in the exports. The general trade of 1864 was divided as follows among the four great divisions of the globe:—

	Imports. Reals.	Exports. Reals.	Total. Reals.
Europe	1,532,731,858	992,705,939	2,525,437,797
Africa	6,094,753	22,693,800	28,788,553
America	420,609,875	392,631,711	813,241,586
Asia	30,439,646	4,820,121	35,250,767
	1,989,867,132	1,412,851,571	3,402,718,703

The revenue from Customs amounted to 241,698,000 reals (2,416,980*l*), or 9,269,000 reals (92,690*l*) less than in 1863. The articles which produced the largest sums were—sugar, 35,847,000 reals; codfish, 26,813,000 reals; woollen stuffs, 21,963,000 reals; cocoa, 17,561,000 reals; iron and hardware, 15,014,000 reals.

NAVIGATION.

	Spanish. Ships.	Spanish. Tons.	Foreign. Ships.	Foreign. Tons.	Total. Ships.	Total. Tons.
Inwards	4,295	229,709	2,495	221,880	7,700	451,509
Outwards.....	4,848	935,241	3,145	503,759	7,493	1,439,000
Total.....	8,643	1,164,950	6 550	725,359	15,193	1,890,509

The quantity of flour, wheat, corn, and barley, left at tide-water, at New York, during the second week in October, in the years 1866 and 1867, was as follows:—

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1866	62,600	294,100	933,700	548,700
1867	37,600	1,820,200	465,300	812 400
Increase ...	25,000	1,026,200	...	263,700
Decrease ...	...	...	438,400	...

The aggregate quantity of the same articles left at tide-water from the commencement of navigation to the 11th October, inclusive, during the years 1866 and 1867, was as follows:—

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1866	145,700	2,742,200	22,050,700	1,086,000
1867	197,000	3,584,000	12,402,300	1,247,800
Increa e.....	51,300	841,800	...	161,800
Decrease ...	...	...	9,648,400	...

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 210,000 bbls flour.

The annexed report shows the state of the Albany lumber market for the week ending October 15, 1867:—The trade towards the close of

Own confession

the week was moderate. Yesterday and to-day, however, there has been a good business done, with large receipts and a well-assorted stock. The shipments are large, and there is a promise of increased activity. Prices show but little change. In clear lumber, the bulk of the sales are from $55 to $58. Coarse lumber is steady in price and in demand. The receipts of lumber at Chicago, during the week ending 11th inst., were about 19,000,000 ft, which is less by 6,000,000 ft than the receipts of the week previous. The shipments were about 15,000,000 ft, which added to the usual local demand, could not have allowed much addition to stock. Prices continue steady. The receipts at Albany by the Erie and Champlain Canals, for the second week in October, were:—

	Lumber. feet.	Shingles. M.	Timber. c feet.	Staves. lbs.
1866	12645700	1265	...	1020000
1867	14076400	1002	7333	3472200

Of the lumber received, 9,501,700 ft were by the Erie Canal, and 4,574,700 ft by the Champlain Canal. The receipts at Albany by the Erie and Champlain Canals, from the opening of navigation to October 10, were:—

	Lumber. feet.	Shingles. M.	Timber. c feet.	Staves. lbs.
1866	248794000	35505	115533	22032100
1867	309156100	22695	57533	3000 400

Showing an increase in receipts of lumber of over 60,000,000 ft.

During the week ending Nov. 6, the imports of the precious metals were—Gold, 519,999*l*; silver, 416,589*l*. The exports were—Gold, 266,124*l*; silver, 79,792*l*.

Messrs Henry Milward and Co., of Chicago, have issued a circular dated October 10, containing valuable information regarding the hogs in the West. They observe:—The high prices which have been current for corn will, doubtless, prevent farmers from feeding it so lavishly as in former years, but as the crop has all been secured in most admirable condition, it is probable they will find it to their interest to keep up their growing stock, and that we shall, therefore, have a liberal supply of hogs, not only during the next packing season, but also through the next spring and summer. We, therefore, anticipate a season of moderate prices.

The agricultural returns for Great Britain in 1867 have just been made up. Under corn crops o all kinds, there were in England and Wales 7,941,578 acres, against 7,921,244 acres returned in 1866; and in Scotland 1,367,012 acres, against 1,366,540 acres in 1866. The land under wheat is returned for England and Wales at 3,255,917 acres, against 3,275,293 acres in 1866; and for Scotland at 115,118 acres, against 110,101 acres in 1866. The number of cattle is returned for England and Wales as 4,017,790, against 3,848,435 in 1866; and for Scotland as 979,170, against 937,401 in 1866. Sheep are returned for England and Wales to the number of 22,097,286, against 16,793,204 in 1866; and for Scotland to the number of 6,893,603, against 5,255,077 in 1866. The large increase in the number of sheep returned in 1867, as compared with the previous year, is to be accounted for by the fact that the returns in 1866 were made for the purpose of the cattle plague inquiry, at a date preceding the lambing season in some parts of Great Britain.

The Registrar of New Zealand has issued the first part of his volume of statistics for the year 1866. It states that the estimated European population of the colony at the end of that year was 204,114, an increase of 13,507 over the number a year before; the increase was greater by excess of immigration over emigration than by excess of births over deaths. Adding 4,568, the number of the military and their families, the whole European population at the end of last year is brought up to 208,682. The value of the imports of 1866 was 5,894,863*l*; of the exports, 4,520,074*l*. The imports for the former five years had been—1861, 2,493,811*l*; 1862, 4,626,082*l*; 1863, 7,024,674*l*; 1864, 7,000,655*l* 1865, 5,594,977*l*. The exports for the five years previous to 1866 were;—1861, 1,370,247*l*; 1862, 2,422,734*l*; 1863, 3,485,405*l*; 1864, 3,401,667*l*; 1865, 3,713,218*l*. The exports for the United Kingdom in 1866 reached the large amount of 1,713,062*l*. The imports of the year included ale and beer of the value of 218,833*l*; boots and shoes, 228,163*l*; coal, 183,846*l*; cotton goods, 220,439*l*; slops, 107,461*l*; woollens, 207,356*l*; other draperies, 584,545*l*; hardware and cutlery, 157,635*l*; flour, 249,829*l*; spirits, 221,864*l*; sugar, 362,303*l*; tea, 195,349*l*; tobacco, 102,429*l*; wine, 118,797*l*. The principal items of export were—Gold, 2,897,412*l*; wool, 1,354,152*l*; kauri gum, 70,572*l*; hides, 11,394*l*; timber, 24,319*l*; grain, 7,297*l*; potatoes and onions, 7,914*l*; specie, 26,535*l*. The gold exported from April 1, 1857, to December 31, 1866, amounted in quantity to 3,059,309 ozs; in value to 11,842,721*l*. The exports of wool last year were in excess of any previous year. In 1858, they amounted to 254,022*l*; in 1860, to 444,392*l*; 1862, 674,226*l*; 1864, 1,070,997*l*; 1865, 1,141,761*l*; 1866, 1,354,152*l*; a gradual and steady increase being observable throughout the whole period. The number of registered vessels belonging to ports in New Zealand was 493, their tonnage 26,787, and their crews numbering 1,919 men and boys. The number of vessels as compared with the former year shows an increase of 27. The vessels which entered inwards at all the ports of New Zealand during the year numbered 1,019, the aggregate tonnage being 330,303. The nationality of the vessels arriving was:—British, 255; colonial, 709; American, 27; and the remaining 26 various. The total number of outward clearances was 986 (aggregate tonnage, 306,979), viz:—41 to the United Kingdom, 792 to British possessions, 153 to foreign countries and the whale fishery. The land disposed of during the year was—Of town lands, 375 acres; suburban, 5,328 acres; country, 597;702 acres. For this, the amount of cash received was 528,028*l*, the balance of payment being by scrip, land orders, remission certificates, &c. The quantity of waste land disposed of from April, 1856, to the end of 1865, had been 4,210 acres of town lands, 64,234 acres of suburban, and 4,096,515 acres of country land. The letters received in 1866 at all the post offices in the colony were 2,404,788 (584,461 foreign, and 1,820,327 inland); the letters despatched (581,726 foreign, 1,772,130 inland), 2,353,856; making a total of 4,758,644, or above 280,000 more than in 1865.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 12th day of October, 1867:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300485	484731	261016
Royal Bank of Scotland	216451	554849	409089
British Linen Company	438024	481756	189099
Commercial Bank of Scotland	374880	633540	354919
National Bank of Scotland	297024	497593	252428
Union Bank of Scotland	454346	604378	272669

Clydesdale Banking Company	274321	393032	187096
City of Glasgow Bank	72921	389258	358033
Caledonian Banking Company	55434	87275	46870
Central Bank of Scotland	42933	57305	30374

The following are the returns of the Irish banks of issue for the our weeks ending the 12th Oct.:—

	Circulation authorised by certificate.	Average circulation during the month.		
		5*l* and upwards.	Under 5*l*.	Total.
	£	£	£	£
The Bank of Ireland	3,738,428	1,562,575	955,900	2,518,475
The Provincial Bank of Ireland	927,667	414,898	485,332	900,230
The Belfast Banking Company	281,611	184,800	291,214	476,014
The Northern Banking Company	243,440	127,170	282,274	409,444
The Ulster Banking Company	311,079	213,450	289,255	502,705
The National Bank	852,269	557,510	500,842	1,058,353

AVERAGE AMOUNT OF COIN HELD DURING THE MONTH.

	Gold.	Silver.	Total.
	£	£	£
The Bank of Ireland	429,549	75,386	504,935
The Provincial Bank of Ireland	353,015	54,130	407,14
The Belfast Banking Company	248,985	31,712	280,697
The Northern Banking Company	213,792	15,261	229,053
The Ulster Banking Company	212,715	40,185	252,900
The National Bank	425,833	57,008	482,842

The following return shows the state of the note circulation in the United Kingdom during the four weeks ending October 12:—

	Sept. 14, 1867.	Oct. 12, 1867.	Increase.	Decrease.
	£	£	£	£
Bank of England	23852234	24129645	277411	...
Private Banks	2559233	2802464	243231	...
Joint Stock Banks	2205205	2361107	155902	...
Total in England	28616672	29293216	676544	...
Scotland	4404142	4581226	177084	...
Ireland	5141005	5865221	724216	...
United Kingdom	38161819	39739663	1577844	...

And, as compared with the month ending the 13th of Oct., 1866, the above returns show an increase of 548,648*l* in the circulation of notes in England, and an increase of 664,297*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,230,152*l*, the English joint stock banks are below their fixed issue 377,533*l*—total below fixed issue in England, 1,607,685*l*; the Scotch banks are above their fixed issue 1,831,955*l*; the Irish banks are below their fixed issue 489,273*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Oct. 9 was 24,387,360*l*, being an increase of 505,310*l* as compared with the previous month, and an increase of 7,812,505*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 12th of Oct.:—Gold and silver held by the Scotch banks, 2,558,924*l*; gold and silver held by the Irish banks, 2,157,572*l*—total, 4,716,496*l*; being an increase of 75,312*l* as compared with the previous return, and an increase of 63,511*l* when compared with the corresponding period last year.

The Bankers' Gazette

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 6th day of November, 1867.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,217,500	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	21,217,500
		Silver Bullion	...
	36,217,500		36,217,500

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,891,203
Rest	3,061,535	Other Securities	16,788,642
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,396,899	Notes	11,610,585
		Gold and Silver Coin	1,115,797
Other Deposits	18,746,986		
Seven-day and other Bills	647,807		
	42,406,227		42,406,227

Dated the 7th November, 1867. FRANK MAY, Deputy Chief-Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	25,254,722	Securities	30,126,845
Public Deposits	5,396,899	Coin and Bullion	22,333,297
Private Deposits	18,746,986		
	49,398,607		52,460,142

The balance of Assets above Liabilities being 3,061,535*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase. £	Decrease. £
Circulation	...	37,901
Public Deposits	475,803	...
Other Deposits	...	837,642
Government Securities	...	...
Other Securities	...	46,437
Bullion	...	364,091
Rest	...	10,788
Reserve	...	316,151

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Nov. 6. £	Week ending Oct. 30. £
Thursday	9,331,000	8,208,000
Friday	8,526,000	8,196,000
Saturday	10,403,000	10,458,000
Monday	11,948,000	7,900,000
Tuesday	10,116,000	8,973,000
Wednesday	8,665,000	16,745,000
Total	59,489,000	60,480,000

JOHN C. POCOCK, Deputy-Inspector.

Bankers' Clearing-house, Nov. 7, 1867.

The decrease of 364,091*l* in the coin and bullion at the Bank, is chiefly owing to remittances on account of the Spanish conversion. The reserve has been reduced by 316,151*l*, the large withdrawals of private deposits being the main cause of the decline.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1857 :—

At corresponding dates with the present week.	1857.	1864.	1865.	1866.	1867.
Circulation, including bank post bills	£ 21,036,430	£ 20,919,333	£ 21,995,896	£ 24,203,592	£ 25,254,722
Public deposits	5,314,859	4,360,836	4,886,861	4,375,714	5,396,899
Other deposits	12,935,344	14,438,450	13,142,786	17,150,191	18,746,986
Government securities	9,444,828	9,972,542	9,746,089	12,293,812	12,891,203
Other securities	26,113,453	19,506,294	20,070,914	19,330,891	16,788,642
Reserve of notes & coin	1,462,153	7,907,175	6,482,502	8,330,276	12,726,332
Coin and bullion	7,170,508	13,647,270	13,306,277	16,891,608	22,333,297
Bank rate of discount	10 p c.	8 p c.	7 p c.	4 p c.	2 p c.
Price of Consols	89¼	91¼	89	89⅝	94⅜
Average price of wheat	52s 6d	38s 11d	43s 4d	54s 9d	69s 11d
Exchange on Paris (shrt)	25 30 45	25 20 25	25 20 27½	25 15 25	25 12½ 22½
— Amsterdam ditto	11 16 18	11 15½ 16½	12 12 0½	11 15½ 16½	12 18 19
— Hamburg (3 months)	13 12 13	13 9½ 10	13 9¾ 10¼	13 8¾ 9¼	13 9¾ 10¼

In 1857, the panic was at its height. It was on Thursday, the 12th November, the day following the stoppage of Messrs Sanderson, Sandeman, and Co., the great bill discounters, that the Government letter authorising the relaxation of the Act of 1844 was issued. The pressure for money at the Bank of England was unparalleled in the history of the establishment. The "other" securities had reached 26 millions, and presented an increase of 3½ millions within the week. Exchequer bills were offered at 2 per cent. discount, without finding purchasers; yet investments were being made in the funds by the public. Consols were, consequently, supported at about 90, notwithstanding the enormous sales by the banking interest, including the Bank of England. The Russian 4½ per Cents. had fallen to 95; and the Turkish 6 per Cent. Loan of 1854 to 87.

In 1864, the London money market, after a period of severe tension, had become slightly easier, and the Bank rate had been lowered from 9 to 8 per cent. The failure had been announced of M. Rougement de Lowenberg, a banker of high repute, in Paris, with liabilities ranging from 600,000*l* to 720,000*l*. There was no political news of improtance.

In 1865, the trade demand for money was on the increase. News had been received of the negro outbreak in Jamaica.

In 1866, the marriage of the Czarewitch, of Russia, to the Princess Dagmar, of Denmark, had taken place. The expected reduction from 4½ to 4 per cent. in the Bank of England rate had been made. The drafts of Messrs Dent and Co. had been refused by their London agents, Messrs Dent, Palmer, and Co.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1857, a deficiency of 13,178,109*l*; in 1864, a deficiency of 5,067,844*l*; in 1865, a deficiency of 6,922,128*l*; and in 1866, a deficiency of 2,180,200*l*. In 1867, there is an excess of 1,958,344*l*.

DISCOUNT AND MONEY MARKET.—There is a gradually growing, though questionable, impression that the market terms are likely to improve slowly towards the end of the year. No perceptible increase in either the demand or the supply is to be remarked, but the state of the market is open to exceptional influences, which may, though probably they will not, result in a higher discount rate. A few weeks back, the sudden decline in Italian securities led to heavy sales here and to a corresponding withdrawal of the sale money. At the present moment, the amounts received on account of the conversion of Spanish Passive stock are being sent away, and some exports on account of wheat are taking place. The cotton market appeared lately to afford promise of increased trade in the north. It is now stated that the supplies will be less than had been anticipated from the United States, and as the Indian imports have been declining in amount, the hoped-for revival of manufacturing activity may be delayed. In any case, the fluctuations in the money market will continue bound within narrow limits.

In the Stock Exchange money is not easily employed, and the rate on Government securities for short periods varies between 1 and 1½ per cent.

The Crown agents for the Colonies, who now offer 505,400*l* (less 35,400*l* recently exchanged for 8 per cent. Treasury bills) balance of the 3,000,000*l* New Zealand Government Debenture Loan (1863 Loan Act, and 1864 Rate of Interest Act), invite attention to the increasing value of the imports and exports of the colony, to the growth of the population and to that of the Customs' revenue.

In 1856-7, the total of exports and imports was under 1,000,000*l*. In 1866-7, it reached nearly 11,000,000*l* sterling. The population has nearly doubled since 1860, and the Customs' revenue, from 138,998*l* in 1857-8, has improved to 864,668*l* in 1866-7. The export of gold has increased from 3,784*l* in 1856-7, to 2,605,789*l* in 1866-7.

The surplus estimated revenue of the colony, for the year 1867-8, is 339,822*l*.

The quotations for mercantile paper, having various periods to run, are as follows :—

30 to 60 days	1½ ½ per cent.
3 months	1¾ ½ per cent.
4 months—Bank bills	1⅞ ½ per cent.
6 months—Bank bills	1½ 2 per cent.
4 to 6 months—Trade bills	2 3 per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks	1 per cent.
Discount houses at call	1 per cent.
Do. with seven days' notice	1¼ per cent.
Do. fourteen days	1¼ per cent.

Abroad there are slight indications, in one or two instances, of an upward movement, but generally rates are quiet.

The discount quotations current on the bourses of the chief continental cities are as follows :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	2	1¾ 2¼
Vienna	4	4
Berlin	4	2¾
—	4½ advcs	...
Frankfort	2½	1¾ 2
Amsterdam	3½	3 ¼
Turin	5	...
—	7 advances	...
Brussels	2¾	2¼ ¾
—	3¼ advcs	...
Madrid	5	...
Hamburg	...	2
St Petersburg	7	8 9

The alterations in the Bank of France return for the week are as follows :—

INCREASE.	£
Bullion	680,000
Advances	40,000
Current accounts	40,000
Treasury balance	4,000
DECREASE.	£
Bills discounted not yet due	2,320,000
Bank notes	1,580,000

ENGLISH GOVERNMENT SECURITIES.—The sudden settlement of the Roman question has been received with much satisfaction. The fears generally entertained that a European war was likely to grow out of the Italian complications have so far proved unfounded, and the tone of the Stock Market has

consequently improved. Consols close at 94¼ to 94½ for money, and 93 to 93⅛ ex div. for transfer in December. New 3 per Cents. and Reduced are quoted 92¾ to 92⅞, and India 5 per Cents. 114½ to 115.

Exchequer Bills and India Bonds are scarcely so firm, the former being quoted 25s to 30s prem., and the latter 57s to 63s prem.

FOREIGN STOCKS.—The attention of the public appears to be directed towards Egyptian securities. The 7 per Cent. Railway Debentures, after having been long neglected, improved during the week from 85 to 90, and close at 90 to 91. The 7 per Cent. stock of 1864 also is better, and the Viceroy (Ishmael Pasha) Loan has participated in the advance. The drawing in the Pasha Loan, which will take place between the 15th and the 30th of the month is, no doubt, one element in the demand now experienced. The drawn numbers of the Turkish 1862 loan are in course of publication, and the drawing of the 1865 6 per Cent. Loan will take place between the 15th and the 30th November. The drawings of this loan have previously attracted little notice, owing to the small amount held in this country. But, as bonds of the 1862 loan are scarce, and as those of the 1865 loan are, if compared with the others, even better security, they will, now that there is a free market in them, attract the attention of investors. Italian 5 per Cents. have improved considerably; at one moment they rose to 46¼. The close this evening is steady, at 45⅛ to 45⅜. Peruvian stocks are firm. The new Spanish 3 per Cents., supposed to be acted upon by parties interested in the success of the Passive conversion, have been carried up to 31¾. Passive stock has advanced to 19⅓ to 19¾. The closing prices of stocks dealt in to-day are subjoined:—

ENGLISH RAILWAY STOCKS.—The depression of the markets continuing, a very general fear is entertained that much in the arrangement of railway accounts and in the distribution of expenses will have to be altered, and that the change will involve for some considerable time to come a reduction in the amount of the dividends. The chief decline in prices is, as might under the impressions entertained be expected, in the heavier priced stocks. The continued fall in Caledonians has promoted a decline in Metropolitan, in Lancashire and Yorkshire, in Midland, and in similar lines. The Great Eastern meeting to-day has terminated in the break-up of the direction, which will have to be constructed afresh.

FOREIGN RAILWAY SHARES.—The dividend of 20 francs (15s 9½d,) has just been taken off the Lombardo-Venetian shares. Their price has improved to 13⅞ ex div. Belgian Railway shares continue without much alteration in the demand, dull.

INDIAN GUARANTEED RAILWAY STOCKS.—These securities are generally firm. The approach of the January dividend tends, as usual, to strengthen quotations.

Subjoined is the usual list of the closing prices of the principal railway shares on October 31 and this day:—

AMERICAN SECURITIES.—5-20 Bonds have advanced during the week, on a steady inquiry for investment. There is no material change in shares.

BANK SHARES are still very dull, at lower prices. The indisposition of the public on one hand, and the successful elimination of speculators under the provisions of Mr Leeman's Bill on the other, effectually serving to check any hope of an advance at present.

MISCELLANEOUS SHARES.—Credit Foncier have declined. International Financial are steady, and General Credit firm. Hudson's Bay shares are steady and quiet. The feature of the week has been the heavy fall in Royal Mail Steam.

EXCHANGES.—Bills were in demand, and rates generally firm.

BULLION.—No gold has been withdrawn to-day. The following is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week:—

Gold.—We have to report the undermentioned arrivals:—129,000*l* per Sussex, from Melbourne; 62,000*l* per Oneida, from the Brazils; 1,500*l* per City of London, from New York—total, 192,500*l*. This total, together with 305,000*l* in bars and coin, withdrawn from the Bank, has been taken for export, the demand being chiefly for the continent; on the other hand, 6,000*l* in sovereigns, from Alexandria, has been sent in. The Ceylon has taken 23,000*l* to Alexandria; this amount, in sovereigns, being sent on Government account.

Silver.—The New York has brought 20,400*l* Doré silver from New York. The market remains quiet, with prices the same as quoted below, the demand being nearly entirely for the Continent. The Ceylon has taken 2,000*l* to Calcutta.

Mexican dollars.—The large amount of this coin, ex Atrato, has been sold at 58 5/16d per oz, showing a slight decline from previous rates. With the exception of about 9,000*l* sent to China, the whole has been taken for refining purposes.

Exchange on India for drafts by the banks at 60 days' sight is somewhat dearer, and may be quoted 1s 11⅛d to 1s 11¼d for Calcutta and Madras, as well as Bombay. At the biddings for council drafts yesterday, applicants on Calcutta and Madras at 1s 11⅛d received about 85 per cent. above that in full. Tenders on Bombay were not invited.

India Government Loan Notes are weaker, and transactions are limited. Nominally quotations remain the same, but it is only at the lower prices sales can be made. 4 per Cents. are quoted 88 to 88½; 5 per Cents., 104 to 104¼; and 5½ per Cents., 109 to 109½. 5 years' debentures are quoted 103 to 103½; 10 years, 103½ to 104; and 15 years, 104 to 104½.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std; ditto fine, 77s 9d to 77s 9½d per oz std; ditto, refinable, 78s per oz std; Spanish doubloons, 75s to 76s per oz, last price; South American doubloons, 73s 7d to 73s 9d per oz; United States gold coin, 76s 3d to 76s 4d per oz, last price. Silver—Bar Silver, 5s ¾d to 5s 0½d per oz std, last price, flat; ditto, containing 5 grains of gold, 5s ¼d to 5s 1d per oz std, last price; fine cake silver, 5s 5d per oz. Mexican dollars, 4s 10⅞d to 4s 11d per oz, last price. Quicksilver, 6*l* 17s per bottle; discount, 3 per cent.

The Crown agents for the colonies have notified that they are prepared to receive tenders for New Zealand debentures for 505,400*l*, being the seventh instalment of the authorised loan of 1863.

The biddings for bills on India took place at the Bank of England on Wednesday. The amounts allotted were:—To Calcutta, 83,000*l*; and to Madras, 17,000*l*. No tenders on Bombay were invited. The minimum price was fixed at 1s 11¼d on Calcutta and Madras. Tenders at 1s 11⅝d received about 85 per cent.; those above that price, in full.

Special Settling.—The committee of the Stock Exchange have appointed Friday, 8th November, as special settling day in the new redeemable shares of the Metropolitan Railway; also in the 25,000 new 20*l* shares of the Dutch-Rhenish Railway Company.

The failure has been announced of Messrs Theodor Knaus and Company, merchants, of Mincing Lane and Liverpool. Their liabilities are expected to reach a large amount.

The failure is announced of Mr Welch Miller and Mr John B. Fawcett, underwriters of Lloyd's.

The following notice has appeared in the *Gazette*:—The Court of Directors of the Governor and Company of the Bank of England give notice, that they have appointed John Whitcher to be one of their Cashiers; and he is hereby empowered to sign bills and notes for the Governor and Company of the Bank of England.

COMMERCIAL EPITOME.

FRIDAY NIGHT

The quantity of English wheat on sale at Mark lane to-day was only moderate. The demand, however, was very inactive, at Monday's decline in the quotations. In foreign wheat, the show of which was extensive, very little was doing, at late rates. We have no quotable change to notice in the value of either barley, beans, peas, or flour; but oats were a dull inquiry, at 6d per quarter less money. This week's importations have been large—viz., 32,170 qrs. of wheat; 4,450 barley; 55,710 oats; 1,780 maize; 670 sacks and 4,950 barrels of flour.

At Liverpool, this morning, the corn trade was steady, at barely stationary prices. At Wakefield, the value of wheat was supported.

In the Liverpool cotton market, on Saturday and Monday, business was considerably checked by the state of continental politics, and an occasional fall of ⅛d to ¼d per lb was submitted to; on Wednesday, however, a better feeling set in, and there has since been a good demand at slightly improved rates. The total sales for the week are 71,820 bales; of which the trade have taken 53,590 bales: speculators and exporters, 18,230 bales. The imports for the week are 16,965 bales; the actual exports, 20,066 bales; and to-day's stock is estimated at 571,800 bales, showing a reduction of over 55,000 bales since last week. Quotations for American descriptions have receded ⅛d per lb. East Indian remain unchanged, and Bengals have advanced ⅛d per lb since last Friday. To-day the market closes steady; sales 15,000 bales at full rates.

At New York, on the 7th inst., middling Upland cotton was selling at 18½ cents per lb. The quotation for Dhollerah at Bombay, on the 1st inst., was 177 rupees per candy.

We have received the following report from Messrs Liddell and Co., of Alexandria. It is dated the 28th ult.:—The improved feeling in cotton noticed in our last of 18th inst. continues to prevail, the better stapled parcels of each class being more especially in demand. To-day's quotations are—Fair to fully fair, 8¾d to 9d per lb, f.o.b.; good fair, 9¼d, ditto.—P.S. 29th instant.—To-day's market extremely dull, and a slightly downward tendency manifested in all articles.

Messrs Nicol and Co. write as follows respecting the cotton trade at Bombay on the 14th ult.:—When last mail left, prices had a downward tendency under the influence of the home telegrams, which were daily coming to hand, quoting lower rates from the Liverpool market, and the intelligence since to hand, continuing to advise a declining market, rates are 20 rs per candy down from our last quotations, without so far inducing buyers to operate to any extent. The whole business of the fortnight does not sum up to 600 candies, and is partly for local consumption—one or two small lots only being reported for export—comprising Dhollerah at 167 rs to 155 rs, and Oomrawuttee at 174 rs per candy. We are still without any addition to our stock, but should shortly be receiving both Dharwar and Dhollerah kinds from the coast. The weather has continued very favourable to the growing crops generally, and it is expected prices of new cotton will open very moderate, as the yield promises to be abundant.

EXPORTS of COTTON from BOMBAY from Jan. 1 to Oct. 12.

In reference to the crop of cotton in the United States, Messrs Neill and Co. observe:—During the past fortnight, the weather has been warm and agreeable—some days, indeed, having been uncomfortably hot even in this latitude. Complaints of the cotton crop have, therefore, become "few and far between," and there can be no question that very satisfactory progress has, on the whole, been made, both in the maturing and gathering of the crop. The early receipts were generally damp and poorly ginned and handled, showing the effect of the September rains, but they have latterly improved very much, in consequence of the fine weather of this month. The staple is very good, so far as we have yet been able to judge.

The demand for tea privately, as well as at public sale, has been moderately active, at late currencies. Last week, duty was paid in London on 1,487,566 lbs. The exports were 620,806 lbs.

The transactions in sugar have been on a full average scale, and prices have further advanced 6d per cwt.

Selected qualities of coffee have moved off freely, at 6d per cwt more money; whilst other kinds have commanded extreme rates.

We extract the following statements from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the Principal European Ports, for the Nine Months ending September 30, 1866 and 1867.

Messrs Moran and Co., of Calcutta, writing on the 2nd ult., observe:—Since we addressed you, the indigo crop has had to contend with much unfavourable weather and an inundation such as has seldom, if ever, been witnessed. Even in districts rarely so affected, the overflow of the rivers has been exceedingly severe, and the damage done to the indigo and other crops has been great in proportion. An inundation so widely spread, so high, and of such long duration, we believe has never been known. We have revised our estimate of the indigo crop, and in giving 90,000 maunds as the present apparent out-turn of the season, we may remark that we believe the chances are more in favour of a still further reduction than of any increase in the quantity. Estimate 1866-67:—Dacca, Furridpore, and Mymensing, 2,700 factory maunds; Jessore, 3,350; Kishnaghur, Hooghly, &c., 4,200; Mid napore, 1,200; Burdwan, 1,550; Moorshedabad, 3,100; Rajshye and Bograh, 600; Malda, Bauleah and Pubna, 2,700; Bhaugul pore, 2,050; Monghyr, 850; Rungpore, 300; Purneah, 3,600; Native, 2,700. Lower Bengal, 29,000; Tirhoot and Chuprah, 35,000; Benares, 14,500; Doab, 11,500—total factory maunds, 90,000. Stock of old indigo consisting of very low *gaud*, remanu-

factured indigo, trash, &c., in the Bazar—about 700 maunds. About 7,000 maunds of the new crop are said to have been sold to arrive. The prices paid are from 20 to 25 rupees per maund higher than the averages obtained last season.

In hemp and flax, very little business has been transacted.

COMPARATIVE STATEMENT of European HEMP and FLAX on hand in London on Nov. 1, 1865, 1866, and 1867, Dealers' Stock included.

East Indian teake	26,200	31,700	21,900

Messrs Powell and Co. observe:—Throughout the month of October, there has been a good demand for almost all descriptions of leather, with prices as nearly as possible corresponding with those of the previous month. The transactions have been almost entirely for the immediate requirements of buyers, scarcely any disposition having been shown to anticipate purchases; nevertheless, prices have been firm, and the stocks now held are generally less than at the commencement of the past month. In raw goods there has not been a particularly active demand, although the imports have been moderate and the stocks small. With so few goods offering prices have been well maintained, excepting for heavy Australian hides, for which article the season has suspended orders for shipping: towards the close of the month additions have been made to the stocks, which are now generally larger than at the beginning of October.

Linseed oil, on the spot, has sold at 36*l* 15*s*, and English brown rape, 37*l* 10*s*. In tallow, sales have progressed slowly, on easier terms. Town tallow, 44*s*; Petersburg Y.C. on the spot, 43*s*; Year, 43*s*; December, 43*s* to 43*s* 3*d*; Spring, 43*s* 6*d* to 43*s* 9*d*; March, 44*s* to 44*s* 3*d*.

A report from New York, dated the 22nd ult., says:—There has been so much of uncertitude of the political situation that everything pertaining to commercial affairs is vague, and nothing fixed or stable. The money market appears to be working into a more comfortable condition, though it is by no means easy; for while first-class borrowers have no difficulty in obtaining money readily at 7 per cent. on call, and 8 to 10 per cent. discount, others equally good, but regarded with less favour by lenders, can only obtain accommodation by submitting to the most usurious shaves. The banks are doing all they can for their regular customers, but they are too weak to meet more than a moiety of the demands upon them.

THE COTTON TRADE.

LIVERPOOL.—Nov. 7.

The cotton market was quiet in the early part of the week, and though business was done to a fair extent, prices had a downward tendency until Wednesday, when, chiefly in consequence of the more favourable aspect of continental politics, the demand materially increased. The sales to-day have again been large, with more firmness on the part of holders, and the week closes with little change from last Thursday's quotations. In Sea Island, transactions have again been large, and in qualities about "fair," which are now scarce, a further advance of 1d per lb is established. American, after a decline of fully ¼d per lb, has nearly recovered the quotations of last Thursday. New York advices to the 7th instant quote middling American 18½ cents., costing to sell in Liverpool 8¼d per sailing vessel, 8⅜d per steamer. For Brazil there continues to be a large demand, which is freely met by holders, at prices showing little variation. In Egyptian a good business has been done, and the better stapled kinds command extreme prices. East India was freely offered at the commencement of the week, and became very irregular, and generally ¼d per lb easier; but with an increasing demand prices have recovered and are now rather higher than last Thursday.

In cotton "to arrive" several transactions have been reported during the week; the latest quotations are—for America, basis of middling, from New York, November shipment, 8⅛d and 8¼d; from Charleston, ship named, 8⅛d; from Mobile, shipping or shipped, 8¼d per lb,

The sales of the week amount to 71,820 bales, including 5,190 on speculation, and 13,040 declared for export, leaving 53,590 bales to the trade.

The sales to-day will probably amount to about 15,000 bales with a strong market.

The above figures show:—

	Bales.
A decrease of import compared with the same date last year of	306,650
An increase of quantity taken for consumption of	73,020
A decrease of actual export of	63,220
A decrease of stock of	149,210

In speculation, there is a decrease of 175,030 bales.

The imports this week have amounted to 16,965 bales. The actual exports are 20,066 bales.

LONDON—Nov. 8.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened with a good demand at hardening rates; but on Saturday and Monday, owing to continental affairs, a pause ensued, and only small sales were effected at about ⅛d decline. On Wednesday renewed confidence appeared, and a good business has since been done, prices closing with an upward tendency, generally ¼d per lb above last week's quotations. Telegraphic advices from New York to the 7th November quote middling Uplands 18½ cents. Gold, 138⅞.

NEW YORK—Oct. 22.

Under an active demand, the market improved half a cent per lb on Saturday, and a further half a cent on Monday; but yesterday, the report of the failure of the Royal Bank of Liverpool and its depressing effect there, restricted the demand, and a portion of the advance of the two preceding days was lost. The sales for the three days reach 7,957 bales, of which spinners took 2,503, speculators 1,545, and exporters 3,909. We quote:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

MARKETS IN THE MANUFACTURING DISTRICTS.

The transactions in goods, both for home use and export, have been very moderate, at prices barely equal to those current in the previous week. The stocks, however, do not appear to accumulate. Coals have sold briskly at high rates, but the iron trade has continued quiet.

MANCHESTER, Nov. 7.—The depression noticed in our last continued unchecked up till yesterday, and prices in the interim gave way, but without leading to any increased business. The more peaceful aspect of the affairs of Italy has had a favourable influence on the Liverpool cotton market, and there is rather more inquiry here during the last two days for yarns and goods, but producers generally have advanced their quotations, which has checked operations. To-day, buyers have shown rather more inclination to purchase at the low prices of Tuesday, but decline to follow the upward tendency. Our market, therefore, closes firm, but with a small business in progress; producers, however, being still pretty well engaged, are not anxious sellers.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Holders of wool are a little firmer in price, but any actual quotations are as low as last Thursday. It is said that average Lincoln wethers can now be bought for 14d per lb. There is a steady but restricted demand for yarns. The export trade is very fitful and irregular. Home merchants buy pieces with great caution, and the American trade has not at all revived.

LEEDS.—The cloth halls were moderately well attended by both buyers and sellers. In some instances heavy goods were sold, at a slight reduction from recent prices, manufacturers being anxious to get quit of their stocks. Ordinary plain goods maintained late quotations. There is no alteration in the price of wool, but in a local point of view not much business is doing. The flax trade is dull, and prices are rather unsettled.

ROCHDALE.—There was a better attendance of buyers than last week, but much the same caution was used in the purchase of goods, only small parcels being selected. The wool trade continues quiet, without any material change in quotations.

BELFAST.—Flax—Rather increased supplies appeared in the various markets of this province during the past week; demand good for superior descriptions; prices in some cases have become reduced, to the extent of 6d per stone for inferior qualities. Yarns—Demand continues very limited. Bleached and finished linens—Although some improvement in the home trade has been reported, still the business transacted has not been large.

NOTTINGHAM.—We have to report another quiet market. Comparatively little can be done either in lace or hosiery yarns, and the tone of the market as regards prices is more decidedly against sellers. There is no improvement in the demand for silk.

DUNDEE.—Business continues without animation, and although there has, perhaps, been rather more doing in some special descriptions of yarns and cloth, there are no symptoms of any general improvement. The demand for flax on the spot continues to be on a very limited scale, as spinners only buy from hand to mouth. Good medium qualities are in fair consumptive demand, and prices of such are comparatively well maintained, on account of the lightness of stocks; with other descriptions, holders have shown rather more disposition to meet buyers; and, in order to bring about business, a slight concession in prices of some kinds has been submitted to. In tows, there is no change to notice. Jute continues very dull, and the tendency of prices is rather in favour of buyers.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 22.—State and Western flour has again declined 50c to 75c, and some of the more undesirable kinds $1, since the date of our last, the result of less favourable advices from Europe, which have led to a slight contraction of shippers' limits. Increased receipts have also exerted rather a depressing influence, since weak holders prefer to accept the alternative of lower prices rather than resort to storage. Of standard shipping brands the supply continues moderate, most of the late receipts having been purchased in transitu, but of grades adapted to the wants of home consumption, the stock is rapidly increasing, the demand being limited to present exigencies. The close was quiet and irregular, buyers offering $10 for standard shipping extra State, and holders demanding $10.25, with broken lots only to be had at the inside price, though some inferior brands were offering as low as $9.65 to $9.75. California flour is inactive and weak, most of the current supply consisting of inferior and ill-conditioned. Sales 26,000 bbls State and Western, and 1,000 sacks California. Southern flour has declined 50c to 75c, under a light demand and accumulating

supplies; sales 1,200 bbls, closing at $10 to $14.50, as extremes for inferior to best extra. Export of flour from 1st to 22nd Oct., 81,230 bbls, against 52,517 bbls last year. The receipts of wheat have considerably increased, which, in connection with reports of a dull market in England, has had rather a depressing effect on the market. On Saturday and Monday buyers had the advantage, gaining a concession of 3 to 5 cents on spring, but yesterday receivers made a vigorous effort to bring about a reaction, which resulted in a little more tone to the market and a curtailment of business. The indisposition of shipowners to accept lower rates of freights is an impediment to active business, since the current cost of choice spring wheat, with all the charges added, is equal to 63s in London, which is considerably above the latest quotation in that market; the sales are 350,000 bushels, yesterday's transactions at $2.10 to $2.12 for No. 3 spring; $2.18 to $2.20½ for No. 2 spring; $2.26 to $2.27 for No. 1 spring; $2.65 for amber state, and previously, but since our last $2.70 for amber state; $2.71½ for amber Michigan; $2.30 for extra Milwaukee spring; and $3.13 for white Michigan. Barley continues dull and prices are lower; sales 63,000 bushels at $1.31 to $1.35 for state, $1.40 for Western, and $1.48 to $1.52 for Canada West. Oats are less active, the speculative demand having abated, and prices are 1 to 2 cents lower; sales 280,000 bushels closing at 81 to 81½ cents for Western. Of Canada peas, we note sales of 15,000 bushels, in bond, at $1.50. Beans are easier. We quote Marrow, $3.90 to $4; medium, $3.70 to $3.80; pea, $3.80 to $3.90; kidney, $3.90 to $4; black eyed peas per bag, $5.60 to $5.70. Export from 1st to 22nd October—wheat, 1,092,502 bushels, against 37,452 bushels last year; corn, 168,115 bushels, against 833,397 bushels last year.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the arrivals of English wheat coastwise and by land-carriage have been only moderate this week, the demand for both red and white qualities has ruled heavy, at a decline in the quotations of from 1s to 2s per quarter. In foreign wheat—the imports of which have been on a liberal scale—very little has been passing, at 1s to 2s per quarter less money. Both English and foreign barley has given way fully 2s per quarter, with a heavy inquiry. We have no quotable change to notice in the value of malt. Sales, however, have progressed slowly. Oats have declined 6d to 1s per quarter, at which reduction the demand has ruled heavy. Both beans and peas have moved off heavily; nevertheless, previous quotations have been supported. The transactions in flour have been only moderate, at barely late rates.

The continental markets have become very quiet for all kinds of produce. Owing to the rapid increase in the stocks, both wheat and flour have further declined at New York. Annexed are the particulars of the supplies in warehouse:—

STOCK OF GRAIN IN STORE.

	Oct. 7.	Oct. 14.	Oct. 21.
	bushels.	bushels.	bushels.
Wheat	190,156	167,608	258,148
Corn	877,245	967,644	1,019,614
Rye	7,300	7,300	22,967
Oats	731,435	890,897	1,087,370
Barley	4,716	32,793	168,155
Malt	61,877	57,977	63,172
Peas	10,411	12,245	6,268

In Scotland, the transactions in all kinds of grain have been very moderate, on rather lower terms.

The Irish markets have been fairly supplied with produce, which has moved off slowly, at drooping prices. The exports have not increased.

The number of vessels on passage from Australia, California, and Chili is reported to be very large; but from ports east of Gibraltar, it is only 389 against 463 a month since, and 351 at this time last year.

Mr George Dornbusch thus reports the state of the floating grain cargo trade:—Since last Friday, 26 grain-laden vessels have been reported arrived at ports of call, viz., 19 wheat, 7 barley. The trade has been quiet, but steady in tone, with little disposition to do business. Wheat—With few cargoes off the coast, composed mostly of inferior sorts, the demand has been limited, and very little business has been done, at a decline of about 1s. In cargoes on passage and for shipment few sales have transpired, and a decline of about 2s has been accepted for Danubian. In maize also very little business is reported. Barley has continued scarce and quite as dear. Rye has attracted a little more attention, and prices have recovered part of the late decline. However, the high prices asked checked business. The reported sales are as follows:—Wheat, 11 arrived cargoes: Don Ghirka Taganrog, 61s 6d to 62s per 492 lbs; Polish Odessa, 69s to 70s 6d; Polish Nicolaieff, 69s per 480 lbs. On passage: 1 cargo Polish Odessa, 70s per 480 lbs. To be shipped: Banat, 52s 6d, f.o.b., January, 1868, shipment (weight guaranteeed at Port of call); Danubian, 61s per 492 lbs, November-December; ditto, 60s per 480 lbs, November-December; Saide, 56s, November-December; Ibrail or Sulina, 57s per 480 lbs, March-April-May. Maize—Shipping: 1 cargo Banat, 47s per 480 lbs. To be shipped in the first seven months of 1868: Danubian, 39s 6d per 480 lbs. Barley—1 arrived cargo: Gaza, 34s. On passage: Azow, 35s 6d. To be shipped in May: Danubian or Azow, 34s per 400 lbs. Rye—To be shipped: Azow, 51s, May; Roumelian, 51s per 480 lbs, to a direct port in Norway or Sweden, December-January. Linseed very quiet, at about 6d decline on the week. Calcutta, arrived in London, has been sold at 67s 6d to 68s per 410 lbs, A.T.; and Azow, to be shipped from June to August, 1868, 60s to 61s per 424 lbs, A.T. Cotton-seed very scarce, and prices firmly maintained. For a lot arrived in London, 11*l* to 11*l* 5*s* is asked.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The refiners have again been large operators chiefly in West India, and prices are rather higher. Low sugars have further advanced slightly, as the demand continues steady. There are now few sellers, unless at higher rates. The deliveries continue good and stocks have further decreased. 3,100 casks West India have sold in three days, including the parcels by auction. The stock in Great Britain is now 49,000 tons less than at the same date of last year. 27,900 baskets Java will be offered by the Netherland Trading Company at the sale on the 26th instant.

Mauritius.—About 12,500 bags have changed hands privately: brown, 30s 6d to 31s 6d; grainy, 36s 9d to 38s 9d per cwt. 1,086 bags by auction found buyers: crystalised yellow, 37s; soft grainy white, 38s to 39s.

Jaggery.—5,200 bags grainy have sold at 27s 3d to 28s 6d; 1,000 bags soft at 27s per cwt.

Foreign.—100 tons unclayed Manilla have sold at 27s 6d; 2,500 bags good at 28s; 17,000 bags clayed at 31s. 800 casks Porto Rico at 34s 6d to 35s 6d. 250 casks Cuba at 33s.

Refined.—The market is firmer, and rather dearer for dry goods and pieces.

RUM.—The reduced supply renders transactions limited, and the late advance is fully maintained. Good Demerara has sold at 2s 2d to 2s 3d, and Leewards at 1s 10d to 1s 11d. 280 puncheons Penang, here and to arrive, at 1s 8d per proof gallon.

COCOA.—Trinidad and other kinds remain quiet. A small parcel of good ordinary Grenada sold by auction at 48s to 49s 6d per cwt.

COFFEE.—The market is firmer, there being less distrust with reference to the course of European affairs. 765 casks 352 barrels and bags plantation Ceylon found buyers at full to rather higher rates; pale and grey, 70s to 73s; low middling to good, 73s to 87s 6d. Native is steady. 1,894 bags sold as follows: good ordinary, 53s 6d to 54s 6d; superior bold, 60s to 61s 6d. 44 casks at 53s 6d to 54s 6d. 1,536 cases 248 bags East India at steady prices, from 75s to 84s 6d. 966 bags Java, of superior quality, realised 76s to 77s. 848 bags Singapore were bought in or withdrawn above the value. 157 bags Manilla sold at 60s. 830 bags Guatemala, 58s 6d to 65s 6d. The next sale of the Netherlands Trading Company, on the 20th inst., will be small—viz., 110,500 bags.

TEA.—There has not been any alteration in the market by private contract. The sales which commenced on Tuesday concluded yesterday. 18,409 packages were offered, nearly all of which were printed "without reserve." 13,893 packages were sold. The auctions have passed with fair spirit, and generally without any material alteration on current rates. Common to fair black and red leaf Congous, of old im-

port, brought from 11¾d to 1s 1d per lb. Several breaks of new season's Congou, from Foo Chow, sold from 1s 1d to 1s 6d per lb, and a small parcel of fine Kaisow, of old import, at 2s 0½d to 2s 1d; common to fair black leaf dust realised 4¾d to 5¼d per lb. Canton scented and green teas sold at private contract prices, and new season's Oolongs, of good quality, from 1s 6½d to 1s 8½d per lb.

RICE.—The market is quiet. A few sales have been made in Ballam afloat, at 10s 9d to 11s 3d; and 150 tons broken white Bengal, at 12s 3d per cwt. There has been a limited business in soft grain descriptions.

SAGO.—500 bags good middling small grain sold at 17s 6d; one lot, 18s per cwt. Sago flour is scarce, and further advanced rates paid for small parcels on the spot. 550 tons Borneo have sold, to arrive, at 16s 10½d per cwt.

SPICES.—White pepper is firmer. 127 bags Penang, by auction, sold at a slight advance: ordinary to fair, 4¾d to 5d. 482 bags Singapore realised 5d to 5¼d. Black remains without alteration. 3,015 bags partly met with buyers. Singapore, 3½d to 3½d; low Penang, 3d. 54 cases brown nutmegs part sold, at former rates. 21 packages mace brought full prices: bright, 3s 3d to 3s 6d; low, 1s 6d to 1s 9d. 20 cases Penang cloves were held for higher rates, and bought in at 11¼d per lb. Jamaica ginger is quiet, and 135 barrels of the lower qualities were withdrawn. 31 cases Cochin sold steadily: fine bold, 100s to 102s; middling slight wormy, 68s per cwt. Pimento in good demand at 2⅛d to 2¼d per lb.

COCHINEAL.—The sales on Wednesday contained 2,258 bags, chiefly Teneriffe, and 1,750 bags sold. Silvers, at a decline of 1d to 2d, excepting for the better qualities, which realised extreme rates. Low to fine, 2s 9d to 3s 8d. Blacks obtained 3s to 4s 1d per lb. The small portion of Honduras sold did not establish any change in quotations.

LAC DYE.—264 chests offered by auction were chiefly bought in at higher prices, the stock being now much reduced.

OTHER DRYSALTERY GOODS.—Cutch is firm, at the recent advance. Gambier quiet; 16s 3d to 16s 6d accepted for common to middling. Cubes realised 24s 3d to 24s 9d. 259 bales safflower sold at previous rates, from 6*l* 12s 6d to 8*l* 12s 6d per cwt.

METALS.—The iron market continues without animation. Scotch pig iron is weaker in price, the last sales of mixed numbers being at 54s 9d. Business has been done in Chili copper, at enhanced quotations. British continues unsettled. Spelter is firm. A few sales have been made in common plates, at 21*l* 15s to 21*l* 17s 6d per ton. English tin has sold rather under the smelters' fixed prices. Straits has been steady, with business at 89*l* 10s to 90*l*; afloat, at 90*l* 10s to 91*l* per ton.

HEMP.—Russian is quiet. Petersburg clean, 38*l* to 38*l* 10s per ton. About 1,200 bales Manilla have changed hands, said to be at previous rates, but prices do not transpire.

LINSEED.—The market is dull with rather lower prices, and no business done for arrivals.

OILS.—Prices of olive are tending downward, as there is a strong desire on the part of importers to realise, even at lower rates. Cod in second hands has sold at 38*l* per tun. Sperm fully maintains the recent advance. Palm dull. Fine Lagos, 41*l*. Cocoa-nut is dull and prices nominal. Linseed oil has further declined to 36*l* 10s to 36*l* 15s. Rape is again lower; English on spot is now only worth 37*l* 10s, and for delivery this and next month, 38*l* would be accepted; for January-April 40*l* is generally demanded, but some forced sales have been made as low as 39*l* for these months; at this price, however, there are many buyers; foreign brown, 38*l* 10s spot; refined 41*l* to 42*l* foreign, and 40*l* English.

PETROLEUM is dull and lower. American refined, 1s 4d to 1s 4½d per gallon.

TALLOW.—Russian is dull, and again rather lower. Petersburg Y.C. 4s 9d to 4s 3; January to March, 43s 6d to 43s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, Nov. 4, 1867.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is strong, and closes fully 6d dearer for the week. Extensive transactions have again occurred in West India, viz., 1,825 casks, making 4,933 casks for the week; 3,900 bags grainy Jaggery Madras have sold at 27s 6d to 27s 9d; 4,800 bags soft, at 27s to 28s per cwt, and several parcels of Mauritius.

COFFEE.—The public sales have gone off with fair spirit and at steady prices, excepting for some of the lower qualities, which were easier: 144 casks Plantation sold; 818 bags Native, good ordinary, at 53s per cwt; 847 cases 568 bags East India, at previous quotations; 96 bags Java at 63s. A floating cargo of Eahia, low quality, sold at 32s per cwt for the Mediterranean.

RICE.—No sales reported on the spot. Two floating cargoes of Rangoon sold at 12s and 13s per cwt.

GAMBIER.—Is again lower. 2,040 bales sold at 16s 3d to 16s 6d per cwt.

OIL.—137 casks palm, by auction, were chiefly bought in.

TALLOW.—Town reduced to 45s. 495 casks Australian, by auction, part sold at 42s 3d to 44s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is firmer, and, in some instances, prices rather higher. There is more doing in Dutch crushed at advanced rates; of B.H.'s, 56 tons have been sold at 29s 4d, f.o.b., Amsterdam.

GREEN FRUIT.—Market somewhat dull, with lower prices for oranges. Some parcels from Lisbon, Spain, Sicily, and Gibraltar, sold by Keeling and Hunt, at public sale, went at easier rates. Messina and Malaga lemons in character. French chesnuts have opened at a moderate figure, and cold weather in favour of sale. Almeria grapes are being sold at prices in character with condition and quality. Para and Barcelona nuts without alteration.

COLONIAL WOOL.—No change to report.

FLAX.—Market steady.

HEMP.—Market rather firmer this week, at the quotations.

SILK.—No change in the market.

TOBACCO.—Our market has been again active during the week, resulting in a good business in the various descriptions of American tobacco. In other classes, sales have been made to a fair extent.

METALS.—A continuance of quiet prevails, but no further depression of consequence. Copper has been dull of sale, but at the close there is rather more disposition to operate. Iron is heavy. Tin is steadily maintained, at last week's rates, and a moderate business done. Lead is neglected. Spelter is buoyant, at further improvement in price. Tin plates very quiet.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	2
Yellow Russia	44	6
Melton stuff	33	6
Rough ditto	18	0
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 4.—The total imports of foreign stock into London last week amounted to 8,168 head. In the corresponding week last year, we received 15,693; in 1865, 19,909; in 1864, 13,674; in 1863, 10,896; in 1862, 11,989; in 1861, 12,755; and in 1860, 6,824 head.

To-day's market was fairly supplied with foreign stock, the quality of which was tolerably good. The demand ruled steady, at prices equal to Monday last. The fresh arrivals of beasts from our own grazing districts were only moderate as to number, but in full average condition. For most breeds there was a fair demand, and last week's quotations were well supported. The primest breeds sold at from 4s 8d to 5s per 8 lbs. The show of sheep was slightly on the increase. Good and prime breeds moved off freely, and in some instances prices were a shade higher than on this day se'nnight. Otherwise the trade was inactive, at late rates. The primest Downs and half-breds realised 5s per 8 lbs. The supply of calves was only moderate; nevertheless, sales progressed slowly, at previous rates, viz., from 4s 4d to 5s 4d per 8 lbs. There was a fair sale for prime pigs, at full prices; but large hogs were much neglected, at late currencies.

SUPPLIES ON SALE.

	Nov. 5, 1866.	Nov. 4, 1867.
Beasts	6,080	5,630
Sheep	21,050	23,390
Calves	125	229
Pigs	610	550

THURSDAY, Nov. 7.—We have a fair supply of beasts and an active demand for them. Last Monday's quotations are well maintained. There are a few more sheep than on Thursday last, yet the number is not large. The trade is very slow, and Monday's prices are with difficulty supported. Calves are rather lower. Beasts at market, 1,010; sheep and lambs, 3,880; calves, 172; pigs, 140.

NEWGATE AND LEADENHALL.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d
Inferior beef	3	2	to	3	4	Inferior mutton	3	2	to	3	6
Middling ditto	3	6		3	8	Middling ditto	3	8		4	2
Prime large ditto	3	10		4	2	Prime ditto	4	4		4	6
Prime small ditto	4	4		4	6	Small pork	3	10		4	4
Veal	3	8		4	6	Large pork	3	2		3	8

HOP MARKET.

FRIDAY, Nov. 8.—The market for most kinds of hops has continued quiet, and prices, in some instances, have shown signs of weakness. The trade on the continent and in America has ruled steady, at drooping currencies:—Mid. and East Kent, 8*l* 8s to 12*l* per cwt; Weald of Kents, 7*l* 10s to 9*l* 10s; Sussex, 7*l* 10s to 9*l*; Farnhams, 9*l* 10s to 12*l*; Bavarians, 7*l* to 9*l* 9s; Belgians, 5*l* 12s to 6*l* 10s; Yearlings, 6*l* 10s to 8*l* 8s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 8.—These markets are well supplied with potatoes, for which the trade has ruled steady at our quotations:—Regents, 110s to 160s; flukes, 120s to 150s; rocks, 100s to 130s; kidneys, 100s to 120s per ton.

COAL MARKET.

FRIDAY, Nov. 8.—There was no alteration in the market to-day. Wallsend Hetton 22s—Original Hartlepool 22s—Hetton Lyons 19s—Kepier Grange 19s 9d—Penshur Primrose 18s 9d—South Durham 19s 6d—Wharncliffe 19s 6d. Ships at market, 38; sold, 10; gas contracts, &c., 14—24; unsold, 14; ships at sea, 30.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 8.—The public sales of sundry descriptions of foreign wools, held here this week, have not commanded much attention; the quantity sold is inconsiderable, and prices, with but few exceptions, show a further decline.

CORN.

FRIDAY, Nov. 8.—The market moderately attended; only a consumptive demand for wheat, at barely Tuesday's prices; flour 1s per sack lower, and dull. Beans 6d dearer; Saide, 22s. Peas steady. Other articles quiet.

WAKEFIELD, Friday, Nov. 8.—Wheat trade firm at last week's rates. Millers would buy freely at a decline. Barley *rather cheaper*. Other articles unaltered.

The Gazette.

TUESDAY, November 5.

BANKRUPTCY ANNULLED.

J. Stowell, Charles street, Hatton garden, bootmaker.

BANKRUPTS.

J. Alston, Sutherland terrace, Pimlico, greengrocer—C. Barnes, Blyth lane, Hammersmith, builder—A. Barthelmeh, Royal Mint street, baker—T. J. The Railway Monitor

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending 26th of October, on 13,072 miles, to 764,688*l*, and for the corresponding week of last year, on 12,773 miles, to 724,922*l*, showing an increase of 332 miles and of 39,766*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 9,423 miles, to 639,590*l*, and for the corresponding week of 1866, on 9,151 miles, to 605,710*l*, showing an increase of 272 miles and of 33,880*l*. The total receipts of the past week show a decrease of 11,022*l* as compared with those of the preceding week, ending the 19th of October.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 4.—In the share market to-day, the only description showing any material change of tone was British railways, of which Great Northern (A shares) relapsed 1½, North-Western ¾, and Great-Western ¾; and Caledonian declined 2, Lancashire and Yorkshire further 2½, South-Western, Midland (of both descriptions), and Metropolitan (Extension) 1 each, ditto (original) and Chatham ½ each, South-Eastern ⅜, and Great-Eastern ¼. In colonial, Great Western of Canada further improved ⅛. In foreign, Ottoman advanced ½; Erie shares (paid up) declined a further ½, and Atlantic and Great Western (consolidated bonds) ¼; and Detroit and Milwaukie are now quoted ex coupon. In mines, West Chiverton advanced a further 1, East Wheal Russell ¼, and Prince of Wales ⅛; Chiverton relapsed 1; and Clifford declined 1½, and Yudanamutana ⅝. Of the banks, Chartered Mercantile and Union of London receded ½ each. In miscellaneous, Universal Marine improved ¼, and Ceylon and China Steam declined ¼ and ⅛ respectively. The Committee of the Stock-Exchange have ordered the 6 per cent. Bonds of the Tasmanian Government Loan and 10-40 Bonds of the United States to be officially quoted.

TUESDAY, Nov. 5.—In the share market to-day, British railways closed with a general recovery from yesterday's depression; banks were also rather better, and the other descriptions were almost unaltered. Of the British lines, Lancashire and Yorkshire recovered 1½, Midland ⅜, ditto (Birmingham and Derby) and Caledonian 1 each, and Great Western, North Western, and Metropolitan ¼ each. In colonial, Great Western of Canada (shares) further improved ⅛, and Delhi (stock) receded ¼. In foreign, Northern of Buenos Ayres declined ½, and Atlantic and Great Western (debentures) remain at 25½ to 26½. In mines, Scottish Australian and United Mexican receded ⅛ and ½ respectively; Rossa Grande were fractionally firmer. In miscellaneous, Ocean Marine and Rio improvements advanced ⅛ each, and Viceroy of Egypt's Loan ¼; Peninsular and Oriental (1855) declined 1, Australian Agricultural and Rhymney Iron (new) ¼ each, and Egyptian Trading and General Credit ⅛ each.

WEDNESDAY, Nov. 6.—In the share market to-day, there was a further general improvement in British railways. Yesterday's prices of banks, mines, and colonial and foreign railways, were also generally fully maintained, the other descriptions closing without change of tone. Of the British lines, Great Northern advanced 1, ditto (A stock) 1¼, Caledonian and Lancashire and Yorkshire a further 1 each, South-Eastern, Chatham, and Great Eastern, ¼ each, ditto (East Anglian), Brighton, Manchester, Sheffield, and Lincolnshire, and Shropshire Union ½ each, Great Western, North-Western, and Midland further ¾ each, Metropolitan a further ⅛, and ditto (Extension) 1. In colonial, Delhi (stock) recovered ¼; Bombay and Central India, Great Indian Peninsula, and Great Southern of India (5 per cent.) advanced ½ each, and Great Western of Canada (shares) a further ⅛; and Grand Trunk of Canada (stock) receded ¼. In foreign, Bahia and San Paulo improved ½ each, Lombardo-Venetian ⅜, Erie shares (paid up) ½, and Illinois Central (shares) 1; and Atlantic and Great Western (debentures) were steady at 25½ to 26½. In mines, Wheal Seton advanced 2½; Wheal Mary Ann 1, and Don Pedro and Frontino ⅛ each, and Chontales declined ⅝.

THURSDAY, Nov. 7.—In the share market to-day, dulness has prevailed throughout, and British and Canadian railways closed with a downward tendency, particularly the former, of which Caledonian and Lancashire and Yorkshire relapsed 1½ each, Great Northern 1, ditto (A stock) ⅝, Great Western and Midland ½ each, Metropolitan and South Eastern ¼ each, and Great Eastern ⅛. In colonial, Great Western of Canada (shares) relapsed ⅛, and Buffalo and Lake Huron and Buffalo and Goderich declined ¼ and 1 respectively. In foreign, Great Luxemburg improved ¼, and Detroit and Milwaukie 1 each; Erie shares (paid up) relapsed ½; Atlantic and Great Western (bonds) receded ⅛; and ditto (debentures) remain at 25½ to 26½. In miscellaneous, Ocean Marine recovered ½; Submarine Telegraph advanced 5, Viceroy of Egypt's Loan ⅛, Upper Assam Tea ¼, and General Omnibus ⅛; China Steam relapsed ½; and Royal Mail Steam declined 9, Peninsular and Oriental 3, ditto (1855) 2, Moscow Gas and Northern Assam Tea (B shares) 1 each, Union Marine (Liverpool) ¼, and Anglo-American Telegraph and Thames and Mersey Marine ⅛ each.

FRIDAY, Nov. 8.—The railway market was dull, but the reduction in prices did not exceed ⅛ to ⅜ per cent. Metropolitan stock was quoted 120⅜ to ⅝; Great Western, 45⅞ to 46⅛; London and North Western, 113⅝ to ⅞; Midland, 117⅛ to ⅜; Lancashire and Yorkshire, 123½ to 124; Caledonian, 85¼ to ⅜; South Eastern, 65⅝ to ¾; Great Eastern, 31⅛ to ¼; Great Northern, 107½ to 108½; ditto A, 111¾ to 112¼; London, Chatham, and Dover, 17⅞ to ⅜; North British, 33 to ½; and Brighton, 52½ to 53.

DEATH.—We have to announce the death of Mr Richard Witherby, of the firm of Richard Witherby and Son, of Mincing lane. He was universally respected.

*** Sold wholesale and for export by the Proprietors, Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally.

"MY LIBRARY."

Edited by PAMPHILIUS.
SIXPENNY VOLUMES.
Each Volume complete in itself, uniform in size, and neatly bound, with Ornamental Wrapper

The object of "MY LIBRARY" is to direct the attention of young men to LITERATURE of a higher standing than that generally published at so low a price—to provide them with a CHEAP, NEAT, PRACTICAL, and PROGRESSIVE LIBRARY, calculated to stimulate to INDUSTRY, ENERGY, PERSEVERANCE, and SELF-DENIAL, for with these virtues there is no eminence to which a man may not aspire, and from the examples deduced he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life.

"MY LIBRARY" will be devoted to PRACTICAL and PROGRESSIVE KNOWLEDGE—will be a MIRROR of LITERATURE, SCIENCE, and ART—a multum in parvo—the condensation of the primary aspirations of the great, the good, and practical, whose examples are calculated to engender and animate virtue, to create emulation, and teach the RISING GENERATION to struggle, to endure, to conquer difficulties, or in failure—

"To arm the obdurate heart
With stubborn patience and with triple steel."

"MY LIBRARY" will also be a Magazine of Reference, an INDICATOR to the youthful mind in the choice of books—for the choice of books, like the choice of companions, either tends to ELEVATE or DEGRADE, as books give the same turn to our thoughts and reasoning that GOOD COMPANY does to our conversation.

....."Pamphilius writes with so much Christian feeling, and in such an agreeable and conversational style, that his new serial cannot fail to meet with approbation and success."—NEWS OF THE WORLD.

....."These small volumes deserve a place in every juvenile library; indeed adults may benefit largely by their perusal. In both instruction is agreeably conveyed, its necessarily didactic tone being softened by the introduction of pleasing narratives and anecdotes. The rules of life constitute the subject of the first volume, and they find enforcement by lively biographies and other accounts of 'Patient Boys' in the second. We heartily commend the books to parents and preceptors, deeming them well adapted to influence to most excellent ends all who may read them."—WOLVERHAMPTON CHRONICLE.

Ward, Lock, and Tyler, 158 Fleet street; and 107 Dorset street, Salisbury square.

MOULE'S PATENT EARTH CLOSETS.

VICTORIA THEATRE.
Lessee and Manager—Mr J. Arnold Cave.
Houses filled to overflowing pronounces RICH AND POOR one of the best dramas of the day. The strongly drawn characters, each one so admirably acted by the talented and unequalled company of this popular theatre, the pictorial illusions and exciting incidents, all contribute to make this great production a triumphant success. Every evening, at 7, the beautiful domestic drama, entitled RICH AND POOR; OR, A STORY OF THE FOUR SEASONS. The caste introduces Messrs Lewis Nanton, E. Fitzdavis, H. Russell, J. H. Doyne, G. P. Jacques, G. S inner, Carter, Baker, Maynard, Nichols, Fr d. Hart; Mesdames Neville, Purette, Doyne, Lizzy Grey, and Julia Summers. After which, those inimitable negro delineators, Diamond and Bryant, will appear in their Plantation Songs and Dances. And conclude with J. B. Howe's exciting Irish drama, THE GREEN HILLS OF ERIN.—Boxes and stalls, 1s; pit, 6d; gallery, 3d; private boxes, 5s and 10s. Half-price to boxes and stalls at a quarter to nine.

LURLEY, OR THE BRIDAL OF BELMONT.—Mr John Millard will read Praed's charming Poem, "A Legend of the Rhine," daily at 4 and 9, at the POLYTECHNIC. The Reading will be illustrated with new and beautiful scenery, by Mr John O'Connor; also with striking Ghost and Spectrescopic effects (J. H. Pepper and Henry Dircks, joint inventors). Professor Pepper's Lectures on the Paris Exhibition, introducing Machine-made Jewellery, by Edwin W. Streeter, of Conduit street, Bond street, daily at 3 and 8. The wonderful Lectard at a quarter to 4 and quarter to 9.

CHRISTY MINSTRELS, ST. JAMES'S HALL, Piccadilly, the only original and veritably legitimate Christy Minstrels. Messrs Moore, Crocker, and Ritter, proprietors.—Every Evening, at eight; Wednesday and Saturday, at three and eight. Company increased to Twenty-seven Performers, rendering it the largest and most talented Ethopian troupe in the World. Moore, Crocker, Ritter, S Newland, Adams, Mudge, Pedro Stirling, Japanese Tommy, and Richard Davies, the Christy's eight Star Comedians, and their powerful vocal and instrumental coadjutors, the them of general conversation.—Fauteuils, 5s; stalls, 3s; area 2s; gallery, 1s. Juveniles under twelve, half-price to stalls and area. Tickets and places, may be secured at Mr Mitchell's, Royal Library, 33 Old Bond street; and at Mr Austin's ticket office, 28 Piccadilly.—Caution.—The Christy Minstrels never perform out of London or anywhere away from their own hall.
Manager, Mr FREDERICK BURGESS.

SHARE AND DEPOSIT INTEREST WARRANTS.—The Warrants for the half-yearly interest, accruing on investments in the share and deposit departments of the Conservative Land Society, due at Michaelmas, were issued in due course on the 1st inst. to the shareholders and depositors, who were entitled to such interest, who are requested to present their warrants for payment at the offices, No. 33 Norfolk street, Strand, London, W.C., between 10 and 4.
CHARLES LEWIS GRUNEISEN, Secretary.
Prospectuses of the Share, Deposit, Land, and Building Advance departments will be sent free of charge to any part, at home or abroad. The Society has acquired 68 estates in 26 counties. The taking of land is quite optional. Present rate of interest—five per cent. on shares, and four per cent. on deposits.

THE ONLY STOVE WITHOUT A FLUE.
NASH AND JOYCE'S PATENT, for airing, drying, and warming shops, halls, church pews, conservatories, and all other places. Price from 12s 6d to six guineas. Stoves made expressly for greenhouses and conservatories, to burn all winter if required, by filling up with fuel every twelve hours, giving any amount of heat, large or small, by a simple arrangement of regulators.
Patent fuel for the stoves in bags and sacks, 4s 6d and 9s; only genuine with name, address, and seal on the bag and sack.
Prospectus post free.
SWAN NASH,
Patentee and Sole Manufacturer,
253 Oxford street, and Joyce's Stove Depot,
119 Newgate street, London.

H. J. AND D. NICOLL, TAILORS to the Queen, Royal Family, and the Courts of Europe.
London—114, 116, 118, 120 Regent street; and 22 Cornhill.
Manchester—10 Mosley street.

THE HEAD AND HEART LEGACY.
"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track."—HEAD AND HEART LEGACY.
OPINIONS OF THE PRESS.
The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."
"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."
"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have heads and hearts' we commend this singul, legacy."
"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him todo. The lessons are alike honourable to the head and heart of the writer."
Ward, Locke, and Tyler, 158 Fleet st eet.

GOUGH AND BOYCE,

ORIGINAL PATENTEES AND MANUFACTURERS.

As many complaints are made of KAMPTULICON manufactured by other houses, we beg to request attention to our address,

48 CANNON STREET.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-Office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE

CAPS, &c. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants. DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

NO MORE GREY HAIR.—

MELANOGENE, the superlative dye of Dicquemare, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This Dye is superior to all that have been employed hitherto; can be obtained of all purfumers and chemists.—Manufactory at Rouen, Rue St Nicholas 39; Wholesale, Messrs HOVENDEN and SONS, 5 Great Marlborough street, W., London

THE BEST REMEDY FOR INDIGESTION.

NORTON'S CAMOMILE PILLS

are confidently recommended as a simple but certain remedy for Indigestion. They act as a powerful tonic and gentle aperient: are mild in their operation; safe under any circumstances; and thousands of persons can now bear testimony to the benefits to be derived from their use.

Sold in bottles at 1s 1½d, 2s 9d, and 11s each, in every town in the kingdom.

CAUTION!—Be sure to ask for "Norton's Pills," and do not be persuaded to purchase the various imitations.

ELECTRICITY IS LIFE.—

HEALTH RESTORED WITHOUT MEDICINE. —The PATENT CURATIVE and ELECTRIC BELT is the only guaranteed remedy for weakness, nervousness indigestion, feelings of decay, &c. Sent for one stamp by H. JAMES, Mechanical Electrician, Percy House, Bedford square, London.

N.B. Medicine alone can never cure.

YEARLY Volumes for 1857, 8, 9, and 60, to be Sold—six numbers deficient.—A. Z., 18 Exeter street, Strand.

KINAHAN'S LL WHISKY.

—DUBLIN EXHIBITION, 1865.—This celebrated old Irish Whisky gained the Dublin Prize Medal. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, London, W. Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

BASS'S EAST INDIA PALE ALE

reduced in price 3s per barrel.

BURTON ALES 6s per barrel.

This October brewing is now arriving in 18 gallon casks.

Last Season's Ale, in bottle, is in fine condition.

BERRY BROS. and CO., 3 St James's street, S.W.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments,

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "ALLSOPP'S PALE ALE" being specially asked for.

HOLLOWAY'S PILLS, — WITH

the weather so cold and the wind so keen, what is to be done to keep the human body healthy—to protect the weak—to renovate the diseased? The reply is—Supplant the suppressed action of the skin through an alterative like these Pills, by a freer action on the liver, bowels, and kidneys—this will preserve the delicate internal structures from congestion, irritation, and inflammation, and carry off those noxious matters ordinarily transmitted through the integument. A course so natural must commend itself, and must elicit the unqualified approbation of all who think and understand how nature invariably aids a defective organ by accomplishing its unperformed functions by means of increased activity elsewhere.

COUGHS, COLDS, ASTHMA, AND

CONSUMPTION, are immediately relieved by DR LOCOCK'S PULMONIC WAFERS.—From Mr R. W. Cooper, surgeon, 22 Slaney street, Enniscorthy:—"I have used them myself, and ordered them with marked benefit." They give instant relief to asthma, consumption, coughs, colds, and all disorders of the breath, throat, and lungs. Price, 1s 1½d per box. Sold by all druggists.

PRICE'S SOLIDIFIED GLYCERINE

(Patented)

GOLD MEDAL, PARIS, 1867.

The newest and best Toilet Soap wears well, gives a rich and fragrant lather, is entirely free from cocoa-nut oil or excess of alkali, and contains half its weight of Price's distilled glycerine.

Sold in 4d and 6d tablets.

PRICE'S PATENT CANDLE COMPANY (Limited), Belmont Works, Battersea, S.W.

THE VICTORIA MAGAZINE.

The "Victoria Magazine" has received many proofs of the great regard in which it is held by the subscribers, advertisers, and the press, and has obtained an extensive circulation in the highest circles. In a recent review, the "Spectator" remarks:—

"The 'Victoria Magazine' maintains its position amongst the serials of the day. Its tales and critic sm are quite of average merit, and it discusses the social questions that affect the status of women with a knowledge and ability alt gether its own. It is always ready to call up for judgment the oppressor or defamer of the sex, and really does an immense amount of good in impressing on the public mind their genuine wants, and in resisting the silly opposition that has often attended the attempt to improve either their mental or physical condition."

Since the magazine was first published in 1863, it has contained original articles on all questions relating to women; it records each month any practical effort made for the improvement of their condition; and under the head of miscellanea, reprints articles on similar subjects, whether adverse or otherwise to the views of those who advocate remunerative employment for women, that free expression may be given "to both sides of the question."

An original serial tale runs through the monthly numbers, which also contain reviews of the newest books and music, theatrical and musical criticisms, and articles upon topics of general interest.

Subscribers receive their copies direct (postage free), on payment of 12s in advance, to

Emily Faithfull, publisher in ordinary to Her Majesty, VICTORIA PRESS, Princes street, Hanover square, W., where all advertisements and communications must in future be addressed,

"The 'Victoria Magazine' would be worth perusing if it was only for the very truthful remarks as to the morals of society in 'Facts and Faces,' by May, but the whole number is very readable."—JOHN BULL.

TRANSPARENT CANDLES.—IF

you only want something pretty to look at, without minding a little smoke and smell, and a little bending and running over if the room should happen to be rather unusually warm, buy any of the very transparent low quality Paraffine Candles now sold freely everywhere at one shilling per pound; but if along with beauty of appearance you require steady brilliancy of light, and freedom from risk of these little occasional mishaps, tell your dealer to supply you with "PRICE'S GOLD MEDAL PALMITINE CANDLES," which though charged at a higher price per pound, are really cheaper when the difference of quality is taken into account. They are believed to be the very best substitute yet produced for real wax and spermaceti, now at such an extravagant price, and are being introduced in place of them in the West End Clubs, and elsewhere where excellence of quality is studied as well as economy.

THE VICEROY OF EGYPT'S MORTGAGE LOAN.

The Fourth Drawing will take place at the office of the Anglo-Egyptian Banking Company, Limited, on Wednesday, the 20th day of November instant, at noon.—By order of the Board,

TO MERCHANTS AND MANUFACTURERS.—A thorough business man, aged 37, is open to an engagement. He is a first-class accountant, and an excellent salesman.—B. G. H., care of Mr Hobcraft, 1 Mincing lane, E.C.

TO CAPITALISTS.—PARTNERS wanted with £10,000, in a foreign shipping business, established upwards of 40 years, and with an old connection of the first order.—Apply through Mr J. Lilwall, No. 1 St Swithin's lane, E.C.

TO CAPITALISTS.—THE Advertiser can introduce and constitute a business producing 25 per cent. per annum net profits; safe, steady, close, and unspeculative. The present works, which are extensive, and the working accounts (which are kept by an independent public Accountant), can be at any time inspected.—Address Box 74, Post Office, Merthyr Tydvil.

PARTNERSHIP.—WANTED, TO take the place of a retiring partner in a Chemical Manufactory in the North of England, a gentleman, who has the command of from £10,000 to £15,000.—Apply, by letter, to Gillespie, Swithinbank and Co., Public Accountants, Newcastle-upon-Tyne.

PARTNERSHIP.—WANTED, IN an established business, with a good connection, in the South American trade, a Partner, who could command a capital of £5,000 to £10,000. None but principals or their solicitors will be treated with.—Apply to Messrs Bateson, Robinson, and Morris, attorneys, Liverpool.

INVESTMENT, LOAN, AND BANK AGENCY.
Established 1839.

Investments and Sales of every description of Public Securities can be effected, either for immediate or deferred settlement, as may be agreed upon.

Loans granted, for one year or any shorter period, on Stocks and Shares having a market value.

Deposits of all amounts received at 5 per cent.

The Finance Agency of Foreign Governments, Municipalities, Public Companies, and Money Agency Business generally undertaken.

RICHARD TAYLOR and COMPANY.
No. 12 Clement's lane, Lombard street, London, E.C.

MR HENRY SPYER,

49 CORNHILL, E.C.

EVERY BRANCH OF ACCOUNTANCY UNDERTAKEN.

HONDURAS GOVERNMENT RAILWAY LOAN, £1,000,000.

IN BONDS TO BEARER OF £100, £500, AND £1,000 EACH,

Bearing 10 per Cent. Annual Interest, payable Half-Yearly in Sterling.

Issued at 80 *per cent., and to be redeemed at par in Sterling within* 17 *Years by Yearly Drawings, by means of an accumulative Sinking Fund of* 3 *per cent. per annum.*

THE FIRST DRAWING TO TAKE PLACE ON DECEMBER 31ST, 1869.

The payments by Subscribers will be as follows :—				£	s	d
5	per cent.	on Application		5	0	0
10	—	on Allotment		10	0	0
10	—	on January 1st, 1868, less interest	£0 9 4½	9	10	7½
15	—	on July 1st, 1868 —	1 11 3	13	8	9
20	—	on January 1st, 1869 —	2 10 0	17	10	0
20	—	on April 1st, 1869 —	1 17 6	18	2	6
80	per cent.			73	11	10½ per cent.

Interest will be payable on 1st July and 1st January in each year at the LONDON AND COUNTY BANK, and, for the first instalment of £15, will date from 1st October, 1867.

In default of payment of any of the respective instalments, all previous payments will be liable to forfeiture.

The instalments may be anticipated at any time at Bank of England rate.

The Government of Honduras having agreed to appropriate to the Subscribers a moiety of the net profits of the Railway during 15 years after the complete repayment of the present Loan, Subscribers will receive, as bonus, within one month after allotment, with each £100 Bond, one 10,000th deferred fully paid-up Railway Share to Bearer, entitling the holder thereof to receive his proportion of such net profits.

PROSPECTUS.

The President of the Republic of Honduras, being duly authorised, has given full powers to Mons. Victor Herran, Minister at Paris, and Senor Don Carlos Gutierrez, Honduras Minister in London, to contract, on account of the Government, a Loan, to be applied towards the construction of an Interoceanic Railway from Puerto Caballos, on the Atlantic, to the Bay of Fonseca, on the Pacific.

To show the importance attached by the British Government to the Honduras Interoceanic Railway, it may be stated that the line has been surveyed on the part of Her Majesty's Government by Lieut.-Colonel Stanton, R.E., and a detachment of Royal Engineers sent out for the purpose. Colonel Stanton reports "That the harbours of both Terminí are unexceptionable, and that the road can be constructed without any sharper curves or heavier gradients than are to be found on existing lines over which Locomotives work without difficulty."

The New Treaty between Honduras and Great Britain declares that—

"In order to secure the construction and permanence of the route or road herein "contemplated, and also to secure for the benefit of mankind the uninterrupted "advantages of such communication from sea to sea, Her Britannic Majesty re- "cognises the rights of sovereignty and property of Honduras, in and over the "line of the said road, and for the same reason guarantees, positively and effica- "ciously, the entire neutrality of the same. And when the proposed road shall "have been completed, Her Britannic Majesty equally engages, in conjunction "with the Republic of Honduras, to protect the same from interruption, seizure, "or unjust confiscation, from whatsoever quarter the attempt may proceed."

Treaties signed by the Honduras Government with France and the United States contain the same provisions, and the French Government, considering the public utility of the Honduras Railway, has promised the official quotation of the Honduras Loan on the Paris Bourse.

The following official report by Rear-Admiral Davis, made to the Secretary of the Navy of the United States Government, in compliance with a resolution of the American Congress on the 19th of March, 1866, demonstrates likewise the importance which the United States Government attaches to the construction of the Honduras Line:—

"The reader who follows the course of the surveyors, naturalists, and geolo- "gists from the capacious, safe, and excellent harbour of Puerto Caballos, through "regions remarkable for their salubrity, fertility, great variety of climate and "productions, and valuable mineral resources, to the waters of the splendid "harbour of La Union (Bay of Fonseca), cannot but regret that capitalists have "not found it to their interest to carry out one of the most promising and one of "the least embarrassing enterprises of the day."

The Line of Railway has been carefully selected and surveyed by Mr Trantwine (late engineer-in-chief of the Panama Railway) and an efficient staff, and a contract has been entered into for the construction of the whole Line, with Stations and Rolling Stock, for a stipulated sum of about £8,000 a mile, including every outlay, and the works are to be proceeded with in sections.

From time to time, as the instalments of the present loan are received, the proportion to be applied to the construction of the first section of the Railway will be handed to and held by trustees in trust, to pay the contractor the instalments on his contract, as certified by the Government Engineer. The balance of the loan will be applied in clearing the forests, and in payment of Engineering and other Incidental expenses.

The Interest and Sinking Fund of the Loan are specially guaranteed by a first charge upon the intended Railway itself and its Revenue, and also by a first mortgage upon the whole of the Domains and Mahogany forests of the State of Honduras, which, according to official report, are of immense value.

It is arranged that the whole of the produce of the above mortgaged State Domains and Forests shall be consigned direct to London by the Honduras Government to Messrs Bischoffsheim and Goldschmidt, who will pay over the proceeds of the sales towards the Annual Interest and Sinking Fund, and the construction of the remaining sections of the Railway.

It has been further arranged in the contract that, as soon as any portion of the Railway is completed, the Contractor shall bring down to the terminus, free of charge, by the return empty waggons, any produce of the Government Forests and Domains that may be ready for shipment to England.

Beginning at the harbour of Puerto Caballos, on the Atlantic, the Railway will proceed over the table land of Honduras—in a line of 230 miles to the Bay of Fonseca, on the Pacific.

The ports at either end are spacious, safe, and easily accessible for the largest ships.

The steaming distances from Liverpool to San Francisco, touching at Jamaica, are —By way of Panama, 7,980 miles; Nicaragua, 7,720 miles; Tehuantepec, 7,740 miles; Honduras, 7,320 miles.

The distance between New York and San Francisco, by Panama, is 5,224 miles by Nicaragua, 4,700 miles; by Tehuantepec, 4,200 miles; by Honduras, 4,121 miles —a saving by way of Honduras, as compared with Panama, the only line on which a Railway is already constructed, of 1,103 miles.

The difference in actual distance, coupled with the superiority of ports, the facilities of embarkation and disembarkation, and the connection with the American coast lines, will effect a saving in time, as compared with the Panama route, of not less than five days between the Atlantic and Pacific ports of the United States.

The line will afford the easiest, safest, and speediest route between Great Britain and British Columbia; it will also offer the increased facilities of first-class ports for the establishment of speedy intercourse with Australia and New Zealand, and will bring Jamaica, Belize, and other British possessions in the West Indies into the direct line of communication.

Last year, the Dividend paid by the Panama Company was at the rate of 24 per cent. per annum on a capital of £1,600,000, in addition to a Bonus of 40 per cent. on accumulated profits. The Honduras Line will in all probability return as much profit as the Panama Line, if not considerably more.

Sufficient of the proceeds of the present issue will be applied to the construction of the first section, from Puerto Caballos to Santiago. This section will enable the exportation of the Mahogany, &c., to take place; the means of transport now existing being too expensive to be remunerative. Careful estimates have satisfied the Honduras Government that the surplus revenue of the State Domains and Forests will be amply sufficient to complete the whole line, without any further issue of stock; but in case it should be found advantageous, on account of increasing traffic, to accelerate the opening of the railway from sea to sea by raising more money, further stock will be issued for the construction of the remaining sections of the Railway.

The several contracts and other documents can be inspected at the office of Messrs Baxter, Rose, Norton, and Co., Solicitors, No. 6 Victoria street, Westminster.

The Application List closed on the 15th inst.

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

HOW THE ABYSSINIAN MONEY SHOULD BE RAISED.

We have heard a sneer at the customary letter of Mr Gladstone that important business would be transacted in the short November Session, but nothing can be truer. The Abyssinian war may be a small war, but it would be a great mistake to let it pass without remark. It may be a necessity, but it is a most disagreeable necessity. The case for the war—the unanswerable case—is, that we have sent certain persons to Abyssinia, and that we are bound to secure their lives and freedom if we can from the King who now holds them. But a most important question arises—*Why* did we send those persons? *Who* is to blame for our having an Abyssinian policy? *What* even fancied interest could be promoted by sending a Consul or any one there? This part of the subject will need the particular attention of independent members of the House of Commons. It is probable that the previous rulers of the Foreign Office may be much more responsible than Lord Stanley for the original cause of war; he may not like to attack them, and they and their party adherents assuredly will not attack themselves. But exactly because this time our party system fails in its greatest advantage; because it, upon this occasion, will not insure that the Ministerial proposals should be sifted thoroughly, independent members are the more bound to do it. If Mr Gladstone began to blame, possibly he might be replied to by an *argumentum ad hominem*: it might be answered—"You cannot "blame this; it was ordered by Lord Russell, in a despatch "written while he was Foreign Minister, and while you were "Chancellor of the Exchequer, and for which, as usual, the "collective Cabinet of that day must now be held responsible." Of course, in fact, a little despatch like this was never laid before Parliament; of course, Mr Gladstone knew nothing about it; most likely Lord Russell, who has a habit of concentrating his attention on the great affairs of the moment, thought very little of it, and trusted to some subordinate. Nevertheless, there, probably, the despatches of Lord Russell, and Lord Russell's Whig predecessors, are, and the Opposition leaders may shrink from assailing them. But the House of Commons is bound, "as the grand inquest of "the nation," to investigate them, to discover who is to blame for this most unexpected and heavy charge, and how for the future we may escape similar charges.

After this subject has been made clear another arises. The present Ministry must prove not only that an Abyssinian war was necessary, but that so great an expedition was necessary. We do not at all say that the size is excessive, but only that the size must be explained. It must be compared not with great European wars, but with ordinary Indian expeditions; and both the lives exposed and the money spent must be justified by conclusive analogies.

But even when this second point is disposed of, there remains a third more practical than either of the other two, and upon which there are lamentable, but we hope unfounded, rumours. It is said that the expedition is to cost several millions, and that this is to be raised by long-dated bonds running over (say) ten or, perhaps, twelve years. And to that policy there are the gravest objections. The sum named is doubtless large, but its magnitude is nothing of an objection in comparison with the suggested mode of obtaining it. There are two sorts of wars—wars of existence, and what we may call wars of administration; the former come very rarely, and when they do preserve our being as a great nation; the latter are for ever occurring upon this accident and that, from our manifold engagements, and by the complications of human affairs. The cost of wars of existence not only may, but ought to be charged to posterity; those wars preserve, so to say, the national *plant*, and the plant ought to bear it; but the cost of wars of administration ought to be paid in taxes at the time. Each generation will have its own—many of its own—lesser wars, and if each thrusts forward the burden upon posterity, posterity will be overwhelmed, and be unable to meet essential obligations by the gradual accumulation of these minor burdens. A petty Abyssinian war may happen at any time,—it can never happen more unexpectedly than to us now,—and it is contrary to every principle to charge aftertimes with the expense of so small an affair, by so many counterparts of which it will itself be plagued. It may be said that raising money by 10-year and 12-year bonds is not charging posterity. But experience shows that long-dated bonds are very easily renewed. It is almost always easier for a Chancellor of the Exchequer to renew than to

pay; and when all remembrance of the origin of the bond has passed away, there is no public conscience to make him pay. The obligation has lapsed into the general mass of the National Debt, and there is nothing to quicken our desire of payment upon that part of our liability in preference to any other part. A short-dated bond will, probably, be paid when due, if such was the original understanding, for it will fall due while the matter is still remembered, and the moral feeling about it is still fresh; but a long-dated bond will be paid or not paid, according to the convenience of the day when it becomes due, and will lapse into a permanent obligation if aftertimes are needy or lavish.

For these reasons, we think that a considerable part of the Abyssinian expense ought to be raised by instant taxation. No one would, in the present state of trade or after the financial history of the last few years, propose to add either to the Customs or to the Excise: temporary additions to indirect taxation are usually unwise, and are particularly objectionable when commerce is depressed. The best, the only admissible expedient, is an addition to the income tax for such part of the cost as we bear at once, and the rest of the burden should be borne by a series of bonds, the last of which should fall due (say) two years hence. The additional income tax now imposed might then remain to discharge these obligations, and for so short a period the public conscience may be relied on to be wakeful and to enforce their payment. *We* who make war in Abyssinia shall then pay for it,—and this is what is just.

THE INTERIOR OF THE ROYAL BANK OF LIVERPOOL.

We do not know even yet the whole interior of the Royal Bank of Liverpool; we do not know the very item we most wish to know, the amount of the rediscounts. We cannot form a proper judgment of the business of a bank unless we know the scale of its transactions; and in such a case as this, the amount of the rediscounts determines the magnitude of everything else. But we know enough to see that the management must have been very bad. The liabilities to the public, to actual external creditors, are stated to be 1,630,000*l*, against which the only assets are these:—

	£
Debts	560,000
Bonds of Mersey Docks	77,000
Bank buildings and land	169,000
Bills rediscounted but returned, and doubtful bills in the hands of bank	269,000
Good bills and cash	172,000
	1,247,000

Showing a deficiency of 383,000*l* to be made by calls on the shareholders, which is more than a fifth of the entire liabilities to the public; and the shareholders will lose as follow:—

	£
Capital formerly to be paid up	650,000
Reserve Fund	109,000
Deficiency as above, to be made by future calls	382,000
	1,141,000

And there will, probably, be interest on present debts not at once paid besides. Such a loss indicates that there was not only common mistake and mismanagement, but a culpable ignorance of the business of banking, or, what is worse, a wilful disregard of its plain principles. If we look over even the meagre history of its affairs which we possess, we shall soon seen how true these unfavourable conclusions are.

First. The Royal Bank invented (as far as we know) a new error in banking. No mistake is more common than for a bank to carry on insolvent customers; there is always a mischievous hope that by advancing a little more, what is already advanced may be possibly recovered; there is, by the very constitution of the human mind, an indisposition to look the first great loss in the face,—to admit that *is* a loss, and to write it off, and provide for it then and there. But the Royal Bank went further; they not only carried on their customers, but *contracted* to carry them on; and now, after the failure, one gentleman "claims the benefit of agree-"ment," that is, says, "You may stop, but I will not. I "am insolvent no doubt, and I was insolvent when you "undertook to work my business for five years. But I am "not so bad as you thought; I really hope to pay more than "we then estimated." Upon a winding up this argument is, we conceive, invalid; the business of the Bank with this remarkable customer will cease, as well as the rest of its business. But before a winding up this argument was conclusive: the bank was bound hand and foot to their insolvent debtor, and bound for five years to carry on his own business for him. Commonly, in every case we ever before heard of, when a banker is unwise enough to let a bad debt run on, and not at once meet it and provide for it, he yet has enough remains of wisdom "to keep," as he would say, "the staff in his "own hands;" he does not agree with his debtor to let him go on; he only does so; he keeps the option of stopping when he likes. But the Royal Bank made a treaty with a bad customer not to ruin him, but only to ruin themselves.

2ndly. There is to be a considerable loss on the "purchase "of shares account." No bank ought ever to get or lose by buying and selling its own shares. Of course, the notion was that the credit of the bank might suffer if its shares were allowed to "droop," and that the price must, therefore, be supported from day to day. But in the end such fictitious credit always breaks down; it is better for a bank, as for every one, to look bad times in the face at once, than to endeavour by temporary remedies to make them look better than they are. The persons who ought to come forward when the price of shares goes down are the *shareholders;* it is for them to support their property; it is for them to prevent the credit of their bank from being impaired. If the shareholders are too needy to do so, or have not enough confidence in the bank to do so, the sooner the concern is wound up the better.

3rdly. Though the details are not given us, it is evident that the Royal Bank made reckless and improper advances on shipping property. A ship is bad security for a banker at the best; it can earn nothing while it stays in port, and if it goes to sea it may come home with a bottomry bond or many bottomry bonds—the *last* of which will, by law maritime, take precedence of all others, and all of which will take rank before the bankers. That a banker ought ever to advance on such a commodity at all may well be doubted; we should argue that he ought not; but everybody will admit that a banker who touches such a delicate security, ought to do so with extreme care and precaution, whereas the Royal Bank plainly took it as an ordinary everyday thing.

But none of these errors are so bad as the large advances to the chairman and managing director. By the latter, whose account was a large one, we are told that there will be considerable loss. And this is worse than mistake. No managing director in a dangerous way of business is fit to be such; he cannot keep his mind in that cool, steady, *objecting* frame of mind which befits a banker. He cannot and will not refuse bad securities, when the very same, or just like them, constitute his property, and absorb his mind. He will always say that they are quite safe, and that it is only "old women" who object to them. But if he begins to borrow of the bank upon such securities, and his colleagues let him, the fate of the bank is sealed. He will be sure both to make a large bad debt upon his own account, and others, probably larger, upon other accounts.

Some persons upon this, as upon all like occasions, are exclaiming that the true remedy is to prevent all advances by a bank to its directors and managers. But, in the first place, this is easier said than done; these persons have the custody of the till, and if they wish to help themselves they can. To evade the firm lending to themselves, they can advance to some brother or cousin or clerk who will go shares in the proceeds with them. The deed of the Royal Bank of Liverpool contains all manner of stringent provisions, which have been useless, and so will all provisions forbidding advances to directors in the one case for which they are intended—viz., the case of directors who use the bank money improperly. And such a restriction tends to defeat its own object; it will make directors not more respectable, but less respectable. A director must bank somewhere, and, if in business, as the most useful directors in cities are, must borrow at times of his banker. But, in practice, he must either bank at his own bank or at an opposition bank, and, of course, the opposition bank will not lend to him, and he will dislike his opponents knowing all about his affairs. In very large cities there are many banks, and the field is so great, that the particular competition of any two is rarely felt. But in common towns and small cities, it is not so; each bank is on terms of civil enmity with the bank over the way. In practice, a director must either bank at his own bank or at a hostile bank, and as no decent man likes to ask a

hostile bank for money, no decent man will be a director of a bank if he is kept from borrowing from it. Belonging to one bank destroys very friendly relations with all others. The real remedy is quite different. You should get a good set of directors, and pay them enough to make it worth while to know all about the business. In Liverpool, there is a most vicious distinction of "outside" and "inside" directors. In the Royal Bank, the "inside" directors knew of the agreements to carry on insolvent customers, but the "outside" directors knew as little as the outside world, and never heard of the matter till the bank failed. Such nominal directors are utterly injurious; they attract business to the bank; a customer says—"I shall leave my money at Mr A's bank; I have "known Mr A ever since I was a boy, and I am sure he will not "go wrong." But these directors let others "go wrong;" they give the sanction of their names and characters to worse men whom alone no one would trust, and they never think of overlooking them or watching them. On the contrary, the system and understanding is, that outside directors are not, and that inside directors are, to know. No doubt, in all boards, some directors attend more to detail than others, and know more than others of the business; but on every good board, every director can inquire into all great transactions, and can be as sure that all vital matters are right as if he had gone through the petty items. No man of business should sit at a board to the *whole* deliberations of which he is not admitted, for he may be sure that what he is excluded from is the critical part, and that which will ruin him if anything can. But if this evil distinction is effaced, and if a fair number of directors are continually watching the bank business, experience proves that all goes right if the directors are competent men, and if they understand the trade of banking. The directors should neither be too few nor too many; for too great an increase of number weakens responsibility; and if the number be too small, the mutual watching may not be enough, and A may do B's job, if B agrees to do A's. But if you form your board thus, joint stock banks are the most successful of joint stock speculations.

They are, doubtless, more successful in London than in Liverpool, and this opens a most important question, far too large for the very end of an article, between two systems of banking. In Liverpool, a daily interest is given, and a high commission charged; in London, no daily interest is given, but no commission, or at any rate only in comparison a small one, is charged. Both systems are compatible with good banking, but we think it certain that the Liverpool system gives the greater temptation to reckless banking.

THE *DIS*ADVANTAGES OF A CONFERENCE ON ROME.

Lord Stanley has acted apparently with his usual clearness of head in discouraging a conference on Roman affairs. It is said at least, and no doubt upon authority, that he has told the Emperor of the French that no good can come of a general talk upon Roman affairs without a fixed basis for negotiation. This is just what he did with regard to the Conference on the position of Prussia in Luxembourg. Count Bismarck wished to go into conference without pledging himself to act upon its decision as to the question of evacuating or not evacuating Luxembourg. Lord Stanley absolutely declined to do so, holding very justly that to submit a matter to this kind of arbitration can only be of use where the parties to it show both the power and the will to make the result of the arbitration effectual. To appeal to a judge whose authority you have not determined to respect, is a mere device for bringing such appeals into disrepute as artifices for gaining time. No one who wishes to see the council of European nations powerful for peace will consent to refer to them any question without reasonable promise of their ability to settle it. No farce is more dangerous to the peace of Europe than grand international palavers which, instead of preventing, only delay, war. It is a resource which an unprepared nation will always fall back upon, in order to gain time for preparation,—and so may positively multiply the number and dangers of war, instead of diminishing them. In the case of the London Conference concerning Luxembourg, there was, at least, a most clearly defined point under discussion, whether after the dissolution of the Old German Bund, of which Prussia was the mere representative in garrisoning Luxembourg, she was or was not bound to withdraw her forces from that fortress, and if so, on what conditions? It was quite clear that this was a point involving the construction of treaties, on which it was possible for a Conference to come to some decision. And if they did come to any such decision—all parties agreeing beforehand to be bound by it—it was easy to execute that decision almost instantaneously, and without much doubt that once executed, the matter would be finally settled; for Prussia had but to give the order to evacuate, and it was not likely that, except in case of war, there would be any pressure on her to re-occupy it.

But these two main conditions of success in the London Conference of last spring do not exist in the present case, while all the general objections to Conferences of this kind exist in even more than ordinary force. There is no tangible question to discuss on which the opinion of a majority of Powers could have any legal or political weight; and whatever decision might be arrived at, there would be little hope of its being really final. Now, a long colloquy between a number of European powers, interested in very various degrees indeed, from interests like those of Italy and France, to whom the matter is all but vital, down to those of Greece and Turkey, whose chief motive would probably be to rival each other in the favour of the Powers most likely to influence the future of the East of Europe,—and a long colloquy, moreover, on so vague a question as the best way of satisfying at once the national feeling of Italy and the dignity of the Pope,—could not easily result in any very definite decision, nor, even if it did, in any practical policy which could be accepted by the defeated parties as final. It is almost inconceivable that any question tangible enough for practical discussion should be laid before such a Conference. It is quite inconceivable that any decision which should satisfy either Italy or the Pope, or neither Italy nor the Pope, would be accepted as final. And yet no decision is conceivable which would not fall under one of these heads. Either it would satisfy Italy and be resented by the Pope and the ultra-Catholic Powers; or it would satisfy the Pope and be resented by Italy and the liberal Powers; or it would satisfy neither. No decision is possible which would satisfy both. Now, if the Italians were satisfied, and the Pope and his allies were consequently bitterly hostile, how could France dare to leave the Pope to his fate? The Emperor has just given him, under very trying circumstances, a new pledge of support against the Italian ambition. He has just earned the Pope's gratitude and blessing. He has earned it at the cost of completely alienating the gratitude of Italy, and drawing upon himself the bitterest hatred. He has felt the pressure of the Catholic feeling in his own country so strong, that he has been forced to defy the Italian army, and even to deny peremptorily the right of joint occupation. He has driven the Italian troops across the frontier in the face of the Italian statesmen's assertion of the equal rights of Italy and France in preserving order in Rome. In a word, where there was really a clear opening for admitting a degree of encroachment on the September Convention, the Emperor has found himself compelled peremptorily to forbid it. It is quite certain that all the properly Catholic Powers will support the independence of the Pope. If the Conference were to decide in favour of Italy, it would be solely because the Protestant and half-and-half Powers had succeeded in outnumbering, in conjunction with Italy, the Catholic Powers. How could France do in deference to non-Catholic opinion what she has so recently and peremptorily refused to do on her own account—and this, though she had just been supported in Conference by all those Powers who acknowledge the authority of the Holy See? Were the decision in favour of Italy, it would rest with France whether it should or should not be executed; and it is clear that France, having just received the formal adhesion of all those States which constitute Catholic Europe, would be in a far worse position to thwart the Pope in deference to the external opinion of Protestant Europe, than she was recently when she resisted even the slightest encroachment on his power on her own authority alone. We cannot conceive, then, that a decision, which practically gives Rome to Italy against the will of the Pope—who, in all probability, would not even enter into conference to discuss such a matter at all, but would take refuge in his *non possumus*—should be admitted by France in the face of the certain disapprobation of Austria, Spain, Bavaria, and Belgium. If, on the other hand, the decision of the Conference should be in favour of the continued secular rule of the Pope at Rome, with guarantees from the Catholic powers—it is quite impossible that Italy should accept this as final. This has, in fact, been tried, and whatever the Italian Govern-

ment may wish, the Italian people cannot, and will not, accept a decision which finally denies to them what they consider their natural capital. A decision in favour of the Pope might, indeed, take some of the odious responsibility of intervention off the shoulders of France, but could not, in the nature of things, finally decide anything. The popular aspirations of Italy would remain what they were. The nation would still only be held back from Rome as a dog is held from its spring by a leash. No European Conference could extinguish a universal popular feeling of this intense kind. France could certainly execute this decision as long as she might be otherwise disengaged, but the Italians would be only biding their time, as they were under the Convention, and the purpose of a Conference is to come to some more satisfactory and permanent arrangement than that of the September Convention. If neither of these solutions can possibly be executed so as to be final, still less could one which satisfied neither Italy nor the Pope—such as a limitation of the Pope's secular power to the City, and an extension of the Italian dominion to its walls. This solution, which would exclude the Italians finally from the one point they most value—their historic capital—and rob the Pope, as he would say, of the larger part of his small remnant of patrimony, would irritate *both* the antagonists in this controversy, and leave no chance of final solution.

On the whole, then, it seems to us certain that neither could a distinct question of moderate dimensions be presented to the Conference, such as could elicit a decision of the smallest weight; nor even if such a question could be presented and decided would the decision in the least advance the prospect of a final settlement. But if this be so, Lord Stanley is certainly entirely right in declining to take any part. Conferences which wrangle and break up, only diminish materially the authority of these bodies, and the chance of their succeeding in cases more fit for their consideration. Conferences which decide something which is of no effect, and which the parties chiefly interested decline to accept as binding on themselves, are, as Lord Stanley justly thought in the case of the Luxembourg Conference, mere instruments for fomenting the mutual grievances of the various Powers instead of removing them. If Italy had obtained a decision in her favour which France refused to respect, or France had obtained a decision in favour of the Pope, which Italy refused to respect, the Conference, besides having inflicted the *general* evil on Europe of a solemn council of Powers ending in smoke, would have compassed the special mischief of aggravating the enmities which it was professedly called to allay. From a Conference of this kind, it is clearly desirable for England to stand aloof.

Indeed, the known sympathy of the English people with Italy, and their known prepossessions, amounting even to prejudice, against the Pope, all combine to diminish the weight of England's opinion with Catholic Europe; and her only influence, therefore, as a mediating Power, would be in case she were prepared—which is notoriously not the case—to join in a guarantee of any solution which the Conference might decide upon. To go into a Conference for the mere sake of expressing the opinion which, as every one knows, England must express, if she is to speak the mind of Parliament and of the nation, but without any intention at all of backing her opinion by promises of material support, would scarcely either add to our own influence or forward the question under discussion; and we have also to remember that a Conference would, probably, be supported by many Powers, like Russia, Turkey, and Greece, not for the sake of the special question under consideration, but in the hope of raising other difficult questions of greater interest to these other Powers. In this way, a Conference may become the instrument of opening up a great variety of vague and unpleasant problems in which England is more closely interested, or, at least, believes herself to be more closely interested, than in the solution of the Roman question. We cannot do better than to keep out of these perilous and vague discussions, and no one feels this more distinctly than Lord Stanley. We feel sure that we may trust to his discretion for not embarking us on these unknown seas, without some much more obvious resulting advantage than that for which chiefly, in all probability, France is looking,—that, namely, of diminishing the weight of responsibility which rests upon her in connection with what we deem the most unfortunate, and, in the end, short-sighted policy to which she has just committed herself afresh.

THE ECONOMIC SIDE OF THE WORKHOUSE INQUIRIES.

THERE is one side of the Workhouse Infirmary question which runs some risk, in the present excitement of the public mind, of being overlooked. It is quite clear from the evidence already received by the Commission of Inquiry, that the report of the *Lancet* upon the Farnham Workhouse, so far from being exaggerated, was undertoned. Every statement made in that journal has been confirmed by witnesses, and the union doctor has added, as it were incidentally, some very dark touches to the picture. It is rare to meet, even in fiction, with anything quite so horrible as his quietly told little story of the sick pauper woman, roasted to death from sheer supine neglect. It is also, we fear, nearly certain that the state of the workhouse infirmaries all over the country is exceedingly bad, much too bad to be tolerated, and that the board, which has been for some time in possession of clear reports on the subject from Dr E. Smith, is to blame for an *inertia*, the secret explanation of which we believe to be this. The traditionary theory of the department is that it must be cautious and slow, because it is so exceedingly unpopular, a theory which twenty years ago was founded on experience. The country gentlemen were at that time bitterly hostile to the Board, believing it actuated by a harsh spirit and a disposition to excessive encouragement, and the public in its jealous dislike of centralisation took up their side of the quarrel. The Board was defeated so often that it became afraid to move, and though the public temper has so entirely changed that the Board might almost vote itself absolute, it is still reluctant to stir until certain of general support. A few sharp rebukes from Parliament, and the removal of one or two old officials, will cure this, and the public is evidently ready to remove any recognised abuses. The houses will, we have little doubt, be improved, the wretched race of "masters" selected to keep down masterful beggars—that was their original duty—will be replaced by men of education, and the infirmaries will be turned into decent though, perhaps, carelessly managed hospitals. On so much the public mind is, we conceive, made up, but there is another and very serious matter for it to consider.

Civilisation is very costly. The main source and reason of all the barbarities now exciting so much just indignation has been the desire to save expense, to keep the rates as far as possible "down." Much may be due to stupidity, and more to the dull indifference into which unpaid committees are apt to fall when assisted, as they believe, by paid officers; but the main cause of all failures in British workhouse management has been economy, and if we wish to remedy them we must spend more, a great deal more. A few pounds will, no doubt, provide basins for sick women at Farnham, but a few pounds will not rebuild the workhouse infirmaries of England, or pay for sufficient professional attendance, or provide proper nurses, or supply a reasonably kindly sick dietary. The mere effort to secure good cooking, cooking that is fit for invalids, the mere sanction of medical necessaries like port and quinine, the mere effort to educate the children decently, will cost more, much more, than the public as yet imagines. The financial managers of Guy's, Bartholomew's, or King's Hospitals, could give details upon these points which would startle reformers, and perhaps alarm the country. We have no hesitation in saying that *if the infirmaries are now thriftily managed*, civilised arrangements such as the *Lancet* would approve will involve at least double the outlay now sanctioned for that branch of the work of relief, a branch extending, as Lord Devon admits, from year to year, and likely, if the infirmaries are improved, to extend till every workhouse becomes an enormous hospital. Thousands are kept out by a dread which decent arrangements will remove, a dread so keen that country folk in London resist being taken to "hospital," lest it should be like the only one they know. This expenditure has to be provided out of rates already in places cruelly heavy, so adjusted as to fall on small farmers and little proprietors with a dangerous weight, and, like all direct taxes, exceedingly unpopular. A sudden and a large increase in the demand for poor-rates—and that is what this movement *must* produce if it is left to run its course—will be felt as an infliction over three-fourths of the country, and perhaps produce a reaction against humanity and civilisation as applied to workhouses. It is, therefore, of the highest importance that the board should consider whether such a demand is indispensable; whether, amidst all the mismanagement now coming to light, pecuniary muddling may not be reckoned.

Are the workhouses thriftily managed? We doubt it very greatly indeed. They are very meanly managed, but meanness is not invariably thrift. Local boards are not good managers of money, as we all know from the experience of vestries and municipalities, and local boards working through contracts are peculiarly liable both to imposition and to jobbery. Supplies are not always the cheaper, because those who are to consume them are paupers, and a union workhouse, if carelessly managed, may easily waste cash like a State department. In this very Farnham affair, evidence is coming out which suggests, to say the least of it, much waste. Witnesses seem to doubt whether supplies paid for ever arrived, and, even if they are wrong, and their suspicions are malignant, it is quite clear the workhouse did not get the full benefit of its position as a great wholesale buyer. A workhouse is as big as a great ship, and has as various expenses, and in a ship the State has found it good economy to keep a separate purveyor—a man responsible for all outlays. Strict inquiry might show, we think would show, that the cost of exchanging the master for an educated superintendent, clergyman or doctor, as it might be, would repay itself, partly in prohibiting peculation, partly in securing a more intelligent, and therefore less expensive, system of purveying. If we are not greatly mistaken, the cost of certain departments in different unions will be found to vary almost as much as the cost of building ships in different dockyards, and for very much the same reasons. At all events, the board will do well to institute quiet but determined inquiries on that head through men who understand something besides official accounts—who know, for example, the difference between the wholesale and retail price of meat, medicine, and serge. It will be well, too, for them to ask whether, if infirmaries were centralised, they would not cost less; whether no use can be made of the "cottage hospital" system; and whether buildings ought to cost quite so much as they do.

We do not wish to be mistaken. Whatever the burden of treating our sick poor decently may be, it must be borne, even if we have, as a last resort, to throw part of it on that vast mass of wealth which now escapes this form of taxation altogether. All we desire is that the public, while insisting on decency and mercy in workhouse hospitals, should look the facts in the face, and remember that unless it can in some way secure exceedingly good management, management with brain in it, like Post-office management, for example, it will have to gratify its philanthropy at very heavy cost. There is one thing sadder almost than workhouse cruelty, and that is the spectacle of a hard-working man sold up for rates, a spectacle which is in places already too frequent, and which cannot be too carefully avoided. Lord Devon may depend upon it that a Householder Parliament will not be easy to manage upon this point, pressed as it will be on the one hand by voters who hate cruelty, because they know they may possibly have to endure it, and on the other by voters who feel the pressure of rates most acutely, and who see that those who pay rental out of work are rated as heavily as those who pay it out of realised savings. In London, as we all know, a millionaire often pays the same rates as a professional who has not saved a shilling; and the inequalities in the country, though not so extreme, are often great. If Lord Devon does not wish to see the reform in the Poor-laws take a direction far from Conservative, he must see that the Board, while prohibiting workhouse cruelties, prohibits also with the same severity workhouse waste.

THE IRISH RAILWAYS.

We showed upon a recent occasion that there are very plausible reasons why Government should think of buying the Irish railways, and, therefore, we are the more anxious to point out two very dangerous, though very natural, Irish desires.

One is to get English money without getting English control. Very unadvisedly and often under Parliamentary pressure, the English Government has lent money (through the Exchequer Loan Commissioners) to the Irish railways, but has obtained from them next to nothing in return. In all material respects, the Irish railways are as independent of the State as the English. But no system can be worse; it is a *via medix*, combining, as middle courses so often do, the evils of both extremes. There are fair arguments for leaving railways, like common commercial enterprises, to take care of themselves, and fail or succeed, according to good or to evil management. There are other, and (we think) better arguments for saying that railways are different from common undertakings; they are *indispensable monopolies;* we can never do without them, and we can never prevent their falling into the sole control of a few hands; we can never ensure an effectual competition in them.

For both these plans there are strong reasons, but there are no reasons for the hybrid plan of lending the public money, and yet getting no return of power in exchange for it. We thereby take away the check which guides common companies, the check of failure and want of money; and we do not substitute the only possible other check—the supervision, and, if necessary, the interference of Government. A railway supported by State subsidies, and not checked by Government control, is a sort of chartered libertine, and we decline to create anything like that in Ireland.

Secondly, what is even more natural; anticipating a possible State purchase, each Irish railway seems to want to raise its own prices. They say, or some of them say, "Our railway is "not so bad as other Irish railways: we are not, perhaps, "prospering just now. There are difficulties as to our "dividends we admit; but these are only temporary. They "are the consequence of an incidental defect which we will "explain to you, and which can be easily cured." But those who use this sort of talk should remember that the only reason for considering the Irish Railway case apart from the English is, that the Irish companies themselves wish it. They come forward as willing sellers, whereas, even in the present disheartened state of the railway interest, a Government which proposed to buy the English railways, would have to deal with most unwilling and intractable sellers—at least, that is the understanding; and if the Irish Railway Companies begin to say the contrary, they upset the first assumption upon which the issue of the present Commission proceeds, and upon which alone Parliament would act. If the Irish railways do not wish to be bought, assuredly the English Government do not want to buy them.

RAILWAYS.

Already, we have pointed generally to the causes which have in so short a space of time led to the depreciation of British railway property. We have shown by a few striking cases that this rapid collapse has not been the result of any sudden diminution of traffic, or of the apparent profit accruing from that traffic, but that the whole question appears to rest upon the inability of railway companies to raise more capital. Railway credit has become rapidly bad, upon evidence which we need not now repeat. With bad railway credit it is difficult or impossible to raise more capital, and the result in some instances is an entire suspension of dividends. The situation is quite novel. We thought we knew more of railways after the teaching of more than a quarter of a century, but we cannot now avoid the conviction that we have yet to learn what are the true profits of railway business, and how a grave dilemma is to be met or to be averted.

A question of such deep interest has naturally provoked the accustomed commentary, but the most business-like form in which a remedy is suggested comes from the "Railway "Shareholders' Association," instituted in Manchester at the instance of some able and wealthy gentlemen who are well known, and whose names give weight to anything of a business-like character with which they elect to identify themselves. The objects of the association are declared to be the protection of railway property, and with that view this Association lays down the following rules for guidance. All further expenditure in obtaining or making competing lines of railway is to be stopped; friendly relations are to be promoted between railway companies, and all disputes are to be arranged by arbitration; shareholders are to supervise the appointment of directors, and to control affairs more effectually than hitherto. Lastly, the Association proposes to consider the best method of extricating railway companies from their present financial difficulties.

As to the first point, there can be scarcely two opinions. Extravagant expenditure of capital has been the chief cause of the existing depreciation, and, therefore, the primary remedy ought to be the stoppage of capital expenditure. But, so far as we are able to judge at present, it is scarcely neces-

sary to pass a resolution of this nature, for the reason that with existing railway distrust, capital expenditure stops of its own accord.

The promotion of friendly relations between railway companies, and the arrangements of disputes by arbitration, would, of course, be steps in the right direction, and this would be the natural sequence of a closed capital account. Give the first, and you can scarcely avoid the second. Railway companies will not fight if they have nothing to fight with. This railway fighting has been an element of cost in railway making, perhaps greater than any other, and the sinews simply consist in an open capital account. Stop the capital: stop the sinews: and there is no more railway war.

As to the further power proposed to be given to shareholders to supervise the appointment of directors and control affairs, there is, we think, very little to be said. Up to the present time, shareholders have in name had ample authority upon all such questions, and yet with all that, for some reason or other, they have been unable to exercise it. There have been directors' proxies. There has been the personal influence of every director pervading the proprietary body. And then above all, there is that constitutional deference to constituted authority which pervades our race. A word from a director, well chosen, is, as a rule, law to the shareholder without the precincts of the board room; and we have yet to learn from the future proceedings of this Association how this difficulty, hitherto almost insurmountable, is to be met and to be overcome. We do not say that it is insurmountable, but it is beyond dispute that up to the present time it has never been ovecome in effect.

As to the last point, we have more hope. When a body of intelligent men, deeply interested, sit down to consider the best method of extricating their property from a pressing difficulty, the probability is, that in the end they will succeed; and there is not the less hope for the efforts of this Association that its focus is in Manchester where we grow and educate, *par excellence*, our best business men.

But we shall be much mistaken if these Manchester shareholders, who have set themselves to perform this useful duty, have not yet much to learn. The assumption is, that railway property, such as it exists in England, Scotland, and Ireland, is intrinsically sound and profitable under capable and economical management. This is the precise question which the Manchester Association has yet to solve, and upon which we might almost pronounce that they are imperfectly informed. Their means of information are just these. Accounts of capital and revenue have been put forth from time to time by every railway company in the United Kingdom, and the one only inference from recent disclosures is this, that all have been more or less in error, and that all have erred in favour of the dividend by means of an open capital account. The first duty of this Manchester Association should be, in our view, to ascertain what railway profits are; and then, when they know that, to suggest such a remedy as will render to investors in railway property some adequate remuneration.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending November 2, 1867:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	62,086 6 11	79,628 17 5
To transfer certificates from Post Office Savings' Banks to Savings' Banks	97 14 8	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	17,414 0 2
Total	62,184 1 7	97,052 17 7
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	87,957 10 0	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	17,424 0 2	...
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...	97 14 8
Gross total	105,381 10 2	97 14 8

Total amounts on November 2, 1867, at the credit of—	£ s d
The fund for the Banks for Savings	35,815,341 15 11
The Post office Savings' Banks fund	9,623,151 13 4
Total	45,438,493 9 3
Ditto—by last monthly account	45,368,078 9 9

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Banffshire.—The report stated that the revenue for the past year amounted to 6,759*l*, and the expenditure to 3,870*l*, leaving available 2,890*l* for debenture and other interests, being an increase over the preceding year of 224*l*. The chairman said at the meeting that the line was amalgamated in the Great North of Scotland system, and that ordinary stock in that company had been accepted in exchange for their own ordinary stock.

Buffalo and Lake Huron.—At the half-yearly meeting the report was adopted, though some disappointment was expressed at the results. The chairman said that the Grand Trunk board had allowed them to draw 10,000*l* on account, and an application was to be made for more, which he hoped would enable them to give something to the preference shareholders.

Bristol and South Wales Union.—At a special meeting, the agreement with the Great Western was sanctioned. It provided for the payment of all preference charges, and the following dividends on ordinary stocks:—For the period between the 1st of August, 1868, the date of the amalgamation, and the 31st of Dec., 1868, the Great Western Company were to pay dividend to the South Wales Union ordinary shareholders at the rate of ½ per cent. per annum for the year 1869, and for the months of January and February, 1870, at the rate of 1 per cent., and after that date the shares would form part of the Great Western ordinary stock.

Caledonian.—The board have notified their intention of applying to Parliament for permission to abandon four branches authorised in 1865, together with extensions of time for the completion of other works.

Great Eastern.—At the meeting on the 8th instant, called for the purpose of considering the constitution of the board, it appeared that the members who composed that body were divided amongst themselves, and that the board meetings were consumed in discussions which damaged rather than assisted the property. The result was that the following resolution was carried:—"That this meeting, convinced that a thorough and immediate reorganisation of the board is essential, thank Mr Turner, Mr Ballantine, Mr Smith, Mr Laird, Mr Gamble, Mr Kennard, Mr Simpson, Mr Makins, and Mr Legg, for having offered to place their seats at the disposal of the proprietors. That this meeting hereby calls upon Mr Goodson, Mr Josselyn, Major Jarvis, Mr Beavis, Colonel Palmer, and Mr Smale, to likewise forthwith place their resignations at the disposal of the proprietors. That a committee, consisting of Mr G. Rowley, Mr James Chadwick, Mr Robert Stuart, Mr Edward Clary, Mr J. Fildes, M.P., Mr S. Rawson, Mr H. B. Legg, Mr Charles Henry Parkes, and Mr C. E. Stewart, be and is hereby appointed for the purpose mentioned in the notice convening this meeting, and to report to an adjournment of this meeting to be held on the 22nd of November, as to the changes which ought to be made in the board."

Honduras 10 per Cent. Railway Loan.—The Government of Honduras has contracted for the issue of a loan for 1,000,000*l*, bearing 10 per cent. interest, payable half-yearly in London, and redeemable at par within 17 years by yearly drawings. The issue price is 80 per cent.; and the payments are to be made as follows:—

Deposits	15 per cent.
1st January, 1868	10 —
1st July, 1868	15 —
1st January, 1869	20 —
1st April, 1869	20 —

Each payment to be made, less interest. The object is the construction of an inter-oceanic railway from Port Caballos, on the Atlantic, to the Bay of Fonseca, on the Pacific. Colonel Stanton, R.E., has surveyed the line on behalf of Her Majesty's Government, and reports favourably. Extracts from the agreement with the British Government accompany the prospectus. The revenue of the line is specially hypothecated to meet the bondholders' claims, together with the produce of the Mahogany forests. Subscriptions are also invited on the Paris Bourse.

Madras.—An additional section of 32 miles on the North-West line is reported to be far advanced. The number of miles worked over has been 645, against 611. The gross receipts for the half-year were 241,010*l*, against 213,676*l*, and the net receipts 141,182*l*, against 117,853*l* of the corresponding half of 1866. These results were attained in the face of a general depression of trade.

Nova Scotia and New Brunswick (Intercolonial).—This company, to which it is understood that an Imperial guarantee is attached, has been registered with a capital of 600,000*l*, in 20*l* shares, with power to increase.

Victoria Station and Pimlico.—Offers are made by the board to convert all outstanding debentures at once into 4½ per cent. debenture stock, or to pay them off in cash.

BANKS.

Royal Bank of Liverpool.—At a recent meeting, the depositors refused the terms offered for their payment by instalments; and a further meeting was held on the 12th instant. No definite course was then resolved upon; but various persons spoke in favour of a conciliatory course of action. On the 13th, however, the proposals made below were accepted. A meeting of the

shareholders was held on the 11th instant, when Mr Banner stated that the accounts showed a greater deficit than he was previously lead to suppose. His estimate is given :—

Liabilities.	£
On current and other accounts	1,630,088
Assets.	£
Debts, good and doubtful, estimated to produce	560,574
Mersey Dock bonds	77,612
Bank premises and land in Cheshire	169,532
Bills of exchange to come back, &c.	269,411
Bills of exchange considered as good, and cash in hand	170,489
Total assets	1,247,618
Estimated deficiency	382,470

This does not include, say, 60,000*l* for interest. He stated that a 10*l* call upon the ordinary shareholder was necessitated; and that promissory notes would be issued to the creditors bearing 5 and 6 per cent. interest, payable at 6, 12, 18, and 24 months. The officers of the company were represented as being, in some instances, largely in debt to the bank; and the appointment of an investigation committee was discussed. All creditors for less than 200*l* are to be paid off as soon as possible.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Joint Stock Discount Company.—A further distribution of 1s in the £ is to be made to the creditors on the 18th instant, making 10s distributed.

Overend, Gurney, and Co., Limited.—The official liquidators have announced a further dividend of 1s in the £ to the creditors, making 13s in all.

Trust and Agency Company of Australasia.—At a meeting on the 11th instant, an interim dividend at the rate of 10 per cent. per annum was declared.

ASSURANCE COMPANIES.

County Life Assurance Company.—Mr Arthur Cooper, of Cooper Brothers, is appointed official liquidator.

Gresham Life Assurance Society.—At the annual general meeting, held on the 14th inst., the report stated that the new premiums for the year were 39,656*l*; the annual income, 297,699*l*; and the realised assets, 1,025,482*l*. The report further stated that the company had in hand 70 per cent. of the premiums received on current assurances. A bonus of 60,000*l* was declared for the past two years.

Norwich Union Life Insurance.—This company has determined to grant settlement policies—that is ts say, by the payment of the usual premiums during life, the insurer secures to his widow the interest of the sum assured, and, on her death, the payment of the principal to his children, in such proportions as he may direct. It is provided that the principal be invested in Government securities, so that the income to be derived may be calculated at 3 per cent. on the sum assured. By adopting this description of security, trust and deed settlements will be avoided.

MISCELLANEOUS COMPANIES.

Greek 1824-25 *Bonds.*—At a meeting on the 12th instant, the proposal of the Greek Government for a settlement of these claims was accepted by the bondholders conditionally. The conditions were, that special securities be assigned for payment of the interest and sinking fund of the 1,000,000*l* 5 per cent. stock to be created; and that the sinking fund should, at the expiration of 5 years, be augmented to the amount of 20,000*l* per annum. The bondholders in Amsterdam are stated to be opposed to the settlement proposed.

Italian Irrigation Company.—Creditors are required to prove their debts without delay.

London Flour Company, Limited.—The 14th and 15th inst. were appointed by the liquidators to settle the list of contributories.

New Zealand 6 per Cent. Debentures.—Tenders are to be received till the 19th instant for 470,000*l* in 6 per cent. debentures, the balance of the loan for 3,000,000*l*, authorised in 1863. The bonds will have 24 years to run, and the interest will date from the 15th of next month. A sum equal to 2 per cent. per annum is to be applied as an accumulating sinking fund. The proceeds are to be used in redemption of 8 per cent. Treasury bills falling due on the 31st of December, of which a total of more than 400,000*l* is reported to be held here.

Peninsular and Oriental Steam Company.—The annual meeting is to be held on the 6th December; but the profit and loss account shows no dividend. The secretary states that the contract for new and increased mail services to India and China has been provisionally agreed to by the Government.

Turkish 6 per Cent. Loan, 1862.—Notice has been given that 495 bonds, representing 104,300*l*, have been drawn for redemption on the 1st January next.

MINING COMPANIES.

Cape Copper Company.—It appears from the report that, owing to large advances obtained during 1866 pending the sale of various ores, the profits have been reduced. The balance of profit to 31st December, 1866, is 2,831*l*; but against this there are the balances standing to the following accounts:—Nababiep Trial Works, 5,618*l*; Koperberg ditto, 163*l*; New Road, 931*l*; Reduction Works, 5,555*l*. The directors, therefore, propose to apply the balance of profit as follows:—To Nababiep Trial Works account, 1,500*l*; to Reduction Works, 1,000*l*; leaving 331*l* to be carried forward to next account. The report was adopted on the 13th inst.

Foreign Correspondence.

[FROM OUR OWN CORRESPONDENT.]

PARIS, Thursday.

The *Moniteur* has published the following return of the Bank of France, made up to the 14th inst. The return for the previous week is added :—

Debtor.	Nov. 14, 1867. f	c		Nov. 7, 1867. f	c

	1,887,012,772	38	.....	1,870,430,472	99

In the Bank return of this week, compared with last, there is an increase of 9,955,000f in the coin and bullion, of 8,926,000f in the discounts, of 12,086,000f in the deposits.

Owing to the turn the Italian affair has taken, and to the desire of speculators to wait to see what the French Emperor will say in his speech, on opening the Chambers on Monday, the Bourse has been much quieter in the week that has elapsed since my last than it was for some time before; and the fluctuations in prices have not been considerable. In Mexican bonds, however, there has been an advance of some importance, owing to the belief that the Government will do something for the holders. The quotations are as follow :—

	Nov. 7. f	c		Nov. 14. f	c
Threes	68	32½	.....	68	7½
Fours	...		.....	...

Meridional of Italy	270	0	.....	270	0

By decree of the French Emperor, issued to-day, M. Magne is appointed Minister of Finance *vice* M. Rouher, who has resigned the post. The general expectation is that one of the first acts of the new Minister will be to raise a loan of 500,000,000f or 750,000,000f (20,000,000*l* or 30,000,000*l*), in order to consolidate part of the floating debt, which now exceeds 1,000,000,000f—a sum considerably above that which the late M. Fould some years back denounced as dangerous—to pay the unforeseen expenses which the new expedition to Rome has occasioned, and to, it is said, give some compensation to the unfortunate Mexican bondholders who lent their money to Mexico at the solicitation of the French Government, and on its assurance that the loan might be safely made. But from what I hear, I should not be surprised if, contrary to the

general belief, M. Magne were to try to avoid a loan for the moment, if only to prove that he is not the borrowing Minister the public suppose him—borrowing being the clumsy expedient of unskilful financiers. And though the situation in undoubtedly embarrassing, he may be able to do without a loan for a time by turning aside certain revenues set apart for the sinking fund, manipulating the funds of the dotation of the army, effectiug a conversion of the Mexican securities on the condition that with each one a certain sum should be paid in return for so much *rente*, &c., &c.

The Prefect of Paris, in consequence of the dearness of bread, has decided that what is called the "compensation system" shall be re-established—that is, that bakers shall be requested (not compelled) to sell their bread below the cost price, subject to being reimbursed the difference by what is called the Caisse de la Boulangerie. It was, you are aware, for many years the custom in this country for the municipal authorities of towns to, in French parlance, "tax" bread, which meant that they took the average price of flour in the market every fortnight, added thereto what they conceived a sufficient sum per sack for the baker's industry and profit, and then decided that the loaf should be sold for so much and no more. In 1853, the addition was made to this system, so far as Paris was concerned, that bread in times of scarcity should be sold under its real value, and in times of plenty above the value; and the Caisse de la Boulangerie was established for enabling these things to be done. The Caisse started with a fund of 20,000,000f contributed by the department of the Seine; and by means thereof compensated for a time bakers for selling bread at less than the real cost. Afterwards, it got back its money by making them sell at more than the cost. Things continued in this way until some years back, when the baking trade, which had been a monopoly, was thrown open, and the "taxing" of bread ceased. But then it was decreed that a special duty should be imposed on grain and flour, in order to form a fund to enable bread to be sold at not more than 50c the kilogramme (4¾d the 2 lbs), when the real price should be superior to that figure. In this way, the Parisians were treated like children, for whom it was necessary to exercise foresight. The contingency of bread being above 50c having now arisen, the Prefect has brought the compensation system into work again. The average price of flour is to be taken every week, and 9f per sack is to be added to it for the baking. Each sack is to produce 130 kilogs of bread. The baker is to sell at 50c, and the difference between the 50c and the real price is to be reimbursed him. Several bakers, it appears, have refused to adopt this system, because it necessitates the keeping of double accounts and the exposure of the state of their business to the Caisse. When, too, bread may become cheap again, they will have the trouble of levying more for it than its cost, and handing over the difference to the Caisse. But, as the public will naturally go to the shops in which bread is cheapest, it is almost certain that all the bakers will have to come into the system, except, indeed, in districts where there happens to be no competition. Some time back, the French Emperor proclaimed the necessity of spreading "sound notions of political economy" in France. This Governmental meddling with the price of bread is hardly in accordance with such notions.

An Imperial decree, dated yesterday, enacts that, until otherwise ordered, the surcharges established by the law of 15th June, 1861, on grain and flour imported in foreign vessels, are suppressed. Under this law, wheat and buckwheat so imported pay 1f the 100 kilogs (about 9½d the 2 cwt); flour of ditto, 1f 50c; all other grain and flour, 50c.

The report of the grain market at Marseilles, of Saturday last, says:—"During the past week, the transactions that have taken place show that there are still wants to fulfil. During the past month, we have received about 1,200,000 hectolitres of wheat, but, notwithstanding, our prices have greatly advanced, and the quantities disposable are insignificant, owing to the numerous demands of each day. We believe that the variety of wheat in the great markets of Europe cannot do otherwise than consolidate this state of things, since Spain, Africa, England, France, Belgium, and even Italy have to complete supplies necessary for their consumption." This week the market has been firm. At Paris, it will be observed from the report below, there is a new advance both in wheat and flour.

Messrs Bischoffsheim, Goldschmidt, and Co., bankers of the Chaussée d'Antin, have, by means of advertisements in all the newspapers, solicited subscriptions to the 50,000 railway bonds of Honduras, of which the issue has been announced at London. French capitalists and speculators, not being very learned in geography, hardly knew where Honduras was, and manifested some little surprise at being asked for money for it. However, it is affirmed that having instituted inquiries about the State and its resources, and about the value of the security offered, they have made investments.

The Tunisian Government has sent the Comptoir d'Escompte bills on Paris at 75 days date for 716,000f towards the payment of the coupon of one of its loans, which fell due on the 1st July last. With 800,000f of bills previously forwarded, and 400,000f to be obtained from a bank at Paris, the amount necessary for that coupon will be nearly realised. But another coupon fell due on 1st November, and it has not yet been paid. Payment, however, is promised not later than the month of May.

Circulars have been issued proposing to raise a capital of 150,000,000f for the establishment of 150 banks in the provinces, to be in connexion with a great central establishment in Paris. It is said that the getters up of the affair are of celebrity in the banking world, but, with singular modesty, they abstain from giving their names. Serious doubts are entertained that the 150,000,000f will be subscribed, it not being usual to furnish such sums to anonymous gentlemen.

Some time back, a company was formed in this city under the name of Magasins-Reunis, with a capital of 200,000,000f (8,000,000*l*), for selling all sorts of goods—under the singular condition of reimbursing the purchaser all his outlay in a given number of years,—the reimbursement to be effected by means of an investment at compound interest. The company, which, by the way, has built for itself a vast and splendid edifice, now announces that, in order to "obtain a great number of purchasers, and to limit its sacrifices," it will give *gratis* a share to the number of 12,000 to every person who, in three months, will buy from it 500f worth of goods. The announcement seems to indicate that the success of the company thus far has not equalled its expctations.

Subjoined is the market report:—

FLOUR.—Prices at *Paris* have risen. Yesterday, superior was 94f the sack of 157 kilogs; first marks, 93f; good, 92f; other sorts, 90f to 91f. Six marks, 91f 25c. Type Paris, the 101 kilogs, 56f. These prices are from 1f to 2f above those of last week.

WHEAT.—At *Paris*, yesterday, choice was 53f; first quality, 52f; second, 50f, the sack of 120 kilogs. The choice is 50c, and the first quality 1f more than last week; in second, there is no change.

COTTON.—The sales at *Havre*, in the week ending Friday, were 8,446 bales, and the arrivals 1,371. The closing quotations were 2f to 5f lower for United States, in very ordinary and higher designations; 2f to 3f lower for Peru and Bahia; 2f to 5f for Soracaba and Minas; 2f for Cumana and Tinnevelly; other sorts unchanged. New Orleans very ordinary was, consequently, 103f the 50 kilogs, and Broach, good ordinary, 90f; Tinnevelly ditto, 82f; Madras ditto, 75f. The market was regular on Monday and Tuesday, but dull yesterday. The quotation yesterday of New Orleans, very ordinary, was 102f 50c for disposable, and 90f for delivery; good ordinary, for delivery, 85f.

COFFEE.—The sales at *Havre*, in the week ending Friday, were, 1,400 Port-au-Prince, Jaemel, and Jeremie, 62f to 67f the 50 kilogs, in bond; 263 Cape, 76f; 338 Gonaives, 80f; 770 Rio, not washed, disposable, 57f to 58f; 2,340 ditto, for delivery, 46f to 64f 50c; 1,755 ditto washed, for delivery, 76f 50c to 85f 50c; 600 Santos, different prices; 116 La Guayra grage, 77f; 58 Malabar, 85f to 86f 50c; 100 bags Manilla, from London, 75f. By auction, some damaged. This week, Port-au-Prince, 69f to 73f; Gonaives, 79f to 80f; Cape, 76f; Rio, 49f 50c to 70f; washed, 80f and 88f 50f; Santos, different prices. At *Bordeaux*, last week, 1,805 sacks Winard, 105f and 112f 75c; 173 bags Salem, 117f 50c; 250 Rio, not washed, 61f 50c and 58f; 138 washed, 92f; 50 Bahia, —; some habitant, 140f. This week, Mysore, 108f 50c; habitant, 140f; Rio, washed, 97f 50c; Rio, not washed, and Costa Rica, prices not given. At *Nantes*, last week, 250 bales Reunion pointue, prices not stated. No sales this week. At *Marseilles*, last week, 7,384 sacks Rio, at 53f 50c, 54f, 62f, and prices not stated. This week, Rio, 60f and 53f.

SUGAR.—Business was limited at *Havre*, in the week ending Friday: a small quantity of French West India at 49f 25c the 50 kilogs, bonne quatrieme, duty paid, and some usine, 52f 25c to 56f; also some damaged Havana by auction. This week, no sales. At *Bordeaux*, last week, some lots of French West India, 48f 75c, bonne quatrieme; a small quantity ditto, 49f 25c. This week, Martinique, 48f 50c, bonne quatrieme. At *Nantes*, last week, some French West India usine at 53f 50c, 54f 50c, and 62f on sample. No sales this week. At *Marseilles*, last week, 230 tons Egypt at prices not stated, but believed to be 32f 50c, No. 12; some Martinique, 31f, bonne quatrieme. No sales this week.

INDIGO.—At *Havre*, in the week ending Friday, 15 chests Bengal new, at the estimates to 1f above; 2 ditto old, and 7 serons Guatemala, prices not stated. This week, Bengal, to 75c and 60c premium. At *Bordeaux*, last week, 27 chests Bengal, 21 Kurpah, 64 Madras, for delivery, at 2f 95c the rupee: 11 serons Carracca, prices not stated. This week, Bengal and Kurpah, quotations not given.

HIDES.—The sales at *Havre*, in the week ending Friday, were 938 Monte Video dry, for delivery, 110f the 50 kilogs; 10,500 salted saladeros ox, 57f 25c to 60f; 1,750 Rio Grande salted ox and cow, 55f; 1,000 Rio Janeiro salted ox, for delivery, 54f 50c; 850 Pernambuco salted, 52f 50c; 100 Para salted and drysalted, 70f; 200 horse, Buenos Ayres dry, 8f each. By auction, 121 Bahia, 75f to 82f; 1,052 Martinique, 49f 50c to 58f 50c; also different sorts of damaged. This week, Pernambuco salted, 52f 50c; Monte Video salted saladeros ox, 58f to 60f; Buenos Ayres, 58f 75c; Trinidad, 55f; Lima drysalted, 65f; Jersey salted, with horns, 42f; Monte Video horse salted, 44f and 44f 25c; Buenos Ayres ditto salted, 45f 25c.

WOOL.—At *Havre*, in the week ending Friday, the sales were 235 bales La Plata unwashed, 1f 10c and 2f the kilog; 14 Monte Video washed, 2f 15c; 30 Rio Grande unwashed, 1f 65c; 4 bales sheepskin, La Plata *rasons*, 60c; 10 Buenos Ayres lambskin, 1f 25c. By auction, some different sorts of damaged. No sales this week.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 100 pipes 300 demi-pipes Monte Video saladeros, disposable or in the port, 52f to 52f 50c the 50 kilogs; 82 demi-pipes La Plata, disposable, 50f to 51f 50c; 37 pipes 300 demi-pipes ditto, for delivery, 50f 50c to 51f; 14 casks New York, disposable, 53f. This week, La Plata, 51f. At *Paris*, yesterday, the 100 kilogs, without octroi duty, averaged 104f.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, 90 deg., disposable, 59f to 60f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 85f; 3-6 beetroot, first quality, 90 deg., 67f.

MADRID, Nov. 11.—An official return of the financial situation

of Spanish railways on the 31st March last has just been issued. The 22 different companies are shown to possess a nominal capital of 3,969,731,000 reals, which, calculated at the exchange of 100 reals to the pound sterling, represents a sum of 39,697,311*l*; the total amount at which the shares were issued was 2,798,607,444 reals, and the sum actually produced was 2,444,227,444 reals, or 62 per cent. of the nominal capital. The Government subventions amounted to 1,713,214,287 reals, or nearly one-half of the nominal capital, and of this sum 1,409,626,484 reals had been paid on the 31st March, 1867. The railway bonds issued have been 2,942,355 in number, of a nominal value of 5,624,165,100 reals, and producing 2,842,754,543 reals, or 50 per cent. Of these bonds 66,759, representing 1,409,626,484 reals, have been paid off.

The capital disbursed on the 31st March was, consequently, as follows:—

	Reals.
Shares	2,444,227,444
Government subvention	1,409,626,484
Bonds	2,842,754,543
Total	6,696,608,471

or more than 66,966,084*l*. The total length of railway in working being 2,556 miles, the cost per mile has been 2,619,960 reals, or 26,199*l*. The receipts during the first quarter of 1867 were 69,742,920 reals, or 27,285 reals (272*l*) per mile.

Correspondence

THE BANK OF ENGLAND.

TO THE EDITOR OF THE ECONOMIST.

SIR,—"C" says in his last letter, that a bank note is analogous to a check, and is, indeed, substantially the banker's cheque on himself.

Such language is calculated to create confusion, because it ignores fundamental distinctions. A bank note is a promise to pay, a cheque is an order to pay, and there is no analogy between them.

A bank note is a transferable promise on the part of a bank to pay to bearer, on demand, a certain amount of coined gold; it circulates side by side with coin in endless succession; it liquidates debts like coin; and *men in business are practically bound to accept it when in circulation*—(the words in italics are taken from the *Times*). A cheque is an order directed to a banker to pay over a specified sum of money; it requires endorsement on being paid, nor is any one practically bound to accept it when it is offered to him as payment of a debt, as he would be in the case of a bank note, because it is an order to pay bank notes, which may or may not be complied with for various reasons: it is not a bank note itself. An order to pay a fifty pound Bank of England note, and the note itself, are very different things, and I believe there is no analogy between them.

A little further on, "C" says—"The amount of bank notes at any time in circulation is, therefore, not regulated by the banks: it is regulated by the public, &c., &c." Most true, but "C" omits to state that this only holds good where banks are obliged by law to hold gold coin or bullion for all bank notes issued over a certain fixed amount, for where there is no such wholesome regulation, it is well known that the public cannot regulate the amount of bank notes, but that if the foreign exchanges continue adverse for any time, the banks issue more and more bank notes, the public take them, prices rise, and gold goes, until a depreciated currency points out the true nature of what has taken place.

It is only when bank notes are issued under strict regulations to secure their convertibility that the public both can and ought to regulate the amount of them which they require.

Again, "C" calls Bank of England notes "artificial circulation," while he admits that country bankers call for large amounts of them to keep their own bank notes convertible, or "national circulation." Surely bank notes, which have to depend upon other bank notes for their existence, are "artificial circulation," while the bank notes the nation depend on (as "C" admits) are "national circulation."

Further, there was no "increase in the issue of bank notes" When the country bankers took nearly four millions from the reserve of the Bank, these notes were already issued.

I believe it to be an error to mix up the two accounts, and that a correct view of the Bank's position cannot be obtained by doing so.

The fifteen millions of authorised Bank of England notes, though payable in gold on demand, cannot be classed with public and private deposits or bankers' balances, nor does the Bank of England ever keep any reserve in its banking department account as against them; they are supposed to be provided for in the issuing department, and are so provided for; events having clearly shown that our national circulation (not in "C's" sense) is as sound as it can be under our present system.

One more remark. "C" is perfectly right about the bankers' balances; they are a trust, and until they are considered as such, and remain untouched, we shall not see every bank standing on its own merits.—I remain, yours truly, N.

November 5, 1867.

TO THE EDITOR OF THE ECONOMIST.

SIR,—While insisting on the duty of the Bank to maintain a large metallic reserve, I doubt the policy of "C's" advice. It would, probably, be wise as you suggest, to separate the deposits between bankers and others; but what need is there to turn the bankers' balances into gold? Deposits may properly be reserved in that form in which they are commonly demanded, but if it is unlikely that a fiftieth part will ever be wanted in gold, it is foolish to keep the whole in metal. And the fact is known that bankers use extremely little gold in their current business. They require more notes, but the balance with the Bank of England is held chiefly as a reserve for settling the Clearing house engagements, which are purely matters of account.

In times of pressure, for which "C's" plan is designed to prepare us, the bankers increase their balances instead of withdrawing them in gold or even notes. They keep more notes and gold in their tills, but they take especial care to strengthen their reserve in the Bank of England, because upon it their largest operations are based.

I do not care to discuss what active harm "C's" plan may cause. It does, however, appear a waste of treasure to collect heaps of gold for those depositors who require very little, and who enrich instead of impoverishing the Bank during the panics for which "C" is providing. R. M.

Manchester, Oct. 31.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Railway Companies' Act of last Session contains an important clause, giving to the shareholders a control through the auditors, and imposing on the auditors a responsibility which they never had before. It is a striking fact that (as far as we remember) the auditors have never discovered, or at any rate disclosed, any one of the numerous cases of forgery of stock, false returns to the Board of Trade, payment of unearned dividends, charging of revenue expenses to capital, or any other of the various forms of "cooking" accounts by which shareholders have been lured to ruin by their directors. Henceforth the auditors will not have the excuse, when actions are brought against them for neglect of duty, that they had only to certify such accounts as were presented to them by the directors. The clause (30 of the Act) was moved by Lord Redesdale on the advice of one of the leaders of the Parliamentary bar, and is as follows:—"No dividend shall be declared by a company until the auditors have certified that the half-yearly accounts proposed to be issued contain a full and true statement of the financial condition of the company, and that the dividend proposed to be declared on any shares is *bonâ fide* due thereon after charging the revenue of the half-year with all expenses which ought to be paid thereout in the judgment of the auditors. But if the directors differ from the judgment of the auditors with respect to the payment of any such expenses out of the revenues of the half-year, such difference shall, if the directors desire it, be stated in the report to the shareholders, and the company in general meeting may decide thereon, subject to all the provisions of the law then existing, and such decision shall for the purposes of the dividend be final and binding; but, if no such difference is stated, or if no decision is given on any such difference, the judgment of the auditors shall be final and binding. And the auditors may examine the books of the company at all reasonable times, and may call for such further accounts and such vouchers, papers, and informations as they think fit; and the directors and officers of the company shall produce and give the same as far as they can, and the auditors may refuse to certify as aforesaid until they have received the same; and the auditors may at any time add to their certificate, or issue to the shareholders independently, at the cost of the company, any statement respecting the financial condition and prospects of the company which they think material for the information of the shareholders.

The following return shows the production of iron in, and export from, Sweden during the last 7 years:—

Years.	Production. tons.	Exportation To England; tons.	Exportation To Other Countries. tons.	Total. tons.
1860	134,700	51,100	44,600	95,700
1861	142,600	32,200	37,100	69,300
1862	126,200	42,700	44,800	87,500
1863	128,000	45,600	45,100	90,700
1864	135,000	45,000	48,300	93,300
1865	146,100	43,400	44,500	87,900
1866	164,200	56,000	57,300	113,300

The annexed report shows the state of the Albany lumber market for the week ending Oct. 29:—There has been a steady trade during the week, but there is an absence of that activity which ought to be met with at this season. Prices have undergone no change. The Chicago receipts are very large—31,000,000 feet for the week ending the 25th inst. The shipments were also large—about 15,000,000 feet. Allowing for the local trade, the increase to the already large stock at Chicago must be at least 10,000,000 feet. There is an increase at Buffalo of over 100,000 feet which was not looked for. At Albany the receipts to October 22 were 325,546,000 feet; and to the fourth week of October, with one day to add, 16,955,300 feet. The additional day's receipts will carry the aggregate over 343,508,100 feet which were the total receipts at Albany in 1866.

The statistical report of the army medical department shows a decrease in the mortality of troops serving in the United Kingdom in 1865, compared with the average of the six preceding years, at each quinquennial period of age, except under 20, and at ages 35 and under 40. Thus, the annual ratio of deaths per 1,000 living, exclusive of all depôts, in 1865, and in the six years 1859-64 respectively, was, under 20 years of age, 3·54 and 3·01; at 20 and under 25 years, 3·49 and 6·09; at 25-30 years, 6·75 and 8·25; at 30-35 years, 11·05 and 12·23;

at 35·40 years, 17·40 and 15·61; and at 40 years of age and upwards, 14·49 and 19·65.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during the month of October, 1867:—

IMPORTS.

By Sea.	Ships.	Tons.	By Railway and Canal.	Tons. cwt.
Newcastle	229	123,341	London and North-Western	105,723 12
Seaham	29	8,184	Great Northern	93,740 0
Sunderland	135	65,562	Great Western	37,536 0
Middlesborough	9	3,214	Midland	10,355 12
Hartlepool	101	31,509	Great Eastern	21,265 11
Blyth	1	267	South-Western	179 6
Scotch	6	2,060	London, Chatham, & Dover	49 0
Welsh	9	2,152	London, Tilbury, & Southend	...
Yorkshire	21	2,650	South-Eastern	1,711 4
Duff	...	...	Grand Junction Canal	946 10
Small coal	3	1,558		
Cinders	3	365		
Culm	...	...		
Total	546	241,562	Total	271,506 15
Oct., 1866	648	275,765	Oct., 1866	310,906 0

COMPARATIVE STATEMENT, 1866 and 1867.

	Ships.	Tons.
By Sea.—Jan. 1 to Oct. 31, 1867	5,626	2,440,526
Ditto ditto, 1866	5,840	2,452,057
Increase in the present year	...	...
Decrease in the present year	214	11,531

	Tons. cwt.
By Railway and Canal.—Jan. 1 to Oct. 31, 1867	2,663,229 6
Ditto ditto, 1866	2,437,047 4
Increase in the present year	226,182 2

EXPORTS.

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during October, 1867:—

		Tons.
1. Railway-borne coal passing in transitu through district		22,696
2. Sea-borne coal exported to British Possessions, or to foreign parts, or to the coast	tons 72,642	
Ditto sent beyond limits by railway	5,715	
Ditto by canal and inland navigation	3,567	
		81,924
3. Railway-borne coal exported to British Possessions, or to foreign parts, or to the coast	6,496	
Ditto by rail beyond districts	...	
Ditto by canal and inland navigation	172	
		6,668
4. Sea-borne coal brought into port and exported in same ships		722
Total quantity of coal conveyed beyond limits of coal duty district during Oct., 1867		112,010
Ditto, Oct., 1866		76,226

During the week ending Nov. 13, the imports of the precious metals were—Gold, 47,402*l*; silver, 23,427*l*. The exports were—Gold, 169,073*l*; silver, 238,765*l*.

The Bankers' Gazette

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 13th day of November, 1867.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,150,315	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	21,150,315
		Silver Bullion	...
	36,150,315		36,150,315

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,319,203
Rest	3,066,989	Other Securities	16,682,646
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,145,163	Notes	12,000,665
		Gold and Silver Coin	1,088,492
Other Deposits	18,691,673		
Seven-day and other Bills	634,180		
	42,091,005		42,091,005

Dated the 14th November, 1867. FRANK MAY, Deputy Chief-Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	24,783,830	Securities	29,448,849
Public Deposits	5,145,163	Coin and Bullion	22,238,806
Private Deposits	18,691,673		
	48,620,666		51,687,655

The balance of Assets above Liabilities being 3,066,989*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase. £	Decrease. £
Circulation	...	470,592
Public Deposits	...	251,736
Other Deposits	...	55,313
Government Securities	...	572,000
Other Securities	...	105,996
Bullion	...	94,491
Rest	5,454	...
Reserve	362,774	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Nov. 13. £	Week ending Nov. 6. £
Thursday	11,121,000	9,831,000
Friday	10,444,000	8,526,000
Saturday	11,168,000	10,403,000
Monday	9,340,000	11,948,000
Tuesday	9,722,000	10,116,000
Wednesday	9,267,000	8,665,000
Total	61,072,000	59,489,000

GEORGE DERBYSHIRE, Chief-Inspector.

Bankers' Clearing-house, Nov. 14, 1867.

The reserve shows a fresh increase of 362,774*l*. The stock of coin and bullion has suffered the small decrease of 94,491*l*. Private securities to the extent of 105,996*l* have run off, and Government securities have been reduced by 572,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1857:—

At corresponding dates with the present week.	1857.	1864.	1865.	1866.	1867.
Circulation, including bank post bills	£ 22,235,954	£ 20,759,500	£ 21,661,131	£ 23,869,564	£ 24,783,830
Public deposits	5,483,881	5,142,368	5,690,148	5,145,772	5,145,163
Other deposits	13,959,165	14,426,234	12,275,016	16,667,127	18,691,673
Government securities	6,407,134	10,734,542	9,741,100	12,304,391	12,319,203
Other securities	20,299,270	19,305,241	19,308,882	19,061,233	16,682,646
Reserve of notes & coin	1,552,686	8,307,970	7,174,973	8,867,762	13,089,156
Coin and bullion	6,484,096	13,852,355	13,677,098	17,144,607	22,238,806
Bank rate of discount	10 p c.	8 p c.	7 p c.	4 p c.	2 p c.
Price of Consols	90¾	91	89½	89⅞	94⅝
Average price of wheat	51s 8d	38s 9d	45s 3d	57s 2d	70s 1d
Exchange on Paris (short)	25 25 45	25 17½ 25	25 12½ 22½	25 15 22½	25 12½ 20
— Amsterdam ditto	11 17½ 18½	11 15 16	11 18½ 19	11 15½ 16½	11 18½ 19½
— Hamburg (3 months)	13 12⅝ 14	13 9 9½	13 9½ 10	13 9 9½	13 9⅝ 10½

In 1857, the Bank return showed that the Act of 1844 had been infringed by an over issue of two millions of notes, of which the amount left in the Bank's coffers was 1,552,686*l*. Two millions of Government securities had been transferred from the banking to the issue department. The Bank had also sold large amounts of Government securities, but the increase in the private securities had been large. Failures in the Swedish trade had commenced, and the Wolverhampton and Staffordshire Bank had stopped payment. The exchanges were rapidly rising, and there were other indications of a coming turn for the better in the money market.

In 1864, a new Egyptian loan of 5,704,200*l* had just been issued on the London market. Some rather large mercantile failures had been announced, both in London and in the provinces. The proposal for the federation of British North America was being discussed.

In 1865, the Bank return was favourable, there being an increase of nearly 693,000*l* in the reserve of notes and coin. For money, there had been an active demand, at fully the Bank minimum of 7 per cent. The negotiations for the issue of an Austrian loan in London had broken down.

In 1866, there was an abundant supply of money. The Bank of Frankfort had reduced its rate from 4 to 3½ per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1857, a deficiency of 16,340,105*l*; in 1864, a deficiency of 4,879,007*l*; in 1865, a deficiency of 7,033,866*l*; and in 1866, a deficiency of 2,374,106*l*. In 1867, there is an excess of 2,009,027*l*.

DISCOUNT AND MONEY MARKET.—The continued decline in the amount of the private securities held by the Bank proves the absence of a sufficient demand to employ the increasing resources of the national establishment. "Outside" lenders are disposed to ask rather higher rates for periods over four or six weeks. The supplies in the hands of the Joint Stock Banks are very large, and the rate on the best paper varies from 1¼ to 1½ per cent.

In the Stock Exchange, the abundance of money is in nowise diminished. From day to day, on Government securities, it is not easy to obtain more than 1 per cent. Even at that price, dealers are scarcely disposed to borrow to any extent.

The announcement of a 10 per cent. Honduras Government railway loan, in the early part of the week, has provoked considerable comment. In the Americaine de l'Economic Politique, the actual debt of the Republic is stated at 800,000 dollars treasury bonds. The population of the country is stated at 350,000 inhabitants, and its commerce at 148,000*l* value of importations and 165,000*l* value of exportations, almost exclusively with Great Britain. The Customs produce

52,000*l* annually; and the expenditure of the country is 60,000*l*. There is an additional estimate of 120,000*l* per annum from tobacco and mahogany. Under these circumstances, it may be well for intending subscribers to consider whether sufficient security is to be found for the carrying out of the projected railway, or whether the proposed loan is not out of all proportion to the resources of the Republic of Honduras. The loan, after being 3⅛ to 3⅜ prem., declined to 1½ to 2 prem.

The current quotations for mercantile paper having various periods to run, are as follows :—

30 to 60 days	1¼ ½ per cent.
3 months	1¼ ½ per cent.
4 months—Bank bills	1⅜ ⅝ per cent.
6 months—Bank bills	1¾ 2 per cent.
4 to 6 months—Trade bills	2 3 per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks	1 per cent.
Discount houses at call	1 per cent.
Do. with seven days' notice	1¼ per cent.
Do. fourteen days	1½ per cent.

Abroad there has been no alteration during the week, and the discount quotations current on the bourses of the chief continental cities are as follows :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	2	1¾ 2¼
Vienna	4	4
Berlin	4	2¾
—	4½ advcs	...
Frankfort	2½	1¾ 2
Amsterdam	3½	3 ½
Turin	5	...
—	7 advances	...
Brussels	2¾	2¼ ¾
—	3¼ advcs	...
Madrid	5	...
Hamburg	...	2
St Petersburg	7	8 9

The account published this week by the Bank of France gives the following results compared with the previous return :—

Increase.	£
Current accounts	480,000
Bullion	400,000
Bills discounted not yet due	356,000
Bank notes	244,000
Treasury balance	48,000
Advances	24,000

English Government Stocks.—Purchases for investment have, during the week, been made to a very large extent. The price improved steadily, and the market continned to gain strength up to Thursday afternoon, when the quotation was good at 93 5-16 to ⅜ ex div., and 94¾ to ⅞ for money; stock being sufficiently scarce to show no difference in the rate, whether for money or for the account. The price then gave way, and closed 93 to ⅛, without any explained reason for the decline. To-day, it receded afresh to 92⅞ on political rumours. Later in the day, and in the absence of any confirmation of these rumours, the quotation became steadier, and closed 93 to ¼. The investment market is good, and has been maintained. New 3 per Cents. and Reduced close 92⅞ to 93, and India 5 per Cents. 116 to ½. Consols for money with dividend, 94½ to ⅝. The more probable explanation of the decline in Consols yesterday and to-day appears to be that weak holders who bought on speculative account, in anticipation of Government purchases for the sinking fund, ascertained from the nature of the Bank return that such purchases would probably not take place, and, therefore, resold their accounts. The firmness of those stocks which are dealt in exclusively for money, seems to indicate very steady investments on account of the public.

Exchequer bills and India bonds are unaltered, but firm at the quotations.

Foreign Stocks.—The approach of the dividend time on a great number of the foreign stocks in the market gives rise to firmness. Turkish stocks, notwithstanding the Cretan difficulty, are well held. The drawing of the 1862 Loan has been advertised, and of the 8,000,000*l* then issued, nearly 1,000,000*l* has been redeemed. The drawing of the 1865 6 per Cent. Loan is to take place in the course of the next ten or fifteen days, and about 300,000*l* will have been redeemed by the close of the year. The redemption of the Turkish foreign debt is now going on at a rate rather over 500,000*l* per annum. Egyptian securities, after having improved rather rapidly, declined, and close at a relapse that is thought to indicate attempts to negotiate a fresh loan. The new Spanish 3 per Cents. have been held very firm, and as the orders to purchase on foreign accounts are large it is presumed that they emanate from parties interested in bringing in a large number of Passive bondholders to the conversion. Peruvian 4½ per Cents. continue to improve. Venezuela 6 per Cents. have a fresh decline, and the former bad faith of many of the South American Governments is looked upon as a bar to the issue of fresh loans on account of States so disorganised and unstable as most of them are. The conduct of the Venezuelan Government especially is a flagrant example of bad faith, for which no actual facts afford either palliative or excuse. The Chilian loans have held moderately firm. Danubian 7 and 8 per Cents., the latter especially, have improved. The large amount of the dividend accruing, and to be shortly paid on very many of the foreign stocks currently dealt in, affords strong inducement to investors, who are almost wholly unable to employ their spare funds in the money market. In many cases, the drawings taking place will be immediately succeeded by the dividend payments of December and January; which, in their turn, will, on payment, materially reduce the market quotations of securities already at low values. Italian 5 per Cents. have fluctuated less this week, and the public seem to absorb stock steadily, as small bonds, which were plentiful a short time back, subsequent to the large deliveries here on foreign account, have become scarce, and are again inquired for. The following are the closing quotations of stocks dealt in to-day :—

Brazilian 5 per Cents., 1865, 73½ to 74½. Chilian 6 per Cents., 1867, 84 to 86; ditto 7 per Cents., 1867, 90½ to 91½. Columbian 6 per Cents., 80 to 82. Danubian Principalities 8 per Cents., 63 to 65. Egyptian 7 per Cents., 85 to 87; ditto 1864, 84 to 85; ditto 500*l* bonds, 85 to 86; ditto 100*l* bonds, 87 to 88; ditto Government Railway debentures, 89½ to 90½. Greek 5 per Cents., 11½ to 12. Mexican 3 per Cents., 14¾ to 15¼. New Granada, 11½ to 12½. Peruvian 5 per Cents., 1865, 70½ to 71½. Portuguese 3 per Cents., 1853, 40 to 40½. Russian 3 per Cents., 1859, 50½ to 51½; ditto 5 per Cents., 1862, 84 to 85⅓; ditto Anglo-Dutch, 1866, 86½ to 87½. Spanish New Deferred 3 per Cents., 31½ to 32; ditto Passive, 20¼ to 20¾. Turkish 6 per Cents., 1858, 62½ to 63⅓; ditto 1862, 62 to 63; ditto 5 per Cents., 1865, 32 to 32½; ditto 6 per Cents., 1865, 50 to 52; ditto 4 per Cents. Guaranteed, 103 to 105. Italian 5 per Cents., 1861, 45 to 45½.

French 3 per Cent. Rentes close 68.17½ for the account, at an advance of ⅛th.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

English Railway Stocks.—There have been heavy fluctuations in most railway securities. The settling on the 14th showed a great preponderance of "bear" accounts which, mostly, were carried over at a backwardation. It is stated that

the Caledonian Railway Company are preparing to abandon several projected lines, and to issue fresh capital. The great decline in many stocks during the present year has left a wide margin of price against the higher railway securities, and speculators are to a great extent taking advantage of this margin to operate for the fall; believing that the public will by changes of investment, or from disquiet, supply the stocks they have engaged to deliver. To-day, quotations close at a fresh decline in almost every instance.

INDIAN GUARANTEED SECURITIES.—Indian Railway stocks have shown an upward tendency during the past two days. The causes acting upon foreign dividend-paying stocks operate to some extent in this direction, as at the approach of the dividend payments investments are commonly made in considerable amounts. Great Indian Peninsula Railway and East Indian Railway both have improved.

FOREIGN RAILWAY SHARES are mostly firmer. Purchases have been, in some instances, freely made, at rather improved prices.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing price this day.

BANK SHARES.—English Joint Stock Bank shares continue to be very heavy, and most quotations show a further decline. Anglo-Austrian Bank and Imperial Ottoman Bank shares are both quoted firm, at an improvement.

MISCELLANEOUS SHARES.—The transactions have been few and unimportant. In International Financial and in General Credit shares there is no alteration worth notice. Hudson's Bay shares are steady. Telegraph Construction shares are dull, at 15 to 15½. Atlantic Telegraph, old stock, has advanced, and the 8 per cent. preference shares also have improved. The Anglo-American Telegraph Company's shares have risen about 10s per share.

EXCHANGES.—Rates were firmer to-day.

BULLION.—12,000*l* in sovereigns have been received from Lisbon at the Bank to-day. The following is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week:—

Gold.—The demand for abroad has much diminished during the past week, and there have not been any withdrawals of bars from the Bank. The arrivals we mention below have, however, been taken for export, together with about 19,900*l* for Alexandria, and 68,500*l* for the Brazils: these amounts consisting of coin. The Bangalore has brought 6,740*l*, from Alexandria; the Persia has brought 17,500*l*, from New York; the City of Paris has brought 5,000*l*, from New York; the France has brought 21,900*l*, from New York; the Sir John Lawrence has brought 72,000*l*, from Sydney; the Essex has brought 111,000*l*, from Melbourne—total, 234,140*l*. The only vessel now known to be on the way from Australia is the Anglesey, with 211,000*l*.

Silver.—The Seine has taken 8,000*l* to the Brazils, and the Union has brought 14,600*l* Dore from New York; this last amount has been the only import during the week. Our market remains very quiet; the nearest quotation is 60⅜d per oz standard, with scarcely any bars offering.

Mexican dollars.—The Louisiana has arrived at St Nazaire with 240,000*l*, of which about 160,000*l* are on English account, and will reach here in a day or two. They have been sold at the last price of 58 $\frac{15}{16}$d per oz for refining purposes.

Exchange on India for banks' drafts at 60 days' sight is, on Calcutta and Madras, 1s 11⅛d, and on Bombay 1s 11¼d per rupee. Business is on a limited scale.

India Government Loan Notes have been more offered within the last few days, and prices have somewhat receded from our quotations of last week—the 4 per Cents. are 87¾ to 88¼; 5 per Cents., 103¾ to 104¼; and the 5½ per Cents., 108¾ to 109½.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std; ditto fine, 77s 9d to 77s 9½d per oz std; ditto, refinable, 78s per oz std; Spanish doubloons, 75s to 76s per oz, last price; South American doubloons, 73s 7d to 73s 9d per oz; United States gold coin, 76s 3d to 76s 4d per oz, last price. Silver—Bar Silver, 5s ⅜d per oz std, nearest, one here; ditto, containing 5 grains of gold, 5s ⅞d per oz std, last price; fine cake silver, 5s 5d per oz. Mexican dollars, 4s 10$\frac{15}{16}$d per oz, last price. Quicksilver, 6*l* 17s per bottle; discount, 3 per cent.

MISCELLANEOUS.—The dividends due on the Chilian 4½ per Cent. Loan on the 1st December are advertised for payment by Messrs Baring Brothers.

The numbers of 495 bonds, amounting to 104,800*l*, of the Turkish 6 per Cent. Loan of 1862, have been published. These bonds will be paid off at par on the 1st January.

At a meeting of the Greek bondholders, the Government proposal to create a new 5 per cent. stock to the amount of 1,000,000*l*, in the place of the debt created in 1824-5, was agreed to, "provided that certain revenues be hypothecated for the payment of the interest and the redemption of the debt, and that the sinking fund, at the expiration of five years, be augmented to the extent of 20,000*l* per annum."

At a meeting of the creditors of Messrs Louis Maggi and Co., ship chandlers of London and Liverpool, a composition of 5s in the pound was agreed to.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25f 15c per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight was, on the 8th inst., about 109¼ per cent. At this rate, there is no profit on the importation of gold from the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT

A few parcels of English wheat were disposed of at Mark lane to-day, for shipment to the continent. For home consumption, very little was doing at Monday's decline in the quotations. Foreign wheats moved off heavily at late rates. Barley and all other kinds of spring corn met a dull inquiry on former terms. The flour trade was heavy. This week's imports have amounted to 21,930 quarters of wheat; 1,910 barley; 34,470 oats; 200 maize; and 13,870 sacks of flour.

At Liverpool and Wakefield, this morning, the transactions in produce generally were much restricted. In prices, however, no quotable change took place.

In the Liverpool cotton market there was a fair average demand, at last week's rates up to Tuesday, when a much quieter tone set in, and prices have since receded ⅛d to ¼d per lb. The total sales for the week are 60,970 bales; of which the trade have taken 48,540 bales; speculators and exporters, 11,830 bales. The imports for the week are 18,721 bales; the actual exports 14,036 bales; and to-day's stock is estimated at 528,050 bales, showing a further decline of nearly 44,000 bales. Quotations for all descriptions have declined ⅛d to ¼d per lb since last Friday. To-day the market has been dull; prices close rather irregular, and the sales are 8,000 bales.

At Bombay, on the 9th instant, Dhollerah cotton was quoted at 158 rupees per candy. The shipments in the previous week had been 3,730 bales. The quotations for middling Upland cotton at New York on the 13th instant was 18½c per lb. A telegram from Hong Kong, dated the 21st October, states:—"Cotton goods advancing; stocks light; silk lower—20 taels in week." We have to report a very inactive market for all kinds of tea, at late quotations. Last week, duty was paid in London on 1,461,258lbs. The exports were 1,560,885 lbs.

The fruit market may be considered steady, yet prices have been with difficulty supported, owing to the large quantities brought forward.

About an average business has been passing in the sugar market, at full prices.

Several parcels of coffee have been withdrawn from public sale; nevertheless, no change of importance has taken place in prices. In rice, very few sales have been concluded.

The fourth and last series of colonial wool sales for the present year commenced on Thursday, when the following wool was offered:—2,499 bales Cape of Good Hope; 866 Sydney and Queensland; 424 New Zealand; 420 Port Philip; 28 Adelaide—total, 4,237 bales. The attendance both of home and foreign buyers was less than usual, and the bidding languid. Cape wool sold at an average reduction of 1½d per lb for fleece, scoured, and handwashed; faulty and heavy condition suffering most. The Australian was chiefly scoured; this also showed a decline of 1d to 1½d per lb, particularly some of the best scoured; the fleece, especially those of fair staple, washed and greasy, sold at about last sale's rates. Quantities arrived to date:—Sydney, 19,145 bales; Port Philip, 8,778; Van Dieman's Land, 742; Adelaide, 2,330; Swan River, 108; New Zealand, 7,525; Cape of Good Hope, 48,802—total, 87,430 bales.

Scotch pig iron has sold at 54s 3d cash. Linseed oil, on the spot, 36*l* 5s; English brown rape, 37*l* 10s. Tallow is steady:—Town, 42s 6d; Petersburg Y.C., on the spot, 43s; year, 43s; December, 43s; spring, 43s 6d; March, 44s to 44s 3d.

A report from New York, dated the 1st inst., says:—The dry goods trade presents less decided changes this week than last, both in business and prices. There has been a slight further decline in standard goods, and some considerable reduction in quotations of low grades of goods, to correspond with the decline in primer grades noticed last week. Woollens are very quiet, and the demand is chiefly for prime new styles of cloths, cassimeres, &c. Foreign goods are dull in sympathy with the state of the domestic market. The week opened with an easier condition of the banks, the legal tenders showing an increase of two millions, deposits an increase of about $800,000, with a slight decrease in the loans. This improvement has been followed by an easier condition of the loan market, the supply on call being quite liberal at 6 to 7 per cent., with exceptions at 5 per cent. Very choice paper passes at 7 to 7½ per cent.; but for average prime names the rate continues at 8 to 10 per cent. The following are the quotations for loans of various classes:—

	Per cent. per annum.	
Loans on call, stock securities	6	7
Do. bond and mortgage	...	7
Prime endorsed bills, 2 months	7	9
Do. do 3 and 4 months	9	12
First-class single names	11	12
Lower grades	15	25

THE COTTON TRADE.

LIVERPOOL—Nov. 14.

Cotton was in good demand at the commencement of the week, but since Tuesday the business has been comparatively limited, and the market closes with some decline from the quotations of last Thursday. For Sea Island an unusually active demand has prevailed, and the choice being materially diminished, prices have advanced fully 1d per lb. American continues in fair request, but has declined about ⅛d in the common, and ⅛d to ¼d in the better grades. New York advices to the 13th inst. quote middling Americans 18½ cents, costing to sell in Liverpool 8½d per sailing vessel, 8⅜d per steamer. In *Brazil*, a moderate amount of business has been done, at easier rates. Egyptian is in improved demand, but the recently landed cotton is freely offered at rather lower prices. East India has been freely offered, particularly the better qualities, and prices have receded in many instances ⅛d to ¼d per lb. Bengal, though in good demand, is partially ⅛d per lb lower.

In cotton "to arrive" some transactions have been reported, at prices rather below those current last week. The latest quotation is—for American, basis of middling, ship named, from Charleston 8d per lb.

The sales of the week amount to 60,370 bales, including 2,240 on speculation, and 9,590 declared for export, leaving 48,540 bales to the trade.

The sales to-day will, probably, amount to about 8,000 bales; the market without change.

The above figures show :—

	Bales.
A decrease of import compared with the same date last year of	316,120
An increase of quantity taken for consumption of	92,580
A decrease of actual export of	61,130
A decrease of stock of	180,670

In speculation, there is a decrease of 173,730 bales.

The imports this week have amounted to 18,721 bales. The actual exports are 14,036 bales.

LONDON—Nov. 15.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market opened with a fair demand, and steady business was transacted up to Tuesday last, since which day a quieter tone has prevailed, and quotations for most descriptions have given way ⅛d to ¼d per lb, as compared with last week's prices. Telegraphic advices from New York to the 13th November quote middling Uplands 18½ cents. Gold, 140¼.

NEW YORK—Nov. 1.

The receipts of cotton this week at all the ports, although considerably less than for the same period last year, when they amounted to 50,723 bales, still show an increase on last week, the total this week reaching 36,129 bales (against 32,962 bales last week, 25,075 bales the previous week, and 18,621 bales three weeks since), making the aggregate receipts since September 1, this year, 141,294 bales, against 160,982 bales for the same period in 1865-6. In the exports there is this week a large increase, the total reaching 15,156 bales, against 6,372 bales last week, and 3,898 bales the previous week. For the corresponding week of 1866, the shipments from all the ports amounted to 9,511 bales. The total foreign exports from the United States since September 1, 1867, now reach 35,052 bales, against 66,065 bales for the same period last year, and the stocks at all the ports are at present 115,978 bales, against 294,097 bales at the same time in 1866. Below we give our usual table of the movement of cotton at all the ports since September 1, showing at a glance the total receipts, exports, stocks, &c. :—

RECEIPTS and EXPORTS of COTTON (bales) since Sept. 1, and STOCKS at dates mentioned.

The buoyancy and activity noticed in our last report have not been continued this week. This check to increasing business and rising prices is the result more especially of the scarcity and high rates of freights and the decline in gold, but the increased receipts here and at the Southern ports, dull accounts from Liverpool, and lower prices in our market for cotton goods, have also had an unfavourable influence. Prices, however, have only declined 1 cent per lb in currency, while the gold price is about the same. Sales of the week foot up only 12,394 bales, of which 5,080 bales were taken by spinners, 4,032 bales for export, and 1,272 bales on speculation. At the close, the market is dull, and the following are the current quotations :—

	NEW YORK CLASSIFICATION. Upland.	Florida.	Mobile.	New Orleans and Texas.

MARKETS IN THE MANUFACTURING DISTRICTS.

We have no improvement to report in the demand for any description of manufactured goods, but prices, on the whole, have been fairly supported. There is still a brisk inquiry for steam coals, in anticipation of the wants of the Abyssinian expedition and the numerous transports attending it. The demand for home consumption is also active. The iron trade has ruled less firm, at about stationary quotations.

MANCHESTER, Nov. 14.—The firmer tone prevailing in this market at the date of our last was not of long continuance. Prices are again lower for all kinds of yarn and cloth, with a very limited business doing. The dulness is chiefly owing to the unfavourable news from our Eastern markets, and the large increase of receipts of cotton at the American ports ; the latter leading to the impression that cotton must decline further in value, and, of course, goods and yarns to follow more or less.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool—Most holders ask the same prices as they asked last week, but there are some who will accept a little less money for certain sorts, and generally the turn of prices may be said to be a shade in favour of the buyer. Yarns—The market continues much as it has been for a long time. Spinners have great difficulty in finding remunerative employment for their machinery. Pieces—The inquiry has not at all improved, and for all markets engagements are very cautiously entered into.

LEEDS.—As we have lately had to report, the demand has not been brisk for any particular class of goods, with the exception of tweeds, and the inquiries for this make have begun to fall off considerably. The plain cloth and coating trade has been quiet, and few parcels worthy of special notice have been transferred. The business done in heavy makes has been quiet. Prices are without change.

HUDDERSFIELD.—The market has been quiet. The yarn trade continues depressed, and little is doing in the shipping trade. There has not been much doing in the warehouses during the week; and, in consequence of the restriction of production, the local wool market is inactive.

NOTTINGHAM.—The demand for fine yarns is slow, but there is a moderate sale for coarser yarns, suitable for heavy lace goods and for hosiery. Prices remain without alteration, and sellers are glad to obtain orders at previous rates. Quotations for silk are about the same, but almost nominal. The lace trade continues depressed; plain nets are quoted at previous prices; quillings which had not been reduced in equal proportion are finding the same level.

BELFAST.—Flax—Generally speaking, a fair average supply appeared in the various markets during the past week; very little fine flax appears; coarse and medium qualities were in abundant supply, and in some instances, reduction in prices was established. Yarns—Although, in some instances, a moderate amount of business has been transacted on home account, still demand was very limited, and any purchases made were for immediate requirements. Linens, brown hand-loom—A fair demand exists for approved makes of drills; cambric handkerchiefs and light linens for bleaching are in very moderate request. Stocks show increase, and prices rule in favour of buyers. The business transacted in light linens for bleaching was not large.

ROCHDALE.—The manufacturers of flannel keep tolerably well employed, and, though for some time past the demand has been of a quiet order, stocks in the hands of makers are not more than usual at this period of the year. The local wool trade continues dull, but prices are firm, as are those of flannels and other goods.

CARDIFF.—Steam coal proprietors continue tolerably busy, and the business doing shows a considerable increase as compared with a few weeks ago. The coasting inquiry for house qualities is about the average by rail and sea, and the railways now compete to a slight extent for the West of England traffic. The home consumption is increasing. At the ironworks, employment keeps without change.

BIRMINGHAM.—The reports relative to the state of trade here are still of a discouraging character. The orders given out through the factors have been smaller than at any time since the commencement of the quarter. The gun trade is moderately good, and some of the edge-tool makers report a slight improvement, but these are exceptional cases.

WOLVERHAMPTON.—The iron trade is quieter. Hoops and sheets are in fair request, but for plates and bars orders are very scarce, and rails have for some time ceased to be an important article of production in South Staffordshire. Pig iron keeps firm, the market being strengthened by the diminished production. The hardware trades are, as a rule, dull, and in few branches is full time made.

GLASGOW.—There are sellers of iron at 54s 1½d cash, and buyers at 54s.

DUNDEE.—There is no change to notice in the general state of our trade since our last weekly report; the dulness continues as great as ever, and there is no sign of any immediate improvement taking place. Our flax market continues much as before; spinners restrict their purchases to the supply of present wants, and their requirements having been well supplied by the goods disposed of by auction, comparatively little business has been done privately, and the tendency of prices has been somewhat in favour of buyers. In the demand for tows there is little activity, and prices, although nominally unaltered, have still a tendency in favour of buyers. Jute is without improvement, although a better demand is looked for, in consequence of stocks in consumers hands wearing low. The yarn market continues much as before. Jute yarns are without animation, and prices are unaltered.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 29.—The flour market opened buoyant, and prices ruled in favour of the seller till yesterday, when there was a pause in the demand. Our revised quotations for the low and shipping grades of State and Western indicate an advance of 20 to 35 cents per barrel, the medium and high grades having been subject to small and unimportant fluctuation. The receipts have slightly increased, as usual at this period of the year, and, with a light home trade demand, a large portion of the supplies of medium and choice extras is going into store. Winter wheat extras are relatively cheaper than other kinds, notwithstanding the fact that it would be difficult to replace some brands made from choice white wheat at current figures; but, as the supply is comparatively small, the exigencies of consumption will sooner or later bring about a parity of prices. California flour has not varied in price, and the market has ruled quiet. Sales 41,000 barrels State and Western, including 2,000 barrels shipping extra State, for November delivery, within our range, and 2,000 sacks California, the market closing quiet. Southern flour is 10 to 25 cents higher, but quiet; sales 1,500 barrels, closing at $10.30 to $14.60 for inferior to choice extra. Rye flour is unchanged and rather dull; sales 600 barrels, at $7.25 to $9.25. Corn meal is more active; sales 1,500 barrels. City at $6.65 to $6.70, and 300 do brandywine on private terms. Buckwheat flour is dull at $4.20 to $4.30 per 100 lbs. Export of flour from 1st to 29th October, 137,701 barrels, against 70,513 barrels last year. The wheat market opened very strong on Saturday, prices of spring advancing 3 to 5 cents, under a brisk export demand; but on Monday it became weak and unsettled, followed by a decline, yesterday, nearly equal to the improvement of Saturday. The sales are 295,000 bushels, yesterday's transactions at $2.25 for No. 3 spring; $2.27 to $2.30 for No. 2 spring, the inside price for inferior; $2.35 for No. 1 spring; $3.5 for white Genesee; $2.70 for amber Tennesee; $3 for white Tennessee; $3.37 for amber Minnesota, and previously, but since our last, $2.25 (in bond) for Canada spring; $2.45 (in bond) for Canada "golden dew drop;" $3.20 for white Michigan; and $2.75 to $2.77½ for amber State. Rye is inactive and nominal; sales, previous to yesterday, 15,000 bushels Western at $1.67 to $1.68, which is hardly a fair expression of the market at the close. Corn has ruled in favour of the buyer throughout, closing 3 to 4 cents lower. The demand has been mainly for home use and on speculation; sales 310,000 bushels, closing at $1.40 to $1.41 for Western mixed, afloat and in store. Oats have advanced 2 to 3 cents, closing at 82 to 83 cents for Western, with sales of 350,000 bushels. Barley continues in limited demand.

STOCK OF GRAIN IN STORE.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Only moderate supplies of English wheat have been received fresh up to our market this week, coastwise and by land carriage; nevertheless, the demand has ruled very inactive, at a decline in the quotations of 1s per quarter. In foreign wheat—the

imports of which have been tolerably good—very little business has been doing, at 1s per quarter less money. The sale for both English and foreign barley has ruled heavy, at barely stationary prices. Malt has changed hands slowly, on rather easier terms. Oats have given way 6d to 1s per quarter, with a heavy inquiry. No quotable change has taken place in the value of either beans or peas. Sales, however, have progressed slowly. The flour trade has been in a sluggish state, and country marks have been offered on lower terms.

The provincial markets have been in a sluggish state for all kinds of produce, and prices have not been supported.

On the continent, the value of wheat is maintained, although the transactions for export have fallen off. Spring corn has sold slowly, on rather lower terms. In America—where the stocks of grain are on the increase—prices have slightly given way, although the shipments to Great Britain have considerably increased.

The Scotch markets have been fairly supplied with wheat, which has moved off slowly, on rather lower terms. Barley and all other articles have commanded very little attention.

In Ireland, produce generally has met a dull inquiry, and the quotations have not been supported. The shipments to England have been only moderate.

Mr George Dornbusch thus reports the state of the floating grain trade :—During the last se'nnight, 60 grain and seed-laden vessels have arrived at ports-of-call—viz, 43 wheat, 2 maize, 6 barley, 2 beans, 2 rye, 3 rapeseed, 1 oilcake, 1 lentils. The trade this week has varied in tone almost daily,—dulness and steadiness alternating, with prices rather tending downwards but closing with an improving tendency. Wheat—fine sorts being scarce, have maintained last week's prices; but to sell secondary sorts, 6d to 1s less money had to be taken. Maize has continued scarce, and held for last week's prices. Barley has met with a slow sale, at 6d to 1s decline. The demand for rye was quiet. Corn, shipping or shipped, and for spring shipment, was more sought after; the market closing firm. The reported sales are as follows :—Wheat, 9 arrived cargoes: Ghirka Taganrog, 62s to 63s 6d; Don Ghirka ditto, 62s to 62s 6d; New Coast Ghirka ditto superior, about 70s; Marianopoli, 70s; Berdianski, 70s, less 2 per cent.; Ghirka Odessa, 69s 6d per 492 lbs. On passage—3 cargoes: New Ghirka Nicolaieff, sup., 72s 6d, per steamer; Hard Azow, 64s 6d per 492 lbs, for Lisbon; Danubian, 61s per 480 lbs. Barley—2 arrived cargoes: Kustendje, 34s 9d and 35s 3d per 400 lbs. Rye on passage—3 cargoes: Galatz, 51s; Danubian, 51s 3d; Azow, 51s. Shipping or shipped: Azow, 51s; Salonica, 49s. To be shipped—April-May, '68 (O.S.): Azow, 51s per 480 lbs. Beans—2 arrived cargoes: Saide, 41s per 480 lbs. Linseed, on the spot, quiet, but a large business has been done for spring and summer shipment, as follows :—On passage: St Petersburg, 63s per 424 lbs, A.T., for English east coast. To be shipped (40,000 qrs): Black Sea or Azow, 60s to 60s 6d; Azow, 60s to 61s 6d, according to time of shipment, April-August, '68 (O.S.)—all per 424 lbs, A.T. Cotton-seed quiet. A cargo Egyptian, to be shipped in February, has been sold at 7*l* per ton, f.o.b.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues firm, but the extreme rates now demanded cause the buyers to curtail their operations, and a quiet tone now prevails. Brown sorts fully maintain the recent advance, and there are not many sellers thereat. Grainy sorts are not any dearer. The sales of British West India in three days were 828 casks, including Barbadoes by auction at 32s 6d to 36s 6d; crystalised Demerara, 37s 6d to 39s per cwt. There were 1,600 tons landed, and 5,220 tons delivered last week; leaving the stock at the close 22,350 tons less than at the same date in the previous season.

Mauritius.—Of 6,893 bags in the public sales, a fair proportion sold: brown, 29s to 32s 6d; soft yellow, 33s to 34s 6d; grainy and crystalised, 35s 6d to 37s 6d; soft grainy white, 39s 6d to 40s per cwt. Business has been done in brown and crystalised sorts by private contract.

Natal.—486 bags, by auction, sold at 30s to 35s.

Madras.—500 bags low grainy Jaggery have sold, at 27s 3d. 3,500 bags soft, at 27s. 766 bags Aska Madras, by auction, chiefly sold: fine grainy white, 41s to 42s 6d; soft brown and yellow, 32s 6d to 37s.

Manilla.—The sales, unclayed, reach 32,000 bags, at 31s to 31s 6d, with some good at 21s 9d. 3,000 bags unclayed have sold at 28s 9d.

Other Foreign.—552 casks 109 barrels Porto Rico, offered by auction, were held firmly, and chiefly bought in. Afterwards a portion sold, at 34s to 37s for low to very good grocery. 2,578 boxes Havana were taken in above the value, and since sold at 36s 9d for good greyish yellow. 2,800 boxes, privately, chiefly at 36s 6d to 37s 6d. 270 casks Surinam, 32s to 33s 6d per cwt.

Refined.—Since the latter end of last week, the refiners have been enabled to obtain better prices for dry goods; indeed, the advance from the late lowest point of the market is 1s to 2s per cwt. according to quality, but the demand is limited. Pieces have been in good demand.

RUM.—Common kinds are firm, and the reduced supply operates against business. Small sales have been made in Jamaica, on former terms.

COCOA.—851 bags Trinidad, offered by auction, partly sold on former terms, from 46s to 57s; fair mixed red, 67s to 70s 6d. There is a partial inquiry for other descriptions. A few lots of Grenada sold at 47s 6d to 49s 6d. 169 bags Bahia, at 46s to 49s 6d. 354 bags Guayaquil were bought in at 52s. 86 bags African sold at 48s to 50s per cwt.

TEA.—The market continues rather quiet. Fine grades of Congou support recent quotations. In other respects, no new feature can be noticed. The sales of India, comprising 2,776 packages, have passed with spirit, showing an advance of 2d to 3d per lb in Pekoes and Souchongs, both Assam Company's and other growths; and with further extreme prices for some peculiar fancy sorts.

COFFEE.—There has been a steady market, and full prices paid for plantation Ceylon, as well as East India descriptions. The good to fine qualities are still most in demand. With a continuance of large deliveries the stock is decreasing. It is, however, 17,950 tons, a quantity 3,000 tons above that of the previous season. 627 casks 822 barrels and bags plantation Ceylon, by auction, sold steadily at prices ranging from 70s to 76s for small to middling, up to 82s for superior. A few sales have been made in Native, by private contract, at 53s 6d to 54s 6d; and 805 bags, by auction, part sold: good bold, 62s; good ordinary, 53s 6d; 76 half-bales mixed greenish Mocha have sold at 89s 6d to 91s; 925 cases 34 barrels 2,605 bags East India, nearly all sold, including fine Mysore, at 90s to 96s; other sorts, pale to good, 70s to 87s; Native Mysore, &c., 60s to 63s 6d; 837 bags Costa Rica brought 57s to 60s; 2,045 bags Rio were chiefly taken in at 42s to 56s; 301 bags washed were bought in; 472 bags washed Santos sold at 68s to 69s 6d; 614 bags Guatemala, part sold, at 54s to 70s per cwt.

RICE.—The market is firmer. There has not been much business done privately. Cargo Bengal is less freely offered. 3,219 bags pinky Madras were bought in at 13s 3d to 13s 6d per cwt.

IMPORTS and DELIVERIES of RICE to Nov. 9, with STOCKS on hand.

SAGO.—363 bags small grain sold by auction, at 17s to 18s for middling to fine.

SAGO FLOUR.—Business has been done in Borneo, to arrive, at 17s 7½d per cwt.

SPICES.—57 cases brown nutmegs sold at previous rates; small to middling, 1s 2d to 1s 6d; fair, 2s to 2s 1d; bold, 4s. 11 cases 2 casks mace, part sold at 1s 7d to 2s 7d. White pepper is steady, and 836 bags Singapore chiefly sold at 5⅛d. 305 bags Penang at 5d. No alteration in black, and the market is rather quiet. 279 bags Singapore sold at 3⅞d. 1,907 bags Penang partly found buyers; common, 3d to 3⅛d. 60 barrels pimento sold at 2d to 2⅛d. Good quality has realised 2⅛d to 2¼d privately. 140 bags Zanzibar cloves sold at 3½d per lb. 590 cases Cochin ginger realised extreme rates, especially the better qualities, from 76s to 122s; ordinary to middling brought 46s to 70s. 287 barrels Jamaica, part sold, at 42s to 60s; 400 bags African partly found buyers, at 26s 6d per cwt.

SALTPETRE.—The market is dull. Some business has been done in Bengal privately, at a slight decline. The particulars do not transpire. A small parcel, refracting 2⅝, sold at 19s 3d cash.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 9, with STOCKS on hand.

	1867.	1866.	1865	1864.
Imports ...tons	8120	9630	8160	12560
Deliveries	10300	8750	9550	11630
Stock	8580	9000	6220	8100

SHELLAC.—A few small sales have been effected on previous terms.

DYESTUFFS.—Safflower is rather quiet, but held firmly. 60 bales Bengal, by auction, part sold, at 5*l* 7s 6d to 7*l* 2s 6d. Good was bought in at 8*l*. Cutch firm. The last quotation of good was 45s. Gambier has

been inactive, at 16s to 16s 3d. Fair Bengal turmeric sold at 21s per cwt.

LAC DYE.—240 chests, by auction, part sold, at 10½d to 1s 4¾d; ordinary, 7½d to 9½d per lb.

METALS.—The sales have been of moderate extent, and a quiet tone pervades the market. A few sales are reported in spelter, at easier rates, viz., 21*l* 15s to 21*l* 17s 6d for common plates. Tin steady, with business in Straits at 89*l* 10s to 90*l* cash. English and Welsh iron have been quiet. Scotch pig is weaker in price: mixed numbers, 54s 3d per ton.

HEMP.—Petersburg clean has advanced to 40*l*. There is an inquiry for Manilla by private contract, and the stock being much reduced, prices are tending upward.

JUTE.—The market is firm, and about 10s dearer. A few parcels have changed hands, partly for arrival. 4,246 bales, by auction, part sold at 17*l* 5s to 22*l* 10s per ton.

LINSEED.—The only feature to notice has been an extensive business in Black Sea to arrive, at prices ranging from 60s to 61s 6d per quarter, according to date of shipment.

OIL.—Common fish oils have been quiet, but there is an inquiry for Sperm at 112*l* per tun. Olive oils are still unsettled, with sellers at lower rates. Cocoanut has been dull. Ceylon, 52*l*. Cochin, 56*l*. Palm is inactive. Fine Lagos, 40*l* to 40*l* 10s. Linseed inactive, at 36*l* per ton on the spot, which is lower. Considerable sales have been made in English brown oil for future delivery, but the market is now quiet.

TURPENTINE firm. American Spirits, 27s 6d to 28s per cwt.

PETROLEUM.—There has been a large export demand. American refined is slightly dearer, viz., 1s 5d to 1s 5½d per gallon.

TALLOW.—Foreign is steady, and rather firmer for foreign. Petersburg of first quality, 43s to 43s 3d; to the end of the year about the same; January to March, 43s 9d; March only, 44s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, Nov. 11, 1867.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was steady to-day. Some parcels of Barbadoes, by auction, sold on former terms; also 1,273 bags Mauritius. Of 7,855 bags Penang, a large proportion sold, at 33s to 36s for low to fine soft yellow. 77 casks Cuba were bought in, at 36s to 38s. The week's business in West India amounts to 1,800 casks. A floating cargo of Bahia has sold, for the United Kingdom, at 21s 1½d.

COFFEE.—191 casks 735 barrels and bags plantation Ceylon went at former rates; also 241 bags native. The latter included some fine bold, at 66s 6d to 68s. 879 bags Singapore part sold, at 74s. A portion taken in at 80s.

RICE.—4,900 bags Bassein, offered by auction, were taken in at 12s 9d. 675 bags white Bengal sold at 15s 6d to 16s for good middling. 645 bags Ballam were taken in at 11s 6d to 12s. 1,383 bags Dacca were taken in at 13s 3d per cwt.

SALTPETRE.—2,750 bags low Madras have sold at 18s 6d per cwt.

GAMBIER declined to 16s per cwt in public sale.

SHELLAC was again lower: good orange selling at 82s 6d to 84s 6d.

OILS.—Sperm, by auction, sold at 108*l* 5s to 112*l* per tun.

TALLOW.—A firm market.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains firm. No alteration as respects prices. Dutch crushed is in more demand, at advanced rates, and 400 tons of first marks have been sold at 29s 4½d to 29s 7d, f.o.b., Holland.

DRY FRUIT.—A very fair trade has been done in fruit during the week. Valencias have moved off in large quantities at public sales. Prices feeble for lower sorts. Currants meet with few buyers. Figs continue firm.

COLONIAL WOOL.—The public sales opened yesterday; the biddings were not spirited; the attendance was not large. Prices for Cape wool ruled on the average 1½d per lb lower than last sales. Australian wool (excepting scoured, which was lower), sold at former rates.

FLAX.—Market quiet.

HEMP.—Market very dull at the quotations.

SILK.—No change in the market since our last circular.

TOBACCO.—The American market during the past week has not presented so much activity, but a fair business has been done at prices rather in favour of holders. Other growths have been freely dealt in.

LEATHER AND HIDES.—Since our last report, no change has occurred in the leather trade; the demand has somewhat slackened both in the week and at Leadenhall on Tuesday, but the supply was not large, and former prices were generally realised. Light English butts, light shoulders, light shaved hides, and the best calfskins continue the most in request.

METALS.—Nothing of moment has occurred during the week in metals. Copper is uninterruptedly dull of sale, and prices are feeble. Iron is again rather heavier. Tin is quiet, with prices of foreign steady, but English is weaker. Spelter is firm, and in steady demand. Lead is depressed, and tin plates the same.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	2
Yellow Russia	44	9
Melton stuff	33	6
Rough ditto	18	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 11.—The total imports of foreign stock into London last week amounted to 11,685 head. In the corresponding week last year, we received 15,822; in 1865, 18,365; in 1864, 16,173; in 1863, 9,401; in 1862, 8,208; in 1861, 5,837; and in 1860, 8,242 head.

Our market to-day was well supplied with foreign stock, in fair average condition. The demand ruled heavy, at slightly depressed currencies. The arrivals of beasts fresh up from our own grazing districts were moderately extensive, and mostly of good quality. The primest breeds were in fair request, at prices about equal to Monday last. Inferior breeds were very dull, at barely last week's currency. The top figure was 5s per 8 lbs. The supply of sheep was rather extensive, and in good saleable condition. For all breeds the demand ruled heavy, and the quotations gave way 2d per 8 lbs. The best Downs and half-breds changed hands at 4s 10d per 8 lbs. Calves—the show of which was by no means extensive—were a slow sale at late rates—viz., from 4s 4d to 5s 4d per 8 lbs. We have to notice a heavy sale for pigs, at barely stationary prices. The highest quotation was 4s 2d per 8 lbs. The foreign pigs arrived in good condition.

SUPPLIES ON SALE.

	Nov. 12, 1866.	Nov. 11, 1867.
Beasts	4,630	4,880
Sheep	18,290	21,360
Calves	120	28
Pigs	610	480

THURSDAY, Nov. 14.—We have a large supply of beasts and a very dull trade for them. A considerable number remain unsold, notwithstanding the reduction in price. There are also more sheep than required. Purchasers are very scarce, and prices are lower. Beasts at market, 1,580; sheep and lambs, 5,320; calves, 143; pigs, 280.

NEWGATE AND LEADENHALL.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d

Veal	3	4		4	2	Small pork	3	6		4	0

HOP MARKET.

BOROUGH, Friday, Nov. 15.—There has been very little inquiry for hops, the demand being confined to the immediate wants of consumers. Prices have a drooping tendency. Mid and East Kents, 8*l* 8s to 12*l*; Weald of Kents, 7*l* 10s to 9*l* 10s; Sussex, 7*l* 10s to 9*l*; Farnhams, 9*l* 10s to 12*l*; Bavarians, 7*l* to 9*l* 9s; Belgians, 5*l* 12s to 6*l* 10s; and yearlings, 6*l* 10s to 8*l* 8s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 15.—These markets have been well supplied with home-grown and foreign potatoes. Most descriptions have been in steady request, at the annexed rates:—English Regents, 120s to 160s; Flukes, 120s to 140s; Rocks, 90s to 120s; French, 85s to 90s.

COAL MARKET.

FRIDAY, Nov. 15.—The market for house coals to-day continued a dull business, and to effect sales a little further reduction in price had to be submitted to. Hartley's without alteration. Wallsend:—Haswell 21s 6d—Hetton 21s 6d—South Hetton 21s 3d—Tees 21s—Braddyll's Hetton 20s—Hetton Lyons 18s 6d—Russell's Hetton 19s—Hastings' Hartley 18s 6d—Portland West Hartley 17s 6d—East Wylam 15s 9d—Braucepeth Cannel 18s 6d. Ships at market, 23; sold, 11; gas contracts, &c., &c., 7—18; unsold, 5; ships at sea, 30.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 15.—There has been rather more doing here this week, holders having shown more disposition to meet the market, which appears to have induced buyers to purchase with greater confidence.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 15.—The market fairly attended. Wheat—fine qualities support late rates; inferior slightly in favour of buyers. Flour quiet, and nominally unchanged. Beans 1s per quarter dearer; Saidi, 43s to 43s 6d. Oats dull, and 2d per bushel lower. Oatmeal in moderate demand, at late rates. Indian corn in fair supply, at 6d per qr. decline; mixed, 49s to 49s 6d.

WAKEFIELD, Friday, Nov. 15.—Wheat trade firm, at last week's rates, with more disposition for business. Barley, beans, and oats support former quotations.

The Gazette.

TUESDAY, November 12.

BANKRUPTCIES ANNULLED.

J. Darling, Wickhill, veterinary surgeon—W. B. Wilson, Tottenham, clerk in the Principal Registry of Her Majesty's Court of Probate.

The Railway Monitor

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending 2nd of November, on 13,072 miles, to 756,233*l*, and for the corresponding week of last year, on 12,773 miles, to 727,636*l*, showing an increase of 332 miles and of 28,597*l*. The gross receipts on the 14 principal railways amounted, in the aggregate, on 9,423 miles, to 634,834*l*, and for the corresponding week of 1866, on 9,151 miles, to 610,113*l*, showing an increase of 272 miles and of 24,721*l*. The total receipts of the past week show a decrease of 8,455*l* as compared with those of the preceding week, ending the 26th of October.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Nov. 11.—In the share market to-day, the business has been of small extent, and, with the exception of a rise in Atlantic Telegraph, no material average alteration appears in the closing prices of mines, miscellaneous securities, and colonial and foreign railways, but British railways and banks were disposed to flatness, particularly the former, of which Great Northern (A stock) relapsed 1, South-Eastern ¼, and North-Western and Midland ½ each; and ditto (Birmingham and Derby), Bristol and Exeter, Glasgow and South-Western, and North-Eastern (York) declined 1 each, Caledonian 2¼, Great Eastern further 1½, Lancashire and Yorkshire further ¾, Brighton and Manchester, Sheffield, and Lincolnshire ¼ each, and Great Western and Metropolitan ¼ each. In foreign, Great Luxembourg were ¼ better, Lombardo-Venetian ⅛ lower, Illinois Central (sterling bonds) 2½ better, ditto (shares) ½ better, and Atlantic and Great Western (consolidated bonds and debentures) each ½ lower. Of the banks, Standard of British South Africa advanced 1, and Ottoman ¼; and Union of Ireland declined 2, London and County a further 1, and Imperial, London and Westminster, and Union of London ½ each. In miscellaneous, Atlantic Telegraph advanced 5½, ditto (8 per cent.) 2, Anglo-American a further ⅛, Electric and International and Peninsular and Oriental 1 each, Anglo-Mexican Mint ½, and Royal Mail Steam a further ½; and Peel River Land declined 1, and County Land and Viceroy of Egypt's Loan ½ each, Ceylon and Natal Land ¼ each, and Thames and Mersey Marine ⅛.

TUESDAY, Nov. 12.—In the share market to-day, a further general decline appears in the final quotations of British railways. Banks and miscellaneous securities were also rather weak, but the other descriptions show no material average change. Of the British lines, South-Western, South Devon, and North-Eastern (Berwick) declined 1 each, ditto (York) a further 1, Caledonian and Great Northern (A stock) further 1½ each, Lancashire and Yorkshire and Manchester, Sheffield, and Lincolnshire further ¾ each, North British ½, Bristol and Exeter, North-Western, and Midland a further ½ each, and Great Eastern, Great Western, South-Eastern, and Metropolitan a further ¼ each. In colonial, Melbourn and Hobson's Bay (5 per cent.) advanced ½, and Madras (4¾ and 4½ per cent.) and Great Western of Canada (6 per cent.) 1 each; and Grand Trunk of Canada (4th preference) declined ½, ditto (2d and 3d preference) and Atlantic and St Lawrence 1 each, and Demerara 2½. In foreign, Great Luxembourg relapsed ⅛, and Illinois Central (shares) further improved 1. In mines, Great South Tolgus improved ⅛, and East Caradon a further ¼; and Wheal Seton and West Chiverton receded 2½ and 1 respectively.

WEDNESDAY, Nov. 13.—In the share market to-day was the preparation for the settlement in the middle of the month, and the majority of the transactions were for the account. The movements in the final quotations again show a general downward tendency in British railways, as well as slight weakness in banks, but in other descriptions the tone was not depressed. Of the British lines, Great Northern (A stock) recovered ½; Caledonian declined further 2½; Lancashire and Yorkshire further 1½, Great Southern and Western (Ireland), North Staffordshire, and Metropolitan (extension) 1 each, ditto (original), North-Eastern (Berwick), and Midland a further ½ each, and Brighton ¼. In colonial, Bombay and Central India (F shares) improved ⅛, Oude and Rohilcund (stock) ¼, and East Indian and Great Indian Peninsula ½ each; Great Western of Canada (shares) declined ¼, and Grand Trunk of Canada (stock) ½. In foreign, Great Luxembourg recovered ⅛; Bahia and Erie shares (paid-up) improved ¼ each; and Atlantic and Great Western (debentures), at 24 to 25, were ½ lower. In mines, East Grenville declined ¼, and Cape Copper advanced ½.

THURSDAY, Nov. 14.—In the share market to-day, although the transactions were few, yet the general tone throughout was slightly improved. In British railways, Brighton, Midland and Caledonian recovered ½ each, Metropolitan 1⅛, and ditto (extension) and Lancashire and Yorkshire 1 each; Great Eastern and Great Western improved ¼ each, and South-Eastern, North-Western, and Manchester, Sheffield, and Lincolnshire ½ each; and South-Western, North-Eastern (Leeds and York), and Great North of Scotland declined 1 each, and Bristol and Exeter, and Glasgow and South-Western ½ each. In colonial, Great Southern of India (5 per cent.) advanced 5, and Great Indian Peninsula a further ¼. In foreign, Illinois Central (shares) advanced 5, Erie shares (paid up) relapsed ⅛; Atlantic and Great Western (debentures) are steady at 24 to 25; and West Flanders are now quoted ex dividend. In mines, Chiverton receded ½, and Frontino ⅛, and Don Pedro closed ⅛ better. In miscellaneous, Anglo-American Telegraph advanced a further ⅛, Electric and International and Atlantic 1 each, ditto (8 per cent.) 3, Peninsula and Oriental 2½, ditto (1855) 3½, ditto (1867) and London Financial ½ each, Land Securities ¼, and General Credit and Hudson's Bay ⅛ each; Viceroy of Egypt's Loan relapsed ½; and Upper Assam Tea receded ⅝.

FRIDAY, Nov. 15.—The railway market was flat, but the reduction in a few of the leading lines did not exceed ¼ to ½ per cent. American securities were dealt in to a fair extent.

The advantages of modern practice, with the security of an office whose resources have been tested by the experience of nearly a CENTURY AND A HALF.
A prospectus and table of bonus will be forwarded on application.
ROBERT P. STEELE, Secretary.

TRANSPARENT CANDLES. — IF
you only want something pretty to look at, without minding a little smoke and smell, and a little bending and running over if the room should happen to be rather warmer than usual, buy any of the very transparent low quality Paraffine Candles now sold freely everywhere at one shilling per pound; but if, along with beauty of appearance, you require steady brilliancy of light, and freedom from most of these little occasional mishaps, tell your dealer to supply you with "PRICE'S GOLD MEDAL PALMITINE CANDLES," which, though charged at a higher price per pound, are really cheaper when the difference of quality is taken into account. They are believed to be the very best substitute yet produced for real wax and spermaceti, now at such an extravagant price, and are being introduced in place of them in the West End Clubs and elsewhere where excellence of quality is studied as well as economy.

FIRST CLASS INVESTMENT, FOR
TRUSTEES and CAPITALISTS.—For Sale, extensive modern Freehold premises, occupying a good frontage and large area in Wood street, Cheapside, and in the heart of the Manchester trade; let on lease at the moderate rental of £200 a year, and to be sold to pay 5 per cent., thus offering a secure and profitable investment without risk or trouble.—Messrs DE BENHM, TEWSON, & FARMER, 80 Cheapside, E.C. (14,719.)

IN THE MATTER OF THE INDIAN
COMPANIES ACT, 1866, and of the BOMBAY CITY BANK ("Limited").

The Creditors of the above-named Company who have not yet sent in particulars of their claims, are hereby required, on or before the 14th day of December, 1867, to send their names and addresses and the particulars of their debts or claims to the undersigned, the liquidators of the said Company, at their office, 7 Hornby row, Bombay.

(Signed)
BURJORJEE RUSTOMJEE MODY,
ARDASEER EDULJEE CHINAY,
HORMUSJEE PESTOMJEE FRAMJEE,
Liquidators.

Bombay, 13th September, 1867.

NEW ZEALAND GOVERNMENT
DEBENTURE LOAN, £3,000,000, authorised by the Loan Act, 1863, and the Rate of Interest Act, 1864, of which £2,494,600 have already been issued.—The undersigned Crown Agents for the Colonies, acting under instructions received from the General Government of New Zealand, and with the concurrence of Her Majesty's Principal Secretary of State for the Colonies, now invite TENDERS for DEBENTURES representing £505,400—less £35,400 which have recently been exchanged for 8 per cent. Treasury Bills—making the Seventh instalment of the above Loan.

The Debentures, having 24 years to run, will be drawn in sums of £1,000, £500, £200, and £100 each, and bear interest at the rate of 6 per cent. per annum from the 15th December, 1867.

Both principal and interest will be made payable at the Offices of the Crown Agents for the Colonies in London; the former on the 15th June, 1891, and the latter by coupon on the 15th June and 15th December of each year.

The Loan is secured on the public revenues of the Colony, and, in addition thereto, provision has been made by an Act of the Colonial Legislature for the payment annually, to public trustees appointed in this country, of a sum equal to two per cent. on the total amount borrowed, for the formation of an accumulating fund for the final liquidation of the debt.

The money will be applied to the redemption of 8 per cent. Treasury Bills (or short-dated Debentures), falling due on the 31st December next, of which upwards of £400,000 are held in this country.

Sealed Tenders, made in accordance with the annexed form, will be received by the undersigned for the whole or any portion of the loan—not being less than £100—until One o'clock on Tuesday, the 19th instant, and the allotment will take place at that hour in the presence of such of the applicants as may desire to be present.

The Debentures will be allotted to the highest bidders, provided the rates offered are not below the minimum which will be placed in a sealed envelope on the table before the Tenders are opened.

Tenders at a price including a fraction of a Shilling, other than Sixpence, will not be preferentially accepted, and in the event of an equality of tenders beyond the amount to be issued, a pro-rata distribution on such tenders will be made.

Five per cent. on the nominal value of the debentures must be paid into the Bank of England as soon as the allotment is made, and the balance not later than the 14th December following.

The debenture bonds will be delivered in exchange for the Bank receipts for the money.

The following figures afford conclusive evidence of the steady progress and rapidly growing wealth of New Zealand, and, at the same time, they can hardly fail to convince capitalists that the colony possesses abundant resources to meet all its pecuniary obligations.

VALUE OF IMPORTS, EXPORTS, AND REVENUE, FOR THE LAST TEN YEARS.

Year.	Imports.	Exports.	Customs' Revenue.	Ordinary Revenue.
	£	£	£	£
1857–8.....	1,066,153	411,133	138,998	166,646
1858–9.....	1,345,387	502,794	160,830	193,734
1859–60 ...	1,549,682	570,219	178,117	220,736
1860–1.....	2,021,072	979,600	204,612	278,585

1866–7.....	5,864,609	5,254,129	864,668	1,108,362

During the same period the export of Gold amounted to £ 3,106,891, of which £2,605,789 were produced during the year ended 30th June last.

Forms of tender, and further information respecting the financial condition of the colony, may be had on application to the undersigned.

PENROSE G. JULYAN, } Crown Agents for
W. C. SARGEAUNT, } the Colonies.

London, 7th November, 1867.

FORM OF TENDER.

GENTLEMEN,

I hereby tender for the following portion of the above Loan, subject to the conditions contained in your advertisement of the 7th November, 1867, viz., Debentures to the extent of £——— for which I undertake to pay at the rate of £——— for every £100 in Debentures.

Name .....
Address .....
Date .....

To the Crown Agents for the Colonies,
Spring Gardens, London, S.W.

On Oct. 26 was published No. 10, Vol. III., of the

INVESTORS' MONTHLY MANUAL.
The Proprietors of the INVESTORS' MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly REPORTS of the Companies mentioned in the MANUAL.
They have also decided upon receiving for it a few pages of Advertisements; and, at the same time, beg to observe that it now commands a very extensive sale, and is a peculiarly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being a WORK OF CONSTANT REFERENCE FOR A WHOLE MONTH, and is used exclusively by all MONIED CLASSES.
Sold as a Supplement to the ECONOMIST, price 6d separately, 9d and 9d.
Advertisements for the next number must be sent on or before the 27th of November.
OFFICE, 340 STRAND.

MESSRS FREDERIC GILL AND CO., STOCK and SHARE DEALERS, St Clement's house, Clement's lane, London, E.C., Transact Business in all Mining Stocks and Shares at closest market nett prices, either for cash or account.
Having an extensive and growing connection, Messrs F. G. and Co. are generally able to deal in shares difficult of sale in the open market, and invite transactions from holders of this kind of stock. They are also in a position to advance money on approved securities. Telegraphic messages have prompt attention.

LENNON AND CAPE, STOCK AND
Share Brokers, 136, Pitt street, Sydney, New South Wales, Official brokers for the sale of New South Wales Public Securities, in the colony of New South Wales, as per annexed copy of new South Wales Government Gazette Notice, undertake the investment of capital in Government or Local Companies Debentures, and Joint Stock Companies, or on mortgages, upon advantageous terms; undertake the agency of parties connected with the colony, in collecting and remitting dividends, rents, &c.; and undertake every description of financial agency business.

BANKERS.
Commercial Banking Company of Sydney, and 32 Cornhill, London.
D. P. McEuen, Esq., 97 Cannon street.
Messrs Owen and Graham, 33 Great St Helen's.

(Copy.)
"The Treasury, New South Wales, Dec. 22, 1866.
"His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the appointment of Messrs Lennon and Cape as the official brokers for the sale of Public Securities in this colony, on account of the Government.
(Signed) GEOFFREY EAGAR."

ATLANTIC AND GREAT WESTERN RAILWAY.

MR TREVITHICK'S REPORT.

"The most complete examination ever made of a railway."

THE "RAILWAY NEWS" OF THIS DAY

contains the Complete Report and Estimates of Mr Trevithick on the Atlantic and Great Western Railway.

Office, 7 Whitefriars street, E.C.

CHEAPER BRUSSELS CARPETINGS, RUGS, AND DAMASKS.

There is a general fall in nearly everything in our Furnishing stock; the following are a few instances, and the reduction in the better classes of goods is in proportion:—

Brussels at	3	11	that were	4	11	a yard.
—	—	3 9½	—	4	6	—
Hearth Rugs at	3	11	that were	4	11	each.
—	—	5 11	—	7	3	—
—	—	8 9	—	9	9	—
—	—	14 6	—	18	0	—
Worsted Damasks at	2	4½	that were	3	0	a yard.
—	—	2 9½	—	3	3	—
—	—	3 3	—	3	9	—

CHARLES MEEKING AND CO.,
Brooke House, 141 and 142 Holborn hill,
Corner of Brooke street, near Furnival's inn.

GREAT FALL IN THE PRICES of SCOTCH WINCEYS and REAL FRENCH MERINOS.

SCOTCH WINCEYS, in all the best Colours and Mourning,

Now selling at	1	2½	a yard that were	1	6	a yard.
—	1	4½	—	1	8	—
—	1	9½	—	2	5	—

REAL FRENCH MERINOS, in fashionable Colours and Black,

Now selling at	1	8½	that were	2	0	a yard.
—	1	11½	—	2	6	—

And an admirable quality at 2s 3½d that was very much higher.

CHARLES MEEKING AND CO.,
45 Holborn Hill.

FOR FIRST-CLASS OFFICES

apply to the CITY OFFICES COMPANY (Limited). Office—Palmerston buildings, Old Broad street.

Applications for such packages should be made by the next of kin of the deceased, or by the legal representatives of such next of kin, to the Military Secretary, at this office.

In the event of any of the packages in question remaining unclaimed for the further period of six months from this date, they will be opened, the contents be disposed of by sale, and the amount realised be credited to the estate of the deceased.

T. T. PEARS, Major-General, Military Secretary.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD SEVEN PER CENT. LOAN, FOR £90,000 STERLING.

The half-yearly interest on the above Bonds, due on the 1st December, will be paid on that day and any succeeding day, at the counting house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of eleven and two o'clock. The Coupons must be left for examination two clear days before applying for payment.

London, Nov. 16, 1867.

ATLANTIC TELEGRAPH COMPANY.

—Extraordinary Meeting of Shareholders.—Notice is hereby given, that an Extraordinary General Meeting of the shareholders of the Atlantic Telegraph Company, will be held at the London Tavern, Bishopsgate street, within the City of London, at 12 o'clock at noon on Monday, the 2nd day of December, 1867, for the purpose of appointing a committee of the shareholders to assist and advise the Directors as to the best means for carrying out such measures as may be deemed necessary to improve the position of the Company, either by amalgamation with the Anglo-American Telegraph Company, or by raising the necessary capital to redeem the existing charge of £125,000 per annum on the revenue of the Atlantic Telegraph Company, and to aid the Board in the consideration of other important matters.

And notice is further given, that such resolutions will be proposed at the said meeting as may be deemed necessary for carrying out the objects thereby intended.

—By order,

GEO. SAWARD,
Secretary and General Superintendent.
12 St Helen's place, Bishopsgate street within,
London, 14th November, 1867.

THE DIRECTORS OF THE LONDON AND ST KATHARINE DOCKS COMPANY

hereby ANNOUNCE that they have decided on REDUCING the CHARGES on TEA as specified in the following Schedule, and that the reduction will be applied to all Tea warehoused in any of their Docks since the 1st September last, viz.:—

Billiter square, November, 1867.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principle bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vendor. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

KAMPTULICON FLOOR CLOTH.

The only Floor Covering fit for hard wear in Banks, Offices, Counting Houses, &c

GOUGH AND BOYCE,

ORIGINAL PATENTEES AND MANUFACTURERS.

As many complaints are made of KAMPTULICON manufactured by other houses, we beg to request attention to our address,

48 CANNON STREET.

TRELOAR'S DURABLE FLOOR COVERINGS

Comprise FINE COCOA-NUT MATTING, SUPERIOR KAMPTULICON, DECORATIVE FLOOR CLOTH, and a great variety of other fabrics.

T. TRELOAR, Manufacturer, 67 LUDGATE HILL.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET,

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

ECONOMIST.—EIGHT HALF-YEARLY Volumes for 1857, 8, 9, and 60, to be Sold—six numbers deficient.—A. Z., 18 Exeter street, Strand.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-Office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants. DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of Dicquemare, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This Dye is superior to all that have been employed hitherto; can be obtained of all purfumers and chemists.—Manufactory at Rouen, Rue St Nicholas 39; Wholesale, Messrs HOVENDEN and SONS, 5 Great Marlborough street, W., London

ELECTRICITY IS LIFE.—HEALTH RESTORED WITHOUT MEDICINE.—The PATENT CURATIVE and ELECTRIC BELT is the only guaranteed remedy for weakness, nervousness indigestion, feelings of decay, &c. Sent for one stamp by H. JAMES, Mechanical Electrician, Percy House, Bedford square, London.

N.B. Medicine alone can never cure.

ECONOMIST, FROM 1845 TO 1865 inclusive, for Sale. A few numbers deficient—A. Z., 18 Exeter street, Strand.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

36s WARD'S PALE SHERRY. 36s

Fit for a Gentleman's Table.

BOTTLES AND CASES INCLUDED.

Post Orders on Chapel street, S.W.

CHARLES WARD AND SON,

(Established upwards of a Century.)

MAYFAIR, W., LONDON.

36s WARD'S PALE SHERRY. 36s

KINAHAN'S LL WHISKY.—DUBLIN EXHIBITION, 1865.—This celebrated old Irish Whisky gained the Dublin Prize Medal. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, London, W. Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottled, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "ALLSOPP'S PALE ALE" being specially asked for.

HOLLOWAY'S PILLS.—Indigestion.—How much thought has been bestowed, and what ponderous volumes written, upon this plague of every household, which is safely and certainly dispensed by a course of this purifying, soothing, and tonic medicine, without fear of relapse. It acts directly on the stomach, liver, and bowels; more indirectly, though not less effectively, on the brain, nerves, vessels, and glands, and so commands order throughout the entire system. Dyspepsia can now no longer be the bugbear of the public, since Holloway's pills are fully competent to subdue the most chronic and distressing cases of impaired digestion, and to restore the miserable sufferer to health, strength, and cheerfulness.—Sold at Professor Holloway's establishment, 244 Strand, and by all medicine vendors throughout the civilised world.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters Manors, &c.—PEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

OVERLAND ROUTE via MARSEILLES.—Services Maritimes des Messageries Imperiales French Mail Steam Packets.

The 19th of every month, at 2 p.m., for Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore Batavia, Saigon, Hongkong, Shanghai, and Japan.

The 9th of every month for Messina, Alexandria, Aden, Seychelles, Réunion, Mauritius.

For passage, freight, and information, apply to B. W and H. Horne, 4 Moorgate street, London; G. H. Fletcher and Co., Liverpool; at the Offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

Passengers, eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

Offices, 71 Lombard street; 7 Regent circus, Piccadilly; 25 Leadenhall street; and St Katherine's Wharf.

SETTLEMENT POLICIES.

THE NORWICH UNION LIFE INSURANCE SOCIETY,

In order to meet one of the greatest wants of the day, issues policies in the nature of settlements, securing a certain and direct provision for the family of the insurer.

Among the upper classes, no prudent head of a family sanctions the marriage of his daughter, without some provision being made for her by way of settlement. When there is no actual property to vest in trustees, almost the only mode of accomplishing this object is by means of a policy of assurance on the intended husband's life, which must be assigned by deed or otherwise vested in trustees in consideration of the contemplated marriage. The practice is, however, not so common among the middle classes, owing to the difficulty of obtaining trustees and the expense of the necessary legal formalities. To meet these objections, the Directors of the Norwich Union Life Office issue policies by which the Society undertakes to pay the money insured direct to the objects of the trust. For example, if a man desires to settle a sum of (say) £1,000 upon his marriage, a policy for that amount will be issued by which, in consideration of the usual premiums to be paid during the settler's life, the Directors will, upon his death, set apart £1,000 out of the Society's assets, together with the accruing bonuses, and pay the income to the settler's widow during her life, and upon her death divide the principal among their children, either equally or in such other manner as the settler may direct; or, in default of children, pay it to his personal representatives or assigns. By such a policy the desired object may be attained at no greater expense than the payment of the premiums upon an ordinary life policy, and without any of the expenses necessarily attending the preparation and execution of a settlement, or troubling friends to become trustees.

To explain the subject more fully, the form of an ante-nuptial settlement is subjoined. It will be observed that the trusts may be varied to meet the wishes of the settler.

ANTE-NUPTIAL SETTLEMENTS.—FORM OF POLICY.

NORWICH UNION LIFE INSURANCE SOCIETY.

No. £ Annual Premium £

Whereas, A. B. of (in consideration of an intended marriage between himself and C. D., of) hath agreed with her to affect an insurance upon his own life with the Norwich Union Life Insurance Society in the sum of pounds, upon the terms and conditions hereinafter mentioned, and hath, by himself or his agent, made and signed a declaration in writing, setting forth his age and certain particulars relative to his health, and hath agreed to pay to the said Society the sum of pounds shillings and pence as a premium for the first year of such insurance, and to continue such payment yearly during the term of his life. Now know all men by these presents, that if the said A. B. shall die between the day of the date of this policy and the day of , one thousand eight hundred and , inclusive, or in the event of his living beyond the last-mentioned day, if he shall pay to the said Society the sum of pounds shillings and pence, on or before the day of in every subsequent year of the said term, the Directors for the time being of the said Society shall, at the expiration of three calendar months after satisfactory proof of his death, set apart or stand possessed of the sum of pounds, and of such further sum or sums as shall at any time or times hereafter be appropriated under the regulations of the said Society as a bonus upon this insurance upon the trusts following (that is to say), upon trusts to pay the income thereof unto the said intended wife of the said A. B. during her life (in case she shall become his widow), and from and after the death of the survivor of them, upon trust for such of their children as shall attain the age of 21 years or be previously married, in such shares and proportions as their said parents or the survivor of them shall, by any writing under their, his, or her hands or hand, registered in the books of the said Society, direct or appoint, and in default of such appointment, and so far as any such appointment shall not extend, upon trust for such children in equal shares; and in case there shall be no such child, then (subject to the life interest hereinbefore given unto the said intended wife in case she shall become the widow of the said A. B.), upon trust for his executors, administrators, and assigns, provided always that the said Society, or the Directors thereof, shall not be under any obligation to require or compel payment of the said annual premiums, and that in the event of the non-payment of the said annual premium at any time after three annual premiums shall have been paid, this policy shall not become wholly void, but shall remain in force for such a reduced amount without the payment of any further premium as in the opinion of the actuary for the time being of the said Society shall be the just equivalent of the value of the policy on the day at which the premium ought to have been paid. Provided, nevertheless, that within twelve months from such day the policy be left at the office for such valuation to be made and for an indorsement stating such reduced amount to be made thereon, and signed by three of the said Directors, and thereafter such reduced sum shall be subject to the like trusts as are hereinbefore declared concerning the amount originally insured hereby. Provided also that in the event of the reduction of the sum assured in manner hereinbefore mentioned, if such reduced sum and the bonuses thereon shall not exceed one-third of the sum originally insured hereby, with the bonus additions which would have been made thereto, it shall be lawful for the said Directors to pay the same to the said widow of the said A. B., for her sole use. Provided also that the statutory declaration of the said intended wife or of any of her said children or of any legal personal representative of the said A. B. shall in favour of the said Society be conclusive evidence of the truth of any statement therein contained as to the family of the said parties, and every payment made in accordance with such statement and the trusts hereinbefore declared shall effectually discharge the said Society, but without prejudice to the rights of any person claiming hereunder against any person or persons receiving any such payment. Provided also that, upon the sum assured becoming payable, it shall be lawful for the Directors of the said Society to invest the amount assured by this or any substituted policy in Government securities in the names of any four of their trustees, or to appropriate in respect thereof a competent share of such securities out of the funds of the said Society according to the market price of the day, or with the consent of the said intended wife to retain the amount assured in their own possession, at interest at such rate and for such time as may be agreed upon between the said intended wife and the Directors of the said Society; and pay or apply the amount so invested, appropriated, or retained, and the dividends and interest thereof, upon the trusts hereinbefore declared concerning the amount assured hereby. Provided always that this policy shall be void in any or either of the cases mentioned on the back hereof (these will be the same conditions as on ordinary policies), and the money paid on account of this insurance shall be forfeited to the said Society.

In witness whereof we, the undersigned, being three of the Directors of the said Society, have hereunto set our hands and seals this day of———, 18—.

POST-NUPTIAL SETTLEMENTS.

In like manner, a settlement after marriage may be made, provided the transaction is bonâ fide.

There is no reason why a man in solvent circumstances should not at any time make a provision for his family suitable to his station, which shall be irrevocably secured to them, in spite of his early death, and notwithstanding any subsequent misfortune which may befall him.

The persons for whose benefit such a settlement policy may be effected may be either the wife and children of the insurer, or any other persons for whom he may desire to provide.

Should the insurer, at any period after the expiration of the third year, be unable to continue the payment of his premiums, he will be entitled to bring the policy to the office, and have an indorsement placed upon it, reducing the sum assured to an amount equivalent in reversion to the then value of the policy, at which amount it will thenceforward stand, and no further premiums will be payable. This privilege will apply equally to both classes of insurance.

NORWICH UNION LIFE INSURANCE SOCIETY.

A MUTUAL ASSOCIATION. INSTITUTED 1808.

PRESIDENT—THOMAS BEEVOR, Esq. | SECRETARY—Sir SAMUEL BIGNOLD. | ACTUARY—C. J. BUNYON, Esq., M.A. | SOLICITOR—E. FIELD, Esq.

INVESTED CAPITAL, £2,400,000.

This Society was established in 1808, and is one of the few purely mutual insurance offices. It has issued more than 36,000 life policies, and has paid to the representatives of more than 8,000 deceased members upwards of 7,000,000 sterling. These sums are exclusive of the policies effected by the Amicable Society, which ancient corporation, established by Royal Charter in the reign of Queen Anne, was in 1866 merged by Act of Parliament in the Norwich Union. The amount at present insured exceeds £6,500,000, and the accumulated capital, £2,400,000, the whole of which is securely invested upon first-class securities. The income of the Society, exclusive of the receipts for annuity business, now exceeds £280,000.

There is no proprietary to divide with the assured the profits of this Institution.

Thus, in the year 1866, a sum of £165,954 was paid to the representatives of deceased insurers, and £38,346 in bonuses thereon, an addition exceeding twenty-three per cent. upon the sums assured upon the total amount of claims paid by the Society.

Prospectuses may be had on application at the offices, 50 Fleet street, London, and Surrey street, Norwich.

THE MERSEY DOCKS AND
HARBOUR BOARD hereby give notice, that they are willing to receive Loans of Money on the security of their bonds, at the rate of Four Pounds Five Shillings per centum per annum interest, for periods of Three or Five Years, and Four Pounds Seven Shillings and Sixpence per centum per annum for Seven Years and upwards.
Interest Warrants for the whole term, payable half-yearly at the bankers of the Board in Liverpool, or in London, will be issued with each bond.
Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.
Dock office, Liverpool, Oct. 31, 1867.

CEYLON GOVERNMENT SIX PER
CENT. DEBENTURE LOAN, £1,000,000, authorised by ordinance No. 19 of 1862, and subsequently reduced to £700,000 by ordinance No. 7 of 1864, passed by the Governor with the advice and consent of the Legislative Council of Ceylon, for the construction of a Railway from Colombo to Kandy.
Her Majesty's Principal Secretary of State for the Colonies having directed the undersigned to negotiate, on behalf of the Government of Ceylon, the loan authorised by the ordinance above cited. Notice is hereby given, that they will be prepared to receive tenders for the final instalment thereof, amounting to £100,000, until 10 p.m. on Saturday, the 30th instant.
The debentures will be issued in sums of £500, £300, £200, and £100 each, and bear interest at the rate of 6 per cent. per annum from the 15th November, 1867.
The principal will be repaid in sixteen years from the same date by an accumulating sinking fund of ample amount, to be formed under the control of trustees selected by the Secretary of State for the Colonies, or if he so direct, by the Governor of Ceylon for the time being.
To provide the sinking fund and to pay the interest as it falls due the export duty on coffee, amounting to about £50,000 a year, and the net earnings of the railway are specially and exclusively hypothecated, and should the sums received annually from both these sources fall short of 10 per cent. of the total railway debenture debt of the colony as it shall stand on the 1st January, 1868, then the difference to make up such 10 per cent. is to be paid out of the general revenue, upon which the principal and interest of this loan are further secured concurrently with the other liabilities of the Colony.
Both principal and interest are made payable at the offices of the Crown Agents for the Colonies in London; the former on the 15th November, 1883, and the latter half-yearly on the 15th May and 15th November of each year.
Sealed tenders, made in accordance with the annexed form, will be received by the undersigned for the whole or any portion of the loan—not being less than £100—until One o'clock on Saturday, the 30th instant, and the allotment will take place at that hour in the presence of such of the applicants as may desire to be present.
The debentures will be allotted to the highest bidders, provided the rates offered are not below the minimum which will be placed in a sealed envelope on the table before the tenders are opened.
Tenders at a price including a fraction of a shilling, other than sixpence will not be preferentially accepted, and in the event of an equality of tenders, beyond the amount to be issued, a pro-rata distribution on such tenders will be made.
Five per cent. on the nominal value of the debentures must be paid into the Bank of England as soon as the allotment is made, and the balance, not later than the 10th December following.
The debenture bonds will be delivered in exchange for the bank receipts for the money.
The railway for which this money is required, and which it will fully complete and stock, has already been opened for traffic throughout, with results far beyond the expectations of the most sanguine.
The general revenue of the colony is in an equally satisfactory condition, and has for many years past been considerably in excess of the general expenditure, and out of the surplus upwards of a million sterling has been contributed towards the construction of the railway.
Full particulars respecting the cost and traffic of the railway, and the general financial condition of the Colony, together with forms of tender, may be had on and after Tuesday next, at the offices of the undersigned.
PENROSE G. JULYAN, } Crown Agents for
W. C. SARGEAUNT, } the Colonies.
London, 23rd November, 1867.

FORM OF TENDER.

CEYLON LOAN.
Gentlemen,—I hereby tender for the following portion of the above Loan, subject to the conditions contained in your advertisement of the 23rd November, 1867, viz., debentures to the extent of £———, for which I undertake to pay at the rate of £——— for every £100 in debentures.
Name .....

To the Crown Agents for the Colonies,
Spring gardens, London, S.W.

On Nov. 30 will be published No. 11, Vol. III., of the
INVESTORS' MONTHLY MANUAL.
The Proprietors of the INVESTORS' MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly REPORTS of the Companies mentioned in the MANUAL.
They have also decided upon receiving for it a few pages of Advertisements; and, at the same time, beg to observe that it now commands a very extensive sale, and is a peculiarly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being a WORK OF CONSTANT REFERENCE FOR A WHOLE MONTH, and is used exclusively by all MONIED CLASSES.
Sold as a Supplement to the ECONOMIST, price 6d separately, 8d and 9d.
Advertisements for the next number must be sent on or before the 27th of November.
OFFICE, 340 STRAND.

FOR FIRST-CLASS OFFICES
apply to the CITY OFFICES COMPANY (Limited). Office—Palmerston buildings, Old Broad street.

MILNERS' STRONG HOLDFAST
AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS, with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other robberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (qualit considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

"3. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

"4. Blockades, in order to be binding, must be effective, that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

"The Governments of the undersigned Plenipotentiaries engage to bring the present Declaration to the knowledge of the States which have not taken part in the Congress of Paris, and to invite them to accede to it.

"Convinced that the maxims which they now proclaim cannot but be received with gratitude by the whole world, the undersigned Plenipotentiaries doubt not that the efforts of their Governments to obtain the general adoption thereof will be crowned with full success.

"The present Declaration is not and shall not be binding, except between those Powers who have acceded, or shall accede, to it.

"Done at Paris, the 16th April, 1856."

The Americans, as will be remembered by every one, refused to concur in these resolutions. How far, then, are they binding upon us?

It has (we hear) been decided to adhere strictly to them, as far as respects the neutral nations who are parties to the Declaration of Paris; but no further. Thus, if a French ship is carrying American corn to England or to any other part of the world, we shall not interfere with her; we shall observe the same rule which we laid down five years ago, and shall seek not to infringe on or deviate from it. But we shall not hold ourselves bound to abstain, in the event of an American war, from the use of privateers. This clause of the Declaration we do not consider to be binding upon us, although the others are.

The reasons of the distinction are just and obvious. The only persons who can complain of the infraction of this treaty or of any other are the contracting parties. The Americans were invited to participate in the advantages of the Declaration of Paris, but for reasons of their own they declined. *As far as they are concerned*, therefore, the resolutions then agreed to are waste paper. *They* cannot complain if we issue privateers,—*they* could not complain if we arrested their goods in neutral ships. But the terms of the Declaration, though restricting the parties to be benefited thereby, do not in any way limit the sort of war to which they are to have reference. They are to be applicable to all wars. We are to have the benefit of them as against France, no matter with what nation France may quarrel, and similarly they are to have the advantage in every war of ours. The Americans, it is true, are not parties to the treaty; but this is immaterial. It is not said that these resolutions shall only be binding in *wars between* the parties who have concurred in them, but that they shall only be binding *between* those parties. The contract includes all cases, though it is confined to a few nations.

This is not only the actual decision and the best law, but likewise the good sense. In the Russian war, before these resolutions were agreed to or thought of, we relinquished nominally for the moment, but really for ever, the right to confiscate enemies' goods in neutral ships. From a mistaken policy we had for years maintained that anomalous and barbarous right, despite the remonstrances of other nations, and in opposition to the good sense of the whole world. As soon as we once relinquished that right, it was practically at an end for ever. We only abandoned it because neutral commerce is now so vast and so enormous that we could no longer enforce it. As soon as there were many *shipping* nations, this arbitrary claim, which rested on the supremacy at sea of one or two, of necessity came to an end.

It is true that the Americans might, if they chose, seize our goods on board French ships, but we rather think they will not, and we are quite sure that if they do it will be much the worse for them. Neutral nations will compel them to observe the modern rules of maritime warfare, and it is not likely they will risk a departure from them. The employment of privateers injures no one but the Americans, and to them we owe no duty and have contracted no obligation.

The English nation is most anxious to do what is right, and to do no more, and the English Government is not less anxious. We mean to uphold the honour of England quietly and firmly, at whatever cost, and through whatever peril. But we would not even appear to forge a quarrel upon the United States at a time of weakness and rebellion. We would combine tenacity of resolve with suavity of manner. Even now it is said that Lord Lyons is directed to impart the decisive and unfaltering instructions which have been sent him as mildly and peacefully as possible. He is to tell them at first to Mr Seward informally, and to allow an interval, though of course only a brief one, to elapse before their final and official public communication. We shall demand our rights very firmly, but we shall demand them also very quietly.

NOBLE DIRECTORS AND THE DEPOSIT BANKS.

It is now nearly four years since we called attention to the want of self-respect evinced by the commercial classes in the unwholesome preference which they evince for aristocratic names. On the 19th December, 1857, we wrote as follows:—"The commercial classes of England, as a whole, have "never yet learned to respect themselves. They are peri-"odically angry with the Government for employing in the "organisation of large and complex transactions 'red-tape "'men' who 'have no head' for such matters, when a large "class of our community, well accustomed to organise "similar affairs upon the largest scale, are at their disposal; "but it is essential for these administrative reformers to re-"form their own class before they can effect any such change "as this in the administration of national affairs.....There "are plenty of valuable and respectable appointments already "in the hands of the commercial classes, which men edu-"cated in business are qualified to fill; and yet only see "how they give them away. Only too often they bestow "them on mere aristocratic or high-sounding *names*—on "men who can supply no one *desideratum* of a large business "undertaking,—men who never had personal experience of "a single function essential to commercial prosperity except "consumption, and who not unnaturally take a consumer's "view of the large capitals that suddenly begin to flow through "their hands." The four years that have elapsed since these words were written have not impaired, we fear, the force of these remarks. Certainly the history of the Deposit Bank's affairs illustrates them with even greater force than the failure of the London and Eastern Bank which was the first occasion of them. The Bank of Deposit appears to have had two titled Chairmen in succession who understood little or nothing of the business which they had to transact, and one of whom does not even seem to have had any wish to understand,—and two titled Trustees who were lent money by the Company with which to buy their shares in it, having their dividends set off half-yearly against the interest due from them on the loan. The mode in which these gentlemen were secured as Directors and Trustees is carefully explained by Lord Keane, who was a Director as early as December, 1852, Chairman ever since May, 1857, and never had, and apparently never aspired to have, any intelligent insight into its affairs. "He was the holder," he tells us, "of 500*l* capital stock in the Company; he had not, however, paid any money, but had borrowed the amount from the Company. Similar arrangements had been made with others of the Directors." Further, let us hear how the noble Trustees were persuaded to lend their names to the Company, Lord Keane being still our witness:—"On the 27th of October, 1853, the Marquis of Abercorn was elected a Trustee of the Company, and the sum of 500*l* capital stock of the Company was allotted to his Lordship. Similar arrangements appeared to have been made as to this stock and the payment of the dividends as had been made with the Directors, but he did not know anything about it beyond what appeared in the books of the Company. Similar entries occurred in the books on the election of Lord Templemore as a Trustee, but he did not know anything further as to his election. The names of the Marquis of Abercorn and Lord Templemore were published as Trustees of the Society."

Our readers well know what is expected from the Chairman of the Board of Directors of a Joint Stock Company, and the kind of confidence which is very blindly reposed by the public in his surveillance. Lord Keane justified that confidence simply by unintelligent attendance at the Board, and by nothing further at all. Mr Morrison managed, by Lord Keane's own confession, as completely as

it was the best thing Lord Keane could have done under the circumstances to leave everything to Mr Morrison. He at least understood what he was about, which the noble Chairman did not. Had Mr Morrison been trustworthy, Lord Keane's interference would have been mischievous. In the opposite alternative, his interference would have been useless. He *could* only trust to Mr Morrison,—but did he consider how large a portion of the public were most foolishly it may be, but still sincerely, doing business with the Bank on the strength of his respectable name? Let us hear a few of his answers with respect to the influence exerted by him in the Bank's affairs. "On the 30th and 31st of March, 1857, he attended the deputation to the Imperial Company of Paris. The proceedings at the Board meeting were conducted in French between Mr Potter, on behalf of the English Directors, and the members of the French Board. *The English Directors did not understand what was said*, and no record of the proceedings was kept." "*He made no inquiries himself* before agreeing to any loans that were proposed to be made to the Company." "In December, 1860, the Company's balance at the bankers' was 5,470*l*, and they then agreed to pay to the State office on account of shares 12,500*l*. *He could not account* for the payment of this large sum of money without there being sufficient balances at the bankers'. The matter was left entirely to Mr Morrison." "He did not know whether any such deed had been executed. He executed any deeds that were presented to him for execution, without inquiring into their nature or object, relying upon the officers of the Company that he was doing what was right."

Such is Lord Keane's knowledge of the affairs of the Bank of which he was Chairman. The first answer, indeed, refers to a period about a month before his election as Chairman, but it is impossible to do him injustice in the matter since every answer he gives is of the same sort. He understood nothing from beginning to end. He had perfect confidence in Mr Morrison. He did what Mr Morrison told him. He did not comprehend the negotiation with the Imperial Company of Paris; he did not comprehend the relations with the State Fire Insurance Company; he did not understand the relations with the Livorno Bank; he did not understand the relations with the Defender Fire Insurance Company; "could give no information respecting the transactions." In short, the Chairman understood little or nothing, but that he was entitled to a salary for attending and lending his name to the Company. And he was the nominal head of it for the last four years.

His predecessor in the chair, Lord George Paget, was perhaps not quite so much of a cypher. He at least had some vague impression that he had responsibilities in connection with it, and resigned because an agreement had been entered into with the Imperial Company of Paris during his absence in the Crimea which would put the control over the affairs of the Bank fairly beyond his power. But notwithstanding the energy of Lord George's aspiration in this respect, we cannot accuse him of knowing really much more than Lord Keane. He does not profess to have known whether certain loans were advanced to the Directors with or without security. He agreed to the declaration of a dividend of 5 per cent. without even seeing a balance-sheet. "They passed "the resolution on Mr Morrison's representations," he says; and, generally, we may say that their noble Chairman was quite innocent of any responsibility for the Manager's acts.

Now, in this particular case we can scarcely accuse the shareholders of want of self-respect in looking out for titled Directors. The number of shareholders, we are told, was very little larger than the Board of Directors,—in fact, the whole concern *was* the Board of Directors. But it was the clear knowledge on the part of designing men that titled names attract public custom, which induced the applications to men of such distinguished business talents as Lord Keane and Lord George Paget. Had not titles a certain fascination for the commercial world, they would not be so largely sought for. Now, we do not hesitate to say that it ought to be thought a *primâ facie* discredit instead of credit to a Company to have titled names in the directory, unless they are men who have made themselves a business repute. The [illegible] Did they honestly canvass the list of names in any Joint Stock concern with a single view to their business significance, the appearance of empty titles unassociated with established reputations for business would be even more disreputable, even more damaging to a Company, than the appearance of names of noted bankrupts. The latter have at least a certain business experience which renders them able to ask the right questions, and to know where it is that fraud or mismanagement is probable. A mere Peer has nothing like so much knowledge, and there are very few bankrupts indeed who would not have been much more useful to a Joint Stock Company than Lord G. Paget and Lord Keane. Therefore we say that if the public would secure themselves against such gross incompetence in future, they should learn to estimate titles aright, and to attach definite discredit to any concern which boasts titled names, merely as such, among the Directors. Directors must have an experience to enable them to direct; and the experience of men of rank *as such* is usually of a kind to disqualify them in a very remarkable manner for understanding, much less directing, a Bank.

THE EXACT LAW OF THE TRENT CASE.

WAS SHE LIABLE TO CONDEMNATION?

(FROM A CORRESPONDENT.)

ALTHOUGH the seizure of the four passengers on board the Trent has already undergone a great deal of discussion, both in England and France, there seems, at least to a legal mind, such a want of clearness and precision in the opinions that have been expressed—so much indistinctness as to the exact ground on which the case of the British ship ought to be rested—that a few words as to the exact legal bearings of the case may not be out of place, as preparatory to the perusal of the elaborate arguments on the American side, which will doubtless reach this country in a few days.

The act of the Captain of the San Jacinto—as was said from the very commencement—naturally raises two questions:—

First. Had the Captain of the American frigate a right to take the four passengers out of the Trent by force on the high seas, or, in other words, ought he not, in case he had reasonable ground to suspect that the Trent had committed a breach of neutrality, to have taken the ship into an American port, in order that the question might be decided by a properly constituted Prize Court?

Secondly. Supposing the Trent had been so taken into an American port,—was the carrying of these four passengers such an act as rendered her liable to condemnation in a Prize Court deciding on the well-established principles of international law?

The first question is almost too plain for discussion. The Trent is accused of having committed a breach of her duty as a neutral ship which subjected her to capture and condemnation; and it is said that, instead of complaining, her owners ought to be thankful for having been let off so easily as they were.

But who is to determine whether the accusation against the Trent is well founded or not? Certainly not the Captain of the San Jacinto. It is a univeral principle of international law, that the validity of maritime captures is to be determined in the Prize Court of the captor's country; and that for that purpose the captor must bring his prize at the earliest possible moment within the jurisdiction of a Prize Court. It will suffice to cite one authority on this subject, but that shall be a judgment of the Supreme Court of the United States, in which the rule and the reason of it are thus stated:—

As a general rule, it is the duty of the captor to bring [his prize] within the jurisdiction of a Prize Court of the nation to which he belongs, and to institute proceedings to have it condemned. This is required by the Act of Congress in cases of capture by ships of war of the United States, and this Act merely enforces the performance of a duty imposed upon the captor by the law of nations, which, in all civilised countries, *secures to the captured a trial in a Court of competent jurisdiction*, before he can finally be deprived of his property. But there are cases where, from existing circumstances, the captor may be excused from the performance of this duty, and may sell or otherwise dispose of the property before condemnation. And where the commander of a national ship cannot, without weakening inconveniently the force under his command, spare a sufficient prize-crew to man the captured vessel, or where the orders of his Government prohibit him from doing so, he may

lawfully sell or otherwise dispose of the captured property in a foreign country, and may afterwards proceed to adjudication in a Court of the United States. (Jackson *v.* Montgomery, 13 Howard's Reports, 515.)

The Court in this case lays down the rule, and states also the occasional exception from it. It is clear that the present case is not within the exception, and it is equally clear that the act of Captain Wilkes was a direct violation of the rule.

This point is, therefore, not a mere question of form or a "quibble," as some persons have hastily called it, but, on the contrary, it involves one of the very first principles of justice,—namely, that the owners of the captured property have a right to be heard in a competent Court before they are deprived of their property, or in case they have been injured by having their ship stopped and detained on the high seas.

It is said that the British Government have rested their demand for reparation exclusively on this point. If so, they have acted most correctly, for a Government, like a Court of Law, can only deal with the actual facts that have occurred, and cannot engage in a speculative discussion as to what would have been the result in case Captain Wilkes had brought the Trent before a Prize Court in the regular manner.

But though the British Government may very properly decline to discuss with the American Cabinet a mere speculative question, it behoves the public prints of England not to shrink from discussing with those whom I hope I may still call their American friends, the second question involved in the seizure of the four passengers.

Supposing, then, the Trent to have been carried into an American port and that proceedings were taken against her in a Prize Court,—would the Court have been justified in condemning her?

The charge against the Trent is, that by carrying these four passengers she has committed a breach of her duty as a neutral ship—that, in fact, she has thereby aided and abetted the enemy.

If so, not only had Captain Wilkes a perfect right to visit and search her, but she was undoubtedly liable to be captured and condemned according to the acknowledged principles of the law of nations.

Now the guilt of the Trent depends on the character of the ship, the objects of her voyage and her destination, and the *status* of the persons who were seized on board of her.

Let it be at once admitted, for the sake of the argument, that Messrs Mason and Slidell were public agents or emissaries of the enemy on their way to Europe in a neutral ship for some purpose or other connected with the present war.

Let it be further admitted, that a ship may be condemned not only for transporting military persons in the service of the enemy, but also for carrying public civil servants of the enemy engaged in a mission connected with the war. This point has never been decided, but it is a fair inference from the judgment of Sir William Scott in the case of the Orozembo (6 Rob. 434), and the American Government is entitled to the benefit of it.

The question to be decided turns, therefore, on the character of the Trent, the nature and object of her voyage, and her destination.

The Trent was one of the regular passenger and postal steamships belonging to the Royal West Indian Mail Company. The business of these ships, and for which they are fitted out and chiefly intended, is the conveyance of passengers and letters between the certain ports on the coast of South America—on the Gulf of Mexico—and in the West India Islands, and thence to England. They also carry parcels and light goods, and sometimes treasure; but with them cargo is a secondary consideration. For conveying the letters, the Company receive a large subsidy from the British Government. These ships sail on certain days, call at fixed places on their round, and take up all passengers and letters that offer at such places, and all this traffic is carried on between neutral ports. They are, in fact, and may be called, public or common carrier passenger ships, bound and compellable (be it remembered) by the common law of England and America to receive all goods and passengers that offer, as long as there is room for the one or accommodation for the other [illegible]

Now, it appears that the Trent, having in the usual and ordinary course of her voyage called at the Havana, one of her regular ports of call, received on board, in the ordinary way, the four passengers in question and their families for the purpose of conveying them to St Thomas's, there to be transhipped for England. It does not appear whether the master of the Trent knew anything more about these passengers or their missions, than he did of the hundred other passengers whom he had on board or their business. While the Trent was on her voyage to St Thomas's with these and some hundred other passengers on board of her, she was stopped and boarded by an officer from the San Jacinto, and the four passengers forcibly taken out of the Trent and conveyed as prisoners to the American frigate.

Such being the character of the Trent and the objects of her voyage, and such being the act complained of, it remains to consider whether the conveyance of these four passengers in the manner described, was a breach of neutrality for which the Trent was liable to condemnation in a Prize Court.

The cases that have occurred in our Prize Courts most resembling that of the Trent, are those in which ships have been condemned for carrying military persons in the service of the enemy, or enemy's despatches.

One of the first was the case of the Friendship. She was an American ship, bound from Baltimore to Bordeaux, carrying, besides a small cargo, 90 passengers, being French mariners shipped under the direction of the French Minister in America. She was condemned on the ground that having been hired by the agent of the French Government to convey French mariners to France, she was to be considered as a French transport. It was asked in that case, whether the Court was prepared to lay down a principle that might be carried to the length of preventing a military officer in the service of the enemy from finding his way home in a neutral ship from America to Europe? To this Sir William Scott answered:—

If he was going *merely as an ordinary passenger, as other passengers do, and at his own expense*, the question would present itself in a very different form. Neither this Court nor any other British tribunal has ever laid down the principle to that extent. This is a case differently composed. It is the case *of a vessel letting herself out in a distinct manner under a contract with the enemy's Government* to convey a number of persons described as being in the service of the enemy, with their military character travelling with them, and to restore them to their country in that character.

The Orozembo was also the case of an American ship chartered by a merchant at Lisbon to proceed ostensibly to Macao, a neutral port, but really to Batavia, a hostile port, for the purpose of conveying three military officers and two civil servants in the Government of Batavia. The ship was condemned, also on the ground that having been hired to convey persons in the public service of the enemy, she was to be considered as a transport let out in the service of the Government of Holland, and, as such, subject to condemnation.

In both these cases the ships were chartered by the enemy *ad hoc*, and were condemned as being at the time of the capture virtually, if not actually, in the service of the enemy. The principle on which these cases were decided is well stated by Mr Duer, now a Judge at New York, in his work on "Insurance," vol. I., p. 452:—

The nature of the service or employment in which a vessel is engaged is very justly deemed, in some cases, conclusive evidence of its hostile character. A neutral owner, who has suffered his vessel to be employed by a belligerent power, or its officers, for purposes immediately or mediately connected with the operations of the war, if the vessel is captured in the employment is never permitted to assert his claim. *The vessel, while thus employed, was as truly a vessel of the enemy as if she had been such by the documentary title*, nor can the owner, for his protection, divest her of the hostile character that she bore at the time of seizure.

The Atalanta is the leading case on the subject of carrying enemy's despatches. She was a Bremen ship proceeding to Bremen from the Isle of France, where a packet containing despatches from the Government of the Isle of France to the Minister of Marine at Paris was taken on board by the master and one of the supercargoes, and was afterwards found concealed in the possession of the other supercargo. The ship was condemned on the ground that she had been knowingly made subservient by the master and owners to the purposes of [illegible]

carrying of despatches between the colonies and the mother country was a service highly injurious to the other belligerent, and that to interrupt such communication was one of the most energetic operations of war. "If a war intervenes (he observes) and the other belligerent prevails to interrupt that communication, any person stepping in to lend himself to effect the same purpose, under the privilege of an ostensible neutral character, *does in fact place himself in the service of the enemy State*, and is justly to be considered in that character."

On the other hand, the Rapid was the case of an American ship captured on her voyage from New York to Tonningen, a port to which an open trade was permitted, and in effect, therefore, on a voyage between neutral ports. Among a variety of other letters from private persons taken on board by the master at New York, was one addressed to a commercial house at Tonningen, enclosing a despatch to the Dutch Colonial Minister at the Hague, but of which enclosure the master was ignorant. The ship was restored to her owners, on the ground that the despatch was concealed in an envelope addressed to a private person and taken on board in a neutral country, and that where the commencement of the voyage is in a neutral country and it is to terminate at a neutral port, there is less to excite the vigilance of the master, and allowance must be made for any imposition which may be practised upon him.

Mr Duer, in his "Treatise on Insurance," vol. I., 455, sums up the result of these cases as follows:—

The conveyance of public despatches, which are defined to embrace all official communications of official persons on the public affairs of the Government, is considered in some cases a highly criminal act that will infect the vessel and all the property of the owners with its noxious consequences. The mere fact that such despatches are found on board a vessel is not sufficient to produce her condemnation. They may be in the exclusive possession of a passenger, their existence on board may not be known or suspected by the owner or master, and where no guilt or misconduct is imputable to the owners or their agents, their property is safe from confiscation. But when the despatches are knowingly received by the owner or master, and more especially when an attempt is made to conceal or suppress them,—to withhold them from the knowledge of the capturing force or of the Prize Court, these acts are deemed to be fraudulent, and are held to justify a condemnation not only of the vessel, but of all the property of those who directly or through their immediate agents are chargeable with privity or knowledge.

In the last edition of "Wheaton's Elements," by Mr W. B. Lawrance, formerly Chargé d'Affaires of the United States at London, the Editor makes the following comment on this subject, p. 507:—

It is conceived that the carrying of despatches can only invest a neutral vessel with a hostile character *in the case of its being employed for that purpose by the belligerent*, and that it cannot affect with criminality either a regular postal packet or a merchant ship which takes a despatch in its ordinary course of conveying letters, and with the contents of which the master must necessarily be ignorant. This view, it is supposed, is not inconsistent with the text, which refers to a fraudulent carrying of "the despatches of the enemy." Since the former European wars, some Governments have established regular postal packets, whose mails by international conventions are distributed throughout the civilised world, while in other countries every merchant vessel is obliged to receive till the moment of its setting sail not only the despatches of the Government, but all letters sent to it from the post offices.

Lastly, in the case of the Commercen, both classes of cases were reviewed and approved of by the Supreme Court of the United States, and the rule of international law on the subject laid down with clearness and precision. That was the case of a Swedish ship captured by an American cruiser in the act of carrying a cargo of corn, being British property, for the supply of the allied armies in the Peninsula; the United States being then at war with England, but at peace with Sweden and the other Powers allied against France. The voyage was, therefore, to a neutral port. The majority of the Court held that the voyage was illegal, and that the the ship must, to all intents and purposes, be deemed a British transport. It was laid down that the destination to a neutral port could not vary the application of the rule; as that was only doing indirectly what was directly prohibited, and that it was not the effect of the particular transaction which the law regards, but the general tendency of such transactions to assist the military operations of the enemy and to tempt deviations from strict neutrality. The judgment of the Court professes to be founded on the Justice Story, in delivering the judgment of the Court, makes the following remarks on these decisions:—

Was the voyage lawful and such as a neutral could with good faith and without a forfeiture engage in? It has been solemnly adjudged that being engaged in the transport service of the enemy, or in the conveyance of military persons in his employ, are acts of hostility which subject the property to confiscation. And the carrying of despatches from the colony to the mother country of the enemy has subjected the party to the like penalty. And in these cases the fact that the voyage was to a neutral port was not thought to change the character of the transaction. The principle of these determinations was asserted to be *that the party must be deemed to place himself in the service of the hostile State*, and to assist in warding off the pressure of the war, or in favouring its offensive projects.

I have thus stated the rule of international law, as laid down by the highest English and American authorities, without any reference to those Continental writers who, chiefly out of antagonism to England, are always disposed to push the rights of neutrals to extremes, and from whose pages, therefore, much stronger arguments in favour of the Trent might be easily extracted. But it seems best for the present to rest the case upon authority to which both the disputants have been always accustomed to appeal.

Now, in all the cases the ships condemned were hired by the enemy or his agents, and were either let out expressly for the service of the enemy, or were knowingly made subservient by the masters or owners to the purposes in respect of the enemy;—the ships were, therefore, treated as enemy's ships, and condemned accordingly.

But it surely does not admit of being seriously asserted, that the Trent, by merely receiving in the ordinary course of her voyage the four passengers in question with some hundred others at a neutral port, for the purpose of conveying them to another neutral port, thereby entered into the service of the Confederate States, and became in effect a Confederate transport. It cannot be said truly that she was hired or employed by one of the belligerents, or that she was let out by her master or owners for the purpose of conveying public persons in the service of the enemy, or for any other purpose connected with the war; nor can the owners of the Trent be justly accused of knowingly lending their ship to the enemy in order to restore communications which had been rightfully interrupted by the course of hostilities, and from which, but for her interposition, the enemy would have been effectually cut off. In no sense, therefore, was the Trent, when stopped, in the service of the enemy, in no sense was she an enemy's ship, nor had she done any act which would justify a Prize Court in condemning her.

If the captors were not entitled to treat the Trent as a ship in the service of the enemy, or as an enemy's ship, it follows necessarily that they had no right to seize and forcibly take out of her the four passengers.

It is said that enemy's despatches may be lawfully seized, and if so, why not envoys who are only "moving" despatches, and that it is absurd to stop the despatch and let free the person who not only carries the despatch, but is presumably acquainted with the contents of it. And even where a ship innocently conveys a despatch, as in the case of the Rapid above cited, though the ship is not condemned, yet her detention is lawful, the despatches are seizable, and the ship is adjudged to pay the expenses of the captor.

But enemy's despatches are enemy's property, and are seizable as such, quite apart from the guilt or innocence of the ship that carries them. On this ground, the bare detention of the ship may be justified to the same extent as if she was found carrying any other kind of enemy's property. But in the cases that have occurred, the detention was considered lawful, on the ground that the master of a trading ship, if he chooses to take letters on board without examination or inquiry, is guilty of a want of caution, and must take the consequences, should any of the letters turn out to be enemy's despatches. It is manifest, however, that this reasoning is of no force in the present day when applied to a regular postal steamer whose very business is to carry letters, and in fact carries millions of letters for all persons indifferently, to and from all her ports of call.

The subject of carrying enemy's despatches need not be pursued further, as no despatches were found on board the Trent, nor in the possession of Messrs Mason and Slidell.

According to international usages as hitherto received, not despatches, nor enemy's

property, nor contraband goods. There is no trace to be found in the judgments of any Court or in the works of any writer of eminence, of passengers in a neutral ship ever having been regarded as coming under either of these denominations. Passengers, indeed, like despatches, may, as we have seen, be carried in such a manner as to affect the neutrality of the ship and render her liable to condemnation. Where that is the case, she is deemed an enemy's ship, and, of course, all enemies found on board of her, whether envoys or not, are lawful prisoners of war, and liable to be treated exactly in the same way as if the ship was in reality a private or public ship of the enemy.

But when it has been once established that the ship has not been guilty of any act whereby she forfeited her neutral character—that she was neither hired by one of the belligerents, nor let out by her owners for the purposes of the enemy,—it follows that her deck remains neutral ground, and all nations acknowledge that it is not lawful to seize either citizens, or rebels, or prisoners of war, or even criminals, and forcibly remove them from neutral territory.

The right of the Trent, therefore, to acquittal in a Prize Court, rests on her character—that being a regular passenger steamer and not hired out to the enemy, nor, in any sense, engaged in his service, the receiving of the four passengers in question at a neutral port in the ordinary course of her business, did not render her liable to be treated as an enemy's ship; and that not being liable to be treated as an enemy's ship, though enemy's property and contraband goods might be lawfully taken from her, all *persons* on board of her are covered and protected by her flag as long as the flag possesses its neutrality.

It follows, therefore, that even had the case of the capture of Mr Laurens been correctly stated by American writers, instead of having been misrepresented altogether—had it been true that he was captured *in a Dutch ship* as alleged, still the capture of ship and envoy would have been perfectly lawful if the Dutch ship had been a ship hired for the purpose of conveying Mr Laurens as "public" minister to Holland. In that case the ship would have been liable to be treated as an enemy's ship, and Mr Laurens was a lawful prisoner.

There is another ground on which some writers have based the illegality of the seizure,—namely, that the four passengers were ambassadors or public ministers, and as such entitled to the protection universally accorded by the law of nations to persons in that character. The judgments of Sir William Scott in the cases of the Caroline and the Madison are appealed to, where he held that a neutral ship may lawfully carry despatches from the enemy to his ambassador at a neutral Court, and *vice versâ*, on the ground that the neutral had a right to preserve his relations with the enemy through the usual diplomatic channel, and that it was not to be presumed that such despatches had any reference to the war. This appears, to say the least of it, an unsafe ground on which to rest the illegality of the present seizure. In the cases before Sir William Scott, the belligerent was an independent country, whose ambassador had been received and accepted at the neutral Court, and whose independence had been acknowledged by all nations. But in the present case, the Confederate States, though admitted to the rights of belligerents, are still rebels, whose independence has not been acknowledged by any country. If a neutral Power wishes to communicate with people in that condition, she may do so, either by recognising their independence and sending an ambassador or minister, or she may communicate by means of a ship of war without difficulty, where a country has already achieved her independence. She may be presumed to have business with a neutral State that has no reference to the war in which she is engaged, and the neutral ship may be entitled to the benefit of that presumption. But where rebels are struggling for an independent political existence, the presumption seems the other way. If they send envoys to neutral countries, the probability is that the mission has reference to the struggle in which they are engaged, and that the envoys have been despatched for aid of some kind, or to obtain an acknowledgment of independence. It seems difficult to contend that a belligerent has no right to intercept a neutral ship that has been hired for the purpose of sending or keeping up such communications. Vattel (p. 455 English Ed.), after describing the protection and privileges usually enjoyed by public ministers in time of peace, writes thus:—"But this "is to be understood only of a time of peace; war "introduces other rights. It allows us to cut off from an "enemy all his resources, and to hinder him from sending "ministers to solicit assistance." To prevent rebels from sending ministers for such a purpose, seems a fair belligerent operation, and there appears strong reason for contending, that if a neutral ship let out for the express purpose of conveying such persons were captured *in delicto*, it would go rather hard with her in any Prize Court on either side of the Atlantic.

Neither can reliance be placed on the fact, that the voyage of the Trent was from one neutral port to another neutral port, as of itself conclusive of the illegality of the seizure. That fact is a very important circumstance to be borne in mind, when discussing the character of the ship and the object of her voyage, or the probability that she had lent herself to serve the purposes of the enemy. The point is so dealt with by Sir William Scott in his judgment in the case of the Rapid above cited, and in the case of the Commercen, already referred to, the Supreme Court of the United States considered that a destination to a neutral port did not alter the character of the transaction. If it can be clearly made out that the voyage of a neutral ship, though between neutral ports, is a voyage expressly undertaken at the request, or in the service, or for the purposes of the enemy, the ship thereby forfeits her neutral character, and if captured *in delicto*, will probably be condemned, notwithstanding her neutral destination.

Lastly, it is quite idle for American writers to attempt to apply to the present case, the doctrine contended for by the British Government in the last war,—namely, that they had a right to impress deserters from the navy when found on board neutral ships. The American Government cannot now maintain a doctrine which they have always strenuously resisted, and in opposition to which they have even gone to war. Besides, Messrs Mason and Slidell are not deserters from the American army or navy, and if they were, no English judge or writer in recent times has said or written that the right sought to be enforced in 1812 could be now seriously maintained.

GAME

RESERVATION AND PRESERVATION.

Honour to Lord Aberdeen. According to the report of the *Aberdeen Herald*, his Lordship has taken the very best step for the improvement of his estates and the well-being of his tenants. And the Aberdeenshire farmers are fully alive to their interest in the subject, for it seems that at the recent election for that county the member had to sustain a sharp series of questions about game and the Game Laws. This is the statement made in the local journal:—

Game Laws.—Considering the universal and hard questioning our county M.P. had to endure on the subject of the Game Laws, when on his electioneering tour, it may be interesting to know that the Earl of Aberdeen has, so far as he is able, made the subject a dead letter by giving his tenantry the privilege of doing with the game over their own farms as they please.

That is the only remedy for game-preservation. Put an end to it. The first advice to be given to any landowner who desires to improve his estate should be, "Discharge all your gamekeepers and give up the reservation of game unconditionally." The occupying tenant who feeds the wild animals is the sole judge of the numbers he may think fit to preserve on his farm. This is the wise and honest course adopted by Lord Aberdeen, and for the sake of British husbandry we hope that his example may be speedily and generally followed.

There are few meetings of farmers either in Scotland or England in which, when game is mentioned, some flagrant cases of spoil and injury of game are not detailed.

In Scotland the Game *Law* is more oppressive than in England, though from the more independent position of the Scotch farmers as occupiers under leases, they frequently offer, and with effect, strong resistance to game depredations. The Scotch Game Law remains in the same state as was that of England before the Act of 1832, *i.e.*, the game on a farm remains the property of the landlord unless it be specially granted; whereas, under the existing Game Law, the English farmer takes the game with his farm unless there be a special reservation of game to the landlord. The practical difference is not, however, very great, for the reservation of the game to the landlord is well nigh universal in England, the

only exceptions being where the farmer has sufficient prudence and energy to decline to take or hold a farm unless he can have full and complete dominion over it during his term of occupancy. In Scotland it has been held that, though the occupying tenant cannot be prosecuted for "trespassing in pursuit of game" on his own farm, his son who is in the management of the farm may be. But in England, where the game is reserved to the landlord, the farmer may be, and occasionally is, prosecuted for Game Law offences committed on his own farm! He is punished for protecting the crops for which he has paid from game depredators.

At a recent meeting of the Inverness Farmers' Club, several speakers told of instances of great hardship and injury arising from game on the farms for which tenants paid full rents, and for which they could obtain no redress.

A curious illustration of the game nuisance in Scotland is afforded by the report of the proceedings in the local court of Inverness, in a case of Burns *v.* Fraser, which we find in the *North British Agriculturist*. It appears that under the Inverness Burgh Act passed in 1847, the magistrates are authorised to levy what are called Petty Customs upon all goods brought into their Burgh "for sale, storage, manufacture, use, or consumption," but goods, &c., merely passing through the Burgh and destined for places beyond the boundaries are exempted from payment of Petty Customs. Mr Burns is a game-dealer, has an establishment within the Burgh of Inverness and at Glasgow, and his course of business is to receive and pack the game at his Inverness warehouse for transit to his shop at Glasgow. The Petty Customs' Collector of Inverness had levied his duties on Mr Burns' game, and the action was brought to recover back the money as illegally levied under colour of the local act. And the facts illustrate the game system.

The pursuer (Mr Burns) made a general agreement with Lord Lovat for the purchase of all his game of season 1860, the price being then fixed at so much per head. He gave a general order to his servants in Inverness that all Lord Lovat's game should be sent direct to Glasgow for sale in his establishment there, which is his chief place of business, and that none of it should be exposed for sale or sold in his shop in Inverness. A large quantity of game came in Lord Lovat's cart, addressed to the pursuer in terms of the said general contract of sale. It was stopped at the entrance to the royalty by the Collector of Petty Customs, and the pursuer's servant sent to relieve it, the pursuer himself being at the time in Glasgow. The servant went to the place, informed the Collector that the game was destined for Glasgow, and both parties accompanied the cart into the town. On finding that the game was to be taken to the pursuer's shop in Inverness previous to being sent off to Glasgow, the Collector insisted on payment, and under a kind of threat of compulsion the servant paid the dues demanded. The game was taken into the Inverness shop, and having come without being packed, as such perishable articles required to be for a long journey, was then put into packing boxes, kept till the first opportunity, and then sent off to the Glasgow shop for sale there by the next steamer. It lay in the Inverness shop for the space of two days, but none of it was exposed for sale or sold in Inverness.

Lord Lovat's carts and servants are stated to have brought the game into Inverness. It was contended by the Collector that the game was a commodity "stored" in the Burgh, and as such liable to the duty. And the Sheriff held the game not liable. In giving his judgment he said:—"By the contract between the parties (*i.e.*, Lord Lovat and Mr Burns), the sale was made at least to this extent, that the moment these animals were shot by the seller, or those acting for him, he was bound to deliver them to the purchaser, and that the purchaser was equally bound to take delivery of them wherever they should be offered." This particular action was only for the dues taken on 100 hares and 100 pheasants, the object of the game-dealer being to try the question of right.

Now mark the state of things this contract indicates to exist on Lord Lovat's estate from whence this disputed game-merchandise came. Of course if Lord Lovat occupies all the land on which *his* hares and pheasants are reared and *fed*, there is nothing to be said on the matter, save that he can scarcely be considered as devoting his attention and his property to the maintenance of a very profitable or useful stock. But if, judging from what usually occurs on game-preserved estates, it is assumed that the hares and pheasants, even if bred in reserved woods and coverts, are fed on the land let to tenant-farmers, the fact of such a contract between a landowner and a game-dealer cannot be too strongly reprobated. The excuses, the invalid excuses, made for game-preserving are, that the gentry must have their sports, that they cannot be induced to remain on their properties without the amusement of shooting, that their local residence conduces to local prosperity, and the like. But what becomes of all these excuses when we find that the game animals fed on the tenants' farms,—the vermin which have preyed on the tenant-farmers' substance,—are, by contract, the property of the game-dealer at so much per head the moment they are killed? Here we get a glimpse of the way in which the enormous number of game animals slaughtered in the battues of the game preserves are disposed of. With what feelings must the farmers whose crops have been harried by the game regard the periodical announcement of the results of their landlords' battues? What have the Duke of Rutland's tenants at Cheveley to say to the following?—"The Duke of Rutland and his friends, His Royal Highness the Duke of Cambridge, General Hall, and Colonel Tyrwitt, shot once (says the *Stamford Mercury*) through the Cheveley Park preserves, near Grantham, on Monday last, and bagged 400 pheasants, 130 hares, 93 rabbits, and 7 partridges, making a total of 630 head." And did the Editor of the *Mercury* derive his statistics of the battue from any game-dealer in Stamford to whom the game was consigned by contract or otherwise?

A few week's ago Lord Dacre's foxhounds went through the solemn farce of drawing the Marquis of Salisbury's coverts at Hatfield, the day after 800 head of game had been killed at a battue on the same ground, and of course they found no fox! Hares and pheasants were probably abundant in Leadenhall market the next day. And all this is called amusement. Though it is often well nigh destruction to the suffering tenants, it can scarcely be called amusement—certainly it is not sporting—by the landlords.

And the mischief is that when once the plague of game has been fixed on an estate, it is seldom shaken off. Even the absence of the owner, whose passion for game may have originated the evil, often brings no relief to the tenants. A tale lately told us by one of the tenant-farmers of the Theobald's estate in Hertfordshire strongly exemplifies this. The proprietor, Sir Henry Meux, the great brewer, is, as is well known, afflicted with hopeless lunacy, and his estate is under the dominion of the Lord Chancellor, who of course commits the care of the property to some connection of the lunatic as committee of his estate. Poor Sir Henry's passion for game, prior to his affliction, was something extravagant. Rabbits, hares, and pheasants abounded to such an extent that to farm the land with any hope of profit was out of the question. The tenant with whom we have spoken took his farm before Sir Henry's illness, and was personally assured by him that the game should not be allowed to injure the crops, but he has no written agreement to that effect. Two other tenants of adjoining farms are, he said, better off in that respect, having some kind of agreement in writing with reference to game damages. Now these three tenants occupy farms in the centre of the estate and surrounding the mansion house, and notwithstanding Sir Henry Meux can no longer enjoy the sport of shooting, and the property is in charge of a committee whose duty it is to make the most of it, the farms of the three tenants we have named are swarming with game as badly as ever. And mark this instructive fact. The rabbits on the estate have been destroyed, doubtless in accordance with directions from the Master in Lunacy, but their place has been supplied by such an increase of the hares that the present position of the tenants is somewhat worse than formerly, for the worst depredations of the rabbits were confined to certain places, but the hares are everywhere, and wander for miles in search of food, biting right and left as they pass along. Nor are the gamekeepers satisfied with the natural increase of the game. No less than one hundred hares were turned down last year on these three farms, while all the pheasants and pheasants' eggs from the outer sides of the estate are caught and taken, and then used for increasing the head of game on these three central farms. Our informant says that last year he got only seven bushels of wheat from six acres of land situated in the most game-infested part of his farm, although the seed was got in well and produced a full plant; for knowing the enemy he had to contend with he had sown a large quantity of seed. In fact, he did not get back his seed. We heard that some complaints have been made by these tenants to the Lord Chancellor on the subject, and we trust they will obtain redress; but unless the sensible course adopted by Lord Aberdeen be followed, it may safely be predicted that the tenants will get little practical relief. Surely, where an estate is under the care of the Lord Chancellor representing the Crown as the guardian of lunatic owners, gamekeepers cannot be required, and the committee of the estate ought not to be allowed to render the property of no value through the preservation of game. In this case, it is said, one of the tenants, who has a written agreement about the game, claims to set off several years' rent, which he has purposely withheld, against the damage he has sustained from game. Let the Lord Chancellor direct the gamekeepers to be discharged and the game given up to the tenants, and he will perform a most beneficent and economically useful exertion of his authority.

Literature.

COMMERCIAL LITERATURE.

A Letter to Earl Russell on the Absolute Right of the Mexican Bondholders. By Richard Garde, Esq., A.M., Barrister-at-Law. Letts, Son, and Co., Royal Exchange.

The above pamphlet is a full and exhaustive examination of the rights of the Mexican bondholders who are subjects of the Queen of Great Britain. Although rather diffuse, it gives a sufficiently clear view of the present position of this question.

GENERAL LITERATURE.

An Anti-Slavery Pamphlet. By Otto Wenkstern. London: Mann Nephews, 39 Cornhill. 1861.

The substance of this bitter, trenchant, and diffuse pamphlet consists of an attack upon the London Anti-Slavery Society,—ostensibly, for the imperfect and ill-advised way in which Mr Wenkstern believes them to have dealt with the West India

Labour question. They may have been wrong, but nothing here alleged is sufficient to justify Mr Wenkstern's tone respecting them, and if he knows, or thinks he knows, anything worse, he ought either to speak it out or to abstain from speaking, and not to indulge in unmanly hints and sarcasms. Independently of this quarrel, however, the pamphlet is worth reading for its facts. Mr Wenkstern is a warm advocate for the system of coolie immigration into the British West Indies, and holds, we believe quite justly, that it has been a beneficial measure to all parties concerned. We regret, however, that he has not given so full an account of its actual working and results as he might. A popular account of the facts is much wanted, and would enlighten many persons who have not access to the Government reports, and who are easily puzzled by partial statements. We should add, that we doubt whether Mr Wenkstern fully appreciates the importance of the rule which has hitherto compelled the immigration of the coolie's family in company with himself. The effects of a contrary system are so fatal to morality and society that they cannot be too carefully avoided. Mr Merivale, in treating of this point ("Lectures on Colonization," p. 347), notices that in Mauritius the proportion of female to male coolies is only one-sixth. What it has hitherto been in Trinidad and Guiana we do not know, but as Mr Wenkstern states that the proportion has lately been allowed to *fall* to one-fourth (the rate fixed for the French immigration to Réunion), we hope that the condition of Mauritius, as implied by Mr Merivale, is not to be taken as representing that in the West Indies. Mr Wenkstern's remarks on the suspicious circumstances connected with the French immigration—which is already outstripping our own—are worthy of attention; and we heartily agree in his strong deprecation of Earl Russell's late proposal to admit Spain, on behalf of Cuba, to the privileges recently conceded to France. The notorious pertinacity with which, in disregard of repeated treaties and promises, Spain continues to import negroes into Cuba at the rate of 25,000 per annum, ought to cut her off unhesitatingly from any such privileges, which can only result in consigning thousands of British subjects to one of the worst forms of modern slavery.

Our Whole Country: or the Past and Present of the United States, Historical and Descriptive. Illustrated by 600 Engravings. By John Warner Barber, Author of "Historical Collections of Connecticut and Massachusetts," &c., and Henry Howe, Author of "Historical Collections of Virginia, Ohio, and the Great West." Two Vols. (bound in one.) Cincinnati: Published by Henry Howe, 111 Main street. 1861. [London: Trübner.]

Useful as this work will probably be in America, it will be still more so in England. It consists of an elaborate account, geographical and historical, of every State and Territory in (or out of) the Union. In each case we have a brief sketch of the settlement and vicissitudes of the State, an account of its chief towns, of its natural productions, manufactures, &c., closing with a series of short biographies of its most distinguished citizens. There is a profusion of woodcuts, most of which are good. These do not include portraits, but we have the nearest substitute for them in a quantity of autographs. The arms of each State are engraved, and small outline maps are occasionally inserted to elucidate the seat of a campaign or the position of a railroad. The main body of the work is preceded by an "Outline History of the United States," from the days of Erik the Red to Mr Buchanan. This portion includes two beautiful (but rather small) steel maps of the United States in 1803 and in 1861, in both of which the Free States, Slave States, and Territories are distinguished by different colours. An Appendix gives us the population tables of each State for 1850 and 1860; and the usefulness of the work is increased by separate indexes of the places and the persons described, in addition to a general table of contents. As a book of reference it will be extremely useful to all who wish to acquire a general view of the United States; but its greatest interest will, we think, be found in the enormous quantity of extracts (which are distinguished from the text by a smaller type) taken from local histories or personal narratives not easily accessible to the English reader, many of which are very interesting, and throw curious light on old times. These extracts chiefly consist of episodes from the Indian and British wars, anecdotes of great men, sketches of peculiar societies and local customs, of natural curiosities or antiquities, &c., and are selected with good judgment, being given at sufficient length to be interesting, yet not interfering with the main purpose of the book. Of course, many places are connected with events in the great American conflict which has at length burst into civil war, and which it is not easy to treat neutrally. These narratives are usually told with a scrupulous abstinence from anti-slavery enthusiasm, but with a straightforward regard to the facts on both sides which is much to be commended. In the Harper's Ferry affair, for instance, John Brown's speech at his trial, and the Hon. A. R. Boteler's speech in Congress, giving the "South Side" view of the event, are both presented, and the reader is left to decide between them. The book is well printed and got up, and is particularly acceptable at the present time.

Post Office London Directory. 1862. Comprising, amongst other Information, Official Directory, Street Directory, Commercial Directory, Trades' Directory, Law Directory, Court Directory, Parliamentary Directory, Postal Directory, City Directory, Conveyance Directory, Banking Directory.

We need scarcely do more than welcome the new edition of this invaluable work,—which has now assumed proportions that may fairly be regarded as rivalling, in the world of books, the gigantic size of the metropolis itself, and which no man of business can now dispense with.

The British Almanack of the Society for the Diffusion of Useful Knowledge, for 1862. London: Knight and Co., 90 Fleet street.

Companion to the Almanack; or Year-Book of General Information for 1862. London: Knight and Co., 90 Fleet street.

Dietrichsen and Hannay's Royal Almanack, and Nautical and Astronomical Ephemeris for 1862. Published and sold by Dietrichsen and Hannay, 63 Oxford street, London.

In these days, when almanacks abound on every side, and few people care to follow the example of Mr Lovel in "Evelina," who bought five or six in order to be *quite* sure of the day of the month, it is necessary to make some sort of comparison between their different merits. The "British Almanack" and "Hannay's" seem to appeal to the same class of readers, as they furnish much the same species of information, astronomical notes for the year, army and navy lists, statistics of educational establishments, lists of the members of Parliament, &c. On most of these subjects Hannay's sixpenny Almanack contains far completer details than Knight's shilling one; its university and colonial information, especially, is remarkably full and useful. On the other hand, Knight's publication is much better printed, and on better paper, and is not disfigured by vulgar puffs. The "Companion to the Almanack" contains papers by various writers, on the Census for 1861, on the Cotton Supply, on the Statistics of the United States for 1860, and other subjects of political and social interest, besides a register of the Legislation, public improvements, &c., of the past year. The obituary with which the volume closes, curiously omits the name of Count Cavour. This is probably an oversight; but we are surprised to see that in the list of Sovereigns, Francis II. is set down as King of Naples and Sicily, and Victor Emanuel as King of Sardinia. Now that the Kingdom of Italy has been recognised by the Queen of Great Britain *and* by the "Almanach de Gotha," it may surely be reckoned as an accomplished fact by the "British Almanack."

The Leisure Hour. Vol. X. 1861.

The Sunday at Home. A Family Magazine for Sabbath Reading. Vol. VIII. 1861. London: The Religious Tract Society, Paternoster-row, and 164 Piccadilly.

These two volumes, issued from the same firm, and uniform in size, print, and general style, are intended to meet respectively the secular and the religious needs of the intelligent, but not too speculative, artizan class. The substance of both works consists of tales, travels, anecdotes, and short dissertations, usually of fair average merit, and diversified by frequent woodcuts, which are sometimes pleasing and never objectionable. The tone of the "Sunday reading" is of a mild Evangelical character.

Good Words. December.

The most interesting articles in this number are the "Facts from a South Staffordshire Ragged School," by Mr H. W. Holland, and "The Parish School and the Man-of-War," by the Rev. Mr Blaikie. Mr Holland's narrative is tinged with a somewhat narrow theology, but his facts are deeply touching and valuable. Mr Blaikie's account of the parish school of St Mark's, Windsor, which has attained so much efficiency under the mastership of Mr Hawtrey, is very interesting and encouraging. There is a curious little paper in this number by Dr Whately, "On Past Sufferings," intended to combat the habit of regarding them with that painful sympathy which we frequently entertain for the martyrs of by-gone time or the friends who have passed through troubles now ended. "What we grieve for," he says, "has no real existence, at the present moment." These people *have* suffered, but they do not suffer now; and if we feel so much for them, "it is through a confused conception, which gives no distinct view of the past and the present." These remarks undoubtedly contain a truth which ought to check that sentimental dreaminess that fastens only on the emotional aspect of character as seen in a painful or picturesque past, and neglects the present condition of the objects contemplated. But there is another truth at the root of the error, which the Archbishop seems to have entirely missed, viz., that as no touchstone brings out the inner reality of character more than pain, our estimate of any mind must be greatly influenced by the sort of effect which pain produces on that mind. And when a man's endurance of unusual suffering has been the crowning nobleness of his life, it is most natural that he should be associated in our memories with the fiery trial which he met so well. Of course, the feeling may be, and very often has been, carried to a morbid excess; but that excess will not, we think, be so easily corrected from the placid common-sense point of view adopted by

Dr Whately, as from the growing perception to which all noble endurances open our eyes, that to faithful souls, pain is powerless for evil.

HIDE AND SEEK; or, The Mystery of Mary Grice. By WILKIE COLLINS. New Edition. Sampson Low, Son, and Co, 47 Ludgate hill.

"HIDE AND SEEK" is one of the best of Wilkie Collins' elaborate novels. It does not indeed possess the highly-wrought plot or careful finish of the "Woman in White"; but it is freer in its movements, more natural in its characters, and more interesting, if less exciting, in its story. Valentine Blyth, the kindly and eccentric artist, is a man whose acquaintance we are glad to renew in a second edition.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday Evening.

I hear that M. Fould keeps his financial projects so secret that even personages who stand in high positions in connection with the Government have but a very imperfect idea of them. But from what these personages know or surmise, it appears that M. Fould's plan for establishing an equilibrium between receipts and expenses, consists not so much in cutting down the latter, as in augmenting the former by means of new taxes. It appears, too, contrary to what had been hoped, and contrary to the opinion of some of the most sagacious financiers of the day, that he really intends re-establishing the old duties on sugar and coffee. As to an income tax, he has not yet, it is thought, resolved on adopting one. Reports are current that the well-known M. Emile de Girardin has been consulted about the financial situation, either by the Emperor or some one in His Majesty's name; and that with characteristic boldness he has recommended the adoption of the plans he promulgated some years back,—the transfer of assurances to the Government and the forcing of everybody to insure, a tax on capital, &c. But if M. Fould should shrink from an income tax from fear of its unpopularity, there is little likelihood indeed of any such radical measures as those of M. E. de Girardin being adopted.

The Committee of the Senate charged to examine the new Senatus Consultum for enlarging the powers of the Legislative Body in the vote of the Budget, has, through M. Troplong, presented its report. This document is of enormous length—a length utterly disproportioned to the importance of the subject treated. It may be described as, in substance, contending that the complete control which in constitutional times the Chambers exercised over the Budgets was mischievous; that the additional power which the Emperor has given to the Legislative Body was not called for, but cannot do much harm; that, notwithstanding the startling revelations made in M. Fould's famous memoir, the financial situation is not at all grave; that, though the Empire may have run into debt, it has given the people in return great public works, an increase of welfare, and military glory; and that a comparison between its finances and those of preceding *regimés*, especially Louis Philippe's, is greatly to its advantage. All these fine things are embellished with much adulation of the Emperor and of Imperialism. It would be easy to answer every point presented by the learned reporter, but really to do so would be a waste of time and space.

The French entertain great apprehensions about the impending war between the United States and England. Even if they take no active part in the conflict, it is certain to be disastrous to them, as the States are their principal market; but the general belief is, that with every desire to maintain neutrality, they will be dragged into the conflict sooner or later. Some months back I gave an account of the commerce between France and the United States (Southern Confederation included) as detailed in the French Customs reports. In the year 1859 (the latest for which, strange to say, an account has yet been published), the value of exports of French productions to the Atlantic ports was 298,790,705f, and the value of imports from the States for consumption in France 199,516,926f. But in reality these figures were much greater, especially in exports; much of the commerce between the States and France being transacted *via* England, and therefore figuring as the commerce of the latter country.

Some influential French gentlemen, and among them M. Buon, are engaged in getting up an enterprise which is likely to be of considerable importance,—namely, forming at Paris a *Permanent* Exhibition of the manufactured productions of all nations, and subsequently doing the same in other cities. The project has been received with great favour by French traders, and there is no doubt that it will also be acceptable to English people. By means of the proposed Permanent Exhibition, it is calculated that traders, and especially foreigners, could at a very insignificant expense keep constantly before the *elite* of the purchasing public specimens of their most remarkable wares.

Messrs Guillaumin et Cie. have just completed the publication of one of the most important works ever undertaken by any firm,—the *Dictionnaire Universel du Commerce et de la Navigation*. This Commercial Dictionary is beyond all compare the best that has yet been produced in France or England. It contains a truly prodigious mass of practical information on all the matters which can in any way interest the merchant or the economist; and that information is obtained from the most authentic sources and is brought down to the latest dates. So complete is the work, that no subject connected with commerce or navigation is neglected, however insignificant; so exact, that it would be difficult to discover an error in any matter however vast. One is really surprised at contemplating the research, the industry, the care, the patience, the variety of talent, the sagacity, which have been employed in the compilation of this Dictionary. The book proves that modern French economists are as able, as learned, and as laborious in their way as the Benedictines of ancient times were in theirs. A translation into English of this work is greatly to be desired, but as that perhaps is not to be hoped for, let every merchant place it in his counting-house, and every economist add it to his library.

The Minister of Finance has fixed the rate of interest on Treasury bills since Monday last at 3½ per cent. for those of from three to five months, 4 per cent. for those of from six to eleven months; and 4½ for those of a year—a diminution of ½ per cent. on the preceding rates.

The Director of the Board of Customs, in a circular to the Chambers of Commerce, says that the question has arisen whether the import dutv of 5 per cent. *ad valorem* on Cashmere shawls and scarfs from India, brought in from England or Belgium, should be applied to plain Cashmere tissues, borders, and fringes; and he announces that the Minister of Commerce has decided the question in the affirmative. In the same circular, the Director states that in the official tariff annexed to the commercial treaty between France and Belgium only spun floss silk is represented as free from duty on being exported; but that according to the intention of the treaty such silk *unspun* can also be sent out of the country without paying duty.

The Company of the Iron-Works and Founderies of Rive de Gier, in a report just published, announces that its profits on the last year's operations were so large that it was able to pay between 16,000*l* and 20,000*l* in English money for new constructions, to carry 6,000*l* to the reserve fund, and to distribute *fourteen* per cent., or 70f a share! And yet the ironmasters of France made a fearful clamour against the treaty of commerce with England, because they said it would ruin them!

The Bourse, of course, continues depressed, owing to the anxiety occasioned by the American affair. The following are the quotations of the week:—

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, business has continued languid. Yesterday, the quotations were 77f to 82f for the disposable. These quotations were, however, merely nominal, no purchases having been made by bakers. No transactions for delivery took place In the four marks, the current month was offered at 80f 25c, and the first four months at 83f, which represents a slight decline on the prices of the last week.

WHEAT.—At *Paris*, yesterday, offers were numerous, and a decline took place. In foreign wheat, white Dantzic, offered at 46f; Stettin, 45f and 45f 50c; American, 40f to 43f; Hungarian, 41f to 42f 50c, were only taken with an abatement of 1f to 1f 50c. In French, Lorraine offered at 42f to 44f; Centre, 41f, 43f, to 43f 50c; Burgundy, 43f to 44f, remained for the most part unsold, or taken with an abatement of 50c to 1f. Farmers, not without some hesitation, made some small sales, however, at 43f and 44f. Of the provincial markets, 8 present a rise of 20c to 50c, 95 a fall of 75c to 10c, 4 are reported firm, 26 without variation, and 18 calm.

COTTON.—At *Havre*, in the week which ended Friday, business was not animated; however, prices improved. The sales were 3,343 bales, and the arrivals 335. The closing prices were 1f higher for the very low Mobile and Georgia; for low, very ordinary, and ordinary New Orleans and Georgia; also for good ordinary and superior sorts. No variation on the very low New Orleans, or on low, very ordinary, and ordinary Mobile. Consequently very low New Orleans was at 124f the 50 kilogs;

low ditto, 135f; and very ordinary, 142f. The stock on Friday was 149,550 bales, against 123,500 at the same date in 1860, and 33,360 in 1859. The week's business has not been active, and prices have receded. Yesterday, very low was 122f; and low, 132f.

COFFEE.—Business at *Havre*, during the week ending Friday, was very calm, put prices were firm. The sales were 500 sacks Hayti Port-au-Prince, disposable or in harbour, at 89f to 90f the 50 kilogs in bond; 100 ditto Cape and Gonaives, 92f; 620 ditto Rio, not washed, 75f 50c to 81f 50c; 200 ditto ditto, for delivery, 82f 50c; 50 ditto Ceylon *trie*, 113f, duty paid. The arrivals were about 900 sacks. This week, Ceylon has been quoted at 114f; Hayti, 85f, 86f, 86f 50c, 88f, and 91f; Cape, 92f; Rio, 78f to 82f. At *Nantes*, in the last week, no business; this week, nothing done. At *Bordeaux*, in the last week, 20 casks Ceylon plantation went at 135f; 710 sacks Mysore, 117f 50c; 310 Rio, not washed, 83f. This week, Mysore has been at 116f 50c to 117f 50c. At *Marseilles*, in the last week, 1,200 sacks Rio went at 68f to 87f; Hayti were in demand for consumption at 88f to 90f.

SUGAR.—At *Havre*, last week, business was not active, but prices continued firm. 153 casks French West India, disposable, went at 45f, duty paid, the 50 kilogs; 48 Porto Rico, 48f, duty paid; 195 sacks and 15 sacks Bahia, 29f in bond. The arrivals were 1,770 casks and 820 sacks. This week, French West India has been at 45f; Havana, 32f 50c. By auction, 1,350 casks Havana damaged have been also disposed of. At *Nantes*, in the last week, 27 casks French West India went at 45f 50c; 19 ditto, 45f 50c; 3,650 sacks Reunion, 49f 62½c; 738 casks French West India, 45f 25c; 300 Rio, 45f; and 106 chests Havana, 54f, duty paid. This week, French West India has been at 54f; ditto, usine, 48f 25c; ditto Guadeloupe, 43f 50c; Reunion, 49f 25c; Havana, 50f; ditto, 54f; Reunion, 60f. At *Bordeaux*, in the last week, 42 casks French West India went at 45f 50c to 46f, duty paid; 1,276 bales Reunion, 50f to 50f 50c; 5,736 bales Mauritius, 50f to 50f 50c, duty paid; 48 casks French West India damaged were also disposed of. This week, Reunion has been at 47f 50c; ditto, 49f 50c; Batavia, 55f; French West India, 45f 50c. At *Marseilles*, last week, business in French colonial sugar consisted only in the sale of 80 casks French West India. In foreign sugar it was much more considerable: besides 150 casks Sant Yago, 8,000 sacks Brazil were also sold.

INDIGO.—At *Havre*, last week, business consisted only in the sales of 5 chests Bengal, at prices not stated. The arrivals were 39 chests. This week, no business. At *Bordeaux*, last week, the sales were 20 chests Bengal, 13 chests Kurpah, 2 chests Vellore. Bengal were sold at 15c above the last estimates. This week, 13 chests Bengal have been sold; prices not stated.

HIDES.—Business at *Havre*, in week ending Friday, was animated, and prices were very firm. 7,200 dry La Plata went at 102f 50c to 120f the 50 kilogs; 3,120 salted Saladeros, ox, 70f to 72f 50c; 4,900 Rio Grande salted, green, 65f to 67f; 500 Pernambuco salted dry, 80f; 1,200 salted horse La Plata, 80f to 82f the 100 kilogs; 14 cases Vachettes, Calcutta, 110f the 50 kilogs, and 29 ditto ditto, 92f to 95f in bond. The arrivals were 19,851. This week, Buenos Ayres dry have been at 125f; Monte Video salted, 68f; Buenos Ayres Saladeros, ox, 72f; New York ditto, 48f 25c; Maracaibo dry, 166f; Calcutta Vachettes, 90f 50c in bond. By auction, 138 Buenos Ayres dry damaged, 1,686 Tampico dry ditto, 54 Maracaibo dry ditto, and 37 Bahia dry ditto, were all disposed of.

WOOL.—At *Havre*, in the last week, business was calm. 18 cases Monte Video and Buenos Ayres, not washed, went at 1f 30c to 2f 65c the kilog; 89 Cape, not washed, 2f 17c. The arrivals were in wool, 321 bales; in sheepskin, 254. This week, Buenos Ayres, not washed, have been at 1f 90c; ditto, 1f 20c.

TALLOW.—At *Havre*, in the week ending Friday, the sales were only 6 casks New York at 65f the 50 kilogs. The arrivals were 54 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were at 127f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first-rate, disposable, was at 70f the hectolitre; Montpellier, disposable, 86 deg., 105f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was at 95f the hectolitre; and beetroot, first quality, 81f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial news is dated Calcutta, Nov. 25:—Shirtings firmer. Mule twist slack. Copper sheathing, 41rs; tile, 40rs. Indigo and silk active and advancing. Linseed quiet. Exchange on London, 2s 0⅝d to 2s 0¾d. Government Securities—4 per Cents., 84¼ to 84¾; 5½ per Cents., 104¾ to 105. Freights nominal. Seeds, 60.

From Bombay, we have received the following intelligence to Nov. 27:—Shirtings advancing: 8 ¼lb, 5r 10a per piece. Twist firm. Cotton, new Broach, 180. Copper sheathing, nominal; tile, 58rs. Malwa opium, 1,455rs per chest. Exchange on London, 2s 1⅛d. Government Securities—4 per Cents., 84; 5 per Cents., 96⅜; 5½ per Cents., 104. Freights active and advancing. Cotton, 50s.

The consumption of coal in France during the seven years ending in 1859 was as follows:—1853, 9,422,305 tons; 1854, 10,856,777 tons; 1855, 12,293,686 tons; 1856, 12,896,203 tons; 1857, 13,149,466 tons; 1858, 12,893,034 tons; 1859, 13,063,661 tons. The imports in the same period were:—1853, 3,530,580 tons; 1854, 4,129,980 tons; 1855, 4,952,214 tons; 1856, 5,069,998 tons; 1857, 5,367,803 tons; 1858, 5,671,844 tons; 1859, 5,759,387 tons. Of the total imports, Great Britain contributed in 1853, 666,720 tons; 1854, 708,830 tons; 1855, 881,339 tons; 1856, 1,057,489 tons; 1857, 1,240,916 tons; 1858, 1,313,578 tons; and 1859, 1,395,872 tons. The other leading sources of supply were Belgium and the Rhenish Provinces, the Belgian deliveries being far larger than those from Great Britain.

An account of the importations and exportations of bullion and specie registered in the week ended 18th December, 1861:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 18th day of December, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,426,390	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,776,390
		Silver Bullion	..
	29,426,390		29,426,390

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,963,147
Rest	3,133,688	Other Securities	16,522,564
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6 794,788	Notes	9,984,680
Other Deposits	13,132,844	Gold and Silver Coin	824,957
Seven Day and other Bills	691,028		
	38,305,348		38,305,348

Dated the 19th December, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,132,738	Securities	27,582,711
Public Deposits	6,794,788	Coin and Bullion	15,611,347
Private Deposits	13,132,844		
	40,060,370		43,194,058

The balance of Assets above Liabilities being 3,133,688*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£310,859
An INCREASE of Public Deposits of	874,622
An INCREASE of Other Deposits of	35,418
An INCREASE of Government Securities of	66,738
An INCREASE of Other Securities of	192,747
An INCREASE of Bullion of	343,661
An INCREASE of Rest of	3,965
An INCREASE of Reserve of	608,536

The above return again presents very favourable results. A further large augmentation has taken place in the bullion and reserve, the latter being now as high as 10,819,000*l*. A considerable increase is also shown in the Government balance from the revenue payments usual at this period of the year, the addition within the last three weeks having been nearly 2,600,000*l*. From the greater demand for money, an augmentation has occurred in the other securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 19,774,983	£ 20,438,684	£ 21,401,717	£ 20,356,746	£ 20,132,738
Public deposits	9,202,522	9,660,818	9,676,026	7,384,841	6,794,788
Other deposits	9,360,449	15,149,007	13,310,224	11,759,820	13,132,844
Government securities	13,244,220	10,808,591	10,925,157	9,540,273	10,963,147
Other securities	11,366 148	16,494,120	19,586,996	19,885,590	15,522,564
Reserve of notes & coin	12,737,369	13,918,007	10,831,130	8,108,175	10,819,637
Coin and bullion	17,413,564	19,148,997	17,001,740	13,331,270	15,611,347
Bank rate of discount	3 p. c.	2½ p. c.	2½ p. c.	5 p. c.	3 p. c.
Price of Consols	97⅛ xd	96⅞ xd	95⅝ xd	94 xd	90¾ xd
Average price of wheat	37s 8d	40s 2d	43s 8d	51s 5d	60s 8d
Exchange on Paris (short)	25 17½ 22½	25 10 15	25 10 15	25 15 22½	25 30 37½
— Amsterdam ditto	11 16¼ 16¾	11 15 15⅝	11 13 13⅜	11 14½ 15	11 16 16⅜
— Hamburg (3 months)	13 10	13 6¾ 7	13 5¼	13 6¾ 6½	13 7¾ 8

In the corresponding week of 1851, the message of President Fillmore had just been received, and afforded a marked contrast to the one just issued by President Lincoln. The public revenue for the last fiscal year was described as having been nearly 12,000,000*l*, while the expenditure was less than that sum by fully 2,000,000*l*. The people of the United States were also congratulated on the subsidence of the agitation in the South, which, for a time, threatened to disturb the fraternal relations of the Union. From France it was announced that tranquillity had been everywhere re-established. A treaty of commerce and navigation had been concluded between Great Britain and Belgium. The London money market continued very easy. Two or three mercantile failures had been announced at Liverpool and Glasgow.

In 1858, the appeal of M. de Montalembert to the Supreme Court had resulted in a mitigation of the sentence passed upon him. The bullion in the Bank of England had risen to 19,148,997*l*. The new Turkish loan had fallen to ½ discount. An issue of 750,000*l* Victoria debentures was looked for.

In 1859, Indian enfaced paper had been placed upon the Stock Exchange list, and the transactions in it were consequently becoming every day more extensive. By a circular issued by Mr James Low, the export of gold from Great Britain to the East for nine years amounted to 5,633,445*l* in gold and 66,977,706*l* in silver. The San Paulo (Brazilian) Railway, with a guarantee of 7 per cent. on a capital of 2,000,000*l*, had just been introduced by Messrs Rothschild.

In 1860, intelligence had arrived at St Petersburg, by telegraph and express through the Russian territories, of the conclusion of peace between China and the allies, and the consequent evacuation of Pekin. The news received respecting the English officers and others who had been taken prisoners by the Chinese left little hope that any others beyond those already released still survived. The Emperor Napoleon had abolished the passport system as regards British travellers in France. The secession feeling in the United States was gaining strength, and little effect was produced by President Buchanan's message, the tone of which, however, was regarded in the North as eminently conciliatory and and pacific. The Ex-King of Naples had published a manifesto to the people of the Two Sicilies.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,005,699*l*; in 1858, a deficiency of 3,345,113*l*; in 1859, a deficiency of 5,676,772*l*; and in 1860, a deficiency of 8,125,770*l*. In 1861, the deficiency is 3,389,720*l*.

DISCOUNT AND MONEY MARKET.—The approach of the termination of the year causes the usual increase in the demand for money for revenue and other payments, and the rates of discount are gradually moving upwards. Little or no business is now done below 2¾ per cent., and at the Bank the applications have been on a larger scale than for some weeks past. The following are the approximate rates of discount for first-class paper of various dates:—

30 to 60 days	2¾ per cent.
3 months	2¾ to 3 per cent.
4 months	3 to 3¼ per cent.
6 months—Bank bills	3½ per cent.
— Inland trade drafts	4 per cent.

Although the terms for long-dated paper are nominally the same as last week, there is less disposition to do business in these bills, and occasionally more than 4 per cent. is demanded.

On the Stock Exchange money remained plentiful at 1½ per cent. until this afternoon, when there was a rather better demand, and 2 per cent. was usually charged.

The Committee of the Stock Exchange met this morning with reference to the closing on Monday, the day of the funeral of the Prince Consort, and at first determined that the house should be open from 11 to 12 only. On reconsideration, however, it was determined to close altogether. A holiday will also be kept in the corn, colonial produce, tallow, fruit, cotton (Liverpool), and other markets. Lloyd's and the Jerusalem Coffee-house will be open, chiefly in consequence of the expected arrival of the American mail.

The advices from Australia mention that the Government of Victoria have issued a further sum of 250,000*l* Six per Cent. Debentures, at an average premium of 2*l* 18s 6d per cent., exclusive of accrued interest. Among the tenders accepted were one for 187,000*l* from the savings banks at 3⅛ premium, and one for 20,000*l* from a railway company at 2 premium. The total applications were for 285,750*l*. The Government of Queensland have also placed 80,000*l* Six per Cent. Debentures of the colony at 4 to 5 per cent. premium, besides accrued interest, the whole being taken up by capitalists from Sydney.

The later news from America has caused at Lloyd's a considerable advance in the war risks charged. For outward British vessels to the East about 30s per cent. is paid, and for homeward ships about 40s to 60s, according to the date of sailing. The prices for vessels coming from

New York are wide and irregular, but about three guineas per cent. is the nearest quotation.

The rate of interest on French Treasury Bonds has been lowered to 3½ per cent. for three to five months to run; 4 per cent. for six months, and 4½ for twelve months. This change is a reduction of a half per cent.

The following are the rates of discount in the chief cities of the Continent. The principal change is an advance at Hamburg:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	6

ENGLISH FUNDS.—The announcement of the death of the Prince Consort cast a deep gloom over the City on Monday, and increased the feeling of depression produced by the unsatisfactory character of the President's message. Consols declined about a half per cent., and other securities were proportionably heavy. There was then a slight rally, but the market remained weak and unsettled, owing to some sales of money stock which had counteracted the effect caused by some large purchases for the rise, it is said on American account. To-day the market opened quietly, the price during the greater part of the morning being 90 to ⅛, but a sudden rise afterwards took place to 90½, on the statement in the *Patrie* of the despatch of a French fleet to New York. A reaction temporarily followed, which after official hours was succeeded by a renewed advance, on a report that some favourable news had been received from America; and the final quotations were 90½ for money, and 90½ to ⅝ for the account, showing a slight advance over last Friday.

Exchequer bills have again been rather flat, the June issue having fallen to 11s to 14s premium. The March bills closed without change at 9s to 12s premium. India bonds have likewise been less steady, and left off at 12s to 15s premium.

India Five per Cents. have fully maintained the recent improvement, and were quoted this evening at 102¾ to 103, or a fraction higher than last Friday. The rupee paper stocks were also firm, the respective prices of the Five and Five-and-a-Half per Cents. being 96 to ½ and 102 to ½.

FOREIGN STOCKS.—The transactions in this department of the Stock Exchange have been unusually limited this week, and the daily fluctuations have generally been of little importance. The principal changes have again occurred in Turkish Six per Cents., which, after experiencing a rather severe fall on Monday, subsequently recovered, and now show an improvement over last week. A reduction also took place in Mexican, from which, however, there has been only a partial reaction. The new Italian Five per Cent. loan has been drooping, the stock being weakly held in Paris, and liable to be immediately affected by any adverse influence. Notwithstanding the favourable advices from Venezuela, the stocks of that Republic show a downward tendency. Peruvian bonds have been nominally rather dull, but few sales take place, these securities being chiefly held for permanent investment. Russian Three per Cents. have been more offered.

The closing quotation of French Three per Cents. on the Paris Bourse this evening was 67f 25c, showing a decline on the week of three-eighths per cent., but a fractional improvement as compared with yesterday.

The Ecuatorian Commission of Agency have notified this week the receipt of a further sum of 631*l* on account of the dividend fund of the debt of Ecuador.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

RAILWAYS AND OTHER SHARES.—In the railway department business has been at a complete stand, pending the solution of the American difficulty. On Monday there was a general decline, but the market partially rallied, and remained quiet until this afternoon, when a marked improvement took place with Consols. The public appear to be purchasing at the present low prices, several of the principal stocks, especially Midland, being scarce for delivery. On the other hand, the unfavourable traffic returns and the expectation that the forthcoming dividends will be only moderate cause an unsettled feeling, and a disposition to operate for lower prices. The effect on railway traffic of a rupture with the Northern States is also not lost sight of. Caledonian has shown the greatest depression this week, while Great Northern is comparatively steady. South-Eastern has slightly advanced.

Colonial descriptions have shown more steadiness than home stocks, and in several cases an improvement has taken place. Indian guaranteed stocks have been especially in demand. A further advance has likewise occurred in Grand Trunk and Great Western of Canada.

Foreign railway securities receded in the earlier part of the week, but have since exhibited a better tendency. Brazilian shares have been the firmest. Lombardo-Venetian are dull at ⅛ to ⅜ premium, but have been lower. American securities have experienced a general decline, and remain difficult of sale. Illinois Central are the flattest.

There has been a better feeling with regard to colonial Government debentures, and in several cases a recovery has taken place from the late reduction.

Few changes of importance have occurred in miscellaneous descriptions. The favourable advices from Brazil have caused a fresh rise in St John del Rey mining shares. Joint stock bank shares also improved in the middle of the week, but have since been rather dull. Mercantile Fire Insurance left off this evening at ⅜ to ½ premium, and Commercial Union ⅝ to ⅞ discount.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—The rates this week have been rather less firm, except for Paris, in which a slight advance has taken place.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, on the transactions in bullion during the week, and the movements in Indian rupee paper :—

Gold.—The Atrato has brought 31,000*l* from the West Indies, and the Wellesley 308,000*l* from Melbourne; but as the demand for export has almost entirely ceased, the Bank will purchase these amounts when refined; in fact, about 168,000*l* has been already purchased by that establishment since our last circular of the 12th inst. The Indus has taken 5,508*l* to Calcutta and China, but our market is comparatively inactive.

Silver.—The Atrato has brought 89,000*l* from the West Indies, and a portion only of that amount was sold for the Continent, at 60⅞d per oz standard; an active demand for bar silver arose at this rate, and to-day the price improved to 61d per ounce standard, at which quotation large sales have been effected. The Indus has taken 36,000*l* to Calcutta and China, but the demand for Bombay is expected to be better.

Mexican dollars are rather firm at 59½d per oz.

Exchange on India remains unchanged, viz., 2s to 2s 0¼d for banks' drafts on Bombay and Calcutta, at 60 days' sight; bills with documents, 1s 11¼d to ⅜d. Banks' drafts on Madras, 1s 11¾d. to 2s; bills with documents, 1s 11d.

India Government Loan Notes have improved slightly since this day week. We quote 5½ per Cents., 102 to 102½; 5 per Cents., 96 to 96½; and 4 per Cents., 79 to 81.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9d per oz std, last price; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s per oz; South American doubloons, 74s per oz, last price; United States gold coin, 76s 4d to 76s 6d per oz, last price. Silver—Bar silver, 5s 1d per oz std, last price; bar silver, containing 5 grs gold, 5s 1½d per oz std, last price; fine cake silver, 5s 5⅜d per oz, last price; Mexican dollars, 4s 11¼d per oz; Spanish dollars (Carolus), 5s 9d per oz, nominal.

About 25,000*l* in Australian gold was taken to the Bank yesterday, and 69,000*l* to-day, making a total of 94,000*l* since making up the last account.

The Pera has arrived at Southampton, with the heavy portion of the Australian overland mail and 26,935*l* in specie.

The whole of the silver remaining in the market is stated to have been purchased to-day, partly for Hamburg and partly for Bombay. No advance occurred in the price.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension has taken place of Messrs John Sarl and Sons, jewellers and silversmiths, of Cornhill, with liabilities for about 80,000*l* to 100,000*l*. The estate is expected to turn out favourably. It is said that the failure has arisen from mining speculations, the general business of the firm being believed to have been highly profitable.

Messrs Westgarth and Co., Australian merchants, have issued the following circular notifying their suspension. The liabilities are about 30,000*l*; assets uncertain :—

37 Threadneedle street, Dec. 16.

We regret that the increasingly adverse accounts by several late Australian mails and the absence of remittances compel us to suspend payment.

We beg to state that this result is chiefly caused by the unfavourable winding-up of the late copartnery of Westgarth, Ross, and Co., which has not only deprived us of a reversion of capital that was at first anticipated, but is now leaving some claims against the two senior partners.

This suspension will involve that of our Melbourne house, Westgarth, Ross, and Spowers.

We have placed our books in the hands of Messrs Coleman, Turquand, Youngs, and Co., who will prepare a statement of our affairs, to be laid before our creditors at the earliest possible period.—We are, &c., WESTGARTH AND CO.

In the Court of Bankruptcy, on Wednesday, a first dividend of 3s 4d in the pound was declared in the case of Messrs Barnard, Rosenthall, and Co., braid and trimming manufacturers, of Cheapside, whose suspension was announced on the 29th of October.

The creditors of Messrs Atkinson, Cattling, and Co., who lately failed in the hemp trade, have agreed to a composition of 7s in the pound.

At a meeting of creditors of Messrs Fairhead and Son, seedsmen, it was resolved to wind up the estate under inspection. The liabilities were stated to be about 12,500*l*, and assets 6,100*l*.

PUBLIC COMPANIES.—The Directors of the Provincial Bank of Ireland have declared a dividend for the six months ending at Christmas of 4 per cent., with a further distribution of 30s per share, being at the rate together of 20 per cent. per annum.

The prospectus has been published of a proposed issue of 60,000*l* 7 per Cent. Debentures by the Havana and Marianao Railway Company of Cuba. This line is constructed to provide for the passenger and agricultural produce traffic of the western suburbs of the Havana, and has so far approached completion that it is expected to be opened in a couple of months. The amount already laid out on the works is 143,000*l*. The present sum is required to pay for iron, &c, contracted for in England and delivered in Havana. The loan is sanctioned by the Government of Cuba, and constitutes a first charge on the entire undertaking. The price of issue is fixed at 95, and the whole of the debentures will be redeemed at par within seven years.

At a meeting of the Crystal Palace Company, yesterday, the proposed dividend at the rate of 2 per cent. was agreed to, after considerable discussion. The Directors were also authorised to borrow a further sum of 50,000*l* in debentures, which will make the total amount raised 327,000*l*. The Sunday question, was again brought forward, but again negatived by a large majority.

The report presented to the proprietors of the Liverpool Borough Bank, an establishment that broke down in the crisis of 1857, states that the liabilities have all been cleared off, with the exception of 3,574*l* not yet claimed. A first return of 10s per share was made in September last out of the surplus, and since the closing of the present accounts there has been a second distribution of like amount. Some time will still be occupied in completing the liquidation of the concern.

The important appointment of Manager to the new Birmingham Joint Stock Bank (Limited) has been unanimously conferred on Mr Joseph Beattie, for fourteen years connected with the old and highly respectable banking-house of Messrs Goslings and Sharpe. Mr Beattie is, we believe, a brother of the Manager of the Temple Bar Branch of the Union Bank of London.

A prospectus of the Amman (Aberdare) Colliery has been issued, of which the commercial advantages have been much commended by many public journals. It may be obtained from the Brokers or Secretary, as mentioned in our advertising columns.

The Natal Cotton Company, with a capital of 50,000*l*, in 10,000 shares of 5*l* each, is now fully before the public. That the colony of Natal is capable of producing a very large quantity of cotton is evident from statistics presented to the shareholders, and it is equally clear that a quality far superior to that hitherto received from India may be produced under good management. The Company has entered into a conditional contract for the purchase of several suitable estates (about 36,000 acres) for the sum of 29,945*l*, and which are said to be well adapted for the growth of an article so much required in this country. The lands in question are almost wholly free from jungle and forest wood.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 108¾ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 247,544 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was much restricted. For both red and white qualities, however, the trade was in a sluggish state, yet there were no sellers except at the very full prices of Monday last. In foreign wheat, the show of which was somewhat extensive, sales progressed slowly; nevertheless, the quotations were well supported. With barley the market was very moderately supplied, and the demand, especially for malting qualities, was rather active at extreme rates. Good and fine oats were steady in price, but inferior parcels, as well as peas and beans,—the receipts of which have decidedly increased,—barely supported previous currencies. Flour was in limited request, yet all descriptions were held at full quotations. This week's imports amount to 44,060 quarters of wheat, 9,940 barley, 45,470 oats, 1,260 sacks and 18,670 barrels of flour.

At Liverpool, this morning, both wheat and flour were in slow request, but at the full prices of Tuesday. Indian corn quite maintained its value.

At Alexandria, during the week ending Dec. 5, good and fine wheats sold steadily, at full prices; but inferior parcels were a dull inquiry. Very little was doing for shipment in consequence of the scarcity of dry samples. Beans and barley were in moderate request. Linseed ruled very firm. The following are the sales:—Saide wheat, private trade produce, 19,490 qrs, 30s 6d to 33s; ditto, Pasha's produce, 620 qrs, 32s 6d; Beheireh wheat, private trade produce, 8,420 qrs, 29s 6d to 31s; ditto, white, 375 qrs, 29s 6d to 31s; Saide beans, private trade produce, 4,350 qrs, 27s to 27s 6d; Beheireh beans, private trade produce, 84 qrs, 25s 6d to 26s; barley, 3,400 qrs, 19s 2d to 20s; lentils, 300 qrs, 25s 6d to 26s 6d; linseed, 650 qrs, 49s to 51s 6d per qr, free on board. Freights—Beans to the United Kingdom for orders, 6s 6d to 7s 3d per qr; wheat or other grain or seed in proportion. To a direct port, 5s 9d to 6s. To Liverpool, by steamers, 7s per quarter.

EXPORTS of GRAIN in Quarters from 19th April to 2nd December.

	Wheat.		Beans.		Barley.

There has been again only a very limited business transacted during the present week in the Liverpool cotton market. Spinners appear determined entirely to exhaust their stocks rather than to renew their operations in the market, until some decisive news from America with regard to the Trent affair shall have come to hand. On Monday prices receded about ⅛d to ¼d; but upon fresh news arriving on Tuesday, which was considered more pacific, the market revived, and this decline was fully recovered. We

close firm, with quotations fully up to those of last Friday. The week's total sales are 28,000 bales, including 15,000 to spinners, 7,000 on speculation, and 6,000 for export. To-day, 6,000 bales have been sold at firm prices.

Annexed is Messrs Briggs and Co.'s report of the cotton trade of Alexandria, for the week ending Dec. 3:—

Since our last report prices of cotton have been tending downwards, under the influence of discouraging telegrams from Liverpool and France. But the receipt yesterday of London advices of 29th November, announcing the probability of a war with the United States, has not had so great an effect as might have been expected, and 780 bales were bought at prices very slightly lower than the two preceding days. The operations have been:—417 bales fully good middling to fair, 10.64d to 10.92d; 2,041 bales good fair, 11d to 11.20d; 1,637 bales good, 11½d to 11.49d; 131 bales fine, 11½d to 12.18d per lb, free on board. Prices on the 1st and 2nd were, however, about ¼d to ⅜d per lb lower than above quotations. Freights—The last rates paid were 1½d per lb; but the arrival of three large steamers has reduced it to ¾d.

PS.—5th December.—Very little doing at from 9¾d to 10⅜d per lb f.o.b., say 10½d to 11½d cost and freight.

EXPORT of COTTON in bales from ALEXANDRIA from 26th Nov. to 3rd Dec.

The public sales of tea, held this week, have gone off slowly, but without leading to any material change in prices, compared with the previous auctions. By private contract, a fair business has been transacted, on former terms.

The annexed commercial advices are from Hong Kong to Nov. 1:—

Canton Silk—Settlements have been 30 piculs. Stock, 500 piculs. Loongkong, 400 dols; Kumchuck, 380 dols; Kowkong, 360 dols; re-reeled Kumchuck, 420 dols; Mahtow, 150 dols. Tea—A moderate business has been done. Settlements of congou amount to 18 chops, at somewhat irregular rates, but a decline of half a tael can be noticed in most instances for the finer descriptions of congou. Scented Teas—Little has been done, and all qualities may be quoted one tael cheaper. Canton greens have been in request both for England and America at previous rates. Sales reported are as follows:—Congou, 18 chops, Oopeiks, at 28 taels to 31 taels; Oonahms, 25 taels to 27 taels; stock, 35 chops: scented orange pekoe, 2,500 boxes, 26 taels to 29 taels; scented caper, 3,000 boxes, 16 taels to 23 taels. Canton Green Teas—Gunpowder, 8,200 boxes, 15 taels to 27 taels; young hyson, 6,000 boxes and 2,400 half-chests, 14 taels to 19 taels; imperial, 500 boxes, 17 taels; hyson skin, 1,000 boxes, 400 half-chests, and 200 chests, 13 taels to 14½ taels. Macao—About 15,000 half-chests of tea, including contracts of Tayshan kinds, are in stock. In addition there are about 2,000 piculs unpacked of inferior quality. One vessel has left, and one is on the berth. Foochow advices are to the 24th of October. Tea—A large business has been done in congou since last mail at previous rates, except for ordinary and very common qualities. Arrivals had been large, and comprised a fair proportion of medium grades, and stocks were extremely heavy, nearly one-half being common and inferior. Souchong—Small business at former prices. Stocks—Congou, 135,285 chests; souchong, 4,968 chests; Oolong, 48,073 half-chests; pekoe, 977 chests; scented teas, 3,439 boxes. Shanghai advices are to the 24th ult. Silk—During the fortnight a fair business has been done, amounting to 4,000 bales, making total settlements for the season 28,000 bales. Stock estimated at 26,000 bales. Rates had ruled irregularly, more especially in Tsatlees. Total export of silk from China to Europe is 23,657 bales, against 32,751 bales, showing a decrease of 9,094 bales for the present year. Tea—In black little had been done. The finer kinds were firm and inquired for, but medium and inferior qualities had declined about 2 taels. Three chops of new Ningchow tea had arrived. The quality is inferior to last season, owing principally to the lateness of the picking, caused by the disturbed state of the country. Total export of tea from China to Great Britain is 39,646,200 lbs, against last year 31,725,100 lbs, showing an increase of 7,921,100 lbs. To the United States the export is 5,195,100 lbs, against 12,404,700 lbs, or a decrease of 7,209,600 lbs.

In the market for raw sugar, an improved feeling has been observed, and all descriptions have ruled firm in value. The demand, however, has been by no means active. Refined goods have moved off steadily, at full quotations.

Good and fine qualities of coffee have changed hands to a fair extent, at full prices; but inferior parcels have been unsaleable, except at lower rates.

Messrs Fryer, Schultze, and Co., of Colombo, write as follows, in reference to the coffee trade of that port:—

The weather has been broken during the fortnight, and shipping operations have been retarded in consequence. Nevertheless the clearances have been numerous, and to date the shipment of the season's crops is as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	41,854	against last year, cwts		25,181
Foreign Ports	...	—	—	...
Australia and India.....	1,858	—	—	3,236
	43,712			28,417

NATIVE COFFEE.

To Great Britain.....cwts	7,705	against last year, cwts		11,201
Foreign Ports.....	...	—	—	1,496
Australia and India.....	2,700	—	—	986
	10,405			13,683

Plantation coffee has reached Colombo in considerable quantities, and in nearly all cases in excellent condition. Generally, the parcels to hand are well grown and colourly, and the average quality is above that of last season's crop. The receipts of native coffee continue limited in extent, and the inquiry for this description being good, prices have advanced quite a shilling since our last. The parcels on the market are generally sound, and of good even growth. Freights—The receipt of produce from the interior has kept pace with the influx of tonnage into our roads, and rates to London for coffee remain at 4*l* to 4*l* 10s respectively.

Nearly all kinds of rice have been in slow request; nevertheless, prices have ruled steady. The dry fruit trade continues very dull, and Valencia raisins have given way 1s to 2s per cwt.

For rum, there has been a good demand, and prices have advanced ½d to 1d per gallon. In the early part of the week, a Government contract was announced for 50,000 gallons. Brandy and grain spirits have attracted very little attention.

There has been less firmness in the demand for English wool, and deep-grown qualities have fallen ½d to 1d per lb. Hemp has sold steadily at 35*l* for clean Russian. Yarn has advanced 1*l* to 2*l* per ton.

Messrs Moran and Co., of Calcutta, report the state of the indigo market to the 8th November as follows:—

We have no sales of the new crop to quote, although some liberal offers have been made for some Tirhoot marks to arrive, but sellers are desirous of awaiting the accounts of the October sale before disposing of their indigo. The quality of this year's indigo, so far as we have seen (by small musters sent down), is not good, and we fear that really good and fine descriptions will be found scarce. Manufacturing has now closed throughout the country, and with the smallest out-turn since 1809. In the Benares and North-West Provinces, where prospects promised so well, heavy rains and floods caused most concerns to close at an earlier date than usual, and with a result far below the expectations entertained six weeks ago. The total estimate of the crop, viz., 61,000 maunds, as given in our last, we allow to stand until we are in receipt of factory invoices, but we should not be surprised to find the out-turn rather below than above this figure, unless the manufacture of Gaud has been on a larger scale than usual. Exports of indigo from the 1st November, 1860, to the evening of the 31st October, 1861:—To Great Britain, 22,209; Havre and Bordeaux, 6,275; foreign Europe, 126; America, 730; Gulf, &c., 1,203; sundry ports, 6; total, 30,549 chests.

In saltpetre, so little business has been transacted, that prices must be considered nominal.

Scotch pig iron has ruled steady at 48s 6d per ton, cash, mixed numbers. Manufactured iron has sold steadily, and to a moderate extent for export to France, at full quotations. Tin and spelter are drooping in value.

Linseed oil has met a heavy market, and the quotation is now 33s 6d per cwt on the spot. All other oils have been in limited request, yet prices, generally, have ruled about stationary. In turpentine, very little has been done. American spirits are obtainable at 66s per cwt.

The tallow trade has been very inactive. The quotation for new P. Y. C. is now 51s 6d per cwt on the spot; and 52s 6d for March delivery. Town tallow is 50s 3d nett cash.

COTTON.

NEW YORK, Dec. 4.—The cotton market closed in a very excited state, and with a strong upward tendency, beyond the enhanced quotation of 28½c for middling Uplands; 28¾c Florida; 28¾c Mobile; 29c New Orleans and Texas; good middling 29c for the first, and 29¾c for the last.

NEW YORK, Dec. 6.—The cotton market is very firm, and prices have improved 1c per lb. Sales, 3,500 bales, at 31c for middling Uplands.

During the larger portion of the week the market was very dull, and under unfavourable anticipations of the maintenance of friendly relations with the United States, irregular sales were made at a reduction of ⅜d to ½d per lb. In the last two days confidence in peace has been partially restored, consumers have bought more freely, and we cannot now make any alteration in our last quotations for American cotton. Brazil are in little request, but are without change in prices. Egyptian have been much depressed, and are selling at from ½d to 1d per lb decline. Surat have fluctuated similarly with American, and have recovered their former level of price. To-day the sales may amount to 5,000 bales, with a steady market. The reported export amounts to 5,940 bales, consisting of 2,880 American, and 3,060 East India.

A respectful feeling of sympathy in the Royal and national bereavement has determined a general cessation of business in Liverpool on Monday next, the 23rd inst. Thursday, the 26th inst., and Wednesday, New Year's Day, will be observed as holidays in the cotton market.

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the prospect of a war with the States, the demand for goods in the manufacturing districts, this week, both for home use and export, has been much restricted, and, in some instances, the quotations have had a drooping tendency. The stocks on hand are still very moderate. The transactions in iron have not increased; nevertheless, the coal trade has continued in a healthy state.

MANCHESTER, Dec. 19.—This market has been easier for buyers throughout the week, but with too little business to test prices. All classes seem equally indifferent, pending receipt of decisive news from the States. Those who must sell have, however, little difficulty in finding a buyer at a reduction from nominal rates. The aggregate of such cases has been small. The great complaint at present is the deterioration introduced by Surats, which affects most extensively the medium qualities of cloths. For example, 7-lb and 8¼-lb shirtings are very different articles according as they are made from American or Indian cotton. The old cloths thus promise to be at a premium, whilst the new are found absolutely unfitted for many markets, and a few manufacturers who desire to keep up their name for quality are accordingly returning to their old, though now so costly material. Next week, and the week after, there will be probably the most general cessation of work that has ever occurred in the manufacturing districts.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There seems to be on the one hand no disposition to buy wool, and on the other, but little anxiety to sell. Prices of all sorts have decidedly given way since the shock brought by the news of three weeks back. This, as before stated, has been especially the case with bright-haired sorts. Coburg wools continue in better demand at but a slight fall in price. Yarns manifest but little change from last week. When business is effected, it is generally at a small concession in price, particularly in lustre yarns. Pieces—The mournful event of the week has produced considerable activity in the warehouses of our home merchants. Demands for coburgs and baratheas have come from all parts of the country, and these goods have been freely sought up on every hand, and manufacturers' stocks are cleared. The French trade still keeps many of our large houses very busy, and a few good orders for France have been received.

LEEDS.—Considering the aspect of public affairs, and that we are on the advent of Christmas, a fair amount of business has been done in the cloth halls, though the aggregate bulk of cloth which changed hands was much below an average.

ROCHDALE.—The wool and flannel trades have worn a very quiet aspect. The business done was of a meagre character, and was mostly for immediate delivery. Yorkshire goods are in moderate request. Upon the whole, wools are firm in price.

LEICESTER.—There is a fair amount of business doing in the hosiery trade, considering the advanced period of the year, as the demand usually falls off at this time. Yarns continue in tolerable demand, and prices remain high.

NOTTINGHAM.—There has been a trifle more doing during the past few days, especially by the German houses, and some few orders have been sent off to the Continent. The home trade is as dull as is usually the case at this time of the year.

BELFAST.—The week's transactions have been so limited that it might be said that business had come to a standstill. Irregularity of value rules to a great extent, the scale of prices in the few sales marked off being governed more by the circumstances under which transfers are made than by the usual fixed rules. Some orders for light goods, printed and plain, are to hand from Calcutta houses, and there are slight movements for continental consumers. The home trade is dull in the extreme.

WOLVERHAMPTON.—Mr S. Griffiths quotes the price of iron as follows:—Staffordshire Finished—Common Staffordshire bars, 7*l* at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Pig Iron—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 10s to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 5s; Barrow hæmatites, 3*l* 5s; Workington hæmatites, 3*l* 5s; grey forge cinder pig iron, 2*l* 10s to 2*l* 15s; white forge cinder pigs, 2*l* 5s to 2*l* 10s; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 7s 6d to 3*l* 17s 6d, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites, 3*l* 5s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 4.—The demand for State and Western flour has been fair, and the market has ruled more buoyant. Prices are much the same, though some kinds were a little firmer yesterday, and brought very full prices. The receipts have been pretty heavy, and more than meet the requirements of the trade. Canada flour is in fair request, and prices are a shade firmer. Southern flour yesterday was active, and the transactions heavy.

EXPORT from 1st to 30th November.

	1861. barrels	1860. barrels
Wheat Flour.....	376,087	228,583

There has prevailed a steady fair demand for wheat during the past three days, both for local milling and for export. The receipts have been unusually heavy, however, and prices, though a trifle firmer, show very little variation; the sales aggregate 960,000 bushels. Corn is active and firmer; the sales comprise 580,000 bushels, including 155,000 yesterday, at 64c to 65c for Western mixed, and 58c to 62c for unsound.

EXPORT from 1st to 30th November.

	1861. bushels	1860. bushel
Wheat	4,618,646	2,473 067
Corn	1,125,805	599,731

NEW YORK, Dec. 6.—Flour Sales—18,700 barrels. State and Western firmer, with less doing; superfine State, 5 dols 40c to 5 dols 50c; extra ditto, 5 dols 65c to 5 dols 75c; round hoop Ohio, 5 dols 90c to 5 dols 95c; superfine Western, 5 dols 40c to 5 dols 50c; common to good extra Western, 5 dols 65c to 5 dols 90c. Southern quite firm; sales, 900 barrels; mixed to good, 5 dols 50c to 6 dols; fancy and extra, 6 dols 25c to 8 dols 75c. Canada firmer; sales, 950 barrels; superfine, 5 dols 45c to 5 dols 50c; extra, 5 dols 65c to 7 dols 50c. Wheat a shade firmer; sales, 259,600 bushels; Chicago spring, 1 dol 20c to 1 dol 25c; Racine spring, 1 dol 23c to 1 dol 26c; amber Iowa, 1 dol 30c to 1 dol 31c; Milwaukee Club, 1 dol 28c to 1 dol 29½c. Corn unchanged: sales, 169,000 bushels. White Western, 71c. Freights to Liverpool declining; flour, 2s to 2s 3d; grain, 7½c to 8½c, in bulk and ships' bags.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of English wheat have been on offer in the leading markets held since our last, and that great anxiety has prevailed in reference to our future poli-

tical relations with America, the demand for all kinds has been wholly restricted to small parcels, at about stationary prices. Many of the holders of foreign wheat have refused to sell except at 1s to 2s per quarter more money; but there has been no disposition shown to operate in the article. The inquiry for flour has continued healthy; but no change has taken place in the quotations. Malting barley has commanded quite as much money as of late; but grinding and distilling sorts have ruled heavy. The oat trade has been in a sluggish state, and both beans and peas have been held at full prices.

No change of importance has taken place in the value of wheat in the French markets. The demand, however, may be considered steady. All other articles have realised extreme rates. The exports of produce from New York were very large at the date of our last advices. Apparently the supplies of grain in the hands of the American growers are still very extensive.

The Scotch markets have been fairly supplied with wheat, chiefly in poor condition. The demand has somewhat improved; nevertheless, very little change has taken place in the quotations. Fine barley and oats have moved off freely at very full prices. In other articles the transactions have been trifling.

In Ireland the markets have been somewhat excited for fine wheat, at slightly enhanced rates. Inferior parcels, however, have changed hands slowly on former terms. The oat trade has ruled steady; but the demand for beans, peas, and flour has been much restricted. Indian corn has produced rather more money.

The supply of English wheat at Mark lane, to-day, was very small. The demand, however, both for red and white qualities was in a sluggish state, yet prices ruled firm. Foreign wheat changed hands to a very moderate extent; nevertheless, all descriptions fully supported previous rates. Barley was in good demand, at extreme currencies. Oats, beans, and peas were a heavy sale, and the quotations had a downward tendency. All kinds of flour were held at full prices; but the amount of business doing was much restricted.

Mr E. Rainford writes as follows in reference to the floating trade:—*Floating Cargoes*—The arrivals at ports of call since the 12th instant are 16, consisting of 7 cargoes of wheat, 7 maize, and 2 miscellaneous, viz.:—Wheat, 2 cargoes from Alexandria, 1 Baltimore, 1 Odessa, 3 New York; maize, 5 New York, 1 Odessa, 1 Sulina; rye, 1 Galatz; barley, 1 Alexandria. At this period of the year business is commonly dull, but the uncertainty as to peace or war with America has caused an unusual depression in demand. The following are the only transactions reported since this day week, all for the United Kingdom:—Wheat, per 492 lbs, arrived, Odessa Ghirka, 55s and 56s 3d; shipping, Banat 59s per 480 lbs; arrived, Polish Odessa, 53s; on passage, Behara (for Liverpool), 41s; white Philadelphia, 67s 6d; Saide (sold last week but not reported), 43s. Maize, per 480 lbs, arrived, mixed American, 33s 6d; ditto, one foot at top of after hatch injured, 34s; ditto, perfect, 34s. Barley, per 400 lbs, arrived, new Egyptian, 27s 1½d for London. It has been determined by the Committee to close our market on Monday next.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

The markets will be closed as usual during Christmas week, and reopen on Wednesday, the 2nd proximo.

SUGAR.—Rather more inquiry has prevailed, unattended with any change in prices to yesterday (Thursday). The market is, however, very steady, and considerable transactions have taken place in West India. 364 casks Barbadoes, by auction, went at 33s 6d to 40s 6d per cwt. Desirable qualities of refining and good to fine grocery sugars have commanded ready buyers; indeed, the general demand shows a decided improvement. The week's deliveries were 4,112 tons, against 3,300 tons last year; leaving the stock at the close 71,600 tons, against 51,800 tons.

Mauritius.—A few parcels have changed hands by private contract on former terms

Bengal.—A large business has been done in low brown, privately, at 29s to 30s. At auction, 1,500 bags partly sold: grainy yellow, 42s to 45s; the remainder taken in above the value. 100 casks dark heavy brown were taken in at 27s 6d per cwt.

Madras.—5,183 bags grocery sold readily at about the valuations, ranging from 40s 6d to 44s; one lot, 44s 6d per cwt.

Penang.—3,830 bags found buyers as follows: brown, 31s to 34s 6d; grey and yellow, 35s to 42s; white, 42s 6d to 43s per cwt.

Foreign.—Several parcels of Cuba and Porto Rico have sold privately; also 500 boxes Havana at 44s to 44s 6d; and 700 bags clayed Manilla at 34s 3d. By auction, 444 casks Porto Rico chiefly sold: brown to good yellow, 36s to 41s 6d. 430 casks Cuba at 32s to 37s 6d for brown to middling greyish yellow. 43 boxes clayed, 44s 6d to 45s. 744 bags brown Guatemala muscovado, 33s to 35s 6d per cwt.

Refined.—The recent decline brought in buyers, and a better feeling now pervades the market, low to middling dry goods commanding 48s to 49s. About 200 tons crushed have sold, equal to 31s to 31s 6d per cwt, free on board.

MOLASSES.—199 casks Bengal, by auction, sold at 16s 6d. Several parcels of West India have sold privately on easier terms, ranging from 13s 6d to 15s per cwt.

RUM.—The Government have invited further tenders for 50,000 gallons, to be made on the 23rd instant. This market is very firm, and common kinds slightly dearer: proof Demerara, 1s 10d; Leewards, 1s 8½d to 1s 9d. A parcel of Penang, 1s 7½d per proof gallon. The stock of all kinds is 31,600 puns 3,400 hhds, against 26,500 puns 3,250 hhds last year. There has been an important increase in the deliveries, which were 1,370 puns 205 casks during the past week, against 658 puns 386 casks in 1860.

COCOA.—The declaration for 100 tons more by the Government has not influenced the market at all.

COFFEE.—There has not been any increase of activity in this market, and the sales of Ceylon went off at rather lower rates for plantation as well as native. Of the former, 722 casks 470 brls and bags sold at 72s to 77s, small berry to middlings. 1,186 bags native, 66s 6d to 69s 6d, according to quality. 583 bags Batavia realised 67s to 68s for good ordinary. 65 bags of yellowish Java from the Cape bought in at 74s. A small parcel of Bahia sold at 54s. 964 bags Manilla brought 66s to 68s 6d. A floating cargo of Rio has sold for a near port at 53s per cwt.

TEA.—The market continues inactive. At the public sales yesterday, comprising 3,422 packages, about 1,300 sold without material change in prices. Some fine green Ping Suey obtained 3s 3d; medium Kaisow congou, 1s 10d per lb.

RICE.—Transactions by private contract have been moderate: soft grain, 11s to 11s 3d; picky Madras, 11s 9d to 12s 3d. At auction, 1,375 bags Rangoon were chiefly bought in at 10s 6d to 11s, a small portion of fine selling at 11s 6d. The sound part of 4,353 bags Necrancie Arracan was held at 10s 6d. 1,984 bags Bengal went from 11s 6d to 12s 6d per cwt for broken to middling white. Pinky Madras changed hands yesterday to a fair extent at 11s 9d to 12s 3d per cwt.

IMPORTS and DELIVERIES of RICE to December 14, with STOCKS on hand.

Stock	25600	34170	70900	85200

SAGO.—406 boxes about half sold at 24s per cwt for good small grain. The remainder taken in above the market value.

SPICES.—The only change to notice in the market has been the further slight decline on pepper, which continues unsettled by large arrivals. 2,000 bags, however, all sold: greyish Singapore, 3⅝d; Penang, 3¾d to 3⅞d; Batavia, 3⅝d to 3¾d; greyish Malabar, 4⅜d to 4½d. 50 casks Batavia brown nutmegs partly realised 1s 3d to 1s 6d; 5 casks small limed bought in at 1s 1½d. 180 bags pimento brought 2⅞d to 3d per lb. 600 boxes cassia lignea have sold by private contract at 90s for pile 1. A parcel of wormy Cochin ginger bought in at 50s per cwt.

SALTPETRE.—1,451 bags Bombay, by auction, refraction 56¾ to 43¾, sold at 36s to 36s 6d. A parcel of Bengal on the spot has sold at 41s 6d, refraction 5¼. 100 tons for arrival at 41s. 300 bags landing at the same price.

IMPORTS and DELIVERIES of SALTPETRE to December 14, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	11000	12400	18000	9900
Delivered	11300	12380	17030	13450
Stock	3000	3855	3935	2600

The deliveries last week were 220 tons.

DYESTUFFS.—736 bales Gambier were chiefly bought in at 17s 3d to 17s 6d. 853 bags Cutch were taken in at 25s 6d. 55 bales Bengal safflower sold at further reduced rates, from 5*l* 17s 6d to 7*l* 5s. Bengal turmeric firm at 14s 6d to 15s per cwt. A cargo of St Domingo logwood has sold at 6*l* per ton.

SHELLAC.—A few parcels have changed hands this week in the sales:

liver, 7*l* 10s to 7*l* 17s 6d; garnet, 7*l* 17s 6d; D C orange, 9*l*; ditto, out of condition, bought in at 8*l* 10s per cwt.

DRUGS.—Castor oil sold rather dearer yesterday. China rhubarb at full prices. A large business done in oil aniseed to arrive at 6s per lb.

RUBBER.—234 baskets East India taken in at 1s 4d. Some fine Para held at 1s 10d per lb.

METALS.—The market is quiet, and the fluctuations in prices have been unimportant. Spelter quoted 17*l* 10s to 17*l* 15s per ton. Nothing of interest has transpired in foreign tin: Straits last sold at 116s per cwt. No change in British tin or tin plates. The last sales of Scotch pig iron were at 48s to 48s 3d per ton for mixed numbers. Copper firm, but quiet.

HEMP.—Two parcels of Manilla are offering; demand steady. Russian is firm at the quotation.

JUTE.—2,000 bales sold at extreme rates, from 14*l* 17s 6d to 21*l* 10s per ton, and the market is firmer.

HIDES.—129,000 East India went off at previous rates for most kinds, some of the heavy averages being slightly cheaper.

LINSEED is dull. Bombay, 65s to 66s; Calcutta, 61s to 63s per quarter. Very little done in floating parcels.

OILS.—Sperm has advanced to 95*l*. Pale seal quoted 40*l* 10s per tun. Palm is lower: fine, 43s 6d to 44s. Cocoa-nut quiet: Ceylon, 49s to 49s 6d; Cochin, 50s to 50s 6d. Supplies of linseed oil continue in excess of the demand, and the market still shows a downward tendency. To-day the price is 33s 3d to 33s 6d. Rape sells slowly; foreign refined, 45s 6d to 46s; brown, 42s 6d to 43s per cwt. The market for olive has been dull, and the few sales made establish rather lower rates: Gallipoli, 59*l* to 59*l* 10s; other kinds, 54*l* 10s to 58*l* per tun.

TURPENTINE.—Quotations are nominal. American spirits, 66s per cwt.

TALLOW.—The market was steady until yesterday, when it became dull. 1st sort Petersburg Y. C., 51s 3d to 51s 6d; January to March, 51s 9d to 52s; later deliveries, 52s to 52s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, December 16.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is steady, although not active. Of 1,050 casks West India, by auction, to-day, a large proportion sold: Barbadoes, 33s to 41s; grainy Demerara Berbice, 38s to 44s. 858 bags crystalised Mauritius, 39s 6d to 43s 6d. 1,620 bags Bengal part sold at 43s 6d to 45s for white Benares, and 1,622 bags Penang at the previous quotations. The transactions in West India, this week, amount to 3,700 casks.

RUM.—350 casks Mauritius sold at 1s 8d per gallon.

COFFEE.—29 bales long berry Mocha sold at 122s. 47 casks plantation Ceylon, 72s 6d to 79s per cwt.

COCOA.—273 bags Trinidad were bought in at 62s to 65s per cwt.

RICE.—679 bags Bengal realised 11s to 12s for broken. Of 5,408 bags Java, one pile middling, rather broken, sold at 14s 6d; remainder taken in at 17s to 18s per cwt.

SALTPETRE.—85 bags Bombay, refraction 28½, sold at 37s per cwt.

SHELLAC.—600 chests chiefly sold at full prices. Good orange, 8*l* 15s to 8*l* 17s 6d; reddish and livery orange, 8*l* to 8*l* 10s; liver 7*l* 15s to 7*l* 17s 6d; garnet, 7*l* 17s 6d; middling broken, 7*l* to 7*l* 7s 6d per cwt.

OIL.—266 casks Sydney sold at 45s to 49s per cwt.

TALLOW.—585 casks Australian chiefly sold at 45s to 51s 6d per cwt. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—In the home market for refined sugar, in some instances 6d per cwt advance has been paid. Treacle rather lower. Nothing doing in crushed. Dutch crushed in very limited demand. Some few sales of B and H No. 1 at 31s 9d, also of V O at 31s, all in barrels, have been effected here, f.o.b. in Holland.

GREEN FRUIT.—Oranges have improved in value, say from 2s to 3s per box: Barcelona nuts in fair demand, but Messina sorts are rather cheaper. Walnuts dull.

DRY FRUIT.—The market closed heavily, with no desire on the part of the trade to buy, even at reduced rates.

ENGLISH WOOL.—Very little business doing. Deep-grown fully 1d lower.

COLONIAL WOOL.—The market is without change.

SILK.—Market continues precisely the same as last week, that is, extremely flat.

COTTON.—Dulness has prevailed throughout the week, and there have been no sales on the spot by private contract. For arrival, 700 bales Tinnevelly, guaranteed good fair, have been sold at 7¾d per lb. Yesterday, 4,592 bales Surat, and 300 Bourbon seed Madras, and 150 Tinnevelly were offered at public sale; the Bourbon seed Madras were sold at 10¼d, and about 300 bales of the Surat, mostly damaged and small marks, were sold at 3¾d to 7⅝d; the remainder was bought in at 1d per lb decline from the late highest point, and several offers were made at about ½d per lb below the buying-in prices, which, however, were not accepted by importers.

IMPORTS AND STOCK OF EAST INDIA COTTON IN LONDON.

	Surat. bales.		Madras. bales.		Total. bales.
Imports, 1st Jan. to 20th Dec.	92,982	...	48,017	...	140,999
Stock, 20th Dec., 1861	43,599	...	26,939	...	70,538
— — 1860	10,668	...	18,010	...	28,678

P.S. More doing to-day. Sales, 700 Surat, 5½d to 7½d, being 1d to 1½d decline from the late highest point; also 300 Tinnevelly for arrival at 7⅝d, guaranteed good fair.

TOBACCO.—The market has presented less activity, and purchases have been chiefly restricted to assortments for immediate consumption. Sales for exportation were very limited. Prices unchanged.

TIMBER.—The anticipated rupture with the Northern States of America has disorganised the wood market. Canadian oak, in timber and in staves, has been taken up with eagerness, lest the supply should be curtailed next season. Pine timber has lifted 5s per load. Spars and masts and elm timber have also been in good demand. For Baltic wood, on the other hand, there has been less inquiry, and except for Swedish fir timber, every article is depressed. Baltic and Bosnian oak staves have been readily sold, because of the extremely low prices current for some time past.

LEATHER AND HIDES.—There is no change in the leather market. The amount of business during the past week has to some extent fallen off, which is usual as the close of the year approaches. The supply of fresh goods at Leadenhall on Tuesday was small, and prices were unaltered. Good crop hides were wanted, and there is still a good demand for russet shoe middlings and shoe butts.

METALS.—We have again had a very quiet week in metals, and we look for no change for another fortnight, at best. Copper is quoted as before, but the little business which has been transacted has been at rather lower rates. Iron is wholly unchanged. Tin is flat in all kinds, and foreign is from 10s to 20s per ton lower. Spelter continues to be neglected and prices to droop. Lead is quiet, but prices are better maintained than was expected. Tin plates are unchanged.

TALLOW.—Official market letter issued this evening;—

	s	d
Town tallow	52	9
Fat by ditto	2	8
Yellow Russian	53	0
Melted stuff	38	0
Rough ditto	22	0
Greaves	18	0
Good dregs	7	0

Imports this week 2,340 casks.

PROVISIONS.

Bacon market higher this week with full demand, nearly all landed goods being cleared up. Friesland dearer, price 124s, and all sold. American goods very dull, there being no sale. Other goods in good demand this week.

METROPOLITAN CATTLE MARKET.

THE GREAT CHRISTMAS CATTLE MARKET, Monday, Dec. 16.—Notwithstanding that the value of live stock has not ruled so high during the greater portion of the present year as in 1860, the exhibition of beasts here to-day, for Christmas consumption, was unquestionably, taken as a whole, the best on record. Owing to the changeable state of the weather, and the large supply of stock on offer, the beef trade was in a sluggish state, and, compared with last week, very little change took place in prices. A few very superior Scots, &c., realised 5s 2d per 8lbs, but the general top figure for beef was 5s per 8lbs. From Lincolnshire, Leicestershire, and Nottinghamshire, we received 3,000 Shorthorns, &c.; from Norfolk, &c., 1,500 Scots, &c.; from Scotland, 1,100 Scots and crosses; and from Ireland, 820 oxen and heifers. Some Downs and half-breds were in fair request, at full quotations, viz., 5s 6d per 8lbs; but other breeds moved off slowly, and prices had a drooping tendency. Calves were in short supply, and steady request, at full prices. The total imports of foreign stock into London, last week, amounted to 5,192 head. In the corresponding period in 1860, we received 4,525; in 1859, 4,364; in 1858, 5,734; in 1857, 1,896; in 1856, 1,895; and in 1855, 4,326 head.

	SUPPLIES. Dec. 17, 1860.	Dec. 16, 1861.
Beasts	7360	8040
Sheep	19550	26300
Calves	210	202
Pigs	515	460

THURSDAY, Dec. 19.—A full average supply of beasts, in good condition, was on offer in our market to-day, and for most breeds the demand ruled steady, at Monday's currency, the best Scots having sold at 5s per 8lbs. Sheep, the show of which was rather limited, moved off slowly on former terms. The top quotation was 5s 6d per 8lbs. Although the supply of calves was small, the veal trade was in a sluggish state, at barely stationary prices. Prime small porkers commanded full currencies, but large hogs were a dull inquiry. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	10	4	4	Large coarse calves	4	6	5	0
Prime large oxen	4	6	4	8	Prime small ditto	5	2	5	6
Prime Scots, &c.	4	10	5	0	Large hogs	3	10	4	4
Coarse and inferior sheep	3	2	3	6	Small porkers	4	6	4	10
Second quality ditto	3	8	4	4	Suckling calves, each	22	0	30	0
Prime coarse-woolled do.	4	6	5	2	Quarter old store pigs	22	0	29	0

Total supply—Beasts, 1,980; sheep, 3,200; calves, 130; pigs, 412.
Foreign supply—Beasts, 260; sheep, 1,200; calves, 90.

NEWGATE AND LEADENHALL

FRIDAY, Dec. 20.—Although the supply of meat on sale at these markets is rather extensive, each kind meets a steady sale, and an improvement has taken place in the quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	6	3	10	Middling mutton	4	0	4	4
Middling ditto	4	0	4	2	Prime ditto	4	6	4	8
Prime large ditto	4	2	4	4	Veal	4	4	4	8

Large pork	4	0	4	6	Lamb	0	0	0	0
Inferior mutton	3	6	3	10					

HOP MARKET.

BOROUGH, Monday, Dec. 16.—We have no change to report in our market, which, with but little trade doing, remains firm at our last quotations.

FRIDAY, Dec. 20.—The business doing in hops is still very moderate; nevertheless, prices are well supported.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Dec. 16.—During the past week the arrivals, both coastwise and by rail, have been quite equal to the demand. The trade still continues dull. The following are this day's quotations:—Kent and Essex Regents, 120s to 140s; Yorkshire Flukes, 120s to 140s; ditto Regents, 100s to 130s; Lincolnshire ditto, 90s to 110s; Dunbar ditto, 120s to 130s; Perth, Forfar, and Fife ditto, 95s to 120s; French whites, 90s to 95s per ton.

FRIDAY, Dec. 20.—The supplies of potatoes are tolerably extensive. Good and fine qualities move off steadily, at extreme rates; but inferior parcels are a dull sale. The finest samples from Essex and Kent command 150s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 5s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 7s to 1*l* 16s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 6s to 1*l* 16s per load. A slow trade.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 20.—We have had another quiet week as regards the home demand, but for export there is still a fair amount of business doing at very firm prices, as the stocks of all low and middling kinds are exceedingly light.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 20.—The market has been rather quiet, but wheat and flour commanded very good prices, without any material change since Tuesday. Oats and oatmeal quiet. Indian corn firm.

The Gazette.

TUESDAY, Dec. 17.

BANKRUPTCY ANNULLED.

HOME FOR INCURABLES.—We beg to call attention to an advertisement in another column, of the British Home for Incurables, under the auspices of the Marquis of Townshend, the Archbishop of Canterbury, the Bishop of London, &c. This institution, founded to alleviate the wants of suffering humanity, is worthy of the most extensive support.

COMMERCIAL TIMES

Weekly Price Current.

☞ The prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

Add 5 per cent. to duties on pepper, tobacco, wines, and timber, deals, wood, &c., from British Possessions.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 7th of December amounted to 495,226*l*, and for the corresponding week of last year to 491,640*l*, showing an increase of 3,586*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 220,932*l*, and for the corresponding week of 1860 to 216,697*l*, showing an increase of 4,235*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 16.—The railway market declined this morning with Consols, and, although the further progress of the settlement showed an increased absorption of stock on the late fall, a rally that subsequently took place was only partial, owing to the unfavourable character of the American advices. Compared with Saturday a general reduction took place of ¼ to 1¼ per cent. London and North-Western, Midland, Lancashire and Yorkshire, Great Western, North British, North-Eastern descriptions, and Caledonian being chiefly depressed. The market throughout the day was very unsettled. In the colonial market, Indian guaranteed stocks were fairly supported, but Canadian were flat. Foreign descriptions showed increased heaviness. A renewed decline occurred in Canada, Nova Scotia, and New Brunswick Government debentures. In American securities, a reduction took place in United States Five per Cents., Erie ordinary and preference shares, and Illinois Central. British mines closed about the same as on Saturday, while foreign were rather less firm.

TUESDAY, Dec. 17.—In the railway market to-day the transactions were unimportant, but prices showed a firmer tendency. Compared with yesterday, a recovery took place of ¼ to ⅜ per cent., London and North-Western, Midland, Lancashire and Yorkshire, and Great Western being chiefly in demand. The final quotations were at nearly the best point of the day. In colonial descriptions, Grand Trunk debentures were flat. The ordinary stock left off without change at 17¾ to 18¼, and Great Western of Canada shares at 8⅝ to ¾. Indian guaranteed stocks continued steady. Foreign railways were quiet. Bahia and San Paulo slightly improved, while Pernambuco showed a decline. In American securities, Illinois Central shares rallied. No material change occurred in mines. In joint stock banks, Egypt shares were quoted higher. Miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, Dec. 18.—The railway market improved at the opening, but subsequently experienced a slight relapse. Compared with yesterday, however, the closing prices this afternoon were generally ¼ to ½ per cent. higher, Midland, Lancashire and Yorkshire, and North-Eastern descriptions showing the chief advance. Caledonian was exceptionally flat. The business of the day was altogether unimportant. In the colonial market, Indian guaranteed stocks continued firm. Grand Trunk also improved to 18 to 19; and Great Western of Canada to 8¾ to 9. Foreign descriptions were in moderate demand, and fairly supported. Great Luxembourg advanced, and Lombardo-Venetian closed steadily at ¼ to ⅜ pm. In American descriptions there were some inquiries for Erie shares. The principal movement in mines was a fresh rise in St John del Rey. In joint stock banks, London Chartered of Australia and Union of London were quoted higher. No material change occurred in miscellaneous descriptions.

THURSDAY, Dec. 19.—Business in the railway market was almost suspended, and owing to the unfavourable traffic returns prices were rather flat. Some support, however, was derived from the scarcity in the market of several of the leading stocks. Compared with yesterday, a decline took place of ¾ per cent. in Caledonian, and of ¼ to ⅜ per cent. in London and North-Western, Midland, Lancashire and Yorkshire, Great Western, and Eastern Counties. South-Eastern and Sheffield, on the other hand, were rather firmer. No change of importance occurred in colonial descriptions. In the foreign market there was a rise in Sambre and Meuse shares. Nova Scotia and Victoria Government debentures were quoted higher. In American securities a reduction took place in Illinois Central shares. British mines were dull, and occasionally showed a decline. In foreign there was a further improvement in St John del Rey.

FRIDAY, Dec. 20.—The railway share market remained very inactive. The only alteration in prices worth mentioning was a decline of ¼ per cent. in Great Western and London and North-Western stocks. Lombardo-Venetian Railway shares were quoted ⅛ to ¼ prem. In other foreign, as well as Indian and Canadian railway shares, business was almost at a standstill. The [illegible]

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.
J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr de Jongh's Light Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.
CAUTION.—Beware of Proposed Substitutes.

AT HAMBLY HOUSE ACADEMY,
Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.
The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.
By SAMUEL HARE, F.R.C.S., &c.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
London: John Churchill; and may be had of all booksellers.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL.—Having frequently examined samples of Pale Cod Liver Oil as imported by Mr THOMAS KEATING, I can testify that it is uniformly of the best and purest quality that can be desired or obtained, possessing as it does the nutrient properties of that valuable medicine in the highest degree, unassociated at the same time with any disagreeable and irritating qualities resulting from the presence of decayed matter, thus making it an exception in respect of purity from many of the oils so abundantly advertised.—EDWIN PAYNE, M.D., L.R.C.P., M.R.C.S., Assistant Physician to the Royal General Dispensary, &c., &c.—September 27th, 1861. Sold in half-pint bottles, 1s 6d; pints, 2s 6d; quarts, 4s 6d; or in five-pint bottles, 10s 6d, Imperial Measure, at 79 St. Paul's Churchyard, London.

FREEDOM FROM COUGHS IN 10 minutes after use is ensured by DR LOCOCK'S PULMONIC WAFERS.—Another Cure of Asthma.—From Mr W. Barton, Apothecaries' hall, Campelton. "An old gentleman, who for years has been afflicted with asthma, and seldom had a quiet's night rest, had used very many proprietary medicines as well as medical prescriptions, but all were of no use. Since he began to use Dr Locock's Wafers he feels himself quite well again. He sleeps well at night, and is quite refreshed in the morning." Dr Locock's Pulmonic Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 Grosvenor street, Bond street, where all communications are to be addressed. Pianofortes of all classes for Sale and Hire.

WHITMORE and CRADDOCK—The City Agency, 16 BISHOPSGATE STREET WITHIN, E.C., London. Families regularly waited upon for orders in all parts.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and the late Prince Consort, and Maker of the Great Clock for the Houses of Parliament, invites attention to the superior workmanship and elegance of design of his extensive Stock of Watches and Drawing-room Clocks.

Gentlemen's Silver ditto	25 —
Marine Chronometers	35 —

Gold and Silver Pocket Chronometers, Astronomical, Turret, and Bracket Clocks, of every description. An elegant assortment of London-made Fine Gold Albert and Guard Chains, &c.
DENT, 61 Strand (adjoining Coutts' Bank); 34 and 35 Royal Exchange; and at the Clock and Marine Compass Factory, Somerset Wharf, Strand, London.

DR MARSTON'S LECTURES — FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works, AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds.

THE NEW SPIRIT ACT.— By the 24 and 25 Vict., cap. 21, wine merchants are now allowed to sell a Single Bottle of Spirits. To carry out this boon to the public, J. J. R. is prepared to forward one dozen or half-dozen cases of assorted spirits, according to order. Brandy, 4s 6d; Whisky, 3s 6d; Rum, 3s; Gin, 2s 6d; Geneva, 2s 10d per bottle. Terms cash.
J. J. ROURKE, Importer, 81 Eastcheap, City, London.

ALLSOPP'S PALE ALE in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the finest condition, of Messrs HARRINGTON PARKER and CO., 5½ Pall Mall, S.W.; and 14½ Regent street, Waterloo place, S.W.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City;
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré,

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.
When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

"MIMEMA."— Her Majesty's Royal Letters Patent have been granted to Richard Ford and Co., of 38 Poultry, London, for the Mimema, or Demi-Shirt, which is intended to be worn over an outside flannel shirt, giving the appearance of dress at any time without the necessity of changing the flannel shirt, and thus preventing taking cold. The Mimema is made of long-cloth, with plain and fancy linen fronts and wrists, and being close fitting, not the slightest incumbrance is experienced by the wearer. An illustrated price list, with instructions for measurement, sent free on application. Sold by all hosiers, drapers, &c.; and wholesale and retail by the Patentees, RICHARD FORD and CO., 38 Poultry, London, E.C.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

TEETH.— REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 9 Burton crescent, Tavistock square, London, W.C.

MANUAL OF HYDROPATH[Y] LADIES and CHILDREN. By Mrs [illegible] 1s 6d. London: Job Caudwell, 335 Strand.

SMEDLEY'S PRACT[ICE] HYDROPATHY.—20th Thousand, [illegible] 160 Anatomical cuts, 2s 6d.

£10,000 HAS BEEN EXPEND[ED] on the HYDROPATHIC ESTAB[LISH]MENT, MATLOCK BANK. As a [illegible] dence it is unequalled. Extensive saloons, [illegible] bath-houses—all connected and warmed w[ith] summer temperature is kept up. Thorough[ly] Mild treatment.—Mr and Mrs SMEDLEY — Two Guineas per week. No fees.

TAYLOR BROTHERS' ICELAND MOSS COCOA, is an invaluable article [illegible] Invalids and persons of weak digestion.
Sold by all Grocers at 1s 4d per lb.

TAYLOR BROTHERS' GENUINE MUSTARD. Dr Hassell, [illegible] on Taylor Brothers' Genuine Mustard, says [illegible] this Mustard perfectly genuine, and of super[ior] quality possessing a delicate flavour and much pungency.
Sold by all Grocers and Oilmen.

HARVEY'S SAUCE.—CAUTION The admirers of this celebrated Sauce are [illegible] larly requested to observe that each bottle bears [illegible] known label, signed "Elizabeth Lazenby." [illegible] is protected by perpetual injunction in Chancery [illegible] 9th July, 1858, and without it none can be genuine.
E. LAZENBY and SON, of 6 Edwards street, [illegible] man square, London, as sole proprietors of the receipt of Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.
Sold by all respectable grocers, druggists, and [illegible]

COUGHS, ASTHMA, AND INCIPIENT CONSUMPTION are [illegible] Cured by KEATING'S COUGH LOZENGES. [illegible] by the immense demand, this Universal Remedy stands the first in public favour and confidence. The result has been acquired by the test of [illegible] experience. These Lozenges may be found in [illegible] every British Colony, and throughout India, where they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and effectual remedy.
Prepared and sold in boxes, 1s 1½d, and tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, [illegible] &c., 79 St Paul's churchyard, London. [illegible] Druggists and Patent Medicine Vendors in the World.

HOLLOWAY'S OINTMENT and PILLS.—Colds, Influenza.—Until a very few years these complaints were treated with blood-letting, blistering, and emetics. Now a more rational method of cure has been adopted; Holloway's Ointment and Pills purify, heal, and strengthen. They neither weaken the body nor disconcert the nervous system. Depletion doubtless, arrested these diseases, but at the same time it took away nature's means of restoration. Holloway's remedies, on the contrary, while working the cure, are laying the foundation for perfect recovery not only of the afflicted, but every organ. Holloway's preparations are also the best preservatives against the white list of winter ailments; they throw out impurities, preserve the vital principle from disease, or lead it back to health.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.
This preparation is one of the benefits [illegible] science of modern chemistry has conferred [illegible] kind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.
Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

DR CURTIS'S MEDICAL WORK "MANHOOD," An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the causes of those diseases which produce decline in youth, or more frequently premature old age."—DAILY [illegible] March 27, 1858.
N.B. The author of the above Medical Treatises may be consulted, as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.
